

## ASBESTOS NOTICE

The Environmental Protection Agency published the Asbestos-Containing Materials in Schools Rule (40CRF, Part 763, Subpart E). This new rule requires all public and private schools inspect for friable and non-friable asbestos, develop asbestos management plans that address asbestos hazards in school buildings, implement response actions in a timely fashion, and report results of the assessment studies to school employees and parent/teacher organizations.

We are pleased to announce that none of our buildings contain any friable asbestos. Friable asbestos is material that is easily crumbled and may release harmful fibers into the environment. Friable asbestos may cause severe health problems.

Our buildings do , however, contain non-friable asbestos building materials in the form of floor tile and floor tile adhesive. None of this material poses a health hazard provided it remains undamaged, Through a program of training and surveillance, we are certain that these materials will pose no health hazard.

A copy of the inspection and management plan is available for your examination in the Head of School's office of REBUL Academy.

For further information, interested persons should write REBUL Academy, 5257 Learned Road, Learned, MS 39154 or call (601)885-6802,
