Area of Focus 1: Student Achievement

A. Describe how the LEA will develop and implement a well-rounded Title I, Part A program of instruction to meet the academic needs of all students.

The Liberty County School District monitors students' progress in meeting Florida's challenging academic standard by developing and implementing a well-rounded program of instruction to meet the academic and resiliency needs of all students. The LEA provides appropriate instruction and strategies to enable students the opportunity to perform academically at their expected level or higher. All students have access to rigorous coursework and the support needed to be successful. This is accomplished through a comprehensive needs assessment to determine the strengths and weaknesses of the system as well as barriers for meeting desired outcomes. The district and schools engage in the continuous improvement process to determine the needs of the district and schools based on data from various sources. This includes state and local achievement data, early warning systems data, and feedback from stakeholders such as parents and community members. Based on this data strategies for improvement are developed, resources are identified, goals and objectives are developed and a plan for improvement is implemented. Progress toward meeting established goals are reviewed ongoing during the school year to determine if the strategies in place are working. Based on data, strategies are revised as necessary to ensure desired outcomes are met.

B. Describe how the LEA will identify Title I, Part A students who may be at-risk for academic failure.

Liberty County uses state test data(when available), progress monitoring data and Early Warning System data as a baseline to determine students that are at risk of failure. This data is reviewed, and appropriate Tier II interventions are implemented in consultation with parents during the first three weeks of school. Students continue to be monitored by designated school staff during the school year. Data for this application is derived from Liberty County's FAST Spring assessment for the 2022-23 school year. Additional sources include Early Warning Systems data for each school and lagging data generated for

graduation rate, and acceleration components.

C. Describe how the LEA will provide additional educational assistance to individual students the LEA or school determine need help in meeting Florida’s challenging academic standards.

Progress monitoring assessments are administered to determine progress toward Florida’s challenging academic standards in ELA, Mathematics and Science, utilizing the state adopted progress monitoring assessments and calendar. After each progress monitoring cycle data is collected and reviewed at the district and school level. Data is disaggregated to determine how the school is progressing, by grade level, by subject area and by subgroups. The data is further examined to determine students that are meeting benchmarks and those that need intervention. Students meeting benchmark continue to receive core instruction. The LEA maintains appropriate class size and utilizes appropriately certified infield teachers to deliver instruction.

Tier II interventions are provided for students that do not meet benchmark, following the district MTSS guidelines. These interventions consist of small group class instruction, and small group pull out. Problem solving teams are in place at the district, school and classroom level to design and implement Tier II interventions to improve individual student performance. Data for students` receiving Tier II interventions is reviewed bi-weekly to determine if identified students are responding to intervention. If the student responds and continues to make acceptable progress the intervention remains in place until the student reaches benchmark. If the intervention does not have the desired impact the teacher with the assistance of the problem-solving team designs a new intervention. If the problem solving team determines that the student is not achieving progress or the rate of progress is not sufficient the student is referred for Tier III interventions for specialized interventions and supports designed to support the students and close or narrow the achievement gap. Tier II and Tier III strategies are provided in the inclusive classroom setting to the extent practical. The LEA uses effective infield resource teachers to provide differentiated small group instruction and remediation to at-risk students at all grade levels. Tier III supports are supplemented by resource teachers that push in the general education classroom or pull out as needed to provide appropriate supports to students. An instructional coach is used to support teachers by assisting teachers to prepare and develop curriculum and instructional materials, model lessons, and problem solve to maximize student achievement.

Online instructional resources, such as iReady, and IXL are used to provide additional educational assistance to individual students. These programs are aligned to state academic standards and provide a challenging and engaging learning environment tailored to each students’ individual academic level and learning needs. These learning systems are research based and designed to give teachers and district staff tools to help with differentiation of instruction

D. Describe how the LEA will identify and implement instruction and other strategies intended to strengthen and improve school conditions for student learning.

The Danielson Framework for Teaching is utilized throughout the district to ensure the effective implement of instruction and to improve the environmental conditions for learning. Teachers in the district receive ongoing training on the Danielson`s Framework with attention given to Domain 2, classroom environment and Domain 3, instruction. All teachers will receive on demand targeted Professional Development aligned with their instructional needs utilizing targeted trainings. All new teachers are assigned a mentor for one-three years, based on teacher needs and available funds. This mentor provides individualized guidance, and frequent instructional observations to ensure that teachers are meeting the established standards.

A structure is in place for frequent and ongoing classroom observations. District staff conducts classroom walk throughs bi-weekly, while school principals are required to implement daily classroom walk throughs. Through this system the LEA has established norms for the classroom environment and instructional practice. District and school wide expectations for the classroom environment include, creating an environment of respect and rapport, establishing a culture of learning, managing classroom procedures to ensure instructional time is maximized, and managing student behavior. Expectations for instruction include, clearly communicating the instructional purpose of the lesson, utilizing questioning techniques that use a variety of questions or prompts to challenge student thinking, a high level of student engagement through well designed learning content and embedded assessments that are fully integrated through extensive use of formative assessments.

An instructional coach is used to help teachers identify and implement instructional strategies to improve student learning. The coach models teaching strategies and assists with the analysis of student and school learning data. The coach also assists with the development of focus calendars and provide training on Florida’s B.E.S.T. Standards. Professional development may include Rural Connect, Hattie high impact strategies and other appropriate Professional Learning opportunities, and iReady updates and other applicable online instructional programs. Teachers are supported to meet the requirements for the Reading and ESOL certification/endorsement. The Regional Reading Specialist provides onsite support to teachers throughout the academic year.

E. Describe the LEA's strategy to implement supporting efforts to reduce the overuse of discipline practices that remove students from the classroom. This may include identifying and supporting schools with high rates of discipline, disaggregated by each of the subgroups of students, as identified in section 1111(c)(2).

The LEA will focus on continuing to implement the the Positive Behavior Plan for the 2023-24 school year. This will be done by the district and school leadership teams and driven by behavior data that is disaggregated for each subgroup of students from the 2022-23 school year. Additionally, LCSD will participate in professional development around Resiliency Practices. This professional development promotes relationship-building, and problem-solving through resiliency methods. Instead of strictly looking at punishment for behavior issues, it allows students to reflect on their behavior, take responsibility for their actions, and come up with plans to repair the harm that was caused as well as develop self regulating behaviors to prevent future issues. LCSD believes that these actions, in concert with other directives, reduce discipline practices that could lead to students being removed from the classroom. The district will also use our student information system to track discipline hot spots and utilize the data to shift support as needed.

F. Describe the funded activities that will be implemented to address Area of Focus 1.

A. Provide a description of how the LEA will address Parent and Family Engagement.

Parent and Family Engagement Activities are outlined in the school level and district level Parent and Family Engagement Plans. All activities funded in this application are LEA-level activities. The LEA and individual schools have written Parent and Family Engagement Plans that are developed jointly with parents and family members. The LEA provides guidance and technical assistance to schools as they develop plans each year. This technical assistance takes place during June and July of each year and continues until the plans are complete. Ongoing assistance is provided during the school year as needed. The LEA monitors/evaluates the implementation of plans through quarterly reports of activities presented to the District Advisory Council, review of sign in sheets, attendance at activities, and assistance in writing plans and compacts. The process for the development of Parent and Family Engagement Plans is as follows. The LEA has in place the District Advisory Council that is made up of parents, school staff and community representatives from Title I schools. Through this forum programs, activities, and procedures are planned and implemented through meaningful consultation with parents of participating children. The DAC is involved in the planning, review, evaluation and improvement of Title I programs, which includes the development of the district's Parent and Family Engagement Plan. The school district incorporates the district wide parental involvement policy into its LEA plan developed under section 1112 of ESSA. In carrying out the Title I, Part A parental involvement opportunities for the participation of parents with limited English proficiency, parents of students with disabilities, and parents of migratory children, information and school reports is provided in an understandable and uniform format and includes alternative formats upon request and to the extent practicable in a language parents understand. Parents provide input into the development of the LEA Plan. This input is collected through surveys sent to all parents in the Spring of the school year. The results of these surveys are reviewed and opened for discussion at the District Advisory Council during the spring meeting. The meeting is designed to gather parent input for the completion of the plan. Parents are also included in the decision regarding how to spend the required one percent of Title I, Part A funds reserved for parental involvement. Parent involvement activities are coordinated with various projects to include Title IV, Part A, Student Services, and the curriculum department.

Area of Focus 3: Homeless Education

A. Provide a description of how the LEA will address Homeless Education.

The LEA has in place a homeless coordinator that works in concert with school guidance counselors and attendance clerks at each school to ensure that homeless students are identified and enrolled in school immediately. Homeless students are identified at the beginning of the school year and during the enrollment process. Upon enrollment we have found that homeless students are typically lacking basic school supplies necessary for a successful school experience. Needed supplies are provided through the Title I allocation. Guidance counselors also provide the first level of support by monitoring the educational progress of students identified as homeless. This includes an ongoing review of progress monitoring data, grades, attendance and other early warning data. If homeless students are identified as experiencing difficulty in any of these areas the guidance counselor makes a referral to the problem solving team. The team provides problem solving and interventions as needed based on individual student data.
