

ADDENDUM 2

Questions regarding IT23.17.02.1 Printers

1. How many of each type of printer are you looking for annually? How many printers (type and number of) do you currently have?

A. We do not have a count of how many printers are needed. The district does not typically purchase printers for individual teachers or schools. Each school will make that determination. The district determines which devices that will be supported, bids those items, and publishes that list to the schools. Also, since there is a cooperative purchasing clause in the RFP, other school systems can utilize the RFP for purchasing and we do not know who would be utilizing the RFP and their quantities. We do not maintain a list of printers per site since individual schools make those purchases and maintain their inventory.
