

Cornerstone Montessori Elementary School

OVERDOSE MEDICATION

I. PURPOSE

As a means of enhancing the health and safety of its students, staff and visitors, the school district will acquire, administer, and store doses of an opiate antagonist, specifically Naloxone (Narcan), and administration devices or kits for emergency use to assist a student, staff member, or other individual believed or suspected to be experiencing an opioid overdose on school district property during the school day or at school district activities.

II. GENERAL STATEMENT OF POLICY

The school board authorizes school district administration to obtain and possess opioid overdose reversal medication, such as Naloxone, to be maintained and administered to a student or other individual by trained school staff if the staff member determines in good faith that the person to whom the medication is administered is experiencing an opioid overdose. Authorization for obtaining, possessing and administering Naloxone or similar permissible medications under this policy are contingent upon: 1) the continued validity of state and federal law that permit a person who is not a healthcare professional to dispense an opiate antagonist to the school district and its employees by law; 2) that the school district and its staff are immune from criminal prosecution and not otherwise liable for civil damages for administering the opiate antagonist to another person who the staff member believes in good faith to be suffering from a drug overdose; and 3) the availability of funding either from outside sources or as approved by the school board to obtain and administer opioid overdose reversal medication.

III. DEFINITIONS

- A. **“Drug-related overdose”** means an acute condition, including mania, hysteria, extreme physical illness, respiratory depression or coma, resulting from the consumption or use of a controlled substance, or another substance with which a controlled substance was combined, and that a layperson would reasonably believe to be a drug overdose that requires immediate medical assistance.
- B. **“Naloxone Coordinator”** is a school district staff person or administrator appointed to monitor adherence to protocols outlined in this policy and referenced procedures. The Naloxone Coordinator is responsible for building-level administration and management of Opiate Antagonist medications and supplies. The school district’s Naloxone Coordinator is the Head of School.
- C. **“Opiate”** means any dangerous substance having an addiction forming or addiction sustaining liability similar to morphine or being capable of conversion into a drug having such addiction forming or addiction sustaining liability.
- D. **“Opiate Antagonist”** means naloxone hydrochloride (“Naloxone”) or any similarly acting drug approved by the federal Food and Drug Administration for the treatment of a drug overdose.
- E. **“Standing Order”** means directions from the school district’s medical provider that sets forth how to house and administer Naloxone or other Opiate Antagonist medications to students, staff members or other individuals believed or suspected to be experiencing an opioid overdose. This Standing Order should include the following information:

1. Administration type
2. Dosage
3. Date of issuance
4. Signature of the authorized provider

IV. GENERAL STATEMENT OF POLICY AND RESPONSIBILITIES

- A. Cornerstone Montessori Elementary School will maintain a supply of opiate antagonists to be administered in compliance with Minnesota law. The school will have two doses of nasal naloxone available on-site.
- B. A licensed physician, a licensed advanced practice registered nurse authorized to prescribe drugs pursuant to Minnesota Statutes, section 148.235, or a licensed physician assistant may authorize a nurse or other personnel employed by, or under contract with, a public school to administer opiate antagonists as defined under Minnesota Statutes, section 604A.04, subdivision 1.
- D. To the extent Naloxone is obtained for use consistent with this policy, the school district will designate the Head of School to oversee the general development and operations related to the use of opiate antagonist Naloxone.
 1. The Head of School will obtain a protocol for the use of Naloxone or other Opiate Antagonist annually. A copy of the protocol will be maintained in the Head of School's office.
 2. The Head of School will procure a supply of Naloxone to be used within the school district and will provide annual training to all staff on the method of administration (nasal, auto injector, manual injector), when and how to administer Naloxone, and the necessary follow-up steps, which include:
 - a. When Naloxone is administered, school district employees must activate the community emergency response system (911) to ensure additional medical support due to the limited temporary effect of Naloxone and the continued need of recipients of additional medical care;
 - b. Parents or guardians are contacted as soon as possible and are informed of the action taken;
 - c. Staff must inform the building administrator of the administration of Naloxone, as well as the Naloxone Coordinator, after taking necessary immediate emergency steps.
- E. The Head of School will be responsible for the coordination and implementation of this policy, district-wide guidelines and procedures within the school site and will develop and implement any specific guidelines and procedure for the storage and use of Naloxone within the school site in a manner consistent with this policy and district wide procedures and guidelines.
- F. School district staff members will be responsible for attending all required training pertaining to the policy, procedures and guidelines for the storage and use of Naloxone and performing any assigned responsibilities pursuant to the guidelines and procedures.

V. NALOXONE STORAGE

- A. Naloxone will be stored on-site in a locked cabinet. Naloxone will not be available during activities occurring outside the typical school day or off school property.
- B. The selected storage locations of Naloxone will be classified as non-public "security information" as the school board has determined that the disclosure of this data to the general public would be likely to substantially jeopardize the security of the medication that could be subject to theft, tampering, and improper use. Therefore, the identity of the storage locations will be shared only with those school district staff members whom the Head of School has determined need access to this information to aid public health and safety as determined in the procedures and guidelines.
- C. Stock Naloxone will be clearly labeled, monitored for expiration dates, and stored in a secured location that is accessible by trained staff as set forth in paragraph V.B.

VI. Privacy Protections

The school district will maintain the privacy of students and staff related to the administration of Naloxone as required by law.

Minnesota Department of Health Toolkit on the Administration of Naloxone

ⁱ Naloxone is the medication that reverses an opioid overdose. Narcan® is the brand name for the intranasal applicator (nasal spray) form of naloxone. Naloxone usually refers to an intramuscular (IN+M) naloxone form that comes in a vial and is administered with a syringe, normally dispensed as an "IM kit."

Board Approved: August 15, 2023
