

Connecting Themes/Enduring Understandings Used in 5th Grade Social Studies

Students should be able to demonstrate understanding of selected themes (depending on the course) using knowledge and skills acquired during the school year. Understanding of these themes is not the end product of a single unit or lesson, but the product of long term, ongoing instruction. The bold terms represent the connecting themes that appear in multiple units throughout this course. Enduring understandings transcend specific units and courses and increase student understanding and retention of knowledge.

- **Beliefs and Ideals:** The student will understand that the beliefs and ideals of a society influence the social, political, and economic decisions of that society.
- **Conflict and Change:** The student will understand that when there is conflict between or within societies, change is the result.
- **Distribution of Power:** The student will understand that distribution of power in government is a product of existing documents and laws combined with contemporary values and beliefs.
- **Individuals, Groups, and Institutions:** The student will understand that the actions of individuals, groups, and/or institutions affect society through intended and unintended consequences.
- **Location:** The student will understand that location affects a society's economy, culture, and development.
- **Movement/Migration:** The student will understand that the movement or migration of people and ideas affects all societies involved.
- **Production, Distribution, Consumption:** The student will understand that the production, distribution, and consumption of goods/services produced by the society are affected by the location, customs, beliefs, and laws of the society.
- **Technology Innovation:** The student will understand that technological innovations have consequences, both intended and unintended, for a society.
