Week 1

Math

Review and Topic 1

1-3
Solve and Share
Visual learning
Convince Me
Guided Practice
Independent Practice 13-14

Math Moves Week 2

Standards

- 1 Illustrate the product of two whole numbers as equal groups by identifying the number of groups and the number in each group and represent as a written expression.
- 2 Illustrate and interpret the quotient of two whole numbers as the number of objects in each group or the number of groups when the whole is partitioned into equal shares.
- 3 Solve word situations using multiplication and division within 100 involving equal groups, arrays, and measurement quantities; represent the situation using models, drawings, and equations with a symbol for the unknown number.
- 5 Develop and apply properties of operations as strategies to multiply and divide.

Science

Weather and the Water Cycle

Read from the textbook pages 255-257
Answer questions in the book orally
Complete Water cycle diagram

Mystery Science Gas Trap investigation
Mystery Science Gas Trap experiment

Water Cycle reading passage
Water cycle comprehension questions

Standards

- 13 Display data graphically and in tables to describe typical weather conditions expected during a particular season (e.g., average temperature, precipitation, wind direction).

Social Studies

bobcat block

Intervention

Pull small group (repeated addition and multiplication)

Independent Practice

Splat Cards
