New Milford's Mission Statement

The mission of the New Milford Public Schools, a collaborative partnership of students, educators, family and community, is to prepare each and every student to compete and excel in an ever-changing world, embrace challenges with vigor, respect and appreciate the worth of every human being, and contribute to society by providing effective instruction and dynamic curriculum, offering a wide range of valuable experiences, and inspiring students to pursue their dreams and aspirations.

Course Description: America is called a "nation of immigrants" because all of us, with the exception of the indigenous Native Americans, originally belonged to a different nation and culture. This course is typically presented as a survey of the development or evolution of American literature. In Unit 1, we will ask: What does a group of people have to share in common to be a culture? What do Americans share in common? What happens when unlike cultures collide in the Early Americas? In today's world? This initial unit explores one key strand of American literature -- this part of our literature documents and describes what happened when Native American indigenous culture(s) collided with Euro-American culture during the colonization of America, as well as traces the lasting effects of colonization. The texts we will read present the viewpoints of both European-Americans and Native Americans. Students will be encouraged and expected to think deeply about the complex cultural dynamics of identity in our country that have evolved as a result of conquest and colonization. Further units explore the development of American storytelling traditions as they arise from key historical and cultural moments, including the American Revolution, the institution and abolition of American slavery, the American Renaissance, the modernization of America, and contemporar, America. Other Essential Questions in the curriculum include: Moving beyond the stereotypes, what was the experience of slavery actually like? How do not a slavery shape the identity and narratives of African-American writers, filmmakers and artists then and today? How did modernization both mover and alienate individual Americans? How have contemporary American writers acknowledged the legacy of modern alienation but also strive to chatter we ways to create meaning in today's world?

English III is a required, full-year course offered to eleventh grade students at the College Prep and Honors levels. This course is aligned with Common Core Standards in reading, writing, speaking and listening, and language. It is dedicated to the students of American Literature as it emerges in the context of American history and culture. Students read major works of fiction and nonfiction, included a storical documents, articles, journals, novels, poetry, and drama. Students will develop research, interpretive, evaluative, and argumentative skills while the connect Larning with their lives. Students are challenged to meet standards of increasing complexity.
