

Owosso Public Schools Facility Use Terms & Conditions

Owosso Public Schools | Cardiac Emergency Response Plan | Protocol For All Schools

Sudden cardiac arrest events can vary greatly. Immediate action is crucial in order to successfully respond to a cardiac emergency. Follow these steps in responding to a suspected cardiac emergency:

(a) Recognize the following signs of sudden cardiac arrest and take action in the event of one or more of the following:

- The person is not moving or is unresponsive, or appears to be unconscious.
- The person is not breathing normally (has irregular breaths, gasping or gurgling, or is not breathing at all).
- The person appears to be having a seizure or is experiencing convulsion-like activity. (Cardiac arrest victims commonly appear to be having convulsions).
- *Note:* If the person received a blunt blow to the chest, this could cause cardiac arrest, a condition called commotio cordis. The person may have the signs of cardiac arrest described above and is treated the same.

(b) Facilitate immediate access to professional medical help:

- Call 9-1-1 as soon as you suspect a sudden cardiac arrest. Provide the school address, cross streets, and patient condition. Remain on the phone with 9-1-1. (Bring your mobile phone to the patient's side, if possible.) Give the exact location of the emergency ("Mr./Mrs. ___ Classroom, Room #___, gym, football field, cafeteria, etc.") and provide the recommended route for ambulances to enter and exit ("door number ___").
- Facilitate access to the victim for arriving Emergency Medical Service (EMS) personnel. Assign someone to go to that door to wait for and flag down EMS responders and escort them to the exact location of the patient.
- Retrieve the closest automated external defibrillator (AED) to the scene. Acquire AED supplies from the red emergency bag in the AED cabinet.

(c) Start CPR:

- Begin continuous chest compressions and have someone retrieve the AED.
- Here's how:
 - Press hard and fast in the center of the chest. Goal is 100 compressions per minute.
 - Use 2 hands: The heel of one hand and the other hand on top (or one hand for children under 8 years old), pushing to a depth of 2 inches (or 1/3rd the depth of the chest for children under 8 years old.)
 - Follow the 9-1-1 dispatchers instructions, if provided.

(d) Use the nearest AED:

- When the AED is brought to the patient's side, press the power-on button, and attach the pads to the patient as shown in the diagram on the pads. Then follow the AED's audio and visual instructions. If the person needs to be shocked to restore a normal heart rhythm, the AED will deliver one or more shocks
 - *Note:* The AED will only deliver shocks if needed; if no shock is needed, no shock will be delivered.
- Continue CPR until the patient is responsive or a professional responder arrives and takes over.

(e) Transition care to EMS:

- Transition care to EMS upon arrival so that they can provide advanced life support.

(f) Action to be taken by renter:

- Confirm that 9-1-1 was called. If not, call 9-1-1 immediately.
- Perform "crowd-control" – directing others away from the scene.
- Notify the patient's emergency contact (parent/guardian, spouse, etc.)
- Contact Owosso Public Schools Director of Operations Michael Hendrickson 989-413-0989.
