

Math greetings to all incoming 5th graders!

I want you to have a super summer and at the same time to keep your math skills sharp so we can start off the 2023-2024 school year strong. The Summer Program is required and will be TWO First Quarter QUIZ grades for Math.

The Summer Math Program will consist of TWO parts:

Part 1 (20 points) IXL Summer Boost: Math. You will receive a printed copy of the IXL Summer Boost for 5th grade. There are twenty days of review skills that need to be completed to a MINIMUM Smart Score of 90 (100 would be even better 😊). You need to document the date, time spent, and a Smart Score for each of the twenty skills. The skills do not need to be completed in order and more than one skill may be completed per day.

IXL Summer Boost: Math

Part 2 (20 points) IXL Math Action Plan. You will receive a printed copy of your individualized Math Diagnostic Action Plan. Complete the action plan according to the following guidelines:

- Below Grade level or Grade level skill => 90 or above Smart Score
- Above Grade level skill => 80 or above Smart Score
- For every Smart Score of 100, you earn a bonus point!

*If you work more than 40 minutes (with an appropriate number of questions attempted) and still cannot reach a Smart Score of 80 or 90, you may scroll down to the bottom of the page and substitute one of the suggested foundational skills.

Additionally, the incoming 5th graders will be entered into the IXL STUDY IN THE SUN contest June 12-August 6, 2023. This contest is **OPTIONAL**. As an incentive, the top FIVE finishers will receive a 1-point Test Bonus coupon and and IXL Action Plan 1-point bonus coupon! Full contest rules can be found on the IXL website. <https://www.ixl.com/contest/summer#rules-header>

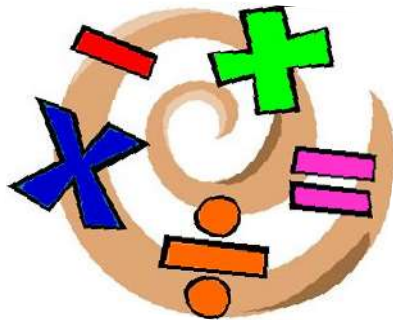

Rules highlights

As your learners practice, please keep these important rules in mind. For more information, read the [full contest rules](#).

- No more than 500 total questions answered (whether answered correctly or incorrectly) per day by a student will be eligible.
- Skills that are repeated after they have been mastered (achieving a SmartScore of 100) once during the contest period will not be counted.
- No more than 50 questions answered by one student in a single skill (prior to reaching a score of 100) will be counted.
- For students in grades PK-4, questions in all grade levels will be counted. For students in grades 5-8, only questions from grade 3 and above will be counted. For students in grades 9-12, only questions in grade 7 and above will be counted.

I am looking forward to an awesome year!

Mrs. Woodson
