Upcoming Events!

## MATH & Innovation STEM Summer Academy

June 11th-29th

The Migrant Education Program in coordination with the United We Lead Foundation held a Math & Innovation STEM academy for students this summer. At the academy students focused on developing problem-solving skills with real-world math problems to be college and career ready. Students participated in 20+ hours of Math instruction, with project-based learning while using STEM kits. The Academy's goal was to provide youth development and leadership skills.

Our district had 21 stipend recipients and two scholarship recipients: Jessica Vasquez Mendez from Santa Maria High School and Berenice Perez Castro from Righetti High School. Congratulations to our students for all your hard work and dedication!

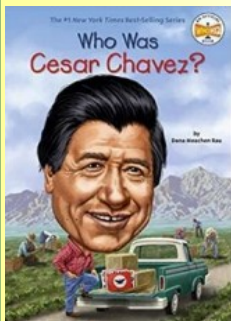

## Young Writers Academy

June 11th—29th

This summer the Migrant Education Program collaborated with the United We Lead Foundation to hold the Young Writer's Academy where migrant students were able to receive 20 hours of ELA instruction and improve their writing skills. Participants also received a stipend of \$150 and a chance to win scholarships worth \$250.

Three of our very own students were scholarship winners. Hooray for: Melissa Ramirez from Santa Maria High School, Sarahi Rubio Solano from Righetti High School, and Jasmine Rubio Solano from Righetti High School. Let's Congratulate our students and acknowledge their hard work this summer!

## Cal Poly Math Academy

July 18th-22nd

During the Cal Poly Math Academy this summer students from across the region experienced hands on activities to build on their math and problem solving skills all while making math fun! Participants received free food and loads of prizes while enjoying the Cal Poly campus.
