

HCSS WIFI FOR PHONES AND PERSONAL DEVICES

HCSS GUEST is available from 7:30 AM-3:30 PM, the credentials must be a technology department approved username and passcode for access. That code will be good for a limited amount of time. Even though the system allows for you to set up a username and passcode on your own during the 7:30 AM-3:30 PM time frame, it will not allow outside access without the proper credentials.

After 3:30 PM, access will be granted to all users by going through the steps listed on their device.

HCSS WIRELESS NETWORK for our staff members:

1. Find the "HCSS" wireless network and click to join it.
2. Enter your user name and password as you would to log into a computer (Do not include @hickmank12.org).

User names for employees hired pre-2006 may be like this: lastnamefirstintial

User names for employees hired post-2006 may be like this: first.lastname

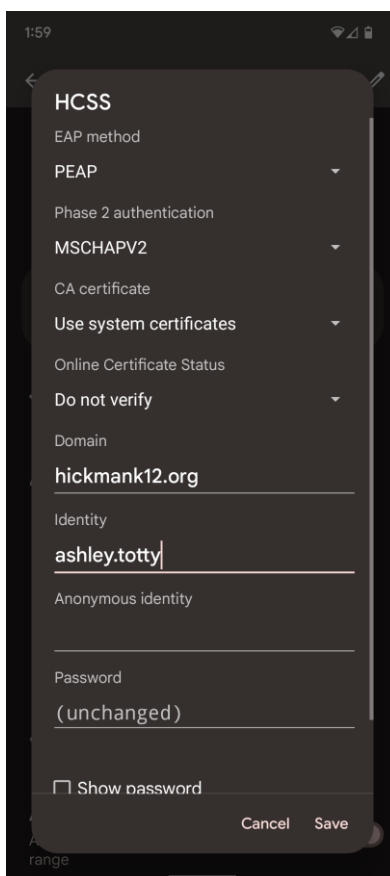

You should be able to join the network if the credentials are correct. It will be important to know your password and keep it up to date.

Very Important: You will be allowed three connections to the wireless network at one time. If you try to add a 4th connection at the same time other devices are still connected, it will be denied.

Also, these credentials are attached to your name. If you share your information with another staff member or student, you are putting yourself liable for any activity they may do under your account.

**Anyone with an Android phone
in order to use HCSS.**

will need to put the following in

Very Important: You will be allowed three connections to the wireless network at one time. If you try to add a 4th connection at the same time other devices are still connected, it will be denied.
