

Count of Heat Units/Air Conditioning at Bryant, Central & Secondary Campus including control panels at Secondary Campus
 Cost \$9,000,000 (601 Responses)

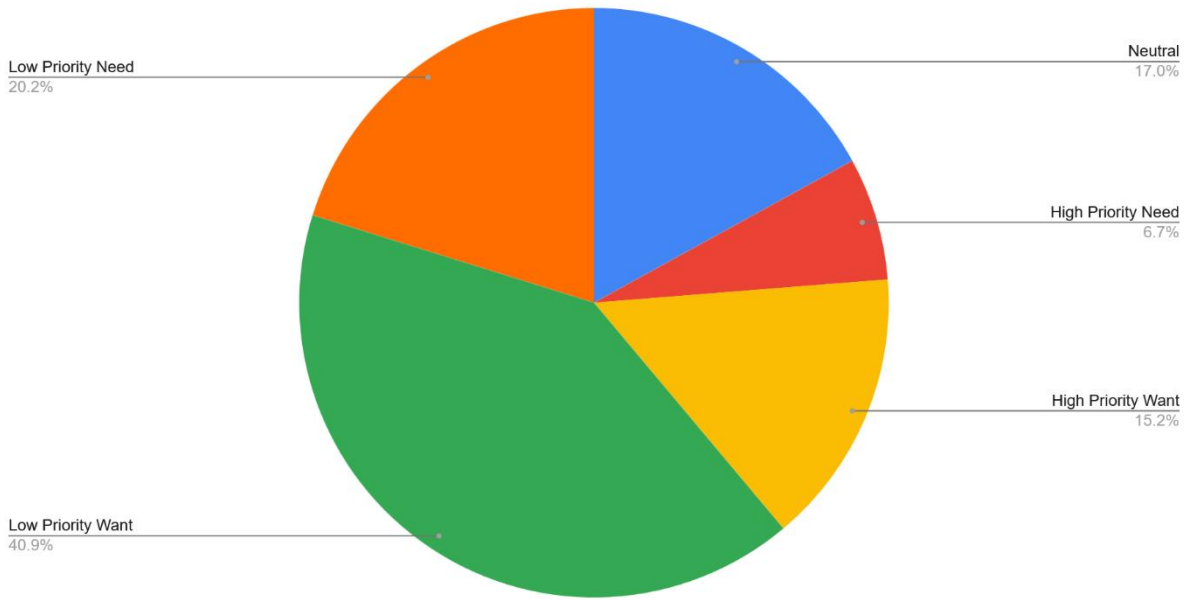

Count of Tennis court improvements (resurface and maintain playing area)
 Cost \$100,000 (602 Responses)

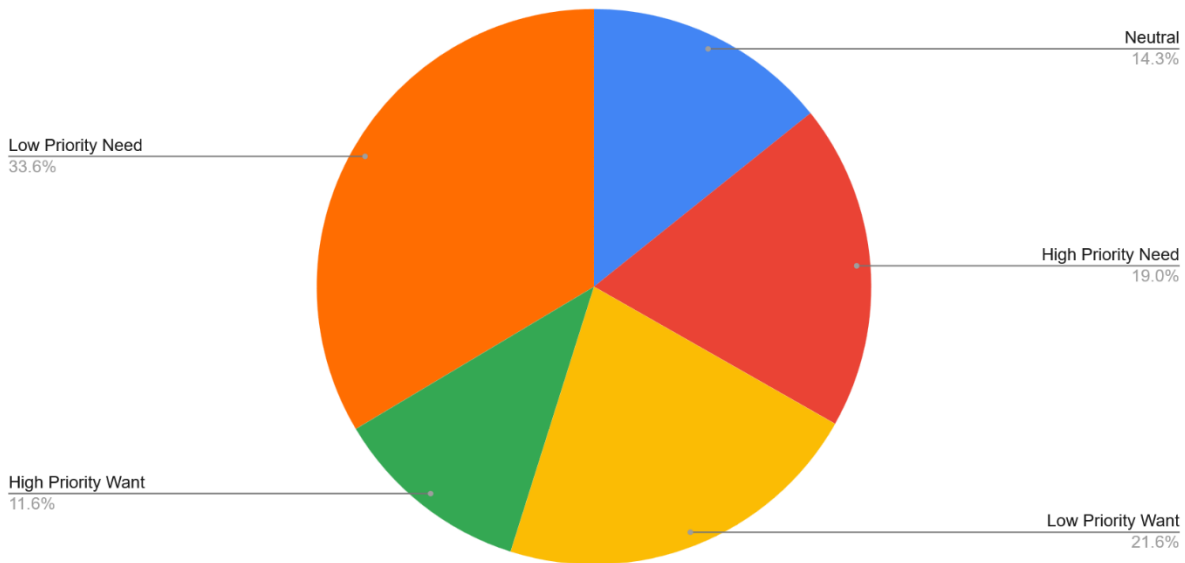

Count of Bleacher replacement in Owosso High School Gym

Cost \$650,000 (594 Responses)

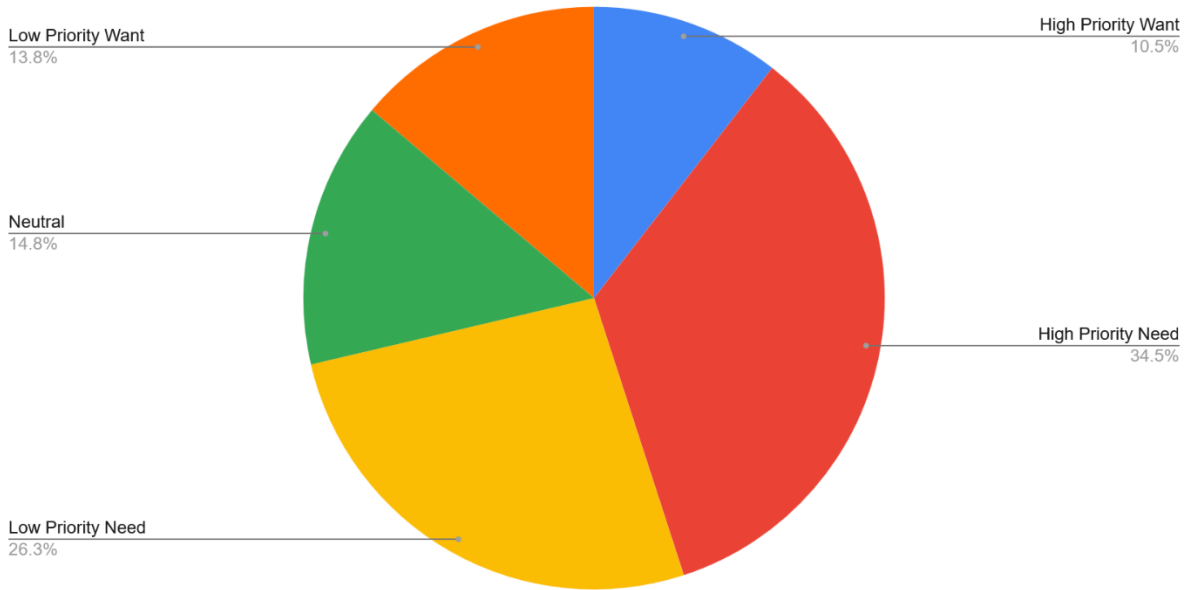

Count of Parking lot and some sidewalk replacement at most buildings (except Central's parking lot which was resurfaced in 2023)

Cost \$3,313,000 (596 Responses)

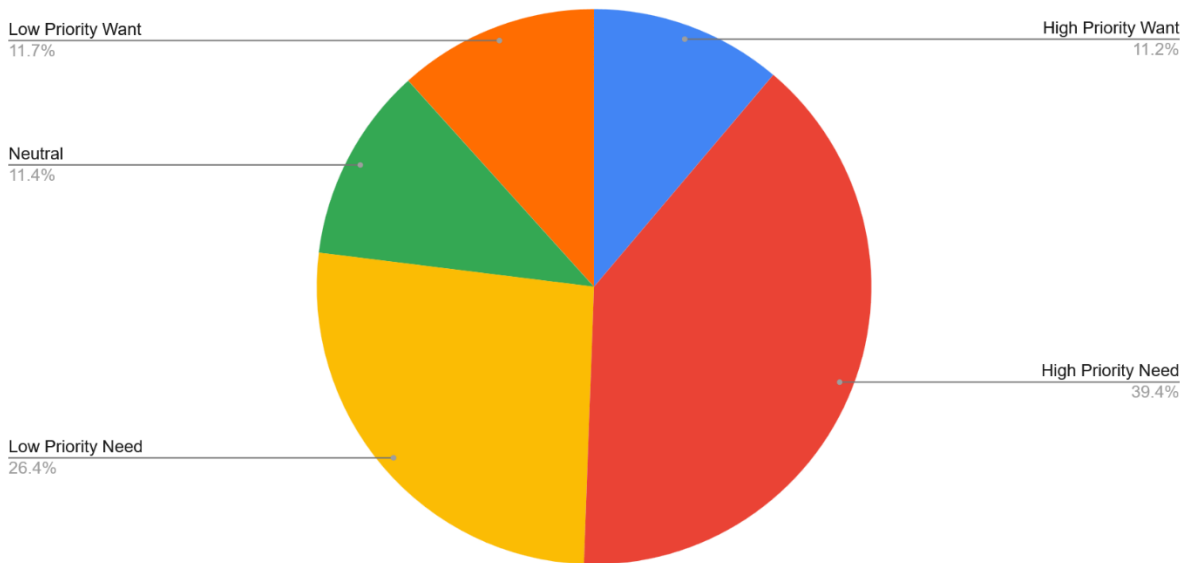

Count of Masonry and structural upgrades at all buildings including Willman Field

Cost \$1,493,000 (600 Responses)

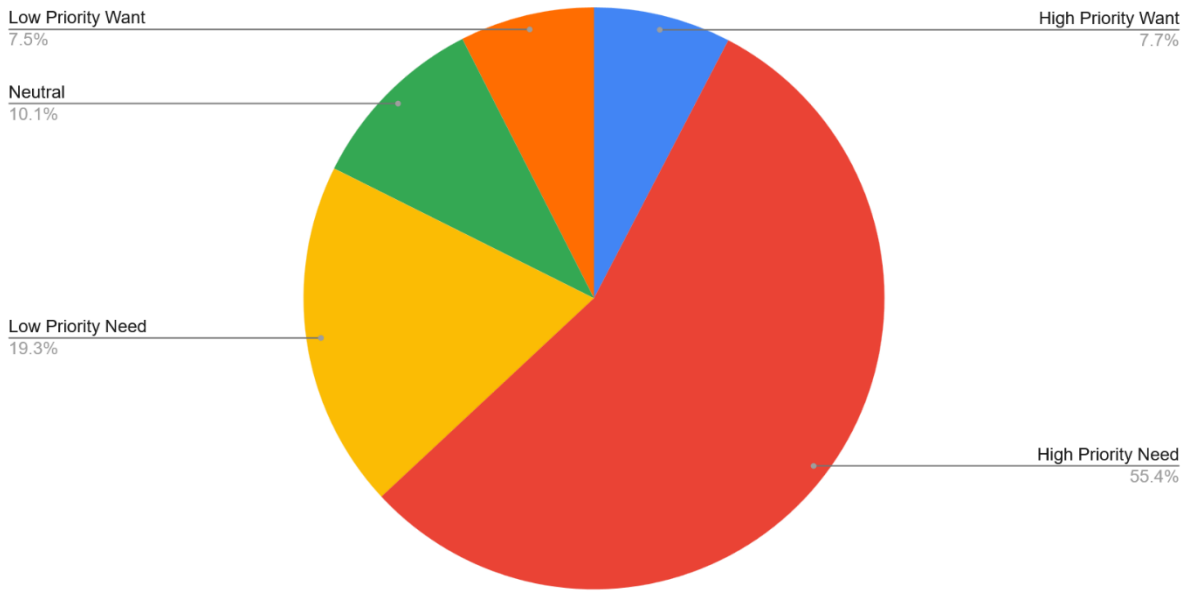

Count of Bathroom renovations at most buildings (except Emerson which was completed in 2023)

Cost \$1,300,000 (599 Responses)

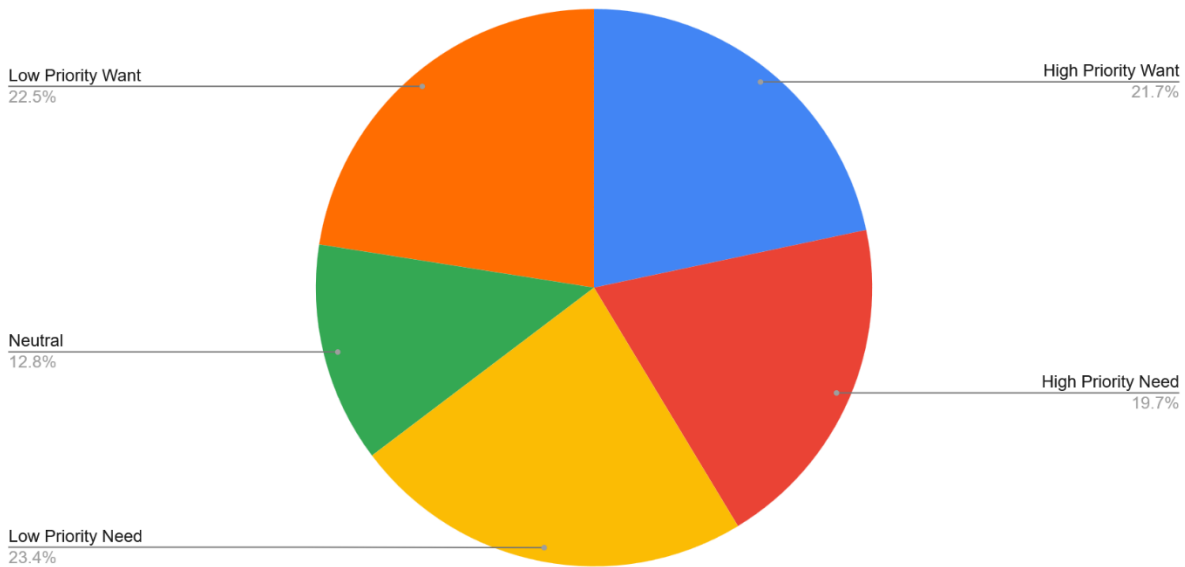

Count of Interior plumbing including replacing cast iron pipes at all buildings

Cost \$3,800,000 (601 Responses)

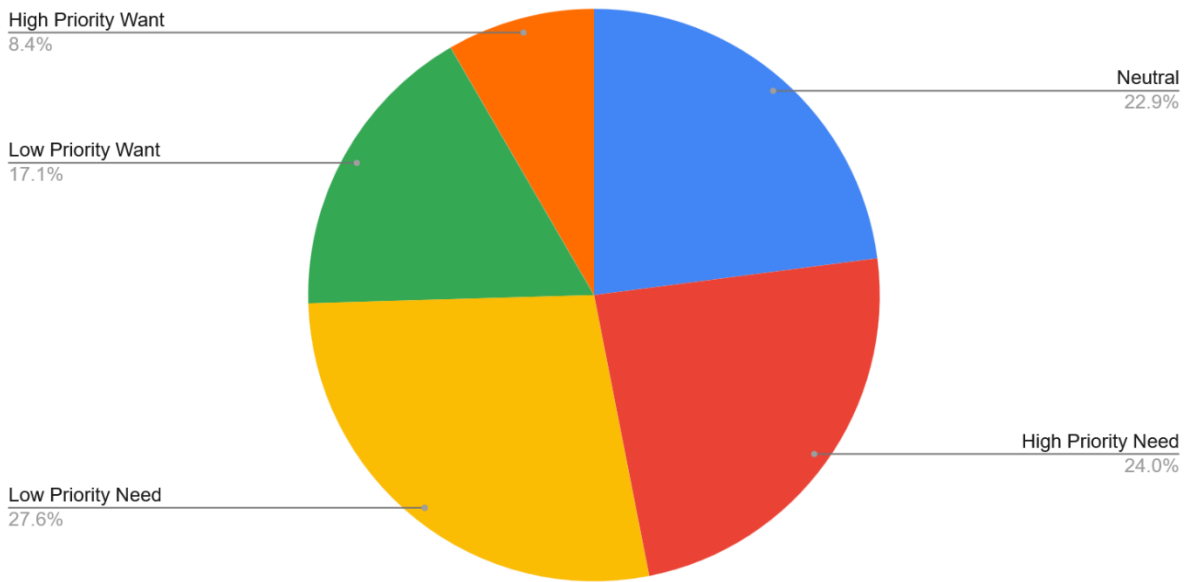

Count of Classroom renovations including flooring, paint, and furniture at all buildings (Not all classrooms at the Secondary Campus were renovated with the 2017 bond projects.)

Cost \$4,122,000 (595 Responses)

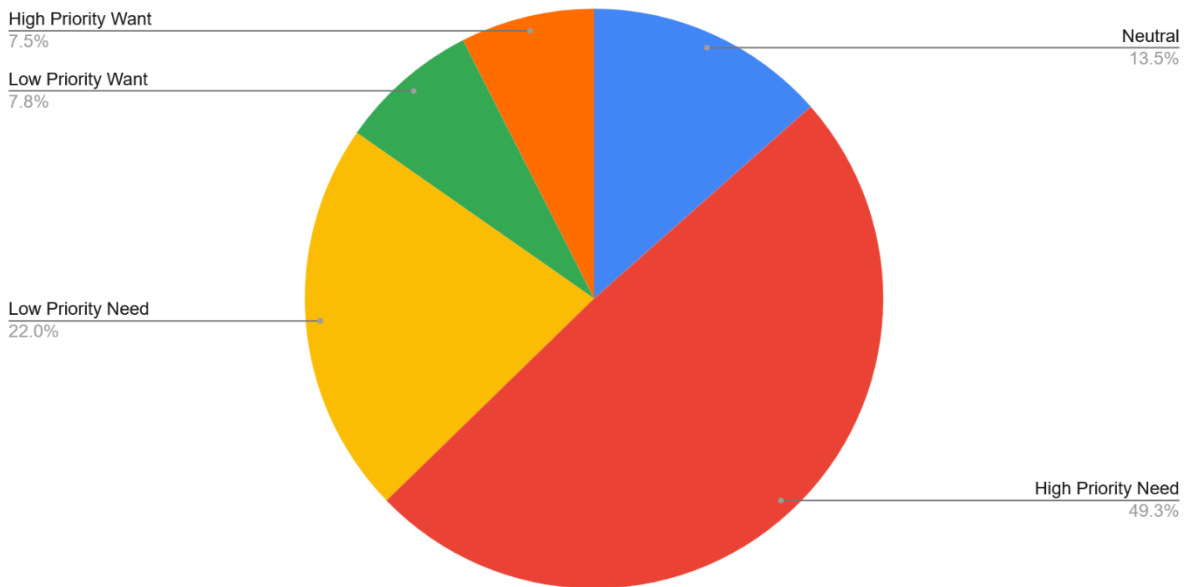

Count of Drainage improvements at all buildings including Willman Field

Cost \$100,000 (597 Responses)

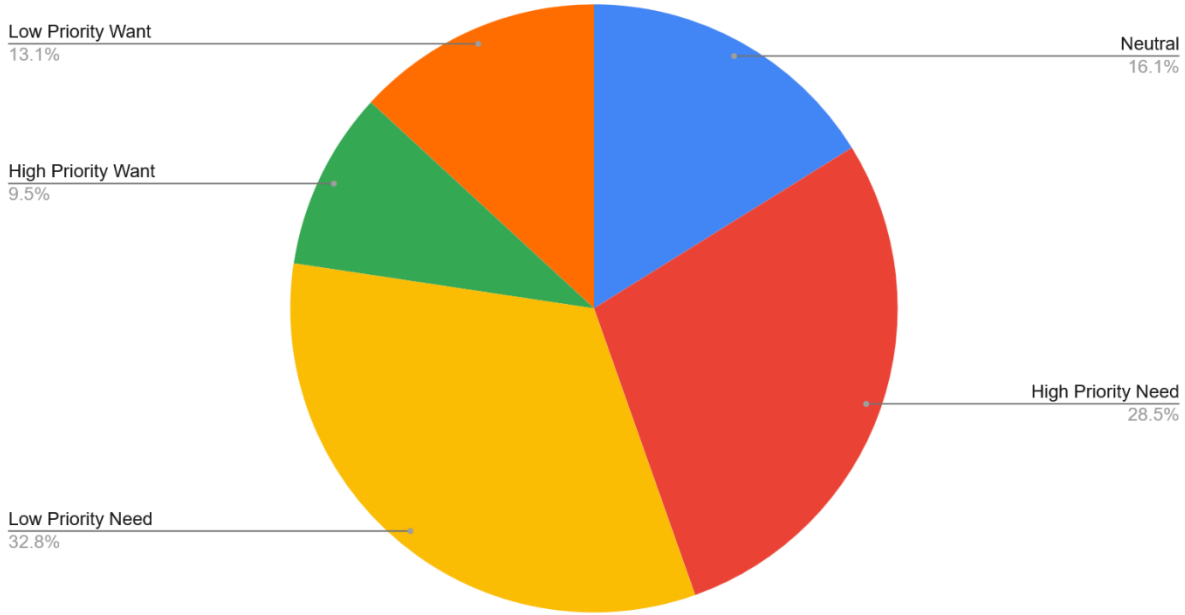

Count of Roof replacement and upgrades at all buildings (except Bryant, which was completed in 2023)

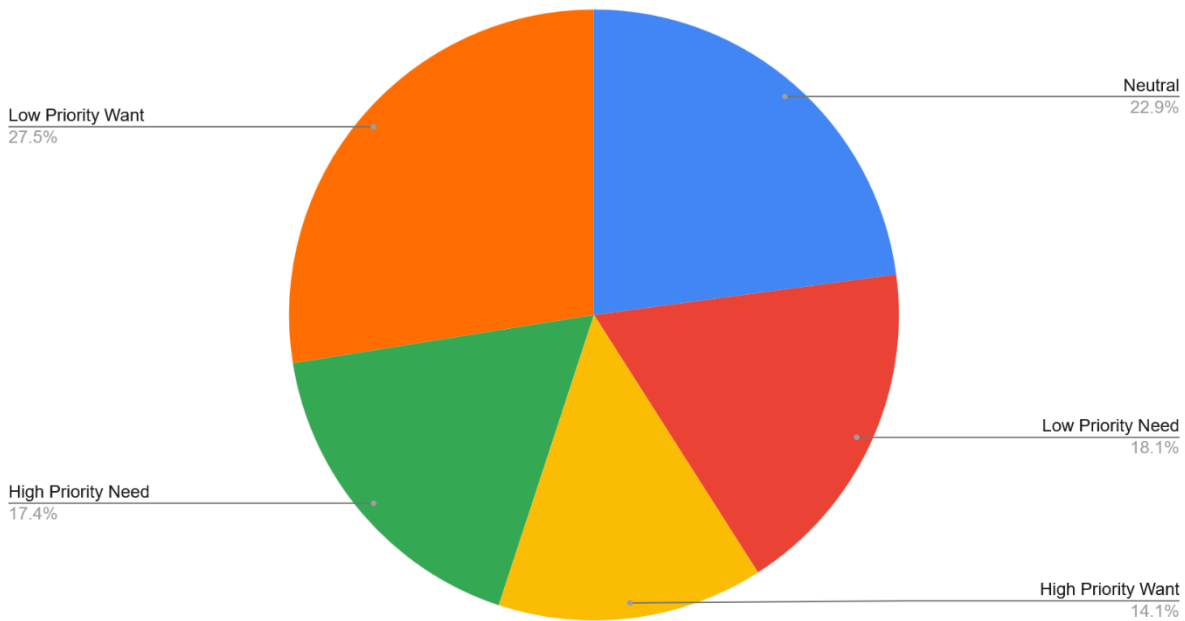

Cost \$4,200,000 (601 Responses)

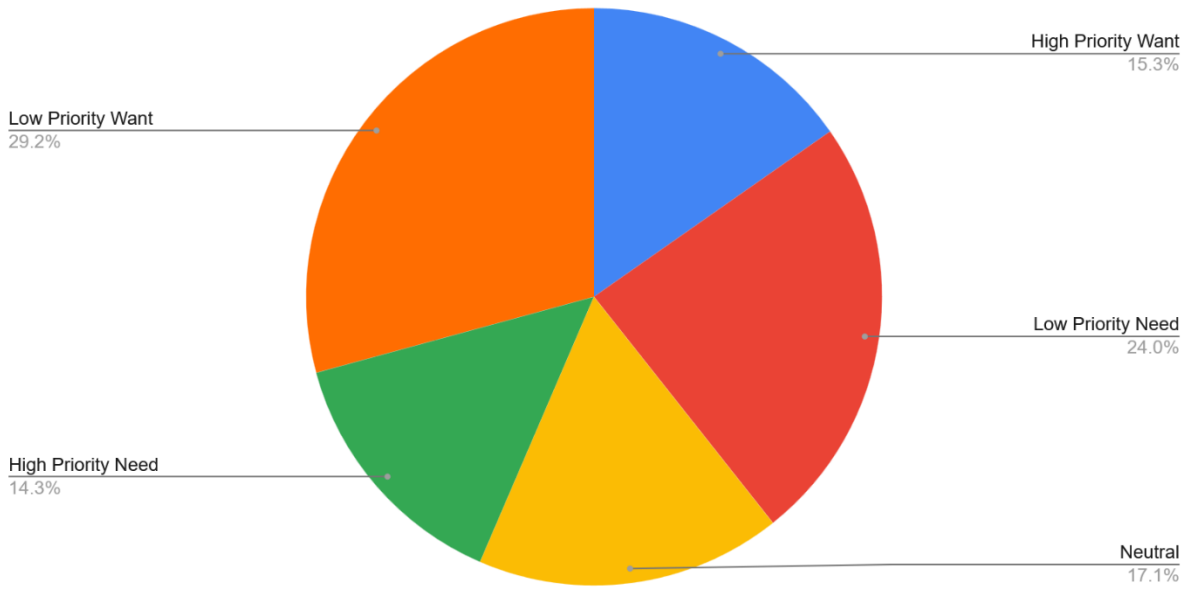

Count of Partial window replacement at all elementary buildings
Cost \$2,208,000 (601 Responses)

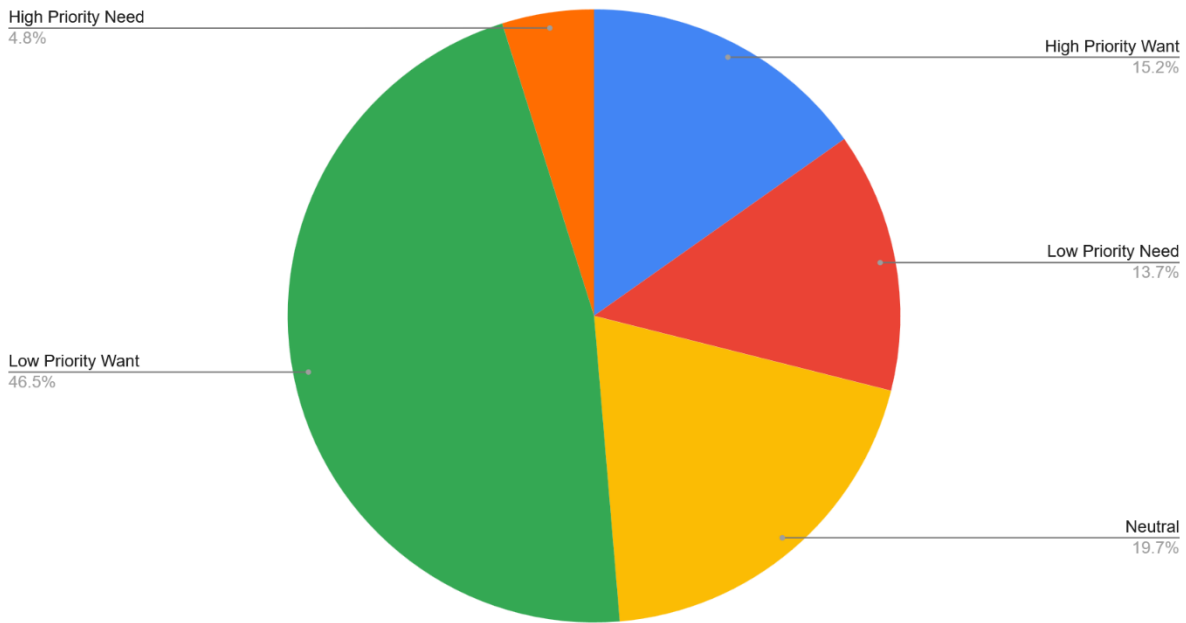

Count of Build 3 additional classrooms and another restroom at Bentley Bright Beginnings
Cost \$2,500,000 (603 Responses)

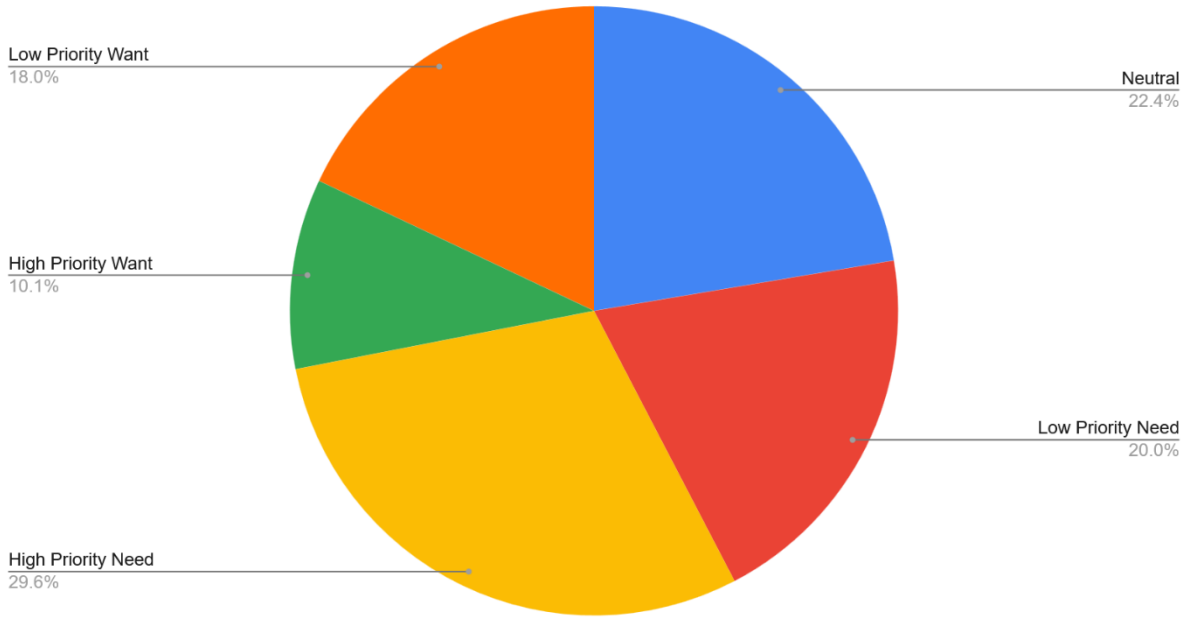

Count of Track improvements including fixing cracks on the track and repainting and sealing the track surface
Cost \$100,000 (595 Responses)

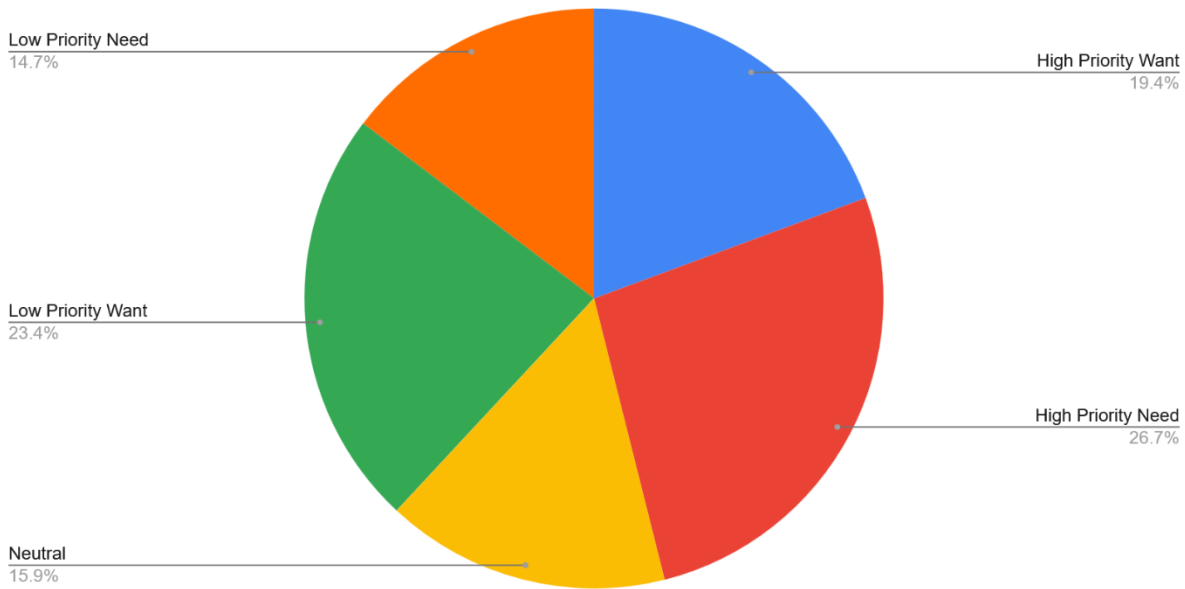

Count of Varsity Baseball and Varsity Softball Field Lighting
Cost \$1,500,000 (598 Responses)

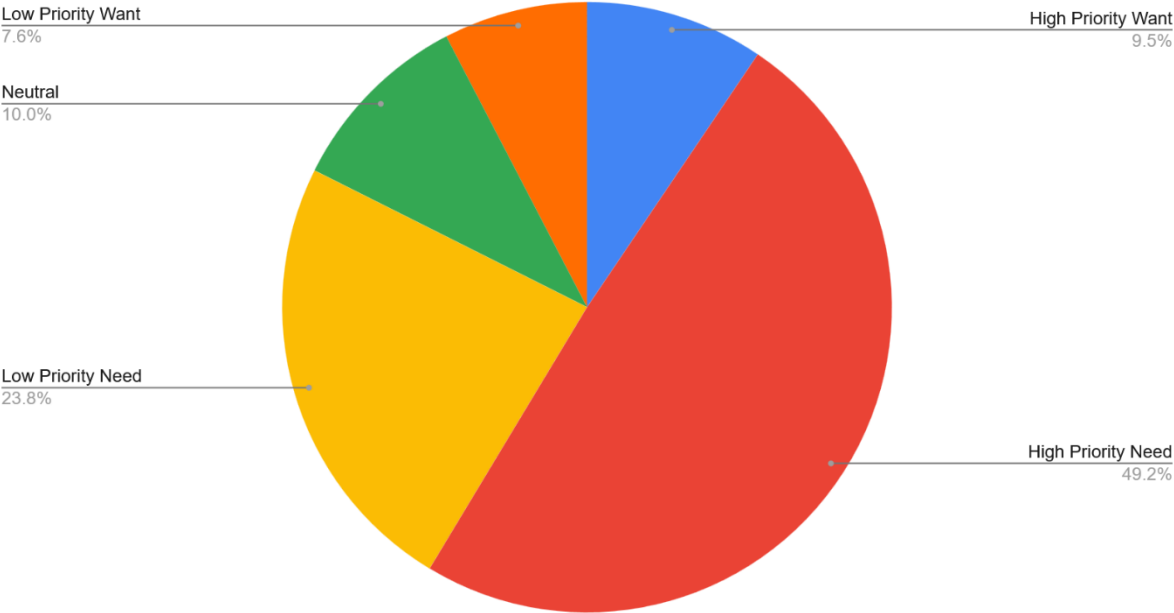

Count of Construct secured vestibules at Washington, Bryant and Central
Cost \$950,000 (597 Responses)

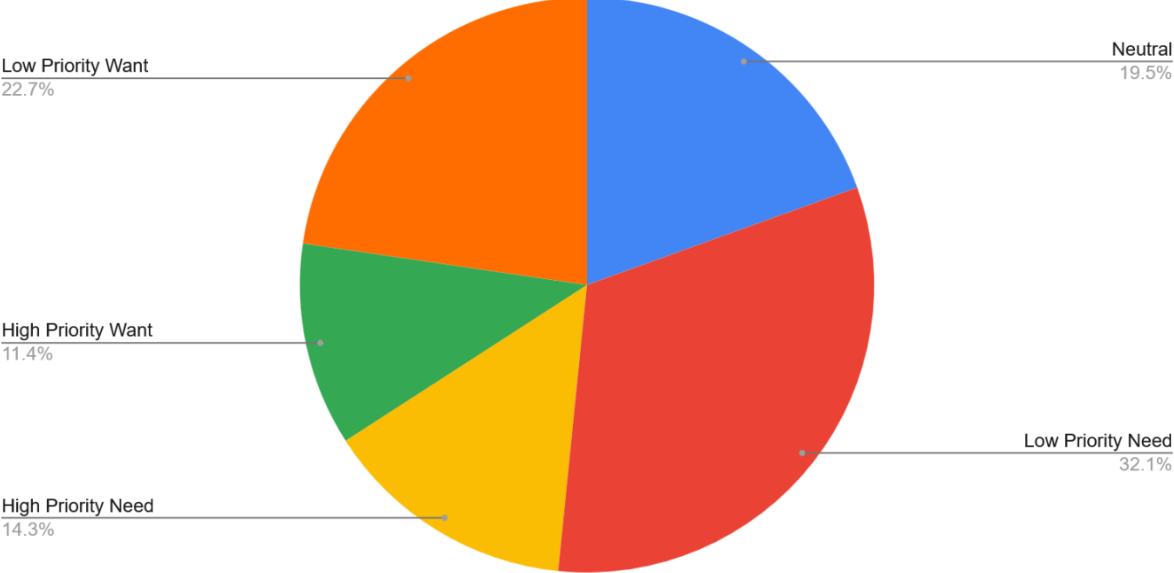

Count of Swimming pool renovations: new lighting, improved and increased spectator seating, pool equipment and control systems such as pipes and pumps
Cost \$8,400,000 (599 Responses)

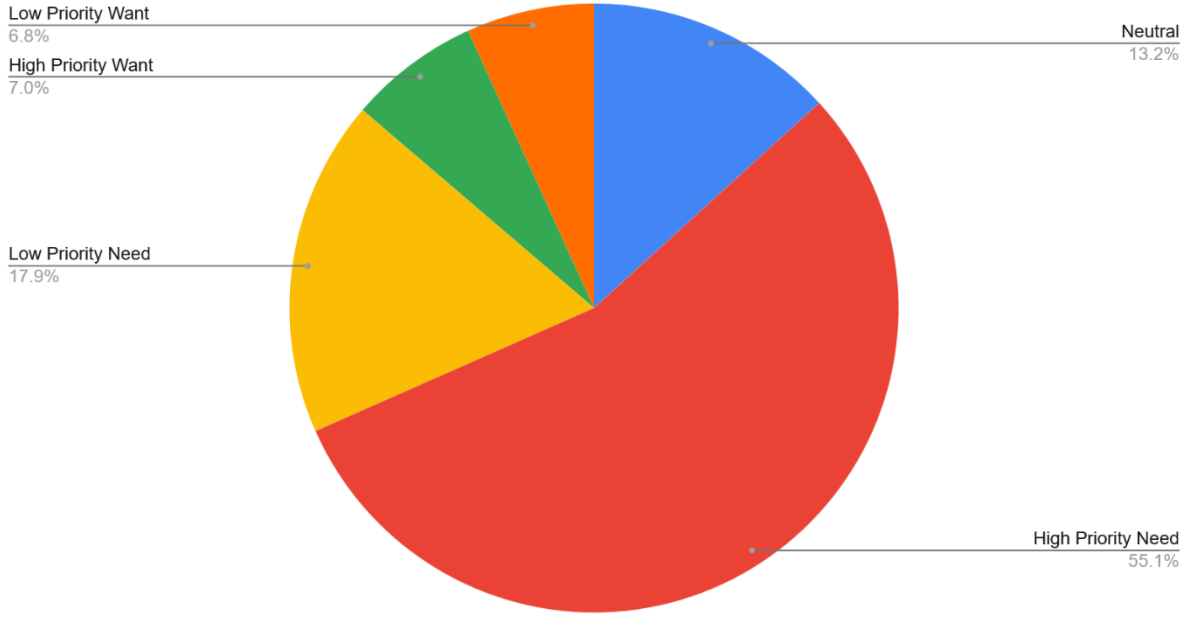

Count of Fire suppression upgrades at all buildings (except the Secondary Campus)
Cost \$3,500,000 (602 Responses)

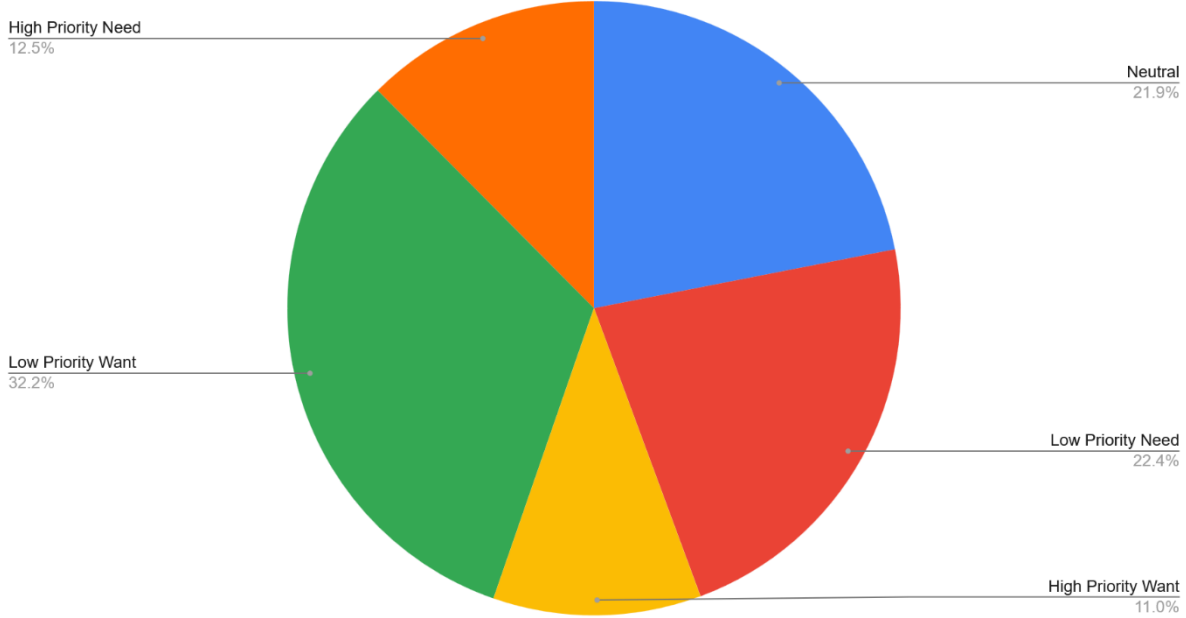

Count of Classroom lighting replacement at all buildings (except Emerson and the Secondary Campus, which were recently completed)
Cost \$2,500,000 (595 Responses)

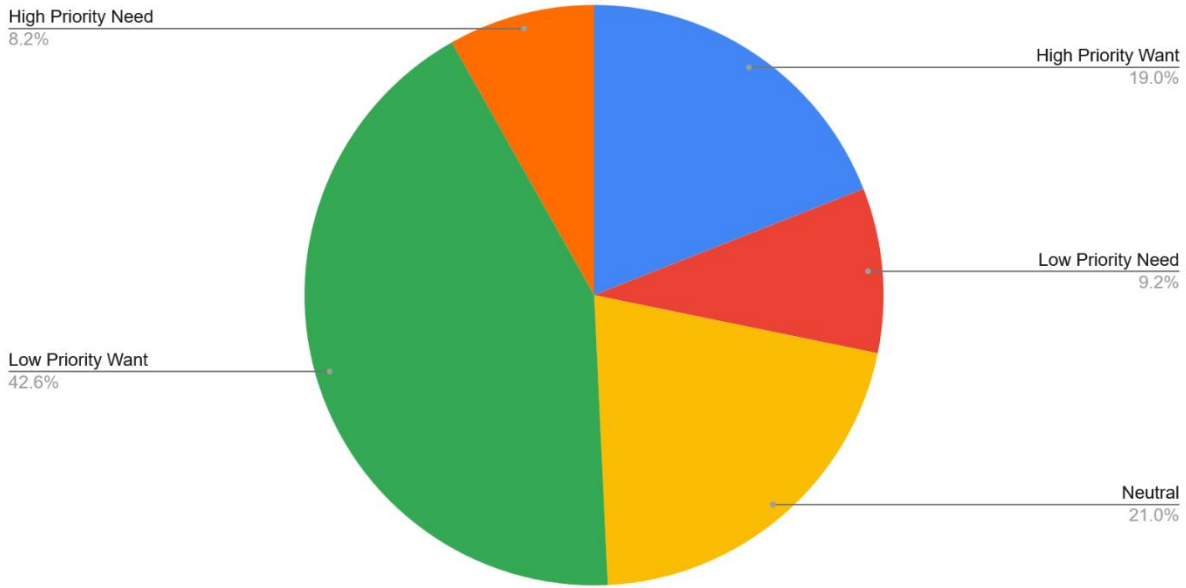

Count of Asbestos abatement at the Secondary Campus
Cost \$507,000 (603 Responses)

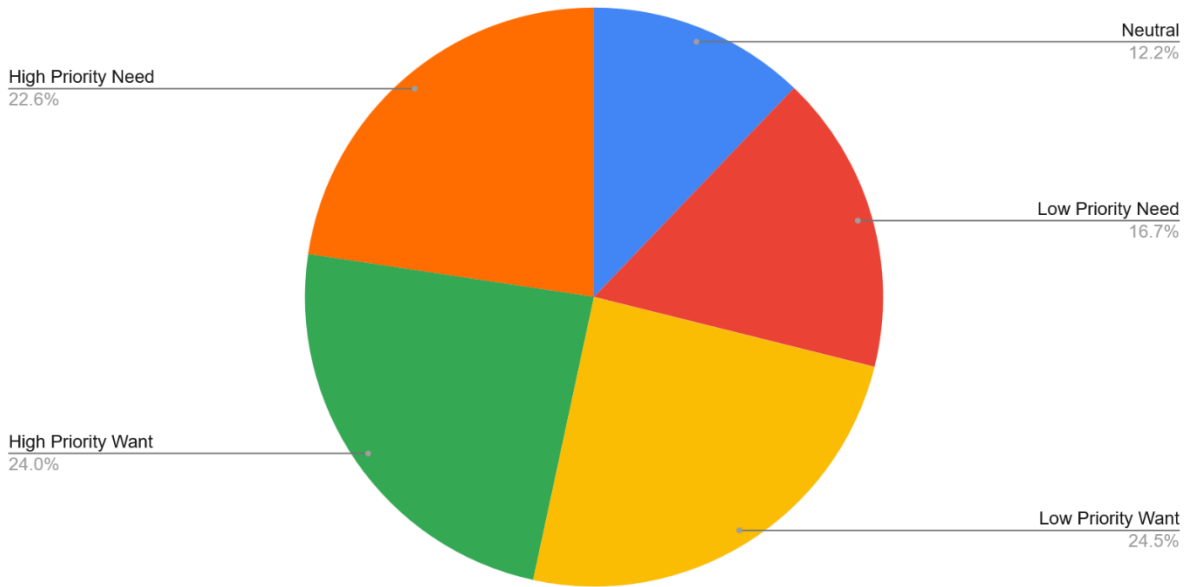

Count of Fencing improvements at Bryant
Cost \$265,000 (602 Responses)

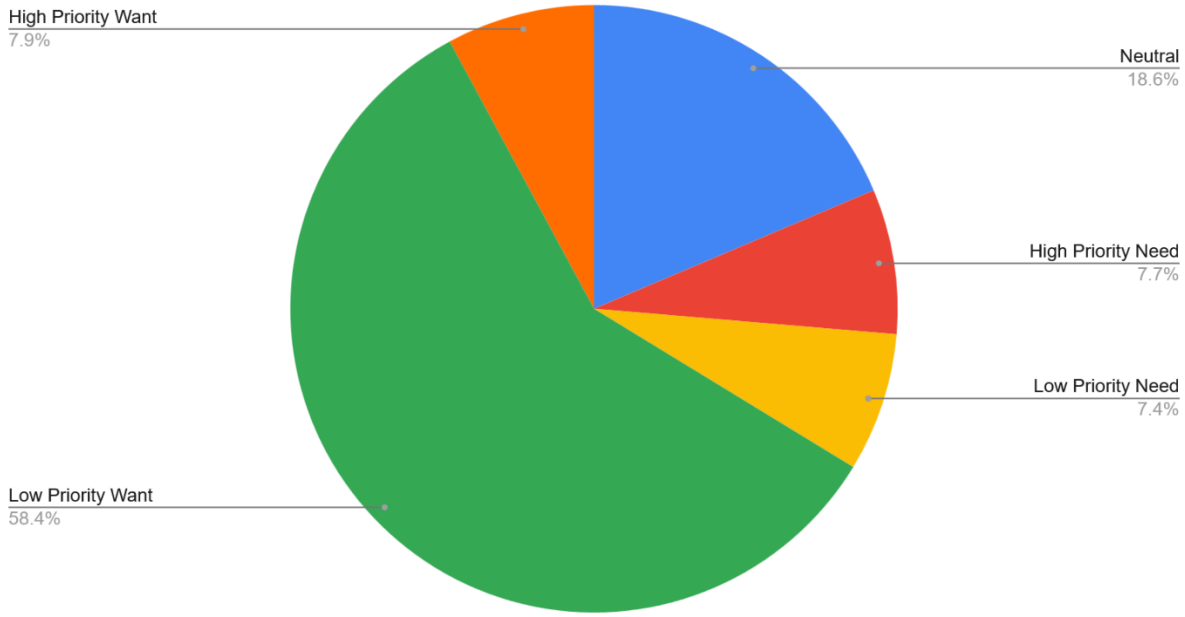

Count of Competition Soccer Field at OHS (Turn practice field into competition field with spectator seating.)
Cost \$750,000 (599 Responses)

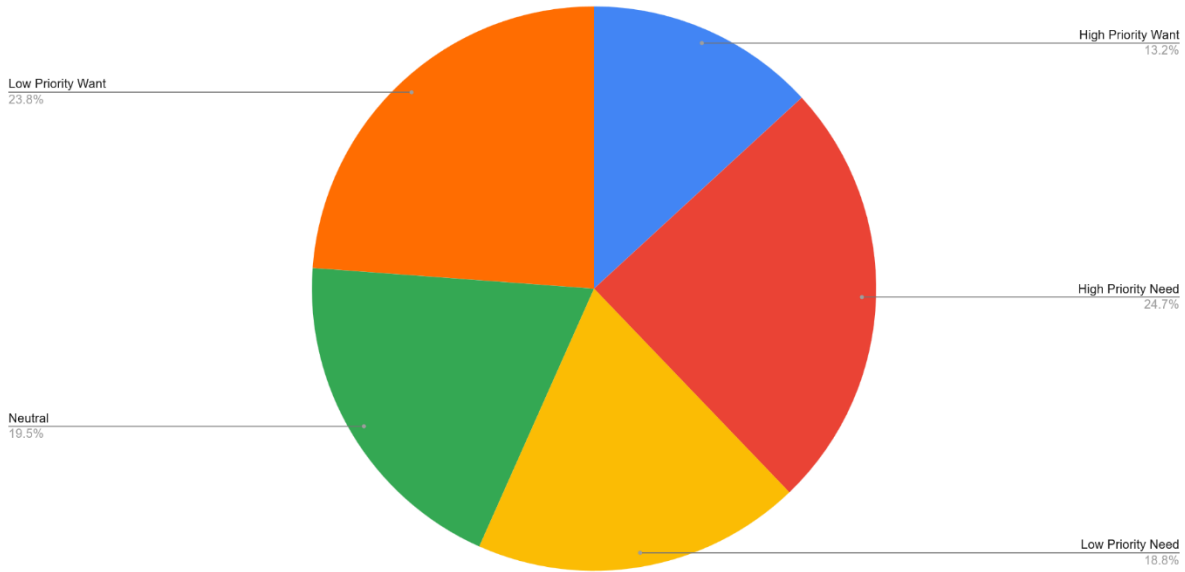

Count of Construct restroom facilities by the Secondary Campus' track, tennis courts, soccer field, and baseball/softball fields, and Willman Field restroom improvements
Cost \$1,400,000 (592 Responses)

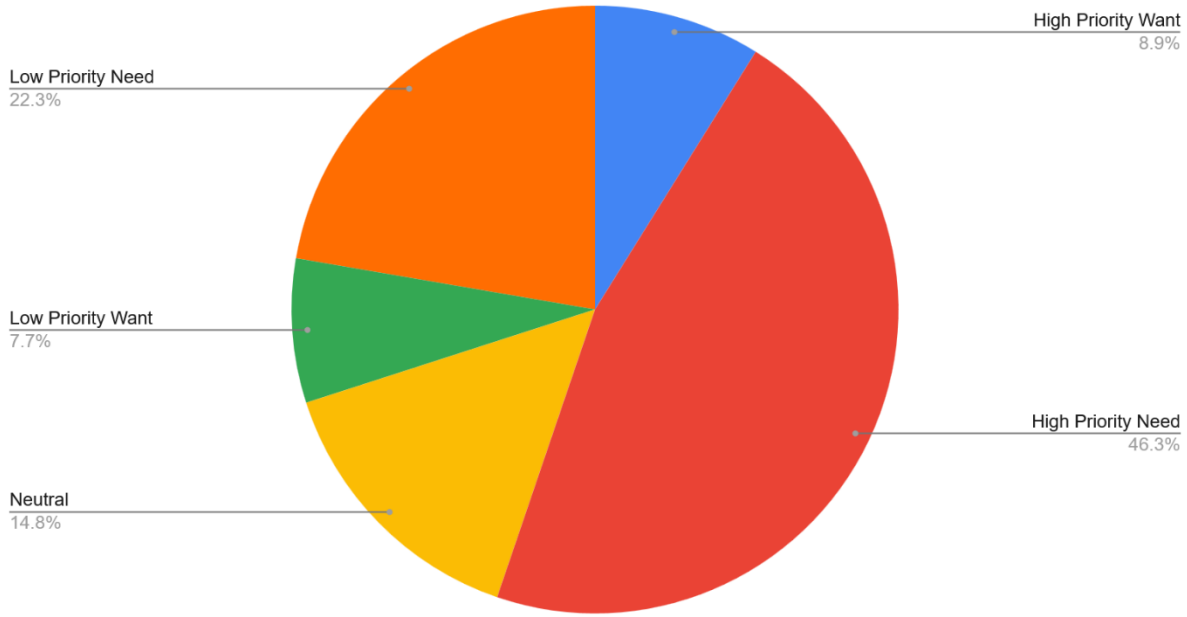

Count of Field turf at Willman Field
 Cost \$3,200,000 (596 Responses)

Count of Construct a new Transportation and Maintenance facility on Middleton Rd. This would involve:
 Converting Jerome St. Bus Garage into Willman Field parking.
 Eliminating Cass Street building (current bus maintenance and district storage facility)
 Eliminating Cedar Street Maintenance Barn
 \$6,100,000 (600 Responses)

Count of Boiler replacement at all schools (will be prioritized by age of the boiler)
\$4,000,000 (574 Responses)

8 million for the pool reno is absolutely not in the typical price range and if this was legitimately quoted, please requote.

adding more bathrooms...outside Hakkens room in the courtyard.....

All of these items are critical but I feel upgrading buildings heating and cooling are most crucial to our students and staff. The buildings are unbearable in the heat and freezing in the cold. Students can't properly learn and staff should not be expected to work under these conditions.

Any maintenance that will preserve the current instructional buildings for longer should be the highest priority.

Anything pertaining to the structural safety of the buildings should be a priority before bleachers, track resurfacing, etc

Anything safety related I feel is a FULL NEED.

Apply for all the grants possible- this could be a business class project to research and find available grants- this can try to offset some of these costs, I would love to see all these improvements. Can we think outside of the box and install solar panels along the back drive of school or on the roof to help offset some of the consumers bills which I'm sure are pricey, most all of teachers run AC units in their classrooms so that moves down the priority of that. Heartland HS has a whole athletic complex where they have solar panels and two wind mills there on the property. Move our football field to the high school campus and have everything at that campus- Willman has horrible parking and is a money pit, leave our pool in the high school and knock out the back wall for raised seating, our pool is in decent condition if you're going to spend the money on The pool build a whole new aquatic center that can host meets to generate revenue for us, knocking out the back wall people could still park underneath this or add additional bathrooms and locker rooms under, bathrooms at the track or baseball fields with drinking fountains are needed so kids (&parents) can fill their water bottles, let us bring our cups back in Willman field! If we invest in our sports we attract more students and if our kids are in sports it keeps them busier and out of trouble!!

As a teacher who is in a classroom with no air or windows, the days when my room is over 90 degrees makes it unbearable for adult sized bodies. No one should have to try to learn/teach in that environment.

Asbestos abatement is at the forefront of my concerns for the the health of not only students, but the teachers who work in these rooms. Asbestos can have long term health affects and many tiles are damaged or broken speeding up the possibility of exposure.

Bentley need improvement on their parking lot.

Bentley needs more parking for its parents and staff. Bentley also needs more than 3 buildings to accommodate the need in the county. We should have a room dedicated to infants and a room dedicated to toddlers to help with the care demand. Bentley also needs better play ground surfaces for the toddler playground. We also need more equipment and space for the younger students to run and play. We would benefit from more funding for new toys. Students are here all day and need new toys to enjoy!

Better fences!!!!

Better hot lunch options with sufficient serving sizes

Better signage at the middle and high schools so that visitors will know where they're going

Both press boxes at the softball and baseball fields REQUIRE upgrading and completion including press box seating appropriate for setting.

Bryant fence needs to be escape free. My kindergarten son made it out during recess. Not safe at all.

Bryant school plumbing is a regular problem, backed up sinks, bag smells from drains, and non working toilets.

But new curriculum that actually helps kids learn how to read.

Central needs more parking available for staff so they stop parking in front of the school at central. I live on Ada street and the parents picking up are very inconsiderate of the home owners. I have had parents completely blocking my driveway or parking in my driveway to walk to the school. I have 2 kids at central and the lack of a crossing guard is my only complaint about have kids at the school. I won't let them walk to or from school alone because of the traffic. I have been nearly hit at least 10 times this year!

Definitely need a little love at football field as to give the community something to be proud of and the kids too.

Do you have any other feedback that you would like to share?

Does Emerson School have air conditioning? I think all of the improvements are needed. Thank you.

Don't mislead the voters as your property goes up or will your taxes.

Education facilities that directly affect classroom learning is ALWAYS more important than sporting facilities. In modern times, air conditioning is now a need.

Equip all classroom doors with special stoppers and defense mechanisms to help protect any intruders in case of emergency scenario.

Facility maintenance to preserve the community's investments educational investments should take precedence over other projects.

Field Turf would be a huge waste of money. Restroom facilities are much needed by the track. It amazes me that there are not any facilities there besides a porta-potty. Security Bell- Camera needs to be on the outside of the building at high school main entrance. You have to enter the building to ring the bell. It's too late at that point.

Fix the bones of the schools first. The rest should follow. No reason anyone should worry about a ball field if nobody's prioritizing bathrooms, windows and fencing in which directly affects the safety and well being of each child, teacher and staff member. Sports are important, no doubt but I'm not worried about constructing a bathroom outside of any of the fields if they aren't prioritized in the schools first.

Fixing the Emerson playground. Planting grass seed.

Focus on safety of people before the cosmetic stuff. Also, as a licensed water operator myself, why would you need to redo the cast iron pipes? Would you switch to ductile iron?

For some of these very important issues... Do a video of a student flushing a toilet and say, "Would you spare X dollars a day to help us to have working toilets?" Or show a student at a desk and a bucket to catch rain water and have them say, "Would you spend X dollars a day so I don't have to share my seat with a rain catcher?" Do emotional advertisements instead of charts and graphs from a board room.

Get all this done

Have Walk-throughs been done by professionals to assess and confirm the structural "Needs" for the safety of children & staff? Are we looking to just replace Boilers because they are old or do they "Need" to be replaced? I would hope that actual structure repairs & equipment to keep the schools running in good, safe conditions would be 1st priorities over any sporting arena requests - just common sense to me.

How do you plan on doing this without a mill increase?

I am excited for my son to go thru the OPS school system, and implementing these improvements would make his experience that much better, on par with other schools in the area.

I don't know all the details of the bids but I 100% know that the lighting for the ball fields should be considerably less the 1.5 million. Champion Electric did Durands Football stadium with polls for 165k

I feel Construct secured vestibules at all elementary schools should have been done a long time ago. Safety and security of children and staff shouldn't be open for debate/discussion.

I feel like we should build a new football stadium at the Owosso high school.

I feel that the most important thing that needs to be fixed is having air conditioning in every classroom in the middle/high school. Seems to be the new systems went to cooling the gym and the weight room. I feel that the classrooms are a higher priority in need of the air conditioning.

I feel there should be a push to improve the pool environment. Our program could be much stronger if we had space to grow. I could see some great potential for hosting events as well if we could really expand our space. Even with sea turtles all throughout my varsity programs, we are too restricted in our space and I feel it is a deterrent compared to all the other athletic spaces that have been improved upon in the last several years. The pool deck has also been called a "dungeon" by guest teams and many community guests because of how dark it is. Any help and support would be incredible! Thank you!

I hope to see security prioritized as well as classroom improvements since ALL students and staff spend their time here.

I hope you're able to get all of these projects done. And sorry for all the mean feedback you all got at the last proposal. People can be so dumb and cruel when it comes to public schools. Not realizing they also went to public school as a kid.

I think a new bus garage is a wonderful and fantastic NEED. They deserve a new facility for all their hard work. I also think restrooms at the ball fields are a good idea. However, I do feel there will be too much upkeep to have those. Someone will constantly have to clean them and people will damage them the first chance they get. Most parking lots in the district need lines repainted. That should be a high priority need.

I think if the bond passes, it should be used to keep the structural integrity of the buildings. Everyone knows if you let those items go too long, the repairs become too costly.

I think the district should prioritize maintaining the buildings and the safety of students. New buildings or soccer fields may look nice, but aren't really necessary.
I think the middle school should be it's own separate building again
I would like to see at least one set of lights at the football practice field.
I would like to see investment in the swim facilities because Owosso has a great swim program that really supports the development of the kids. It would be nice to see Owosso invest in sports other than football to promote the overall growth of a variety of students. The swim area at Owosso is completely subpar compared to other swim programs that Owosso competes against
I would much rather see improvements made to the security of all buildings. There have been too many school shootings to ignore this issue any longer. Cameras, metal detectors, we need to keep our children safe in a world where they risk their lives every day going to school.
Include a drop off circle in the open grass space at emerson. And put parking in the grass section in front of bently. Would help with the parking situations at both schools as it is so limited
Include gym locker room renovations in pool renovation section. High Priority Need.
It appears you're spending money like an elected politician in Washington D.C. \$1.4M for some bathrooms? I could build a mansion for that amount of money. Maybe if you spent as much time scrutinizing costs as you do asking for money, you'd be able to manage and maintain the existing properties and equipment within the current budget. You need to be more responsible with other people's money.
It needs to be shared if we don't do these things what the excepted longevity is of these items such as the pool. The cost will be cheaper to repair all these items then fix them when they are too far gone.
It would be helpful to see what is considered high priority for the health and safety of staff and students per contractors, then follow that recommendation.
It's difficult to prioritize, but infrastructure at all buildings should be a priority.
Let's make sure we put this much into our staff, community & students as well. Relationships don't matter in buildings, they matter in the heart.
Look into grants at consumers energy for the lighting not only for the classrooms but the athletic fields as well. I have done this for other schools I have worked at. Using these incentives I was able to lighting for Flints athletic fields for less than \$75k. No cost for a lot of classrooms as well.
Love the idea of improving Willman field. It needs love badly. This is a must.
Maintaining the current school buildings is a priority, that should have been taken care of with last millage , cosmetic looks is not a priority right now . The rise of water /sewer and consumer bills has alot of residents on edge right now as most people in owosso are living paycheck to paycheck or on a fixed incomeo
Maintenance and repair items should be prioritized. There is no ROI however much of the utility equipment is most likely well past its useful life of 15-20 years. Savings should be looked at as improved efficiencies, reduced downtime and reduced repair and maintenance costs.
Making classrooms less prison looking!
Maybe Owosso school district needs to keep their students safe for rude and mean staff they are all bulllys
More cameras at elementary buildings. Inside and outside
More work at Bentley!! That building needs alot of love!
My brother and his friends share alot about their experiences at the owosso high school, the toilets are always having issues so much as they sometimes cannot use the restroom.between classes and the pac tends to have flooding by the doors leading to wet sheos or fall risks, the choir and band kids have no bathroom close to them which is absolutely ridiculous, if they need to use the restroom they have to walk out of the pac and miss even more class just to use the restroom. A student should always be provided easily accessible restrooms and be able to walk to class without the risk of falling. Those issues seem very high priority. Another issue which understandably is harder to fix is theres not a bathroom for every student, my brothers friends have mentioned having to wait until they are how to use the restroom because their gender doesn't match the signs and the only bathroom they can use is a walk to the front office, bathrooms should be more accessible for ever student even those who don't feel comfortable with the male and female ones
My highest priority is air conditioning at the schools. As the schools are regularly starting in August, the heat is unbearable, with classroom temperatures often reaching over 100 degrees Fahrenheit. Students are unable to learn effectively in this environment.

N/A
Na
NA
Need do start doing some work 😊
Needs over wants
No
No
No
No
No
No
No
No
No mattee the results, safety shouls always be the dirst thought involving the students. If there is asbestos, that should be taken care. Prices seem a bit steep as well. Safety first, wants second.
No more money for sports areas.. sorry..focus on education and safety only
No turf on willman what so ever
Nope
Not at this time
OPS should focus on the projects that are important to the districts growth and future planning. Constructing a maintenance and bus garage facility allows the district to offload properties that aren't suitable or usable anymore. The facilities staff is what keeps the district wheels moving and the time is overdue for this type of facility.
Our schools need to put forth money into our stadiums. Its embarrassing to look at the condition of our fields compared to smaller citys near by. Also there needs to be ways to be sure vandalism isnt taking place. Also if air conditioning is put into schools it needs to be more than just the main offices. If the students have to go during the hottest months of the year and roast their butts off why shouldnt the staff be expected to endure the same?
Ovid turned their field into turf and had an uproar. I wish we had a NO or do not want option to click on.
Owosso swim teams are consistently successful. Owosso also runs swim meets better than most schools. I believe they should have a facility that matches their hard work.
Owosso's pool is in serious need of improvement. We've travelled extensively across the state over the past few years and ours is by far the worst facility we've seen. Aquatic programs provide benefit to taxpayers well beyond the direct students at the school. Comepetitive swim programs feed other athletic areas and act as a measurable draw to the district.
Please choose the projects that save the district the most money on the long run. Energy efficiency and cost avoidance!
Please consider upgrades for Lincoln High School
Please don't ruin the high school trail for the new bus garage
Prioritizing keeping the buildings functional should highly outweigh sport facility improvements
Put a football field where the track is at the OHS and bathrooms and concession. Have it all at the high school where there is betyer parking than at williams field.
Put ac in all schools it's dumb it's not already in but I bet your office had ac. Instead of improving sport fields pay for coaches that can improve the teams then worry about new fields our sport programs are a joke. Fire all coaches and pay for better coaches. Use the money on bringing in teachers who love teaching and want to help the kids.
Put more money into the actual good sports!!! NOT our football team that has sucked for YEARS!!!!
Putting a turf field in at Willman is borderline the stupidest idea I've ever read. Who on earth in this day and age thinks turf is a good idea? Made of plastic, kills everything under it, and abysmal to play sports on leading to increased knee

injuries. If this gets done, plan on offering female soccer players reconstructive knee surgeries for free. Guaranteed they go up year 1. No self respecting and at all competent coach looks at turf and thinks, let's play my sport on turf. No. They want grass.

replacing faulty roofs is highest priority

Restrooms by the track are VERY needed. It is embarrassing when visiting schools have to use the outhouse and it is full of waste. Athletes do not have time to get inside school to use the Restrooms between races/events.

Soccer kids raised a lot via snap fundraiser to get a stadium of their own built. One the can't be displaced from by a JV football game. Even if it means combining the track and soccer fields. Also, the swim teams have been suffering with their pool for YEARS. Skin issues from chemical imbalances, some years, bronchitis and pneumonia resulted from over chlorination fumes to the point where there suits are blue at beginning of practice and grey at the end. Our kids deserve better than this. If we had better facilities we could host. Undefeated 2 years in a row. Back to Back Metro League Championship Titles. State swimmers born out of Sea Turtles. These kids start swimming in that pool around age 5. If we can keep giving money to a losing football team, then we should be investing in these fantastic swimmers bringing pride back to the school, the Track and Cross Country team upgrades to support State runners, the Soccer field upgraded so even in practices they aren't rolling ankles in an unlevel field. The pool locker rooms, embarrassing to have visiting teams see, also disgusting. We can do better, we highly NEED to do better. Shine lights on these points of pride!!

some of these questions can not be answered accurately when you are unsure of the current condition. Do the kids need heat? of course. Do they have to have a/c? its a luxury, not a necessity. Willman field is a dump. Needs to be demo'd and a new facility to replace it, not dump more money into it. The place is embarrassing compared to competing schools. Funding for safety related issues should be prioritized over the "wants". I am all for a better facility for a better learning environment to get the students to achieve goals. Just my 2 cents. I hope the schools get what is needed to help make this generation great.

Sounds like alot of unnecessary things are trying to be done that should have been slowly updated all along.

Sports are not a priority.

Sports should be last on list of projects. Owosso has good facilities now. Get the buildings updated.

Stop spending tax money that we don't have. Every year attendance is dropping and you still want want want. STOP IT !!! Hold 1 election on voting day and when we vote no stop doing special elections on our dollar. Y'all should be ashamed of yourself.

Strive to continually make improvements to better our schools and community to make Owosso stand out and be a leader in Shiawassee county for the next generations!

Thank you for all you do for our children!

Thank you for all you do for our kids at school.

Thanks for seeking stakeholder input!

The bathrooms need to be improved and repaired, however, I see absolutely zero point in putting a dollar into those renovations if Owosso Public Schools continue their stance on not disciplining the students that are destroying them. Until the leadership at OPS decides to enforce proper disciplinary practices I see not point in making any improvements on those areas.

The Owosso high school pool is a major concern for our family and many others. Owosso has an excellent swim team and many students who love being a part of the Owosso swim team. The pool is old, too small to even have people watch. At the very least needs improvements. Please consider the pool a top priority.

The playground at Emerson needs improvements. It is always muddy in the spring, since we got rid of the wooden mulch. It is still dirt years after we switched to black rubber mulch and seeded for grass.

The pool is in desperate need of updates. Lighting is very poor.

The pool needs this upgrade badly.

The pool needs to be addressed as it is falling apart.

The safety of our children, students, and staff should be placed at the top of priority and where money should be spent without any hesitation. This includes safety from the public through confined vestibules to enter the school buildings, as well as updating facilities/schools to be sure our students and staff have the best environment for learning, which is the purpose of public schools!

The schools never needed AC (other than offices and media rooms) when school started after Labor Day. It seems silly to spend that huge dollar amount on air conditioning when you can shorten up the school year by having fewer days off

during the year and revert back to starting in September instead of August. Thus I will never vote for use of taxpayer money for AC in classrooms

The students could benefit for a larger incorporation of environmental activities; such as a school gardening program, or a class dedicated to agriculture in a manner.

The track and field at the owosso high school needs to be turned into a much nicer facility.put the football field in the middl of the track and that can be used as the soccer field as well.upgrade the bleachers because the ones they have now are small and the railings make it difficult to se down the track. Put in a nice concessions stand and actual bathrooms because the porta poty never gets emptied.willman field may be historic but is no longer needed.its outdated and parking sucks.bring the sports to the school

There should be turf at willman

Things that I know little about I prefered to stay neutral on. It is not that I am neutral, I just do not have enough information. In addition, some things I ranked high or low, I may not have all the information necessary to make a solid recommendation. However, you asked for my view, so I tried to give my best recommendations based on my limited information.

This is terrible timing for the school system with the city announcing the water situation due to negligence. I'll change schools before signing up to spend more for the lack of planning by people chosen to make since decisions for our community.

This was very hard to answer the questions as I do not know about the status of each one.

Turf field would be magical

Turf football fields are bad

Turf would be really cool

Updating sporting facilities is a nice idea. However, our district's sports are not all that successful to be spending money on when we have general maintenance issues to address.

Weren't some of the repairs supposed to be competed previously. Would love to see the actual financials with repairs included to see what has been done and when. \$8.4 to upgrade a pool area no way. At that cost, look at adding a new building with a pool.

What about student security

What happened to all the money you got previously, that you didnt use for everything you said you were going to? How is this not going to affect the millage? How are we supposed to be able to trust these repairs will happen? You've proven youre unable to follow budget. I wil vote no on all these items. Stick to whats important. The bleachers are fine. Bring up the grades, and prove you DESERVE these upgrades!

Why dont we focus on more important issues like the policys or the racial treatment that our bi racial childern receives not only from their peers but from the staff. But yet the lowest testing grades by far in the state...or maybe just maybe the reson why the head count is the lowest it has ever been.

Why wasn't this all done with the last bond! Where did all th money from that bond go. The AC in elementary schools was listed as an item on the last bond. The taxpayers feel robbed

Willman field is very outdated and run down. This improvement would give the community and the kids something to be proud. I am very strong on this idea.

Without having the background information on these improvements I feel that answers are more subjective than maybe helpful. Certainly the safety and comfort of our students is a top priority.

Yes! Why is this not an anonymous survey. It feels like you are building a list of supporters and non-supporters. The school needs to publish a paper on the website on why each of these projects are even on the list of consideration. This is a VERY assumptive and biased survey that assumes all these projects have some sort of priority in the eyes of the public. Also, there is little justification or ROI on any project. Until the school is more transparent - I will vote no.
