The Social Emotional Learning Experience

This is a monthly program that provide children and adolescents an opportunity to learn critical social skills. During the session a licensed professional counselor will incorporate evidence-based practices to foster social emotional learning for children and adolescents that can be applied in school, the home, and the community. The sessions are incorporated virtually during the school day. However, a professional counselor can always be contacted when needed. Individuals will also learn how to effectively interact with family members and peers to successfully manage relationships and live meaningful lives.
