

Almost Grades 3-6

Summer Math 2023

Our lower school students have worked diligently in math this year, and we want to keep that momentum going! Research shows that most students experience a "summer slide," losing approximately two months of math skills over the break. In an effort to prevent that slide, we have created a summer math program to help keep our students moving forward in their math skills!

We will continue to provide access to the IXL online math program to our lower school students this summer. IXL is an interactive learning experience that delivers a comprehensive, standards-based approach, helping students to reach greater success in math. IXL can be accessed anywhere with an internet connection: phones, iPads, computers, Chromebooks, etc.

All rising 3rd-6th graders will be expected to complete lessons assigned by our lower school math teachers this summer. The program allows for the teacher to monitor student progress so that they can provide encouragement or assistance as needed.

Tips for IXL Usage

- IXL is best completed as a process over the course of the summer months. Please encourage your child to spread out the summer requirements over the break to maximize his/her progress and skill retention.
- Calculators should not be used UNLESS indicated on the skill checklist sheet.
- For each question missed, IXL provides an immediate explanation of the concept or skill. Please encourage your child to carefully read the explanation of the solution before clicking the "Got It" button to move to the next question.
- Please resist the urge to help your child with answers. Making mistakes is a valuable part of the learning process.

Student Access

- 1) Use the following URL or download the IXL app. [www.ixl.com/signin/...](http://www.ixl.com/signin/)
- 2) Log-in using the following username and password. Your child must log-in for his/her work to save and be recognized on the teacher's online dashboard.

Username: firstnamelastname584 Ex.: sallyandrews584

Password: falcons

- 3) Choose Math and the appropriate grade level.

- Students moving from 2nd to 3rd will select 2nd grade.
- Students moving from 3rd to 4th will select 3rd grade.
- Students moving from 4th to 5th will select 4th grade.
- Students moving from 5th to 6th will select 5th grade.

- 4) Students will need to work on the skills chosen for them by their math teachers. (Please see the attached list.) Students must receive a **Smart Score of 85% or higher on each required skill**.

Lessons can be repeated until the desired score is achieved. **Only work completed between 5/27/23 and 8/14/23 will be counted. Students should return their completed skill checklist to school on the first day of the 2023-2024 academic year. The completion of this work will be counted as a quiz grade.**
