

GET JOB READY!

"Career and Technical Education (CTE) offers high school students the chance to explore career opportunities and receive experiential and technical training that prepares them for college and careers.

Rigorous academics, industry-specific training and work-based learning opportunities empower students to succeed as world-class workers and citizens. Today's CTE tightly aligns with industry needs and trends to offer career pathways — from agriculture and biotechnology to engineering — for students with every educational and career aspiration. CTE develops the talent pipeline NH companies require to compete and grow." (nh-cte.org)
