Introduction

Mission Statement

The Mississippi Department of Education is dedicated to student success including the improvement of student achievement in English Language Arts in order to produce citizens who are capable of making complex decisions, solving complex problems, and communicating fluently in a global society. The Mississippi College- and Career-Readiness Standards provide a consistent, clear understanding of what students are expected to know and be able to do by the end of each grade level or course. The standards are designed to be robust and relevant to the real world, reflecting the knowledge and skills that students need for success in college and careers and to compete in the global economy.

Purpose

The primary purpose of the 2016 Mississippi College- and Career-Readiness Standards is to provide a basis for curriculum development for Grades K-12 English Language Arts teachers in Mississippi. This document provides an outline of what students should know and be able to do by the end of each grade level in preparation for college and career. The primary purpose of this document is to provide a basis for curriculum development for K-12 English Language Arts teachers, outlining what students should know and be able to do by the end of each grade level and course. Mississippi-specific courses that were revised to align with the Mississippi College- and Career-Readiness Standards include Survey of African American Writing, Creative Writing, Debate, Foundations of Journalism, Broadcast Journalism, Print Journalism, Mississippi Writers, Oral Communication, Technical and Workplace Writing, Survey of Twentieth Century Writing, and World Literature. The new Southern Regional Education Board (SREB) Literacy Ready course is included as a transition to college English course.

Organization of the 2016 Mississippi College- and Career-Readiness Standards

The 2016 Mississippi College- and Career-Readiness Standards are divided into 6 sections. The first section includes an introduction to the document, an overview of the Mississippi College- and Career-Readiness Standards for English Language Arts. The second section includes the MS CCRS for ELA for kindergarten through second grade. The third section includes the MS CCRS for ELA for grades 3-5. The fourth section includes the MS CCRS for ELA, including Literacy in Social Studies, Science, and Technical Subjects. The final section includes the Mississippi Specific High School ELA electives, Advanced Placement courses, and the SREB Bridge Course.

Implementation

The required year for the implementation of the 2016 Mississippi College- and Career-Readiness Standards is school year 2016-2017.

Mississippi College- and Career-Readiness Standards (MS CCRS) for English Language Arts Overview

Mississippi College- and Career-Readiness Standards (MS CCRS) for English Language Arts

OVERVIEW

The Mississippi College- and Career-Readiness Standards (MS CCRS) for English Language Arts & Literacy in History/Social Studies, Science, and Technical Subjects (“the Standards”) are the culmination of an extended, broad-based effort to fulfill the charge to create next generation K–12 standards in order to help ensure that all students are college and career ready in literacy no later than the end of high school.

The Standards set requirements not only for English language arts (ELA) but also for literacy in history/social studies, science, and technical subjects. Just as students must learn to read, write, speak, listen, and use language effectively in a variety of content areas, so too must the Standards specify the literacy skills and understandings required for college and career readiness in multiple disciplines. Literacy standards for grade 6 and above are predicated on teachers of ELA, history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6–12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

As a natural outgrowth of meeting the charge to define college and career readiness, the Standards also lay out a vision of what it means to be a literate person in the twenty-first century. Indeed, the skills and understandings students are expected to demonstrate have wide applicability outside the classroom or workplace. Students who meet the Standards readily undertake the close, attentive reading that is at the heart of understanding and enjoying complex works of literature. They habitually perform the critical reading necessary to pick carefully through the staggering amount of information available today in print and digitally. They actively seek the wide, deep, and thoughtful engagement with high-quality literary and informational texts that builds knowledge, enlarges experience, and broadens worldviews. They reflexively demonstrate the cogent reasoning and use of evidence that is essential to both private deliberation and responsible citizenship in a democratic republic. In short, students who meet the Standards develop the skills in reading, writing, speaking, and listening that are the foundation for any creative and purposeful expression in language.

Key Design Considerations

Mississippi College- and Career-Readiness and Grade-Specific Standards

The Mississippi College- and Career-Readiness (MS CCRS) standards anchor the document and define general, cross-disciplinary literacy expectations that must be met for students to be prepared to enter college and workforce training programs ready to succeed. The K–12 grade-specific standards define end-of-year expectations and a cumulative progression designed to enable students to meet college and career readiness expectations no later than the end of high school. The MS CCRS and high school (grades 9–12) standards work in tandem to define the college and career readiness line—the former providing broad standards, the latter providing additional specificity. Hence, both should be considered when developing college and career readiness assessments.

Students advancing through the grades are expected to meet each year’s grade specific standards, retain or further develop skills and understandings mastered in preceding grades, and work steadily toward meeting the more general expectations described by the MS CCRS standards.

Grade Levels for K–8; Grade Bands for 9–10 and 11–12

The Standards use individual grade levels in kindergarten through grade 8 to provide useful specificity; the Standards use two-year bands in grades 9–12 to allow flexibility in high school course design.

A Focus on Results Rather than Means

By emphasizing required achievements, the Standards leave room for school districts to determine how those goals should be reached and what additional topics should be addressed. Thus, the Standards do not mandate such things as a particular writing process or the full range of metacognitive strategies that students may need to monitor and direct their thinking and learning. Teachers are thus free to provide students with whatever tools and knowledge their professional judgment and experience identify as most helpful for meeting the goals set out in the Standards.

An Integrated Model of Literacy

Although the Standards are divided into Reading, Writing, Speaking and Listening, and Language strands for conceptual clarity, the processes of communication are closely connected, as reflected throughout this document. For example, Writing standard 9 requires that students be able to write about what they read. Likewise, Speaking and Listening standard 4 sets the expectation that students will share findings from their research.

Research and Media Skills Blended into the Standards as a Whole

To be ready for college, workforce training, and life in a technological society, students need the ability to gather, comprehend, evaluate, synthesize, and report on information and ideas, to

conduct original research in order to answer questions or solve problems, and to analyze and create a high volume and extensive range of print and non-print texts in media forms old and new. Research, media skills, and understandings are embedded throughout the Standards rather than treated in a separate section.

Shared Responsibility for Students' Literacy Development

The Standards insist that instruction in reading, writing, speaking, listening, and language be a shared responsibility within the school. The K–5 standards include expectations for reading, writing, speaking, listening, and language applicable to a range of subjects, including but not limited to ELA. The grades 6–12 standards are divided into two sections, one for ELA and the other for history/social studies, science, and technical subjects. This division reflects the unique, time-honored place of ELA teachers in developing students' literacy skills while at the same time recognizing that teachers in other areas must have a role in this development as well.

Part of the motivation behind the interdisciplinary approach to literacy promulgated by the Standards is extensive research establishing the need for college and career ready students to be proficient in reading complex informational text independently in a variety of content areas. Most of the required reading in college and workforce training programs is informational in structure and challenging in content; postsecondary education programs typically provide students with both a higher volume of such reading than is generally required in K–12 schools and comparatively little scaffolding.

The Standards are not alone in calling for a special emphasis on informational text. The 2009 reading framework of the National Assessment of Educational Progress (NAEP) requires a high and increasing proportion of informational text on its assessment as students advance through the grades.

Strategies for Content Area Reading

Though strategies utilized in reading and language arts classes provide the framework that students need to comprehend content-specific texts, students must also be equipped with transferable skills and strategies that can be used across grade levels and curricula. The following are suggestions for content area reading that can be incorporated in all classrooms.

Suggestions for Teaching Content-Specific Vocabulary and Facilitating Comprehension

- Establish goals and purposes for reading.
- Plan pre-reading activities that allow students to develop prerequisite knowledge and vocabulary about content-specific topics. Activities may include reading materials, videos, websites, and field trips.
- Plan post-reading activities that allow students to demonstrate mastery of skills and concepts through visual, kinesthetic, oral, and/or written products. Comprehension is often aided when linked to the creation of a product.
- Create mental or visual images associated with technical vocabulary words.
- Link new vocabulary with background knowledge.

- Focus on the semantic relationships of new and familiar words.
- Use synonyms, antonyms, and dictionary definitions to understand the meaning of specialized and technical vocabulary.
- Analyze the structure of new words (affixes, compound words, etc.) to determine word meaning.
- Maintain word banks and word walls for new words (**Note:** Word banks and word walls should be interactive; students must regularly interact with words banks and word walls to fully expand their vocabulary and analyze how words and concepts aid in reading comprehension).
- Use semantic gradients (vocabulary continuums) to illustrate a continuum of words by degree. Semantic gradients often feature antonyms or opposites on each end of the continuum. This strategy broadens students’ knowledge of related and opposite words.
- Develop activities that allow students to work collaboratively to figure out the meaning of new words.
- Encourage students to generate and ask questions of texts.
- Design activities that allow students to make inferences, predict, summarize, and visualize concepts.
- Examine physical features of texts, such as different kinds of text features, including typeface, headings, and subheadings.

Many of the suggested strategies (e.g., prediction, summarizing, analyzing text features) must be directly taught (explicit instruction) and practiced, while other strategies (e.g., creating visual or mental images) can be components of incidental (implicit) instruction.

Additionally, students must engage in reading, writing, speaking, and listening activities that are authentic and content-specific. Textbooks and discipline-specific texts, such as primary and secondary source documents, articles, tables, and graphs, must be cornerstones in social studies, science, and technical subjects to aid students in using reading strategies that are discipline-specific.

The Standards aim to align instruction with this framework so that many more students than at present can meet the requirements of college and career readiness. In K–5, the Standards follow NAEP’s lead in balancing the reading of literature with the reading of informational texts, including texts in history/social studies, science, and technical subjects. In accord with NAEP’s growing emphasis on informational texts in the higher grades, the Standards demand that a significant amount of reading of informational texts take place in and outside the ELA classroom. Fulfilling the Standards for 6–12 ELA requires much greater attention to a specific category of informational text—literary nonfiction—than has been traditional. Because the ELA classroom must focus on literature (stories, drama, and poetry) as well as literary nonfiction, a great deal of informational reading in grades 6–12 must take place in other classes if the NAEP assessment framework is to be matched instructionally.¹ To measure students’ growth toward college and career readiness, assessments aligned with the Standards should adhere to the distribution of texts across grades cited in the NAEP framework.

Distribution of Communicative Purposes by Grade in the 2011 NAEP Writing Framework

NAEP likewise outlines a distribution across the grades of the core purposes and types of student writing. The 2011 NAEP framework, like the Standards, cultivates the development of three mutually reinforcing writing capacities: writing to persuade, to explain, and to convey real or imagined experience. Evidence concerning the demands of college and career readiness gathered during development of the Standards concurs with NAEP’s shifting emphases: standards for grades 9–12 describe writing in all three forms, but, consistent with NAEP, the overwhelming focus of writing throughout high school should be on arguments and informative/explanatory texts.²

It follows that writing assessments aligned with the Standards should adhere to the distribution of writing purposes across grades outlined by NAEP.

Focus and Coherence in Instruction and Assessment

While the Standards delineate specific expectations in reading, writing, speaking, listening, and language, each standard need not be a separate focus for instruction and assessment. Often,

¹The percentages on the table reflect the sum of student reading, not just reading in ELA settings. Teachers of senior English classes, for example, are not required to devote 70 percent of reading to informational texts. Rather, 70 percent of student reading across the grade should be informational.

²As with reading, the percentages in the table reflect the sum of student writing, not just writing in ELA settings.

several standards can be addressed by a single rich task. For example, when editing writing, students address Writing standard 5 (“Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach”) as well as Language standards 1–3 (which deal with conventions of Standard English and knowledge of language). When drawing evidence from literary and informational texts per Writing Standard 9, students are also demonstrating their comprehension skill in relation to specific standards in Reading. When discussing something they have read or written, students are also demonstrating their speaking and listening skills. The CCR anchor standards themselves provide another source of focus and coherence.

The same ten CCR anchor standards for Reading apply to both literary and informational texts, including texts in history/social studies, science, and technical subjects. The ten CCR anchor standards for Writing cover numerous text types and subject areas. This means that students can develop mutually reinforcing skills and exhibit mastery.

Students Who are College- and Career-Ready

The descriptions that follow are not standards themselves but instead offer a portrait of students who meet the standards set out in this document. As students advance through the grades and master the standards in reading, writing, speaking, listening, and language, they are able to exhibit with increasing fullness and regularity these capacities of the literate individual.

They demonstrate independence.

Students can, without significant scaffolding, comprehend and evaluate complex texts across a range of types and disciplines, and they can construct effective arguments and convey intricate or multifaceted information. Likewise, students are able independently to discern a speaker’s key points, request clarification, and ask relevant questions. They build on others’ ideas, articulate their own ideas, and confirm they have been understood. Without prompting, they demonstrate command of Standard English and acquire and use a wide-ranging vocabulary. More broadly, they become self-directed learners, effectively seeking out and using resources to assist them, including teachers, peers, and print and digital reference materials.

They build strong content knowledge.

Students establish a base of knowledge across a wide range of subject matter by engaging with works of quality and substance. They become proficient in new areas through research and study. They read purposefully and listen attentively to gain both general knowledge and discipline-specific expertise. They refine and share their knowledge through writing and speaking.

They respond to the varying demands of audience, task, purpose, and discipline.

Students adapt their communication in relation to audience, task, purpose, and discipline. They set and adjust purpose for reading, writing, speaking, listening, and language use as warranted by the task. They appreciate nuances, such as how the composition of an audience should affect tone when speaking and how the connotations of words affect meaning. They also know

that different disciplines call for different types of evidence (e.g., documentary evidence in history, experimental evidence in science).

They comprehend as well as critique.

Students are engaged and open-minded—but discerning—readers and listeners. They work diligently to understand precisely what an author or speaker is saying, but they also question an author’s or speaker’s assumptions and premises and assess the veracity of claims and the soundness of reasoning.

They value evidence.

Students cite specific evidence when offering an oral or written interpretation of a text. They use relevant evidence when supporting their own points in writing and speaking, making their reasoning clear to the reader or listener, and they constructively evaluate others’ use of evidence.

They use technology and digital media strategically and capably.

Students employ technology thoughtfully to enhance their reading, writing, speaking, listening, and language use. They tailor their searches online to acquire useful information efficiently, and they integrate what they learn using technology with what they learn offline. They are familiar with the strengths and limitations of various technological tools and mediums and can select and use those best suited to their communication goals.

They come to understand other perspectives and cultures.

Students appreciate that the twenty-first-century classroom and workplace are settings in which people from often widely divergent cultures and who represent diverse experiences and perspectives must learn and work together. Students actively seek to understand other perspectives and cultures through reading and listening, and they are able to communicate effectively with people of varied backgrounds. They evaluate other points of view critically and constructively. Through reading great classic and contemporary works of literature representative of a variety of periods, cultures, and worldviews, students can vicariously inhabit worlds and have experiences much different than their own.

Overall Organization of the Standards for English Language Arts

The Standards comprise three main sections: a comprehensive K–5 section and two content area–specific sections for grades 6–12, one for ELA and one for history/social studies, science, and technical subjects.

Each section is divided into strands. K–5 and 6–12 ELA have Reading, Writing, Speaking and Listening, and Language strands; the 6–12 history/ social studies, science, and technical subjects section focuses on Reading and Writing. Each strand is headed by a strand-specific set of College- and Career-Readiness Anchor Standards that is identical across all grades and content areas.

Standards for each grade within K–8 and for grades 9–10 and 11–12 follow the CCR anchor standards in each strand. Each grade-specific standard (as these standards are collectively referred to) corresponds to the same-numbered CCR anchor standard. Put another way, each CCR anchor standard has an accompanying grade-specific standard translating the broader MS CCRS statement into grade-appropriate end-of-year expectations.

Individual CCR anchor standards can be identified by their strand, CCR status, and number (R.CCR.6, for example). Individual grade-specific standards can be identified by their strand, grade, and number (or number and letter, where applicable), so that RI.4.3, for example, stands for Reading, Informational Text, grade 4, standard 3 and W.5.1a stands for Writing, grade 5, standard 1a. Strand designations can be found in brackets alongside the full strand title.

Who is responsible for which portion of the Standard?

A single K–5 section lists standards for reading, writing, speaking, listening, and language across the curriculum. Grades 6–12 are covered in two content area-specific sections, the first for the English language arts teacher and the second for teachers of history/social studies, science, and technical subjects. Each section uses the same CCR anchor standards but also includes grade-specific standards tuned to the literacy requirements of the particular discipline(s).

Key Features of the Standards

Reading: Text complexity and the growth of comprehension

The Reading standards place equal emphasis on the sophistication of what students read and the skill with which they read. Standard 10 defines a grade-by grade “staircase” of increasing text complexity that rises from beginning reading to the college and career readiness level. Whatever they are reading, students must also show a steadily growing ability to discern more from and make fuller use of text, including making an increasing number of connections among ideas and between texts, considering a wider range of textual evidence, and becoming more sensitive to inconsistencies, ambiguities, and poor reasoning in texts.

The following link provides a rubric for determining text complexity of informational texts:

The following link provides a rubric for determining text complexity of literature:

<http://www.mde.k12.ms.us/docs/secondary-education/qualitative-rubrics-for-measuring-text-complexity-informational-and-literary.pdf?sfvrsn=2>

Writing: Text types, responding to reading, and research

The Standards acknowledge the fact that whereas some writing skills, such as the ability to plan, revise, edit, and publish, are applicable to many types of writing, other skills are more properly defined in terms of specific writing types: arguments,

informative/explanatory texts, and narratives. Standard 9 stresses the importance of the writing-reading connection by requiring students to draw upon and write about evidence from literary and informational texts. Because of the centrality of writing to most forms of inquiry, research standards are prominently included in this strand, though skills important to research are infused throughout the document.

Speaking and Listening: Flexible communication and collaboration

Including but not limited to skills necessary for formal presentations, the Speaking and Listening standards require students to develop a range of broadly useful oral communication and interpersonal skills. Students must learn to work together, express and listen carefully to ideas, integrate information from oral, visual, quantitative, and media sources, evaluate what they hear, use media and visual displays strategically to help achieve communicative purposes, and adapt speech to context and task.

Language: Conventions, effective use, and vocabulary

The Language standards include the essential “rules” of standard written and spoken English, but they also approach language as a matter of craft and informed choice among alternatives. The vocabulary standards focus on understanding words and phrases, their relationships, and their nuances and on acquiring new vocabulary, particularly general academic and domain-specific words and phrases.

College- and Career- Readiness Anchor Standards

College- and Career-Readiness Anchor Standards

COLLEGE- AND CAREER-READINESS STANDARDS: READING

The K–12 standards define what students should understand and be able to do by the end of each grade. The standards correspond to the College- and Career-Readiness (CCR) anchor standards below by number. The MS CCRS and grade-specific standards are necessary complements—the former providing broad standards, the latter providing additional specificity—that together define the skills and understandings that all students must demonstrate.

Key Ideas and Details	
CCR.R.1	Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.
CCR.R.2	Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.
CCR.R.3	Analyze how and why individuals, events, or ideas develop and interact over the course of a text.
Craft and Structure	
CCR.R.4	Interpret words and phrases as they are used in a text, including determining technical, connotative, and figurative meanings, and analyze how specific word choices shape meaning or tone.
CCR.R.5	Analyze the structure of texts, including how specific sentences, paragraphs, and larger portions of the text (e.g., a section, chapter, scene, or stanza) relate to each other and the whole.
CCR.R.6	Assess how point of view or purpose shapes the content and style of a text.
Integration of Knowledge and Ideas	
CCR.R.7	Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.
CCR.R.8	Delineate and evaluate the argument and specific claims in a text, including the validity of the reasoning as well as the relevance and sufficiency of the evidence.
CCR.R.9	Analyze how two or more texts address similar themes or topics in order to build knowledge or to compare the approaches the authors take.
Range of Reading and Level of Text Complexity	
CCR.R.10	Read and comprehend complex literary and informational texts independently and proficiently.

Note on range and content of student reading:

To build a foundation for college and career readiness, students must read widely and deeply from among a broad range of high-quality, increasingly challenging literary and informational texts. Through extensive reading of stories, dramas, poems, and myths from diverse cultures and different time periods, students gain literary and cultural knowledge as well as familiarity with various text structures and elements. By reading texts in history/social studies, science, and other disciplines, students build a foundation of knowledge in these fields that will also give them the background to be better readers in all content areas. Students also acquire the habits of reading independently and closely, which are essential to their future success.

COLLEGE- AND CAREER-READINESS STANDARDS: WRITING

Text Types and Purposes³	
CCR.W.1	Write arguments to support claims in an analysis of substantive topics or texts using valid reasoning and relevant and sufficient evidence.
CCR.W.2	Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective selection, organization, and analysis of content.
CCR.W.3	Write narratives to develop real or imagined experiences or events using effective technique, well-chosen details and well-structured event sequences.
Production and Distribution of Writing	
CCR.W.4	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
CCR.W.5	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach.
CCR.W.6	Use technology, including the Internet, to produce and publish writing and to interact and collaborate with others.
Research to Build and Present Knowledge	
CCR.W.7	Conduct short as well as more sustained research projects based on focused questions, demonstrating understanding of the subject under investigation.
CCR.W.8	Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.
CCR.W.9	Draw evidence from literary or informational texts to support analysis, reflection, and research.
Range of Writing	
CCR.W.10	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

Note on range and content of student writing:

To build a foundation for college and career readiness, students need to learn to use writing as a way of offering and supporting opinions, demonstrating understanding of the subjects they are studying, and conveying real and imagined experiences and events. They learn to appreciate that a key purpose of writing is to communicate clearly to an external, sometimes unfamiliar audience, and they begin to adapt the form and content of their writing to accomplish a particular task and purpose. They develop the capacity to build knowledge on a subject through research projects and to respond analytically to literary and informational sources. To meet these goals, students must devote significant time and effort to writing, producing numerous pieces over short and extended time frames throughout the year.

³ These broad types of writing include many subgenres.

COLLEGE- AND CAREER-READINESS STANDARDS: SPEAKING AND LISTENING

Comprehension and Collaboration	
CCR.SL.1	Prepare for and participate effectively in a range of conversations and collaborations with diverse partners, building on others' ideas and expressing their own clearly and persuasively.
CCR.SL.2	Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.
CCR.SL.3	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric.
Presentation of Knowledge and Ideas

CCR.SL.5	Make strategic use of digital media and visual displays of data to express information and enhance understanding of presentations.
CCR.SL.6	Adapt speech to a variety of contexts and communicative tasks, demonstrating command of formal English when indicated or appropriate.

Note on range and content of student speaking and listening:

To build a foundation for college and career readiness, students must have ample opportunities to take part in a variety of rich, structured conversations—as part of a whole class, in small groups, and with a partner. Being productive members of these conversations requires that students contribute accurate, relevant information; respond to and develop what others have said; make comparisons and contrasts; and analyze and synthesize a multitude of ideas in various domains.

New technologies have broadened and expanded the role that speaking and listening play in acquiring and sharing knowledge and have tightened their link to other forms of communication. Digital texts confront students with the potential for continually updated content and dynamically changing combinations of words, graphics, images, hyperlinks, and embedded video and audio.

COLLEGE- AND CAREER-READINESS STANDARDS: LANGUAGE

Conventions of Standard English	
CCR.L.1	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
CCR.L.2	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.
Knowledge of Language	
CCR.L.3	Apply knowledge of language to understand how language functions in different contexts, to make effective choices for meaning or style, and to comprehend more fully when reading or listening.
Vocabulary Acquisition and Use	
CCR.L.4	Determine or clarify the meaning of unknown and multiple-meaning words and phrases by using context clues, analyzing meaningful word parts, and consulting general and specialized reference materials, as appropriate.
CCR.L.5	Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.
CCR.L.6	Acquire and use accurately a range of general academic and domain-specific words and phrases sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when encountering an unknown term important to comprehension or expression.

Note on range and content of student language usage:

To build a foundation for college and career readiness in language, students must gain control over many conventions of Standard English grammar, usage, and mechanics as well as learn other ways to use language to convey meaning effectively. They must also be able to determine or clarify the meaning of grade-appropriate words encountered through listening, reading, and media use; come to appreciate that words have nonliteral meanings, shadings of meaning, and relationships to other words; and expand their vocabulary in the course of studying content. The inclusion of Language standards in their own strand should not be taken as an indication that skills related to conventions, effective language use, and vocabulary are unimportant to reading, writing, speaking, and listening; indeed, they are inseparable from such contexts.

Mississippi College- and Career- Readiness Standards for English Scaffolding Document

Overview of the MS CCRS Scaffolding Document

Purpose

The primary purpose of the 2016 Mississippi College- and Career-Readiness Standards Scaffolding Document is to provide teachers with a deeper understanding of the Standards as they plan for classroom instruction. Based on the 2016 Mississippi College- and Career-Readiness Standards, this document provides a close analysis of the requirements for student mastery. Because of the rigor and depth of the Standards, scaffolding instruction to meet the needs of all learners is essential to individual success. The Scaffolding Document will aid teachers' understanding of how to teach the Standards through a natural progression of student mastery.

Organization of the 2016 Mississippi College- and Career-Standards Scaffolding Document

The 2016 Mississippi College- and Career-Readiness Standards Scaffolding Document is divided by grade level. Within each grade level, the Scaffolding Document is separated into the four strands identified in the Mississippi College- and Career-Readiness Standards for English Language Arts: Reading, Writing, Speaking and Listening, and Language.

Each standard is then broken down into three categories: Prerequisite Knowledge, Conceptual Understanding, and Evidence of Knowledge. The Prerequisite Knowledge column lists the skills that students should have mastered in previous grades in order to work towards mastery of the grade-specific standard. In other words, this column details what a student needs to KNOW before mastering the grade-specific standard. The Conceptual Understanding column explains the deeper understanding of concepts, not actions or skills, which are required for mastery of the grade specific standard. In other words, this column explains what a student needs to UNDERSTAND before mastering the grade-specific standard. The last column, Evidence of Knowledge, explains what student mastery looks like, including what work a student produces to exhibit mastery of the grade-specific standard. In other words, this column describes what a student needs to DO to show mastery of the grade-specific standard.

Finally, key terms are included for each standard. These key terms include the ideas, concepts, and verbs that are necessary for mastery of the standard.

A link to the scaffolding document can be found on the last page of each grade level's standards. The scaffolding documents for all grades may be accessed here:

The following standards offer a focus for instruction each year and help ensure that students gain adequate exposure to a range of texts and tasks. Rigor is also infused through the requirement that students read increasingly complex texts through the grades. Students advancing through the grades are expected to meet each year’s grade-specific standards and retain or further develop skills and understandings mastered in preceding grades.

The CCR anchor standards and high school grade-specific standards work in tandem to define college and career readiness expectations—the former providing broad standards, the latter providing additional specificity.

Scaffolding Document

The primary purpose of the 2016 Mississippi College- and Career-Readiness Standards Scaffolding Document is to provide teachers with a deeper understanding of the Standards as they plan for classroom instruction. Based on the 2016 Mississippi College- and Career-Readiness Standards, this document provides a close analysis of the requirements for student mastery. Because of the rigor and depth of the Standards, scaffolding instruction to meet the needs of all learners is essential to individual success. The Scaffolding Document will aid teachers' understanding of how to teach the Standards through a natural progression of student mastery.

Scaffolding Document

The primary purpose of the 2016 Mississippi College- and Career-Readiness Standards Scaffolding Document is to provide teachers with a deeper understanding of the Standards as they plan for classroom instruction. Based on the 2016 Mississippi College- and Career-Readiness Standards, this document provides a close analysis of the requirements for student mastery. Because of the rigor and depth of the Standards, scaffolding instruction to meet the needs of all learners is essential to individual success. The Scaffolding Document will aid teachers' understanding of how to teach the Standards through a natural progression of student mastery.

Rigor is also infused through the requirement that students read increasingly complex texts through the grades. Students advancing through the grades are expected to meet each year’s grade-specific standards and retain or further develop skills and understandings mastered in preceding grades.

The CCR anchor standards and high school grade-specific standards work in tandem to define college and career readiness expectations—the former providing broad standards, the latter providing additional specificity.

Integration of Knowledge and Ideas	
RL.12.7	Analyze multiple interpretations of a story, drama, or poem (e.g., recorded or live production of a play or recorded novel or poetry), evaluating how each version interprets the source text. (Include at least one play by Shakespeare and one play by an American dramatist.)

Scaffolding Document

The primary purpose of the 2016 Mississippi College- and Career-Readiness Standards Scaffolding Document is to provide teachers with a deeper understanding of the Standards as they plan for classroom instruction. Based on the 2016 Mississippi College- and Career-Readiness Standards, this document provides a close analysis of the requirements for student mastery. Because of the rigor and depth of the Standards, scaffolding instruction to meet the needs of all learners is essential to individual success. The Scaffolding Document will aid teachers' understanding of how to teach the Standards through a natural progression of student mastery.

The Scaffolding Document can be found at <http://www.mde.k12.ms.us/ESE/ccr>.

SREB Literacy Ready Course

Grade 12

1 English Credit

In 2011, SREB began forming a regional partnership of states and experts to develop a readiness course in disciplinary literacy. The courses were designed to help college-bound students reach their state’s college and career-readiness benchmarks before high school graduation.

The Readiness Courses is designed to assist students who are preparing for postsecondary education—meaning they do not reach the state’s college- and career-readiness benchmarks on either the ACT, SAT, or other assessment—to become prepared and reach those benchmarks.

This course is best suited for the middle range of students, not those who can succeed in Advanced Placement courses or who are severely behind. The course is built with rigor, innovative instructional strategies, and a concentration on contextual learning that departs from procedural memorization and focuses on engaging the students in a real-world context. The course provides literacy strategies that allow students to read and comprehend all manner of texts and genres in every core discipline. In short, this course targets students with weaknesses and college-ready skill gaps and re-educate them in new ways to ensure they are prepared for postsecondary-level pursuits.

The course is available free of charge to any district, school or teacher who wishes to download it from the SREB website, after a simple registration process. The full course and additional resources, including informational publications, policy briefs, state information and slide presentations, is also available on the website at SREB.org/Ready.

The SREB Readiness Course titled Literacy Ready is an innovative, dynamic course built to help students master the literacy skills needed for three core subject areas — English, social science and science. Literacy Ready consists of six units: two in history, two in English and two in science. Content of the discipline is at the forefront of the curriculum; while the disciplinary literacy skills are emphasized through reading and writing assignments based on the content. Units are focused on truly understanding how to read and interpret texts in the discipline on a college level. They are designed to be used as steppingstones, with the first module in each subject less rigorous and demanding than the last.

English (Supplemental Fourth-Year or Senior English)

Both units are designed to address the following essential question: “How is the exponential increase of information that we process in all forms of media affecting the way we live?”

Unit 1: Informational

The first unit engages students in reading informational text from Nicholas Carr’s *The Shallows: What the Internet is Doing to Our Brains*, as well as a number of related supplemental texts. Students practice the following reading skills with an English disciplinary focus: literary epistemology; reading for argument, claim and evidence; reading for rhetorical strategies and patterns; and reading for internal and external connections. The unit conclusion engages students in collecting evidence for a stance-based synthesis presentation on a topic drawn from the central text. Students use feedback received from peers and from the teacher to revise their syntheses and submit a synthesis essay.

Unit 2: Literary

The second unit moves into literary study, using *Ubik* by Philip K. Dick as the central text. In this unit, students read the central text and a variety of related supplemental texts. They practice the following reading skills with an English disciplinary focus: literary epistemology, close reading; inference, interpretation of rhetorical strategies and patterns; and reading for internal and external connections. The unit conclusion involves students in collecting and presenting evidence for a literary argument essay on one of three topics related to the central text. With a draft of the literary argument in hand, students participate in a debate related to a common question drawn from the theme of the novel.

Science (Biology)

Each unit has a different theme associated with science. The first unit evaluates science claims in health and nutrition, while the second requires students to dig further to understand DNA structure and the future of biotechnology.

Unit 1: Nutrition

In this unit, students are introduced to disciplinary literacy in the sciences. Students learn strategies for reading multiple types of text, including science textbooks, research articles and news articles. They also learn a variety of ways to write about science—from personal reflection to public consumption—and to comprehend science information in multiple representations, including animations, diagrams, charts and tables.

Unit 2: DNA and Biotechnology

In this unit, students extend their understanding of reading and writing in the sciences as they read research articles and textbook material, take notes from lecture videos and make predictions using scientific models. The text material in this second science unit is more complex in both content and composition than the material in the first unit. Additionally, students are asked to write in more depth as they prepare and present an evidence-based scientific poster in a research symposium.

Social Science (U.S. History or Government)

Units are unified by the topic “concepts of liberty and freedom.”

Unit 1: Civil Rights Movement

The first unit focuses on the Civil Rights Movement and the changes that took place over the period of the 1960s. Students draw information from a textbook chapter, a film, a lecture, and a number of primary source documents as they learn to read history, to recognize implicit and explicit claims and evidence, to write a historical account and to form arguments.

Unit 2: U.S. Foreign Affairs

The second unit focuses on U.S. involvement in foreign affairs: the Cuban Missile Crisis and the Vietnam War. In this unit, students read multiple texts as well, but more emphasis is placed on writing historical arguments based on their reading. The texts and sources in this unit are more complex than in the first.

Technical and Workplace Writing

Grades 9-12

.5 or 1 English Credit

The Technical and Workplace Writing course focuses on the various kinds of written communication currently occurring in a variety of workplaces and careers. In this course, students examine actual examples of written materials produced to communicate within the workplace as well as outside the workplace for the customer and general public. Through reviewing examples and through instruction, students will gain a sense of general principles of communication, learn how audience and purpose shape the form and content of the written piece, and discern how organization, wording, accuracy and specificity of details, typography, visuals, design, grammar, usage, and mechanics contribute to effective communication. Students will apply what they have learned by creating a variety of kinds of written communication. Since conveying information is at the heart of much of workplace and technical writing, students will practice gathering information through research as well as communicate information through various kinds of writing.

The course should be taught so that it offers challenge. Writings should include pieces requiring more sophistication or complexity: delivering or justifying news or a stance, persuading or manipulating the reader's opinions or emotions, and explaining complex processes. Students will produce individual pieces as well as participate in group review of their writings. Through these experiences of working with others, they will practice the language skills of explaining, persuading, and negotiating, and learn the importance and effect of their words.

World Literature

Grades 9-12

.5 or 1 English Credit

The World Literature course is an examination of literary works that have contributed significantly to the thinking of humankind and have contributed greatly to various cultures. In this course, students will read a variety of masterpieces and influential literary works. The course may be organized by theme, genre, or chronology. The one-semester World Literature course may focus mainly on one time period or span centuries to show the range of literary heritage, whereas the one-year course will require reading of literature from the ancient classical period to the twentieth century. In either case, the teacher will need to determine whether the course will include mainly one or two genres or cover many genres, such as plays, poetry, novels, and short stories. The teacher also has the freedom to determine the particular countries and cultures that the works will represent. In the one-semester course, however, at least one work should be chosen to represent the literature of each: (a) Classical Greece or Rome, (b) Great Britain, (c) Europe, (d) the Americas, and (e) either Asia or Africa.

Reading Literature	
RL.9-10.1	Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

RL.9-10.5	Analyze how an author's choices concerning how to structure a text, order events within it (e.g., parallel plots), and manipulate time (e.g., pacing, flashbacks) create such effects as mystery, tension, or surprise.
RL.9-10.6	Analyze a particular point of view or cultural experience reflected in a work of literature from outside the United States, drawing on a wide reading of world literature.
RL.9-10.7	Analyze the representation of a subject or a key scene in two different artistic mediums, including what is emphasized or absent in each treatment (e.g., Auden's "Musée des Beaux Arts" and Breughel's Landscape with the Fall of Icarus).
RL.9-10.8	Not applicable to literature.
RL.9-10.9	Analyze how an author draws on and transforms source material in a specific

	work (e.g., how Shakespeare treats a theme or topic from Ovid or the Bible or how a later author draws on a play by Shakespeare).

Advanced Placement: English Language and Composition

Grades 9-12

1 English Credit

The College Board, a national organization, sponsors this course, through which college credit may be earned if the student chooses to take and passes the AP examination and if the college in question accepts the credit. To teach this course for the first time or for information, teachers should contact their principal, guidance counselor, or AP coordinator at their school. If further assistance or an order form for the teacher's guide and other helpful materials is needed, contact:

An AP course in English Language and Composition engages students in becoming skilled readers of prose written in a variety of rhetorical contexts, and in becoming skilled writers who compose for a variety of purposes. Both their writing and their reading should make students aware of the interactions among a writer's purposes, audience expectations, and subjects, as well as the way genre conventions and the resources of language contribute to effectiveness in writing.⁷

According to the College Board, the goals of an AP English Language and Composition course are diverse because the college composition course is one of the most varied in the curriculum. Although the college course provides students with opportunities to write about a variety of subjects from a variety of disciplines and to demonstrate an awareness of audience and purpose, the overarching objective in most first-year writing courses is to enable students to write effectively and confidently in their college courses across the curriculum and in their professional and personal lives. Most composition courses emphasize the expository, analytical and argumentative writing that forms the basis of academic and professional communication, as well as the personal and reflective writing that fosters the development of writing facility in any context. In addition, most composition courses teach students that the expository, analytical and argumentative writing they must do in college is based on reading as well as on personal experience and observation. Composition courses, therefore, teach students to read primary and secondary sources carefully, to synthesize material from these texts in their own compositions, and to cite sources using conventions recommended by professional organizations such as the Modern Language Association (MLA), the University of Chicago Press (The Chicago Manual of Style), the American Psychological Association (APA) and the Council of Biology Editors (CBE).

As in the college course, the purpose of the AP English Language and Composition course is to enable students to read complex texts with understanding and to write prose of sufficient

⁷ This description is taken from the Advanced Placement Course Description.

richness and complexity to communicate effectively with mature readers. An AP English Language and Composition course should help students move beyond such programmatic responses as the five-paragraph essay that provides an introduction with a thesis and three reasons, body paragraphs on each reason, and a conclusion that restates the thesis. Although such formulaic approaches may provide minimal organization, they often encourage unnecessary repetition and fail to engage the reader. Students should be encouraged to place their emphasis on content, purpose and audience and to allow this focus to guide the organization of their writing.

College writing programs recognize that skill in writing proceeds from students' awareness of their own composing processes: the way they explore ideas and draft and revise their work. This experience of the process of composing is the essence of the first-year writing course, and the AP English Language and Composition course should emphasize this process, asking students to write essays that proceed through several stages or drafts, with revision aided by teacher and peers. Although these extended, revised essays are not part of the AP Exam, the experience of writing them will help make students more self-aware and flexible writers and thus may help their performance on the exam itself. The various AP English Language Released Exams and AP Central® (www.apcentral.collegeboard.com) provide sample student essay responses to exercises that can be useful as timed writing assignments and as the basis for extended writing projects.

An AP English Language and Composition course may be organized in a variety of ways. It might be organized thematically around a group of ideas or issues, using a variety of works and examining rhetorical strategies and stylistic choices. A course focusing on the theme of liberty, for example, might use such writers as John Stuart Mill, Frederick Douglass, Toni Morrison, Susan B. Anthony, Joseph Sobran, Elie Wiesel, Emile Zola and Mary Wollstonecraft to examine the wealth of approaches to subject and audience that these writers display. Another possibility is to organize a course around sequences of assignments devoted to writing in particular forms (argumentative, narrative, expository) or to group readings and writing assignments by form, theme or voice, asking students to identify writers' strategies and then practice them themselves. Still another alternative is to use genre as an organizing principle for a course, studying how the novel, compared to the autobiography, offers different possibilities for writers, and how classical debate or argument influences us in ways that are not the same as those used in consensus building. The study of language itself — differences between oral and written discourse, formal and informal language, historical changes in speech and writing — is often a productive organizing strategy for teachers.

Whatever form the course takes, students write in both informal and formal contexts to gain authority and learn to take risks in writing. Imitation exercises, journal keeping, collaborative writing and in-class responses are all good ways of helping students become increasingly aware of themselves as writers and of the techniques employed by the writers they read. As well as engaging in varied writing tasks, students become acquainted with a wide variety of prose styles from many disciplines and historical periods and gain understanding of the connections between writing and interpretive skill in reading (see the AP English Language and Composition Teacher's Guide for ideas on readings and sample curricula). Concurrently, to reflect the

increasing importance of graphics and visual images in texts published in print and electronic media, students are asked to analyze how such images both relate to written texts and serve as alternative forms of text themselves. In addition, the informed use of research materials and the ability to synthesize varied sources (to evaluate, use and cite sources) are integral parts of the AP English Language and Composition course. Students move past assignments that allow for the uncritical citation of sources and, instead, take up projects that call on them to evaluate the legitimacy and purpose of sources used. One way to help students synthesize and evaluate their sources in this way is the researched argument paper.

Research helps students to formulate varied, informed arguments. Unlike the traditional research paper, in which works are often summarized but not evaluated or used to support the writer's own ideas, the researched argument requires students to consider each source as a text that was itself written for a particular audience and purpose. Researched argument papers remind students that they must sort through disparate interpretations to analyze, reflect upon, and write about a topic. When students are asked to bring the experience and opinions of others into their essays in this way, they enter into conversations with other writers and thinkers. The results of such conversations are essays that use citations for substance rather than show, for dialogue rather than diatribe.

While the AP English Language and Composition course assumes that students already understand and use Standard English grammar, it also reflects the practice of reinforcing writing conventions at every level. Therefore, occasionally the exam may contain multiple-choice questions on usage to reflect the link between grammar and style. The intense concentration on language use in the course enhances students' ability to use grammatical conventions appropriately and to develop stylistic maturity in their prose. Stylistic development is nurtured by emphasizing the following:

- a wide-ranging vocabulary used appropriately and effectively;
- a variety of sentence structures, including appropriate use of subordination and coordination;
- logical organization, enhanced by specific techniques to increase coherence, such as repetition, transitions and emphasis;
- a balance of generalization and specific illustrative detail; and
- an effective use of rhetoric, including controlling tone, establishing and maintaining voice, and achieving appropriate emphasis through diction and sentence structure.

When students read, they should become aware of how stylistic effects are achieved by writers' linguistic choices. Since imaginative literature often highlights such stylistic decisions, fiction and poetry clearly can have a place in the AP English Language and Composition course. The main purpose of including such literature is to aid students in understanding rhetorical and linguistic choices, rather than to study literary conventions.

Because the AP course depends on the development of interpretive skills as students learn to write and read with increasing complexity and sophistication, it is intended to be a full-year course. Teachers at schools that offer only a single semester block for AP are encouraged to advise their AP English Language and Composition students to take an additional semester of advanced English in which they continue to practice the kind of writing and reading emphasized in the AP class. Upon completing the AP English Language and Composition course, then, students should be able to:

- analyze and interpret samples of good writing, identifying and explaining an author’s use of rhetorical strategies and techniques;
- apply effective strategies and techniques in their own writing;
- create and sustain arguments based on readings, research and/or personal experience;
- write for a variety of purposes;
- produce expository, analytical and argumentative compositions that introduce a complex central idea and develop it with appropriate evidence drawn from primary and/or secondary sources, cogent explanations and clear transitions;
- demonstrate understanding and mastery of standard written English as well as stylistic maturity in their own writings;
- demonstrate understanding of the conventions of citing primary and secondary sources;
- move effectively through the stages of the writing process, with careful attention to inquiry and research, drafting, revising, editing and review;
- write thoughtfully about their own process of composition;
- revise a work to make it suitable for a different audience;
- analyze image as text; and
- evaluate and incorporate reference documents into researched papers.

An AP English Literature and Composition course engages students in the careful reading and critical analysis of imaginative literature. Through the close reading of selected texts, students deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readers. As they read, students consider a work's structure, style and themes, as well as such smaller-scale elements as the use of figurative language, imagery, symbolism and tone.⁸

The course includes intensive study of representative works from various genres and periods, concentrating on works of recognized literary merit such as those by the authors listed on pages 52–53. The pieces chosen invite and reward rereading and do not, like ephemeral works in such popular genres as detective or romance fiction, yield all (or nearly all) of their pleasures of thought and feeling the first time through. The AP English Literature and Composition Development Committee agrees with Henry David Thoreau that it is wisest to read the best books first; the committee also believes that such reading should be accompanied by thoughtful discussion and writing about those books in the company of one's fellow students.

Reading

Reading in an AP course is both wide and deep. This reading necessarily builds upon and complements the reading done in previous English courses so that by the time students complete their AP course, they will have read works from several genres and periods — from the 16th to the 21st century. More importantly, they will have gotten to know a few works well. In the course, they read deliberately and thoroughly, taking time to understand a work's complexity, to absorb its richness of meaning, and to analyze how that meaning is embodied in literary form. In addition to considering a work's literary artistry, students reflect on the social and historical values it reflects and embodies. Careful attention to both textual detail and

historical context provides a foundation for interpretation, whatever critical perspectives are brought to bear on the literary works studied.

A generic method for the approach to such close reading involves the following elements: the experience of literature, the interpretation of literature and the evaluation of literature. By experience, we mean the subjective dimension of reading and responding to literary works, including precritical impressions and emotional responses. By interpretation, we mean the analysis of literary works through close reading to arrive at an understanding of their multiple meanings. By evaluation, we mean both an assessment of the quality and artistic achievement of literary works and a consideration of their social and cultural values. All three of these aspects of reading are important for an AP English Literature and Composition course.

Moreover, each corresponds to an approach to writing about literary works. Writing to understand a literary work may involve writing response and reaction papers, along with annotation, freewriting and keeping some form of a reading journal. Writing to explain a literary work involves analysis and interpretation and may include writing brief focused analyses on aspects of language and structure. Writing to evaluate a literary work involves making and explaining judgments about its artistry and exploring its underlying social and cultural values through analysis, interpretation and argument.

In short, students in an AP English Literature and Composition course read actively. The works taught in the course require careful, deliberative reading. And the approach to analyzing and interpreting the material involves students in learning how to make careful observations of textual detail, establish connections among their observations, and draw from those connections a series of inferences leading to an interpretive conclusion about the meaning and value of a piece of writing.

Most of the works studied in the course were written originally in English, including pieces by African, Australian, Canadian, Indian and West Indian authors. Some works in translation may also be included (e.g., Greek tragedies, Russian or Latin American fiction). The actual choice is the responsibility of the AP teacher, who should consider previous courses in the school's curriculum. In addition, the AP teacher should ensure that AP students will have studied, at some point in their high school years, literature from both British and American writers, as well as works written from the 16th century to contemporary times. In addition to British and American literature, teachers are encouraged to include in their curricula other literature in English. (See the AP English Literature and Composition Teacher's Guide for sample curricula.) In an ongoing effort to recognize the widening cultural horizons of literary works written in English, the AP English Literature Development Committee will consider and include diverse authors in the representative reading lists. Issues that might, from a specific cultural viewpoint, be considered controversial, including references to ethnicities, nationalities, religions, races, dialects, gender or class, are often represented artistically in works of literature. The Development Committee is committed to careful review of such potentially controversial material. Still, recognizing the universal value of literary art that probes difficult and harsh life experiences and so deepens understanding, the committee emphasizes that fair representation

of issues and peoples may occasionally include controversial material. Since AP students have chosen a program that directly involves them in college-level work, the AP English Literature and Composition Exam depends on a level of maturity consistent with the age of 12th-grade students who have engaged in thoughtful analysis of literary texts. The best response to a controversial detail or idea in a literary work might well be a question about the larger meaning, purpose or overall effect of the detail or idea in context. AP students should have the maturity, the skill and the will to seek the larger meaning through thoughtful research. Such thoughtfulness is both fair and owed to the art and to the author.

Although neither linguistic nor literary history is the principal focus in the AP course, students gain awareness that the English language that writers use has changed dramatically through history, and that today it exists in many national and local varieties. They also become aware of literary tradition and the complex ways in which imaginative literature builds upon the ideas, works and authors of earlier times. Because the Bible and Greek and Roman mythology are central to much Western literature, students should have some familiarity with them. These religious concepts and stories have influenced and informed Western literary creation since the Middle Ages, and they continue to provide material for modern writers in their attempts to give literary form to human experience. Additionally, the growing body of works written in English reflecting non-Western cultures may require students to have some familiarity with other traditions.

Writing

Writing is an integral part of the AP English Literature and Composition course and exam. Writing assignments focus on the critical analysis of literature and include expository, analytical and argumentative essays. Although critical analysis makes up the bulk of student writing for the course, well-constructed creative writing assignments may help students see from the inside how literature is written. Such experiences sharpen their understanding of what writers have accomplished and deepen their appreciation of literary artistry. The goal of both types of writing assignments is to increase students' ability to explain clearly, cogently, even elegantly, what they understand about literary works and why they interpret them as they do. To that end, writing instruction includes attention to developing and organizing ideas in clear, coherent and persuasive language. It includes study of the elements of style. And it attends to matters of precision and correctness as necessary. Throughout the course, emphasis is placed on helping students develop stylistic maturity, which, for AP English, is characterized by the following:

- a wide-ranging vocabulary used with denotative accuracy and connotative resourcefulness;
- a variety of sentence structures, including appropriate use of subordinate and coordinate constructions;
- a logical organization, enhanced by specific techniques of coherence such as repetition, transitions and emphasis;

- a balance of generalization with specific illustrative detail; and
- an effective use of rhetoric, including controlling tone, maintaining a consistent voice, and achieving emphasis through parallelism and antithesis.

The writing required in an AP English Literature and Composition course is thus more than a mere adjunct to the study of literature. The writing that students produce in the course reinforces their reading. Since reading and writing stimulate and support one another, they are taught together in order to underscore both their common and their distinctive elements.

It is important to distinguish among the different kinds of writing produced in an AP English Literature and Composition course. Any college-level course in which serious literature is read and studied includes numerous opportunities for students to write and rewrite. Some of this writing is informal and exploratory, allowing students to discover what they think in the process of writing about their reading. Some of the writing involves research, perhaps negotiating differing critical perspectives. Much writing involves extended discourse in which students develop an argument or present an analysis at length. In addition, some writing assignments should encourage students to write effectively under the time constraints they encounter on essay exams in college courses in many disciplines, including English.

The various AP English Literature and Composition Released Exams and AP Central provide sample student essay responses written under exam conditions —with an average time of 40 minutes for students to write an essay response. These essays were written in response to two different types of questions: (1) an analysis of a passage or poem in which students are required to discuss how particular literary elements or features contribute to meaning; and (2) an “open” question in which students are asked to select a literary work and discuss its relevant features in relation to the question provided. Students can be prepared for these free-response questions through exercises analyzing short prose passages and poems and through practicing with “open” analytical questions. Such exercises need not always be timed; instead, they can form the basis for extended writing projects.

Because the AP course depends on the development of interpretive skills as students learn to write and read with increasing complexity and sophistication, the AP English Literature and Composition course is intended to be a full-year course. Teachers at schools that offer only a single semester block for AP are encouraged to advise their AP English Literature and Composition students to take an additional semester of advanced English in which they continue to practice the kind of writing and reading emphasized in their AP class.
