

Naatsis'Aan Community School, Inc.

Wellness Policy

Approved: December 18, 2024

WELLNESS POLICY

Naatsis'Aan Community School (NCSI) is committed to the optimal development of each student. This policy outlines the model approach to ensuring environments and opportunities for all students to practice lifelong healthy habits that promote physical, mental, and social health.

Research shows that students who are physically, mentally, emotionally, and socially healthy during and after the school day have positive outcomes. For example, student participation in the U.S. Department of Agriculture's (USDA) School Breakfast Program is associated with higher grades and test scores, lower absenteeism, and better cognitive task performance. In addition, students who are physically active through active transport to and from school, recess, physical activity breaks, high-quality physical education, and extracurricular activities perform better academically.

Chronic health conditions affect about 25% of children and adolescents, with about 5% of children have multiple chronic health conditions. Some chronic health conditions, such as asthma, diabetes, seizure disorders, and poor oral health, can affect students during the school day and possibly impact their academic performance. For example, research demonstrates that 49% of students with asthma miss one or more days of school because of asthma symptoms. Students with diabetes often face many challenges in school with monitoring and treating blood glucose levels, which can ultimately impact quality of life and school achievement. Research illustrates that students with seizure disorders may have difficulty with cognitive ability, academic performance, and scores on intelligence tests.

Research also shows that some chronic diseases can be prevented by eating well, being physically active, avoiding tobacco and excessive drinking, and getting regular health screenings. When systems support policy and create safe and healthy environments, students shall excel in their academic learning.

Mental and physical health are equally important components of overall health and well-being. Mental health is important at every stage of life, from childhood and adolescence through adulthood. Mental illnesses affect a child's thinking, feeling, mood, or behavior. Depression, anxiety, bipolar disorder, attention deficit disorder, and schizophrenia are conditions that may be occasional or chronic and affect the child's ability to relate to others and function during the school day.

Mental illnesses are among the most common health conditions in the United States.

- 1 in 5 children, either currently or at some point during their life, have had a seriously debilitating mental illness.
- 1 in 5 Americans will experience a mental illness in a given year.

Several factors can contribute to the risk for mental illness, such as:

- Early adverse life experiences (ACES), such as trauma or a history of abuse (child abuse, witnessing violence, etc.).
- Experiences related to other ongoing chronic medical conditions, such as cancer or diabetes.
- Chemical imbalances in the brain.
- Use of alcohol and other substances.
- Having few friends, feelings of loneliness, and isolation.

NCSI shall engage the community in supporting the work of the local school and creating continuity between schools and other settings so that students and staff can practice lifelong healthy habits. NCSI shall establish and maintain an infrastructure for management, oversight, implementation, communication, and monitoring of the policy. The NCSI community (including parents, students, food service professionals, physical education teachers, school health professionals, community health partners, school nurses, the LEA board, and administrators) shall be encouraged to participate in the development and assessment of the wellness policy. NCSI may utilize a self-evaluation or planning tool to assess the effectiveness and quality of the policy.

NUTRITION

NCSI is committed to providing meals to students that offer an abundance of fresh fruits and vegetables, whole grains, and fat-free or low-fat dairy products, provide zero grams of trans-fat per serving, and limit saturated fat and sodium. Meal programs at NCSI shall seek to help children develop lifelong healthy eating behaviors, support healthy choices, and improve overall student health and well-being through the following policies and practices.

Nutrition Education

- Nutrition education is taught as part of the Utah Core Standards for Health Education in grades K-6, middle school, and high school, as consistent with [R277-700](#).
- The nutrition curriculum is based on the Utah Core Standards for Health Education, which includes culturally and developmentally appropriate material.
- Nutrition education is incorporated into classroom instruction beyond health in subject areas such as mathematics, social sciences, language arts, and science.
- School nutrition services and health educators coordinate to link the nutrition curriculum with activities in the cafeteria. The cafeteria is used to provide opportunities for students to apply lessons from the classroom and adopt healthy behaviors.
- NCSI has active chapters of agriculture education organizations and encourages student participation.
- Nutrition education and training are provided to teachers and other staff to help model and encourage healthy behaviors.

School Food Culture

- Fresh fruits and vegetables, whole grains, and fat-free or low-fat dairy products are featured in school menus, are displayed attractively, and are prepared appropriately.
- Food items available to children through school meals, a la carte, vending machines, school stores, events, celebrations, fundraisers, concessions, etc., support the Model Health and Wellness Policy.
- NCSI shall provide an environment that ensures students have the best opportunity to practice healthy eating behaviors with minimal distractions. There shall be no advertising on NCSI property that conflicts with health information provided through nutrition education and wellness efforts.
- All items sold to students during the school day meet the USDA Smart Snacks in School nutrition standards. Questions regarding food-related fundraisers, school stores, etc., should be directed to the Food Service Department.

Eating Time

- NCSI recognizes mealtime as an integral time that allows students to enjoy eating, explore and try healthy options, as well as socialize. Students shall be provided a minimum of 10 minutes for traditional breakfast and breakfast after the bell models and 20 minutes for lunch, which excludes time to arrive at the cafeteria and wait in line.
- Breakfast in the Classroom may be counted as instructional time.
- Students are served meals at an appropriate and reasonable time of day.
- Lunch shall follow recess whenever possible, which can help to increase the intake of healthy items, decrease food waste, and improve behavior.
- Considerations shall be made for students with medical needs, such as diabetes and hypoglycemia.

Celebrations and Rewards

- NCSI shall not use food as a reward or incentive for children, as they may undermine healthy nutrition practices being taught, teach children to eat when they are not hungry, and set the stage for unhealthy habits that can contribute to obesity.

- Teachers and parent groups shall be provided with a list of fun, non-food rewards and celebration ideas.
- Food and beverages shall not be used as a reward or withheld as punishment for any reason, such as for performance or behavior.

Promotion & Marketing

Promotion of food and beverages on campus shall be limited to only items that meet the USDA Smart Snacks in School nutrition standards. Students shall receive consistent nutrition messaging across settings, including classrooms, gymnasiums, and cafeterias. Nutrition messages shall be emphasized to students by using these strategies:

- Display posters in classrooms, hallways, the cafeteria, etc., to promote healthy eating.
- Conduct taste tests with students to promote healthy options, inform menu development, and garner enthusiasm around trying new foods.
- Promote nutrition programs and provide nutrition tips and snacks at interactive family events such as parent-teacher conferences.
- Host a health and wellness fair to bring in community partners and provide nutrition resources.
- Nutrition messages shall be infused into the communication channels between the NCSI and households/community (newsletters, social media, websites, etc.).
- Create a wellness-focused school newsletter to promote healthy eating and physical activity to families.
- Share short nutrition and physical activity tips during the morning announcements.
- Allow students to visit the water fountain throughout the school day and to carry water bottles in class. Letters shall be sent home to parents to encourage participation.
- Promote a healthy topic each month on a bulletin board in the main office.
- Cafeterias shall be decorated with murals, artwork, posters, and table tents to promote good nutrition during breakfast and lunch.

Special Diets

NCSI is committed to providing all students with the nutritious and safe meals they need to be healthy. To ensure that all children have an equal opportunity to participate in school meal programs, NCSI shall:

- Design menus to accommodate cultural food preferences and common dietary requests, including allergies.
- Implement a written procedure to process requests for meal modifications.
- Create a team of individuals, such as a 504 coordinator, school nurse, menu planner, food service director, teachers, aides, etc., that is tasked to ensure each child with special dietary needs receives appropriate care.

Physical Activity

Children and adolescents should participate in at least 60 minutes of physical activity every day. A substantial percentage of students' physical activity can be provided through a Comprehensive School Physical Activity Program framework. CSPAP framework reflects strong coordination with the following components:

- Quality physical education is the foundation.
- Physical activity before, during, and after school.
- Staff involvement and family and community engagement.

Schools shall ensure that these varied physical activity opportunities are in addition to, and not as a substitute for, physical education (addressed in the "Physical Education" subsection). All schools in NCSI shall be encouraged to successfully address all CSPAP areas.

Physical activity during the school day (including but not limited to recess, classroom physical activity breaks, or physical education) shall not be withheld as punishment for any reason. Teachers and other school personnel shall not use physical activity (e.g., running laps, push-ups) as punishment. NCSI shall provide teachers and other school staff with a list of ideas for alternative ways to discipline students.

To the extent practicable, NCSI shall ensure that its grounds and facilities are safe and that equipment is available to students to be active. The LEA shall conduct necessary inspections and repairs.

Physical Education

NCSI shall provide students with physical education using an age-appropriate, sequential physical education curriculum consistent with the Utah Core Standards for Physical Education in grades K-6, middle school, and high school, consistent with R277-700. The physical education curriculum shall promote the benefits of a physically active lifestyle and shall help students develop skills to engage in lifelong healthy habits, as well as incorporate health education concepts.

The curriculum shall support the essential components of physical education, such as:

- All students shall be provided an equal opportunity to participate in physical education classes taught by qualified teachers.
- All LEA elementary students shall participate in physical education annually (R277-700) and should receive physical education for a minimum of 150 minutes per week throughout the school year.
- All LEA secondary students shall take a minimum of one physical education course in middle school and 1.5 credits of physical education in high school.
- The LEA physical education program shall promote student physical fitness through individualized fitness and activity assessments, and shall use criterion-based reporting for each student.
- All physical education classes shall be taught by licensed teachers who are certified or endorsed to teach physical education.
- IDEA requires that each child with a disability participate with nondisabled children in these programs and activities to the maximum extent appropriate to the needs of that child. Physical education services, specially designed, if necessary, must be made available to every child with a disability receiving free appropriate public education unless the public agency enrolls children without disabilities and does not provide physical education to children without disabilities in the same grades. Each public agency must take steps to provide nonacademic and extracurricular services and activities, including athletics, in the manner necessary to afford children with disabilities an equal opportunity for participation in those services and activities. Guidance on the legal aspects of the provision of extracurricular athletic opportunities to students is provided under the IDEA link.

Recess (Elementary)

NCSI recognizes that recess is a necessary structural component of the elementary school day for all students.

Schools:

- Shall provide at least 20 minutes of active daily recess to all elementary school students.
- Shall not withhold recess, PE, or other physical activities as a punishment for poor behavior, incomplete class work, or remediation purposes.
- Shall not require students to engage in physical activity as punishment (such as running extra laps).
- Shall provide recess before lunch when schedules allow.
 - Considerations shall be made for students with medical needs, such as diabetes and hypoglycemia.
- Shall offer outdoor recess when weather is feasible for outdoor play. Considerations shall be made for heat, cold, or other extreme weather conditions.

- If the school must conduct indoor recess, teachers and staff shall follow indoor recess guidelines that promote physical activity for students.
- Shall make accommodations for students to participate indoors for poor air quality on mandatory action days.
- Shall create schedules for recess to complement, not substitute, physical education class.
- Shall provide recess monitors or teachers to encourage students to be active and serve as role models by being physically active alongside the students whenever feasible.

Classroom Physical Activity Breaks

NCSI recognizes that students are more attentive and ready to learn if provided with periodic breaks where they can be physically active or stretch. Students shall be offered periodic opportunities to be active or to stretch throughout the day on all or most days of a typical school week. Teachers shall provide short (3-5-minute) physical activity breaks to students during and between classroom time at least three days per week. These physical activity breaks shall complement, not substitute, physical education, recess, and class transition periods.

NCSI shall provide resources, tools, and technology with ideas for classroom physical activity breaks. Healthy Bodies, Healthy Minds Flipbook is a resource providing short activities that can be done in a classroom setting. Additional resources and ideas are available through the USDA and the Alliance for a Healthier Generation.

Active Academics

Teachers shall incorporate movement and kinesthetic learning approaches into core subject instruction when possible (e.g., science, mathematics, language arts, social studies) and do their part to limit sedentary behavior during the school day.

NCSI shall support classroom teachers in incorporating physical activity and employing kinesthetic learning approaches into core subjects by providing annual professional development opportunities and resources.

Teachers shall serve as role models by being physically active alongside the students whenever feasible.

Before and After School Activities

NCSI shall offer opportunities for students to participate in physical activity before and/or after the school day through a variety of methods. The NCSI shall encourage students to be physically active before and after school. For non-active activities and clubs, NCSI shall encourage movement breaks and healthy snacks.

Active Transport

NCSI shall support active transport to and from school, such as walking or biking. Under Utah Code ([Utah Code 53G-4-402](#)), all elementary, middle, and junior high schools are required to create and distribute a Safe Routes Plan. The Safe Routes Plans shall encourage an increase in walking and biking to school.

Health Promotion

Air Quality

All individuals are entitled to breathe healthy air and to be free of the adverse health effects of indoor and outdoor air pollution.

The health, comfort, and learning environment of students and staff are important aspects of the school. Air quality, both indoor and outdoor, is a critical component of providing a healthy and comfortable learning environment. NCSI shall:

- Minimize indoor air pollutants, which shall reduce the likelihood of health problems, including asthma, respiratory infections, allergic reactions, and other health problems.
- Control temperature, humidity, and ventilation-associated problems, which shall foster students' comfort and learning.
- Monitor the outdoor air pollution and provide a safe alternative to outdoor recess on days with elevated levels of air pollution.
- Limit idling at drop-off and pick-up zones and post signage to remind parents and guests of idle-free zones.

For more information, see:

- Utah Department of Health Air Quality Recess Guidance for Schools (based on air quality).
- Air Quality Index.
- Air Quality Flag Program.
- Athletes and Asthma: The Community Coaches' Role.

Sun Safety

NCSI recognizes Utah's high rate of skin cancer. To protect students and staff, NCSI shall use comprehensive sun-safe practices during school activities to best protect them from harmful sun exposure.

Whenever possible, schools shall:

- Schedule recess is when ultraviolet rays (UV) exposure can be minimized.
- Promote sun safety habits like wearing hats, sunglasses, or sunscreen.
- Specify that uniforms or clothing worn for physical education, band, and sports limit exposure to the sun and
- Recognize that sun exposure can be an occupational hazard for employees who spend time outdoors and take steps to limit their exposure.

NCSI commits to teaching the sun safety standards as part of the Health Education Core Standards and utilizes vetted resources provided by the USBE.

Students in Utah shall apply the sunscreen on the student with written consent from the parent or legal guardian. ([Utah Code 53G-9-208](#)).

They will be allowed to self-apply sunscreen without a parent's or physician's authorization. If the student is unable to self-apply sunscreen, a volunteer or school employee.

Health Screenings

NCSI may participate in a variety of health screenings to identify students who may be at risk for developing health-related conditions. Some of the optional screenings may include oral health, height and weight, and hearing. Vision screening in schools is mandatory in Utah ([Utah Code 53G-9-404](#)). Schools shall notify parents or guardians of all student health screenings and provide them with information on how to exclude their students if the screening violates their personal beliefs.

Period Products

NCS will provide period products at no cost in all female and unisex restrooms ([Utah Code 53G-4-413](#) and [53G-5-414](#)).

Substance Misuse Prevention and Intervention

The use of alcohol, tobacco, and other drugs has been found to negatively affect the developing brain of youth. Not only are youth who use alcohol, tobacco, and other drugs at a higher risk for experiencing addiction later in life, but teen substance use has been linked with school performance problems such as higher absenteeism and poor or failing grades. Using alcohol, tobacco, and other illicit drugs in adolescence can harm the parts of the brain that control attention, learning, mood, and impulse control.

Schools are in a powerful position of influence among the students they serve and can play a major role in prevention. Research is clear that the establishment and enforcement of clear, consistent standards of conduct, prevention education and promotion, and the implementation of evidence-based programs can prevent youth substance use.

Establish and Enforce Clear Standards of Conduct

- NCSI has a comprehensive student conduct plan that addresses student use of alcohol and other controlled substances. ([R277-609](#)) ([R277-613](#); [Utah Code 53G-8-209](#))
 - Prohibited behaviors include the use, possession, or distribution of alcoholic beverages, tobacco, electronic cigarettes, drugs, and drug paraphernalia on school grounds, including during school. Sponsored extracurricular activities. ([R277-613](#); [Utah Code 53G-8-209](#))
- NCSI will distribute the rules of student conduct, including the alcohol, tobacco, and other drugs policy, to staff, parents, and students at least once a year.
- NCSI will post signs to inform staff, students, parents, and visitors that school property is an alcohol, tobacco, electronic cigarette, and other drug-free zone.

Substance Misuse Prevention

- NCSI will provide a school-sponsored parent seminar that includes substance misuse and prevention. ([Utah Code 53G-9-703](#))
- NCSI will ensure that a local board-approved Positive Behaviors Plan is implemented in each school and regularly reviews the plan to determine if adjustments/enhancements should be made. ([Utah Code 53G-10-407](#))
- NCSI will provide instruction on avoiding alcohol, tobacco, electronic cigarettes, and other drug use at each grade level by committing to teaching the substance abuse prevention standards as part of the Health Education Core Standards and utilizing vetted resources provided by the USBE. ([Utah Code 53G-10-405](#))
- NCSI will ensure that an approved evidence-based underage drinking and substance abuse prevention program is provided to each 4th or 5th and each 7th or 8th-grade student. ([R277-910](#); [Utah Code 53G-10-406](#)) Utah's current approved program is Botvin's LifeSkills Training (LST).
- When selecting additional substance abuse prevention programs, NCSI will follow prevention principles representative of current research, including:
 - NCSI will focus on programs that enhance protective factors and reverse or reduce risk factors.
 - Chosen programs will address all forms of drug misuse, including the underage use of legal drugs, the use of illegal drugs, and the inappropriate use of prescription medications or over-the-counter drugs.
 - Prevention programs for elementary school children should target improving academic and social-emotional learning to address risk factors for drug abuse, such as early aggression, academic failure, and school dropout. Education should focus on the following skills:
 - Self-control.
 - Emotional awareness.
 - Communication.
 - Social problem-solving, and
 - academic support, especially in reading.
- Prevention programs for middle or junior high, and high school students should increase academic and social competence with the following skills:

- Study habits and academic support.
 - Communication.
 - Peer relationships.
 - Self-efficacy and assertiveness.
 - Drug resistance skills.
 - reinforcement of anti-drug attitudes, and
 - Strengthening of personal commitments against drug abuse.
- Prevention programs should be long-term with repeated interventions (i.e., booster programs) to reinforce the original prevention goals.
 - Prevention programs should include teacher training on good classroom management practices, such as rewarding appropriate student behavior. Such techniques help foster students' positive behavior, academic motivation, and school bonding.
 - Prevention programs are most effective when they employ interactive techniques.
 - NCSI will work in collaboration with Local Substance Abuse Area Authorities and community prevention providers to prevent substance misuse most effectively.

Substance Use Intervention

- When the designated educator has received a report of a substance use violation, they must report the violation to the student's parent or guardian and determine if the violation needs to be reported to the law.
Enforcement. ([R277-910](#), [Utah Code 53G-8-211](#))
- NCSI has an updated policy regarding the confiscation and disposal of electronic cigarette products and follows Utah regulations regarding the proper disposal of nicotine products. ([Utah Code 53G-8-203\(3\)](#), [Utah Admin Code R315-260 through 262](#))
- NCSI recognizes that violations of substance use policies may be an issue of addiction, and therefore, education and cessation resources will be provided to the student and parent/guardian.
- A student may be suspended or expelled from public school for the possession, control, or use of an alcoholic beverage ([Utah Code 53G-8-205](#)); however, progressive discipline, e.g., along with education and cessation resources, is a key recommendation when it comes to enforcement of substance use violations.
 - For examples of programs to use as part of a substance use violation progressive discipline plan, NCSI can reach out to the [USBE prevention team](#).
- If a student is found distributing controlled substances, imitation controlled substances, or drug paraphernalia, they must be suspended or expelled from school. ([Utah Code 53G-8-205](#))
- Parents must be notified of the decision. ([R277-910-10](#), [Utah Code 53G-8-211](#))

Injury Prevention

- NCSI staff shall be required to receive training and instruction on child sexual abuse prevention and awareness, responding to a disclosure of child sexual abuse, and mandatory reporting requirements according to the Utah Child Sexual Abuse Prevention law ([Utah Code 53G-9-207](#)).
- NCSI shall adopt comprehensive school policies and procedures for suicide prevention, intervention, and postvention. Since youth are at higher risk for suicide after an attempt and/or inpatient care, this should include procedures for the re-entry process after this has occurred. By having clear policies and procedures in place, schools can act to reduce the risk of suicide and prevent suicide contagion.
- NCSI shall adopt comprehensive school policies, procedures, and activities related to violence prevention, including sexual harassment, sexual assault, and dating violence.
- NCSI shall adopt policies and practices that promote connectedness as a protective factor against multiple forms of injury and violence.
- NCSI staff shall be required to receive evidence-based training in suicide prevention (e.g., QPR, Mental Health First Aid, etc.) every year. These same opportunities shall be made available to parents/guardians.
- NCSI shall offer yearly parent seminars on traumatic brain injury or concussions, substance abuse, bullying, mental health, depression, suicide awareness, suicide prevention, internet safety,

and the School Safety and Crisis Line according to the Utah Parent Education law ([Utah Code 53G-9-702](#)).

- NCSI coaches, trainers, officials, and student-athletes shall be trained yearly on recognizing and responding to concussions and the Protections of Athletes with Head Injuries Act ([Utah Code 26-53](#)). A child who gets a head injury must be removed from play and may only return after written clearance from a qualified health care provider, according to [Utah Code 26-53-101](#) and [R277-614](#).
 - NCSI shall adopt school policies and procedures for head injuries, including head bumps:
 - For a return to learn/play after a concussion or traumatic brain injury (TBI). See [USBE Model Head Injury Policy](#).
 - Parent notification following any reported or witnessed head injury or bump; and Language that is inclusive of lesbian, gay, bisexual, transgender, questioning, intersex, asexual, etc. (LGBTQIA+) students be included in these policies.
 - Monitor students for 30 minutes using the USBE model forms following a head injury.
 - NCSI shall participate in the Student Injury Reporting System (SIRS). The SIRS allows schools to track injuries that happen on school grounds during school hours or school-sponsored activities.
 - NCSI shall post seatbelt reminder signs along drop-off and pick-up zones.
 - NCSI shall conduct seat belt observations at least two times per year to Better analyze seat belt use in drop-off and pick-up zones.
 - NCSI shall provide proper booster seat education to teachers and students.
- Staff Wellness

Staff Wellness

The NCSI wellness committee shall develop, promote, and oversee a multifaceted plan to promote staff health and wellness. The plan shall be based on input solicited from staff and should outline ways to encourage healthy eating, physical activity, and other elements of a healthy lifestyle among staff.

The NCSI shall encourage staff to serve as positive role models for healthy eating and physical fitness. NCSI shall promote work-site wellness programs and may provide opportunities for regular physical activity among employees.

The NCSI shall have a location and allow schedules for anyone needing to express milk. The Federal Break Time for Nursing Mothers law requires employers covered by the Fair Labor Standards Act (FLSA) to provide basic accommodations for breastfeeding mothers at work.

These accommodations include the following components:

- Privacy for milk expression. This can be a private office (if it can be locked) or an on-site, designated lactation room(s) with an electrical outlet where breastfeeding employees can use a pump to express milk during the work period. This should be a place other than a bathroom that is shielded from view and free from intrusion from coworkers and the public, which may be used by an employee to express breast milk.
- Flexible breaks and work options. Women need to express milk about every three hours or two to three times during a typical workday. Each milk expression takes around 15 minutes, plus time to go to and from the lactation room. Women should be able to express breast milk for their nursing child for one year after the child's birth, each time such an employee needs to express the milk and at a place other than a bathroom.
- Support. A positive, accepting attitude from administrators and coworkers helps breastfeeding employees feel confident in their ability to continue working while breastfeeding.

NCSI shall develop a Comprehensive School Physical Activity framework that allows staff to participate in or lead physical activity opportunities throughout the school day. An employee wellness program shall be implemented in each building to meet the unique wellness needs of school staff.

Chronic, Infectious & Acute Disease Management

NCSI shall have a minimum of one professional registered school nurse who can assist with the management of chronic, infectious, and acute diseases that the students may have. The school nurse is the best person to manage these conditions in the school setting.

NCSI shall have at least one automated external defibrillator (AED) per school. This device should be examined monthly to make sure all components are working properly.

A minimum of two school employees shall be certified in first aid and cardiopulmonary resuscitation (CPR). At least one person certified in first aid and CPR shall be on-site when school is in session ([R392-200-9](#)).

Before the school nurse can delegate a medical task to a school employee, the nurse shall complete an individualized healthcare plan (IHP) or emergency action plan (EAP). The delegated task shall be identified in the IHP ([R156-31b-701a](#)). The Utah Department of Health has created simplified IHPs and EAPs for use in NCSI for students with the most common chronic health conditions (allergies, asthma, diabetes, seizures). These forms can be found at <http://choosehealth.utah.gov/prek-12/school-nurses/guidelines/forms.php>.

Beginning with the 2023-24 school year, all LEAs shall provide seizure awareness training to all teachers and administrators of students with epilepsy. Beginning with the 2023-24 school year, all LEAs shall provide seizure awareness training for all school staff who interact with or supervise students ([Utah Code 53G-9-213](#)).

Medication Management

Students shall be allowed access to medication during school hours by following Utah Code 53G-9-502, which requires prior parent/guardian and healthcare provider authorization. Parents must submit a completed medication authorization form annually to NCSI for any routine and scheduled medications that are required during school. The school nurse shall train staff on how and when to administer medication to students.

Students are allowed to possess and self-administer certain medications after proper signed authorization by both the student's parent and healthcare provider is submitted each year. This applies to epinephrine auto-injectors, asthma medication, and diabetes medication. All other medications shall be stored in a locked location except epinephrine auto-injectors and asthma rescue medication. These shall be kept in a secure but unlocked location.

- Allergy and anaphylaxis: Students are allowed to possess and self-administer an epinephrine auto-injector (when appropriate) after proper authorization has been submitted to NCSI ([Utah Code 26-41](#)). If the student does not self-carry the epinephrine auto-injector, the device shall be kept in a secure but unlocked location. All other allergy medications shall be kept in a locked location. Schools shall have at least one stock epinephrine auto-injector available as required by [Utah Code 26-41](#). Trained school employees shall immediately administer the epinephrine auto-injector to a person exhibiting potentially life-threatening symptoms of anaphylaxis.
- Asthma: Students shall be allowed to possess and self-administer their asthma medications (when appropriate) after proper authorization has been submitted to the school by [Utah Code 26-41](#). If the student does not self-carry the asthma medication, the device shall be kept in a secure but unlocked location.
 - Each school may carry stock albuterol for use with a student who:
 - Has a known diagnosis of asthma by a healthcare provider.
 - Has a current asthma action plan on file with the LEA and
 - He is showing symptoms of an asthma emergency.
 - The decision of a school to carry stock albuterol may not be interpreted to relieve a student's parent or guardian of providing a student's medication or create an expectation that an LEA shall have stock albuterol available.
- Diabetes: Students shall be allowed to carry and self-administer their diabetes medication (when appropriate) after proper authorization has been submitted to the LEA as allowed by [Utah Code 53G-9-506](#).

- Seizures: School nurses shall train school employee volunteers to administer emergency seizure rescue medication (when appropriate) after proper authorization has been submitted to the LEA per [Utah Code 53G-9-505](#). Students shall not carry this medication. These medications shall be kept locked but accessible for use in an emergency.

If the parent does not submit the required paperwork to allow emergency rescue medication at an LEA, employees shall be instructed to call 911 in the event of an emergency.

Mental Health

Mental health means a person's emotional, psychological, and social well-being, which can affect how a person thinks, feels, and acts, including how a person handles stress, relates to others, and makes healthy choices (R277-625).

Mental health is more than the absence of illness; it is an integral component of health and well-being. NCSI understands the role mental health plays in the school context because it is central to our students' social, emotional, and academic success. When students' mental health is supported, they are better able to learn, make decisions, build relationships, cope with life's challenges, and thrive.

Mental health exists on a continuum and is determined by a complex interplay of individual, social, and structural stresses and vulnerabilities. Promoting mental wellness and reducing mental illness for all students is a priority that can be achieved by implementing school-based mental health policies and practices. These efforts are categorized by prevention, identification, intervention, and recovery.

Prevention

Prevention efforts in NCSI involve a variety of proactive strategies to increase student well-being and reduce future mental health challenges in our school community. The goal of our prevention efforts is to decrease risk factors and increase key protective factors in students, such as resilience, feelings of safety and connectedness to school, appropriate social connections with both adults and peers, social-emotional competence, and knowledge of development. These protective factors mitigate the effects of risks to students, build students' strengths, and promote the healthy development of students.

To understand students, parents, school personnel, and other stakeholders' feelings of safety and connectedness, NCSI administers a School Climate Survey every other year by [Board Rule R277-623](#). The results of the school climate survey help inform NCSI about how to improve the school environment. NCSI's universal, Tier 1 prevention efforts include:

- Absenteeism, truancy, and dropout prevention [insert LEA policy]
- Bullying prevention [insert LEA policy]
- Child sex abuse and human trafficking prevention [insert LEA policy]
- Gang prevention [insert LEA policy]
- Substance use prevention [insert LEA policy]
- Suicide prevention [insert LEA policy]

Education

NCSI commits to teaching the mental and emotional health standards as part of the Health Education Core Standards in grades K-6, middle school, and high school and utilizes vetted resources provided by the USBE.

Identification

Mental Health Screening - Routine mental health screenings are a key part of understanding youth mental health. Mental health screenings in schools, with active, written consent from parents, allow staff to identify potential mental health conditions early and connect students with help.

NCSI may provide mental health screenings for students within the school setting to identify if a student is experiencing, or is at risk of experiencing, issues related to the student's mental health. Mental health screenings are NOT a diagnostic tool or process, or a system or process used by a student's teacher to observe behavior for targeted learning interventions.

According to Board Rule [R277-625](#), mental health screenings may only screen for depression, anxiety, and suicidal ideation. At this time, no other mental health conditions may be screened. While behavioral screenings are not equivalent to mental health screenings, a screener that includes questions regarding depression, anxiety, or suicidal ideation does fall under the mental health screening program and must adhere to the same policies.

NCSI follows the guidelines outlined within [53F-2-522](#) and [R277-625](#) regarding Mental Health Screening.

Intervention

NCSI utilizes a tiered system of support for the structure and delivers mental health interventions to students. Universal, school-wide programs, which include mental health literacy and efforts to reduce stigma surrounding mental health issues, are provided within NCSI. Additionally, NCSI provides targeted and individualized interventions to students who have been identified as needing additional support through identification and assessment efforts. Targeted and individualized mental health interventions include individual and/or group counseling and/or therapy provided by professionals working within the scope of practice of their license. Intervention may also be provided through contracted services from community mental health professionals.

NCSI only provides these services to students upon written parental consent as referenced in the NCSI policy and procedure by [53E-9-203](#). Parental consent is not required when NCSI staff are involved.

Recovery

Return to Learn - Students may need to leave school temporarily to access more intensive mental health support. NCSI supports students returning to school by partnering with community providers, parents, and the student to develop a transition plan as found in NCSI policy.

NCSI

Monitoring and Evaluations

Annual monitoring and evaluation of the Health and Wellness Policy is crucial to ensure its ongoing effectiveness and relevance.

Assessment Resources:

This LEA Wellness Policy Evaluation Tool was created using the Utah State Board of Education (USBE) Model Wellness Policy as a guide and is meant to assist LEAs in identifying any gaps within their policies and practices.

https://utahgov.co1.qualtrics.com/jfe/form/SV_9WXW2GY9cpPexXo

A triennial assessment of the LEA Wellness Policy is required by USDA FNS for those participating in the National School Lunch Program. <https://www.fns.usda.gov/school-meals/local-school-wellness-policy>.

WellSAT: A quantitative assessment tool to help you score and improve your local school wellness policy.

School Health Index (SHI): An online self-assessment and planning tool that schools can use to improve their health and safety policies and programs. Whole School, Whole Community,

Whole Child (WSCC): The CDC's framework for addressing health in schools. The WSCC model is student-centered and emphasizes the role of the community in supporting the school, the connections between health and academic achievement, and the importance of evidence-based school policies and practices.

Worksite Wellness Scorecard: The CDC Worksite Health Scorecard is a tool designed to help employers assess whether they have implemented evidence-based health promotion interventions or strategies in their worksites to improve the health and well-being of their employees.
