Child Find

The Coffeenville School District participates in the ongoing statewide effort to identify, locate, and evaluate children, ages birth to twenty-one, who may have physical, mental, communicative and/or emotional disabilities. Early identification and support to children with disabilities is important in maximizing each child's potential. It is therefore the goal of this campaign to identify, locate, and evaluate all children suspected of having a disability who reside in the Coffeenville School District. This includes children in day care, highly mobile children (such as migrant and homeless children), wards of the State, private school children, children advancing from grade to grade, or any child who is suspected of having a disability and who is in need of special education services. The Coffeenville School District Child Find activities will continue throughout the year, including holidays, spring break, and during summer months as well.

Please make all referrals to: Leisa Pegues
