Morristown-Hamblen High School West

Program of Studies Profile

Morristown-Hamblen High School West is accredited by the Tennessee State Department of Education and the Southern Association of Colleges and Schools.

Mission Statement

Morristown-Hamblen High School West will provide a student-centered educational program, which promotes the enlightening of our students in three basic areas: communication, problem-solving and responsibility.

Administrators

Mr. Jeff Kinsler, Principal
Mr. Calvin Decker, Assistant Principal
Mr. Timothy Landefeld, Assistant Principal
Dr. Alvin Sanders, Assistant Principal (Interim)
Main Office: 581-1600

School Counselors

Mrs. Kelly Ezell (Students A – C)
Mrs. Tenesha Bullington (D-He)
Mrs. Erica Gillett (Students Hi-Mi)
Mrs. Renae Byrd (Students Mo – R)
Mrs. Melanie Justis (Students S - Z)
Counseling Office: 581-1600 ext. 1010

Program Planning

Developing a program of study is a vital step in the planning of educational and career goals. At Morristown-Hamblen High School West, it is the responsibility of the parents/guardians and students to exercise the initiative in developing the student's program. Other individuals who have a responsibility to assist in program planning are the school counselors, teachers and principals.

Graduation Requirements

Content Areas & Number of Required Credits	Required Courses	Graduation Requirements You Have Met
English – 4 credits	English I, II, III or equivalent, IV or equivalent <i>Students taking English Language Development courses may use 4 of these credits to count for 2 of their required English credits.</i>	<input type="checkbox"/> English I <input type="checkbox"/> English II <input type="checkbox"/> English III <input type="checkbox"/> English IV
Math – 4 credits Students must be enrolled in a mathematics course each year.	Algebra I, Geometry, Algebra II, 4th Math Class (upper level math) <i>AP Computer Science Principles or AP Physics may be used to meet the upper level math requirement for student who have met the ACT Math benchmark score of 22.</i>	<input type="checkbox"/> Algebra I <input type="checkbox"/> Geometry <input type="checkbox"/> Algebra II <input type="checkbox"/> 4 th Math/Upper Level Math
Science – 3 credits	Biology, Chemistry OR Physics, 3rd lab science	<input type="checkbox"/> Biology <input type="checkbox"/> Chemistry OR Physics <input type="checkbox"/> 3 rd lab science
Social Studies – 4 credits	World History & Geography, U.S. Government, U.S. History, Economics/Personal Finance <i>Marketing Education may substitute for the Economics portion, but students must take a separate Personal Finance course.</i>	<input type="checkbox"/> World History & Geography <input type="checkbox"/> U.S. Government <input type="checkbox"/> U.S. History <input type="checkbox"/> Economics/Personal Finance
Wellness & Physical Education – 1.5 credits	Lifetime Wellness (1 credit), Physical Education (0.5 credit) <i>The Physical Education requirement may be satisfied by substituting an equivalent time of physical activity in other areas including but not limited to marching band, cheerleading, interscholastic athletics. One credit of JROTC may substitute for the PE 0.5 credit requirement.</i>	<input type="checkbox"/> Lifetime Wellness <input type="checkbox"/> Physical Education or equivalent
Fine Art – 1 credit*	Fine Art courses (choose from Visual Art, Band, Choir, and Theatre Arts)	<input type="checkbox"/> Fine Art
World Language – 2 credits in the same language*	World Language I, II (choose from French, German, Latin, Spanish, Heritage Spanish)	<input type="checkbox"/> World Language I <input type="checkbox"/> World Language II
Elective Focus – 3 credits	Every student must earn 3 credits in an approved Academic or CTE focus area <i>Students completing a CTE elective focus must complete 3 units in the same CTE program area or state approved program of study (see p. 5).</i>	Elective Focus Area: _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____
Electives – 5.5 credits		
Total = 28 credits		
*These requirements may be waived for students who are sure they are not going to attend college. Students will take additional courses to enhance and expand the elective focus.

- Three credits in a pathway are required for graduation

- DE = Dual Enrollment

- All CTE Elective Focus options include dual enrollment courses at the 3rd and 4th levels; see your school counselor for more information

Graduation Recognitions

Graduate with Honors

Tennessee graduates who earn at or above the college readiness benchmark scores on the ACT (or SAT equivalent scores) will graduate with Honors. The readiness scores are:

Subject	ACT Score
English	18
Mathematics	22
Reading	22
Science	23

Graduate with Distinction

Students will be recognized as graduating with “state distinction” by attaining a B or better average and completing one (1) of the following

- Earn an industry credential that was on the list promoted by the Department of Education at the time the student earned it;
- Participate in at least one of the Governor's Schools;
- Participate in one of the state’s ALL State musical organizations;
- Earn statewide recognition or award at a skill- or knowledge-based state tournament, convention, or competition hosted by a statewide student organization, and/or qualify for national recognition by a national student organization;
- Be selected as a National Merit Finalist or Semi-Finalist;
- Attain a score of 31 or higher composite score on the ACT or SAT equivalent;
- Attain a score of 3 or higher on at least two Advanced Placement exams; or
- Earn 12 or more semester hours of postsecondary credit.

Tennessee Tri-Star Scholar

A student who earns a composite score of nineteen (19) or higher on the ACT, or an equivalent score on the SAT, and earns a capstone industry certification as promoted by the Department of Education, shall be recognized as a Tennessee Tri-Star Scholar upon graduation from high school.

Work Ethic Distinction

The Work Ethic Distinction is a workforce readiness credential that can be earned by high school seniors. Intended to promote the importance of work ethic among high school students, the Work Ethic Distinction is awarded to those who successfully demonstrate a number of standards. Recognizing the value of these standards, participating employers agree to grant an interview to any qualified applicant who applies for an open position and has successfully completed the Work Ethic Distinction.

Participating students will receive a list of [Work Ethic Distinction Standards](#) which includes 13 achievement categories. Each achievement category has one, two, or three subcategories that are assigned a point value. Students who sign up for the Work Ethic Distinction must complete enough of the goals set out in the achievement categories to score 32 points in order to receive the Distinction.

National Career Readiness Certificate (WorkKeys)

Students graduating with a gold or platinum medal on National Career Readiness Certificate (WorkKeys) shall be recognized at their graduation ceremony.

Tennessee Seal of Biliteracy

Students who have attained a high level of proficiency in speaking, reading, and writing in one or more languages in addition to English will be awarded with the Tennessee Seal of Biliteracy.

Students receiving this recognition shall meet the following criteria:

- Complete all English language arts (ELA) requirements for graduation with an overall grade point average of 3.0 or higher in those classes; *and*
- Demonstrate English proficiency through one (1) of the following:
 - Score at the on-track or mastered level on each ELA end-of-course assessment taken;
 - Score three (3) or higher on an Advanced Placement English Language or English Literature exam;
 - Score 22 or higher on the ACT Reading subtest or 480 or higher on the SAT evidence-based reading and writing subtest; *or*
 - Score 4.5 or higher on the WIDA Access, if the student is an English learner; *and*
- Demonstrate proficiency in a world language through one (1) of the following:
 - Score Intermediate-Mid or higher in all three (3) communication modes (interpersonal, interpretive and presentational) on a world language proficiency assessment recognized by the American Council on the Teaching of Foreign Languages (ACTFL) or comparable assessment;
 - Score three (3) or higher on an Advanced Placement world language exam. B1 or higher on a Cambridge International world language exam; or four (4) or higher on an International Baccalaureate world language exam;
 - Score at the Intermediate level or higher on the Sign Language Proficiency Interview (SLPI: ASL);
 - Pass a foreign government's approved non-English language exam, or score at a level comparable to Intermediate-mid or higher on the ACTFL proficiency scale on another country's secondary level standardized exam in the country's non- English native language;
 - Score at a level comparable to Intermediate-Mid or higher on the ACTFL proficiency scale on an LEA developed alternate model. Alternate models may only be used if the identified world language does not have an associated nationally recognized assessment and must address communication, cultures, connections, comparisons, and communities.

Community Service

Students who voluntarily complete at least ten (10) hours of community service each semester the student attends a public high school shall be recognized at their graduation ceremony.

Grading System

Grade reporting is done at the end of each nine weeks. The following grading scale is used:

A	B	C	D	F
93 - 100	85 - 92	75 - 84	70 - 74	0 - 69

Grades given at the end of each nine-week period will be determined from daily work and oral and written assignments. In computing the grade, the teacher will weigh the value of grades given for various assignments within the nine-week period. This procedure will enable the teacher to allow for individual differences in grading. Grades for the term will be determined by averaging the two nine-week averages and the term exam. The following courses shall include the addition of the following number of percentage points to the grades used to calculate the semester average: Honors – 3 points; Local/Statewide Dual Credit (student sit for associated exam), Industry Certification-Aligned (student must sit for associated exam), and Dual Enrollment – 4 points; Advanced Placement – 5 points (students must sit for associated exam). Progress reports are sent home at the mid-point of each nine-week grading period.

The GPA (grade point average) is the average of the total number of grade points earned in classes divided by the total number of classes taken. Extra points are calculated into the weighted GPA for certain classes. In order to be awarded extra points for dual credit, industry certification-aligned, and Advanced Placement courses, students must sit for the associated exam. Grade points are awarded as follows:

Regular Classes	A = 4	B = 3	C = 2	D = 1	F = 0
Honors, Industry Cert. Aligned Classes	A = 4.5	B = 3.5	C = 2.5	D = 1.5	F = 0
Dual Credit Classes	A = 4.75	B = 3.75	C = 2.75	D = 1.75	F = 0
AP & Dual Enrollment Classes	A = 5	B = 4	C = 3	D = 2	F = 0

Work Based Learning

With the exception juniors and seniors who are enrolled in Work-Based Learning (WBL) courses, all students are required to remain in school for all four periods. Students enrolled in WBL may be dismissed at 1:20 pm in order to report to work if their job requires them to report to work before 3:00 pm, if they have met all other graduation requirements, and if they have parental permission.

Athletic Eligibility

To be eligible to participate in athletic contests, a student must be in good standing, meet all TSSAA regulations, have insurance, have the permission of his/her parent(s) or legal guardian(s), have a physical examination, and live with his/her parent(s) or legal guardian(s) in the Morristown-Hamblen High School West zone. Incoming freshmen must have been academically promoted to the ninth grade in order to be eligible. Students in grades ten through twelve must have earned six credits the preceding school year. All credits must be earned by the first day of the school year. Subjects passed

during Summer School will be considered part of the preceding school year. A student who is ineligible first term may become eligible second term by passing three courses first term and meeting the other aforementioned requirements. A student may not participate in athletics if his/her 19th birthday occurs on or before August 1. Beginning with the ninth grade, a student is eligible to participate in athletics for eight consecutive terms.

NCAA Clearinghouse

In order to participate in college athletics and qualify for certain athletic financial aid, you must register with the NCAA Clearinghouse and meet academic and amateurism eligibility standards. You may register online at <http://www.ncaaclearinghouse.net>. Upon registration, students will need to complete a transcript request form in the Counseling Office. Additionally, the NCAA requires prospects who intend to enroll at NCAA Division I and Division II institutions to supply official ACT or SAT scores to the NCAA Clearinghouse directly from the testing agencies. The test code for NCAA on the ACT is 9999. Test scores on an official high school transcript will no longer be usable for NCAA purposes.

Course Selection and Schedule Changes

The courses that students select will be the basis for the employment of teachers and the development of the master schedule for the upcoming school year. Accordingly, when students and parents sign the course selection sheet, they are considered to have contracted to participate in all requested courses or chosen alternates.

Be sure to list alternates for all elective courses. Otherwise, if the electives chosen are not available, courses will be scheduled at the discretion of the counselor or principal. Schedule changes will be limited. Counseling Office summer hours are to be determined.

Consideration for a schedule change will be made:

1. If a student wishes to attempt to balance the academic load. (These requests will be considered on a space available basis only.)
2. If a student wishes to sequence courses due to special circumstances. (These requests will be considered on a space available basis only.)
3. If a student received a course for which he/she did not register. (When a student selects an alternate, the student has “registered” for that course.)
4. If a student passed a course that he/she assumed he/she would fail.
5. If a student failed a course required for graduation.
6. If a student failed a course, registered for the course again and was assigned to the same instructor. (Where possible and on a space available basis, the request will be considered.). It is the student’s responsibility to contact the counseling office should he/she fail a course required for graduation and need to retake the following semester.

Sequencing Courses

Only one grade level of English may be taken per school year. Principal's permission to take two in one year may be granted in order to allow a student who failed English or other academic course to catch up with his class. Science classes cannot be doubled up in a year in order to finish requirements early but may be doubled in order to reach a more advanced level. This will be done on a space available basis.

Attendance

Attendance is critical to success in high school. By state law, a student is considered truant at 5 unexcused absences and will be placed on an attendance contract. Further unexcused absences may result in referral for truancy review and court. Absences in excess of 10 (unless medical, funeral, or legal excused) result in loss of credit. Students are required to continue attending classes even if credit has been denied.

Testing

By state law, all high school students must take the ACT or SAT before receiving a high school diploma. All juniors are required take the ACT in the spring of their junior year. The test will be administered on a school day, and there is no cost to the student for this exam. In the fall of the senior year, there is an additional opportunity to take the ACT free of charge for all seniors.

TNReady tests are given for English I and II, Algebra I and II, Geometry, U.S. History, and Biology during the semester in which the course is taken.

Students enrolled in U.S. Government and Civics must take and pass a U.S. Civics Test. This is a graduation requirement.

Advanced Placement tests are given in May on the national AP testing days. Students must make a passing score determined by individual colleges/universities to receive college credit.

Rigorous Senior Year

As college admission and job opportunities become more competitive, it is necessary to continue a level of academic rigor. We encourage all students to take challenging courses during their senior year. All seniors are expected to take a Math course, an English course, and an Economics/Personal Finance course during the 12th grade year.

Early Graduation

Candidates for early graduation from Morristown-Hamblen High School West must complete all course requirements, successfully complete all state-mandated test requirements, and earn the 28 credits required for graduation by December of their senior year. Students who would like to be considered for graduation in December of their senior year should submit an application to their school counselor by August 15th of their senior year in high school. Students may participate in graduation in the spring with Principal approval. Diplomas will not be issued until the spring of the student's senior year.

Industry Certifications

Industry certifications are offered through certain Career & Technical Education (CTE) programs and courses. These certifications are aligned with postsecondary and employment opportunities and with the competencies and skills that students should have acquired through their chosen programs of study. Please refer to course descriptions within the list of CTE courses for available industry certifications.

Special Services and Extended Resource Programs

Resource

Grades 9-12

The Special Services Department at Morristown-Hamblen High School West School offers a variety of courses taught on various grade levels which are designed to meet the special needs of students with disabilities. Case managers must approve students to enroll in these courses.

Extended Resource

Grades 9-12

This program is designed to meet the special needs of students with extensive learning disabilities which prohibit their educational needs being met in the traditional classroom environment. Students must be granted permission by their case manager to enroll in this program.

Advanced Placement Program

Morristown-Hamblen High School West School is very proud of its Advanced Placement (AP) Program. Through taking AP courses and tests, you have the opportunity to earn credit or advanced standing at most of the nation's colleges and universities. The AP courses are taught on a college level at the high school. In May, students sit for an AP exam covering the class material. There is a cost for each AP exam imposed by the College Board. This cost varies from year to year – AP teachers will have the new cost each year.

Reasons to take AP level classes:

- get a head start on college-level work.
- improve your writing skills and sharpen your problem-solving techniques.
- develop the study habits necessary for tackling rigorous course work.

- demonstrate your maturity and readiness for college.
- more than 90 percent of four-year U.S. colleges and universities grant credit or placement for qualifying AP Exam grades.

AP Schedule Change Policy

Students and parents need to think about the commitment it takes to be enrolled in AP classes. They are rigorous. The student and parent will have to sign an AP contract committing to the level of work required. **You will not be allowed to drop an AP class.** You will need to do some research to see if the AP program is right for you. Talk to your current teachers and any teacher of an AP class you are considering.

Dual Enrollment

Dual enrollment (DE) students are concurrently enrolled in both high school and a postsecondary institution. There is dual enrollment grant funding to help pay for these classes for eligible juniors and seniors. Please visit www.tn.gov/collegepays for more information regarding dual enrollment grant and to apply for the dual enrollment grant.

One high school credit is given for a 3-hour college class. DE courses may count as credits required for high school graduation. Dual enrollment registration involves several steps that the student takes in conjunction with the postsecondary institution. These steps must be completed prior to the start of the academic semester in order for the student's schedule to reflect the dual enrollment course(s). Each student must also submit a signed West High Dual Enrollment Contract to his/her school counselor before dual enrollment classes will be added to the West High schedule.

The following policy is in place for high school students who choose to take dual enrollment classes at any local postsecondary institute. College grades are typically reported as letters. When no number grade is given by the postsecondary institute, the following conversion chart for college grades to high school grades will apply. These grades include the addition of 4 percentage points, per *Uniform Grading Policy 3.301*.

A = 97	B = 89	C = 79	D = 74	F = 69
--------	--------	--------	--------	--------

It is the student's responsibility to turn in a final college transcript to the Counseling Office to receive high school credit. All college classes must be taken during 1st and/or 4th blocks. High school students will be allowed to come to the high school campus, leave campus, and then return. No attendance points will be added to dual enrollment classes.

Transportation Between West and East

Students who commute to Morristown East from Morristown West are provided transportation on a school bus to transport students between schools at no charge. Students are not allowed to utilize their own transportation when commuting between schools. Please note that not all courses listed in this guide are offered every year and therefore will not appear on this year's registration forms. They are included in this guide with the hope we will be able to offer them in the future.

Course Offerings

English Courses

Creative Writing Intervention

Grade 9

This course is designed to assist incoming freshman students in making a smooth transition into high school. Emphasis will be placed on teaching skills such as reading across the curriculum, organization and time management, project based learning, study skills, and the integration of technology.

English I (H)

Grade 9; TNReady Exam

A course that seeks to integrate the standards of reading, writing, viewing and representing, and speaking and listening, students will work with a wide variety of texts, including traditional works of literature and practical and persuasive forms of communication that involves speaking and listening skills; the course emphasizes communication and critical thinking skills with attention to grammar, paragraph development, theme writing, and introduction to literary analysis.

English I (R)

Grade 9; TNReady Exam

A course that seeks to integrate the standards of reading, writing, viewing and representing, and speaking and listening, students will work with a wide variety of texts, including traditional works of literature and practical and persuasive forms of communication that involve speaking and listening skills; the course emphasizes communication skills with intense attention to grammar, sentence structure, and paragraph development.

English II (H)

Grade 10; TNReady Exam

A course that seeks to integrate the standards of reading, writing, viewing and representing, and speaking and listening, students will work with a wide variety of texts, including traditional works of literature and practical and persuasive forms of communication that involve speaking and listening skills; the course emphasizes communication and critical thinking skills with attention to grammar, essay development, theme writing, and beginning formal literary analysis.

English II (R)

Grade 10; TNReady Exam

A course that seeks to integrate the standards of reading, writing, viewing and representing, and speaking and listening, students will work with a wide variety of texts, including traditional works of literature and practical and persuasive forms of communication that involve speaking and listening skills; the course emphasizes communication skills with intense attention to grammar, sentence structure, essay development, and theme writing.

Advanced Placement English Language and Composition – English III

Grade 11

The purpose of this course is to "engage students in becoming skilled readers of prose written in a variety of periods, disciplines, and rhetorical contexts, and in becoming skilled writers who compose for a variety of purposes." This course is modeled after college composition courses "that teach students to read primary and secondary sources carefully and to synthesize material from these texts in their own compositions." **This class is taken with AP U.S. History in a year-long combined course.**

English III (H)

Grade 11

A course that seeks to perfect the integration of the standards of reading, writing, and viewing and representing, and speaking and listening, students will work with American Literature as the focus of literary works practical and persuasive forms of communication that involve speaking, and listening skills; the course emphasizes communication and critical thinking skills with attention to narrative, argumentative, and informative writing.

English III (R)

Grade 11

A course that seeks to begin perfecting the integration of the standards of reading, writing, viewing and representing, and speaking and listening, students will work with American Literature as the focus of literary works and practical and persuasive forms of communication that involve speaking and skills; the course emphasizes communication and critical thinking skills with attention to narrative, argumentative, and informative writing.

Advanced Placement Literature and Composition - English IV

Grade 12

A concentrated study of composition skills and an in-depth literature study on a college level, using college textbooks. Students are strongly encouraged to take the Advanced Placement test given nationwide in May, with the opportunity of receiving college credit or advanced placement in college. A research paper is required. Summer and fall reading are mandatory and will attribute to overall grading.

English IV (R)

Grade 12

A course that seeks to continue the integration of the standards of reading, writing, and viewing and representing, and speaking and listening, students will work with British Literature as the focus of literary works, and practical and persuasive forms of communication that involve speaking and listening skills; the course emphasizes communication and critical thinking skills with attention to theme writing. The completion of a research paper is required

English Language Development (ELL)

This course is for students whose native or first language is not English. Students are given a test by the ELL teacher in order to enter and exit ELL. This class is required if the specified state score on the TELPA or ELDA is not met. ELL is a year-long course. Each year of ELL may replace up to two English requirements. Two regular English courses are required to meet graduation requirements.

Preparing for ACT

Grades 11-12

Preparing for ACT is a course designed to emphasize the skills necessary for success on college entrance exams, particularly the ACT. Topics include reading with a purpose, note-taking, time management, college applications, application essays, activity resumes, business letters, and career information. Activities promote teamwork and communication skills are utilized.

Mathematics Courses

Placement for freshmen is determined by standardized test scores and teacher recommendation.

Algebra I (R)

Grade 9; TNReady Exam; two credits (year-long class); Prerequisite: This course is for students who had 8th grade math in middle school.

This course emphasizes linear and quadratic expressions, equations, and functions. This course also introduces students to polynomial, rational, and exponential functions with domains in the integers. Students explore the structures of and interpret functions and other mathematical models. Students build upon previous knowledge of equations and inequalities to reason, solve, and represent equations and inequalities numerically and graphically.

Algebra I (H)

Grade 9; TNReady Exam; two credits (year-long class); Prerequisite: This course is for students who were strong in 8th grade math and have their teacher's recommendation to take Honors Algebra 1 or for 8th grade Algebra 1 students whose math teacher recommends additional practice with algebra concepts.

This course covers all of Algebra I but also some additional topics and more challenging problems, thus giving a better background and stronger preparation for all higher mathematics and science courses.

Geometry (H)

Grades 9; TNReady Exam; two credits (year-long class); Prerequisite: This course is for students who had Algebra 1 in 8th grade, passed the class with at least a C, and have their 8th grade teacher's recommendation to proceed to Geometry.

This course covers all of Geometry but also an in-depth study of plane and solid geometry with emphasis on theory and formal proof. It will include an emphasis on algebra vocabulary and advanced algebra topics.

Geometry (H)

Grades 9; TNReady Exam; one term; Prerequisite: This course is for students who excelled in Algebra 1 in 8th grade and have their 8th grade teacher's recommendation.

This course covers all of Geometry but also an in-depth study of plane and solid geometry with emphasis on theory and formal proof. It is recommended for those students who have previously exhibited outstanding mathematical ability and express the desire to pursue enrollment in advanced mathematics.

Geometry (H)

Grades 10; TNReady Exam; one term; Prerequisite: Honors Algebra I

This course covers all of Geometry but also an in-depth study of plane and solid geometry with emphasis on theory and formal proof. It is recommended for those students who have previously exhibited outstanding mathematical ability and express the desire to pursue enrollment in advanced mathematics.

Geometry (R)

Grade 10; TNReady Exam; one term; Prerequisite: Regular Year-Long Algebra I

Geometry emphasizes similarity, right triangle trigonometry, congruence, and modeling geometry concepts in real life situations. Students build upon previous knowledge of similarity, congruence, and triangles to prove theorems and reason mathematically. This course also introduces students to geometric constructions and circles. Students show a progression of mastery and understanding of the use and application of surface area and volume. This course should be taken after Freshman Algebra I (year-long).

Algebra II (R)

Grade 11; TNReady Exam; two credits (year-long class); Prerequisites: Algebra I and Geometry

Algebra II emphasizes polynomial, rational and exponential expressions, equations, and functions. This course also introduces students to the complex number system, basic trigonometric functions, and foundational statistics skills such as interpretation of data and making statistical inferences. Students build upon previous knowledge of equations and inequalities to reason, solve, and represent equations and inequalities numerically and graphically.

Algebra II (H)

Grade 9; TNReady Exam; one term; Prerequisite: At least a B in Honors Geometry (one term) with a teacher recommendation.

A rigorous college prep course designed for students who plan to major in mathematics or related fields in college or who are talented in mathematics. Emphasis is on polynomial, rational and exponential expressions, equations, and functions. This course also introduces students to the complex number system, basic trigonometric functions, and foundational statistics skills such as interpretation of data and making statistical inferences. Students build upon previous knowledge of equations and inequalities to reason, solve, and represent equations and inequalities numerically and graphically.

Algebra II (H)

Grades 10-11; TNReady Exam; one term; Prerequisite: Honors Geometry

A rigorous college prep course designed for students who plan to major in mathematics or related fields in college or who are talented in mathematics. Emphasis is on polynomial, rational and exponential expressions, equations, and functions. This course also introduces students to the complex number system, basic trigonometric functions, and foundational statistics skills such as interpretation of data and making statistical inferences. Students build upon previous knowledge of equations and inequalities to reason, solve, and represent equations and inequalities numerically and graphically.

Bridge Math/Non-SAILS

Grade 12; Prerequisite: Algebra II with an ACT math sub-score 18 or below

Bridge Math is an ACT review of Algebra I, Geometry, and Algebra II, suggested for those students not meeting the math ACT sub-score of 19.

Bridge Math/SAILS (Seamless Alignment and Integrated Learning Support)

Grade 12; Prerequisite: Algebra II with an ACT math sub-score 18 or below

Bridge Math is an ACT review of Algebra I, Geometry, and Algebra II, suggested for those students not meeting the math ACT sub-score of 19. (Based on State Department decisions and upon a student meeting the course requirements, students may earn a remedial college math credit.) SAILS integrates the Tennessee Board of Regents Learning Support (developmental) math competencies with the Department of Education Bridge Math standards. SAILS utilizes a facilitated hybrid instructional model, combining the professional pedagogical expertise of the certified HS math teacher with dynamic properties of multimedia and digital content. Research supports that this blended system of teaching and learning is the most effective at engaging students with their work and increases their success rate.

Applied Mathematical Concepts

Grade 12; Prerequisite: Algebra II with an ACT math sub-score of 19 or above.

For students not planning to major in the physical sciences, engineering, mathematics, or computer science. Concepts includes the following domains and clusters: Financial Mathematics, Linear Programming, Logic and Boolean Algebra, Problem Solving, Investigate Logic, Organize and Interpret Data, Counting and Combinatorial Reasoning, Normal Probability Distribution, and Understand and Use Confidence Intervals.

Pre-Calculus (R) (Statewide Dual Credit)

Grades 11-12; Prerequisite: Algebra II with teacher recommendation

This course is designed for those students who do not intend to take Calculus the following year. Pre-calculus is designed to prepare students for college level STEM focused courses. Students extend their knowledge of the complex number system to use complex numbers in polynomial identities and equations. Topics for student mastery include vectors and matrix quantities, sequences and series, parametric equations, and conic sections. Students use previous knowledge to continue progressing in their understanding of trigonometric functions and using regression equations to model quantitative data. At the end of the course, students will take the Pre-Calculus Statewide Dual Credit exam. Successful completion of the exam will allow students to earn both high school and college Pre-Calculus credit. There is no cost to the student to take the exam.

Pre-Calculus (H)

Grades 11-12; Prerequisite: A or B in Algebra II (H) with teacher recommendation

Pre-calculus is designed to prepare students for college level STEM focused courses. Students extend their knowledge of the complex number system to use complex numbers in polynomial identities and equations. Topics for student mastery include vectors and matrix quantities, sequences and series, parametric equations, and conic sections. Students use previous knowledge to continue progressing in their understanding of trigonometric functions and using regression equations to model quantitative data. This course is recommended for advanced math students, including all students wanting to take AP calculus.

Advanced Placement Statistics

Grades 11-12; Prerequisite: Honors Algebra II with teacher recommendation

AP Statistics is a rigorous, college-level course. All students in this class are required to take the AP Statistics test. Students who are interested in pursuing a college major that requires a Statistics credit should consider taking this course. Statistics is designed to introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The major themes in

Statistics include: interpreting categorical and quantitative data, conditional probability and other rules of probability, using probability to make decisions, and making inferences and justifying conclusions. There is a heavy emphasis on both math and writing skills, as students will be asked to explain, defend, and interpret their work.

Advanced Placement Calculus AB/BC

Grade 11-12; two credits (year-long class); Prerequisite: Pre-Calculus (H) with teacher recommendation

This course is the "core" of all upper level math courses. Because of the nature of the course, college credit must be based on proficiency as results of the AP exam.

Science Courses

Biology I (R)

Grade 9 (TNReady Exam)

This is an introductory course in general biology, designed to meet the Tennessee state standards. This class will cover a wide range of topics that include the cellular basis of life, ecology, photosynthesis and cellular respiration, genetics and biotechnology, diversity of life, and evolution. Ongoing laboratory work and activities will supplement the topics covered.

Biology I (H)

Grade 9 (TNReady Exam)

This introductory course is an accelerated study of living organisms. The class covers all Biology I Tennessee standards: basic life processes, diversity of life to include interactions and interdependence of species, the contributions of men and women to the understanding of biology, the ideas behind the theory of biological evolution, plus current and future biological technologies. Laboratory exercises will be used to reinforce and explore these concepts.

Physical Science (R)/ Physical Science Skills

Prerequisite: Biology

This course includes the study of metric measurements and basic physics principles. The study of electricity as well as light energy, sound energy and waves are included. This course involves the Atomic Theory that includes the role of subatomic particles, the periodic table, and the matter-energy relationships in chemical changes. Math skills are needed for simple computations using formulas and conversions.

Chemistry (R)

Prerequisite: Teacher recommendation

This course is designed to prepare students who plan to attend a 2 year or 4 year college or university. It will cover the structure and interactions of matter, manipulation of chemical quantities through laboratory practices, and problem-solving practices.

Chemistry (H)

Prerequisite: teacher recommendation

Students must be strong in math in order to be successful in honors chemistry. This course is an advanced introductory program in college preparatory chemistry. It blends theory with practice and calculations with descriptive chemistry. Emphasis is on problem-solving skills, atomic and molecular structure, states of matter, and chemical reactions.

Chemistry II (H)

Prerequisites: Chemistry I Honors, Algebra II

This is the second course in the chemistry sequence. This course is **strongly** recommended for those students who plan on majoring in engineering or a field of science in college, as well as those that are interested in a health - related career. Chemistry II is an in-depth, comprehensive study of the topics covered in Chemistry I, but also explores some topics not covered in Chemistry I, such as kinetics and equilibrium. Students must have strong math skills for this course. Laboratory work is an integral part of Chemistry II and is more advanced than Chemistry I. Students will develop their laboratory skills, while applying chemical concepts to real world situations. This course will also serve as a precursor to AP Chemistry and is required before taking AP Chemistry.

Advanced Placement Chemistry

Prerequisite: Chemistry II (H) in the fall followed by AP Chemistry in the spring.

A continuation of Chemistry II, students will refine and master their experimental and analytical abilities in this chemistry course through laboratory and problem-solving situations. Topics will include kinetics, equilibria, thermodynamics and electrochemistry. Students will have the opportunity to test for Advanced Placement college credit in chemistry. This is a rigorous, college level class and is designed for college-bound students interested in majoring in science or engineering.

Physics (R) / Physics Skills

Prerequisite: teacher recommendation

Students should take this course instead of Chemistry if their Algebra I scores are below a C. This course is designed for students with an interest in science, mathematics, and engineering. Physics is the study of matter and energy. Topics of study include classical mechanics, motion, and momentum, energy forms of sound, heat, light, electricity, wave theory, and atomic theory. Investigations in laboratory and classroom demonstrations are included.

Physics (H)

Prerequisite: Algebra II and teacher recommendation

This course is designed to develop an understanding of the relationship of man and the physical world. The content includes the description of physical properties and interactions of matter and energy, including equilibrium power, wave phenomena, mechanics, heat, electricity, magnetism, sound, light, spatial relativity and the particle nature of matter. Lab experiments accompany regular class work.

Anatomy and Physiology (H)

Prerequisite: Chemistry and teacher recommendation

This course covers the structure and functioning of the human body. The course begins with an introduction to the human body and the key chemistry concepts needed to understand its processes. Laboratory experiences are provided related to the body system being studied and will include microscopy, data collection and analysis, and extensive dissection activities. Students will be required to engage in critical thinking and problem solving activities as well as research based projects. This class is recommended for students pursuing a health-related career.

Biology II (H) (fall semester only)

Prerequisite: Chemistry and teacher recommendation; required to take this course in the fall preceding enrollment in Advanced Placement Biology in the spring

Biology II is a beginning unit of biochemistry. This class provides a background for introductory college Biology concepts. Emphasis is placed on areas of cell structure and function, genetics and molecular biology. Extensive laboratory experiences are a major component of the course.

Advanced Placement Biology

Prerequisite: Biology II in the fall followed by AP Biology in the spring of the same school year and teacher recommendation

A continuation of Biology II, the Advanced Placement biology course is designed to be the equivalent of a college introductory biology course. The program aims to provide students with the conceptual framework, factual knowledge, and analytical skills necessary to deal critically with the rapidly changing science of biology. There is a minimum of 8 required labs from the AP program, along with related activities, included in the course.

Advanced Placement Environmental Science

Prerequisite: Biology and Physical Science, Chemistry, or Physics and teacher recommendation

Advanced Placement in Environmental Science is designed to be the equivalent of a one semester course in college-level ecological studies. Students will cover a variety of topics such as ecosystems, populations, land and water issues, pollution and global climate changes. AP Environmental Science will have a heavy emphasis on lab-based inquiry and ongoing outdoor projects. In addition, there will be field trips and/or in-class experiences designed to expose students to various environmental issues.

Social Studies Courses

World History and Geography

Grade 9

This is a study of world history from 1750 to the present. Students will also learn fundamental concepts in politics, economics, and geography within the context of Modern World History.

World History and Geography – Pre-AP (H)

Grade 9

This is a study of world history from 1750 to the present. Students will also learn fundamental concepts in politics, economics, and geography within the context of Modern World History. This class will also cover skills needed in Advanced Placement Social Studies classes. Honors World History and Geography is designed for students preparing for AP courses in Social Studies.

Advanced Placement Human Geography

Grade 9

This is a study of the world with an emphasis on its cultural characteristics and coverage of its physical characteristics. Topics covered in this class include population, cultural patterns and political organization of space, agricultural and rural land use, industrialization, economic development, and urbanization. This class will prepare students to take the Advanced Placement exam in Human Geography. Students may earn 3 hours of college credit by passing this exam.

U.S. Government and Civics

Grade 10

This course will examine the foundations of American government with emphasis on the origins of our government, the Constitution, and federalism. It also includes a study of the three branches of government, civil liberties, civil rights, and state/local government.

U.S. Government and Civics - Pre AP (H)

Grade 10

Topics covered in this class include Constitutional underpinnings of United States government, political beliefs and behaviors, political parties, interest groups, the mass media, three branches of government, public policy, civil liberties, and civil rights. This class will also cover skills needed in Advanced Placement Social Studies classes. Honors U.S. Government is designed for students preparing for AP courses in Social Studies.

Advanced Placement Government and Politics: United States

Grade 10

Topics covered in this class include the constitutional underpinnings of United States government, political beliefs and behaviors, political parties, interest groups, mass media, institutions of national government, public policy, civil rights, and civil liberties. This class will prepare students to take the Advanced Placement exam in Government and Politics: United States. Students may earn three semester hours of college credit by passing this exam.

U.S. History and Geography

Grade 11 (TNReady Exam)

This is a survey of American History that focuses on 1877 to the present. Students will also learn fundamental concepts in civics, economics, and geography within the context of United States History.

Advanced Placement U.S. History

Grade 11

This course is a survey of American History from exploration to the present. This class will prepare students to take the Advanced Placement exam in U.S. History. Students may earn up to six hours of college credit by passing this exam. **This class is taken with AP Language in a year-long combined course.**

Economics/Personal Finance

Grade 12

A study of how society, individuals, and businesses deal with the problem of unlimited wants and scarce resources. This course provides students with practical applications which will help them make wise economic choices.

Advanced Placement Macroeconomics

Grade 12

An extensive study of how society, individuals, and businesses deal with the problem of unlimited wants and scarce resources. This class will prepare students to take Advanced Placement exams in Macroeconomics and Microeconomics. Students may earn three hours of college credit by passing the AP Macroeconomics exam and an additional three hours of college credit by passing the AP Microeconomics exam.

Psychology

Grades 10 - 12

Students will study the development of scientific attitudes and skills, including critical thinking and problem solving. Students will also examine the structure and function of the nervous system, the process of sensation and perception, social and cultural diversity among individuals, memory, perspectives of abnormal behavior, and categories and treatment of psychological disorders. Throughout the course, students will examine connections between content areas within psychology and relate psychological knowledge to everyday life.

Introduction to Sociology (Statewide Dual Credit)

Grades 11-12

Students will explore the ways sociologists view society and how they study the social world. In addition, students will analyze the nature of culture and the role it plays for the individual and society, the dynamics of social interaction and social structure, the roles played by groups and organizations in society, and the process of socialization. Students will analyze major social problems, changes that occur in society, and the impact of those changes. At the end of the course, students will take the Introduction to Sociology Statewide Dual Credit exam. Successful completion of the exam will allow students to earn both high school and college Introduction to Sociology credit. There is no cost to the student to take the exam. This class is based upon teacher recommendation.

Ancient History (H)

An elective survey of the Ancient World from the Fertile Crescent to the Middle Ages and Renaissance. This class examines the early civilizations of Egypt, Greece, and Rome. Also, this course has an extended look at the development of major world religions. Ancient History is designed to prepare students for Advanced Placement courses in Social Studies by developing historical writing skills required in AP World History: Ancient and AP World History: Modern.

Advanced Placement Psychology

Grades 10-12

Psychology is the scientific study of how humans learn, think, feel, and behave. This class will prepare students to take the Advanced Placement exam in Psychology. Students may earn three semester hours of college credit by passing this exam.

AP European History

Recommended Prerequisite: Ancient History (H)

The study of European History since 1450 introduces the cultural, intellectual, political, and social development that played fundamental roles in shaping the world. The goals are to develop an understanding of the principal themes in European History, the ability to analyze and interpret historical evidence through written expression, and preparation for the AP European History Exam. Students may earn up to six semester hours of college credit by passing the AP European History Exam.

Advanced Placement World History Modern

This is a new course from AP Central. World History has been split into two halves, with the temporal dividing line at 1200 AD. The course covers world events from 1200 AD to the present day. As with all AP courses, there is an emphasis on writing and preparation for the AP World History Modern exam. This course will be offered every other year, beginning spring 2020.

Advanced Placement World History Ancient

Recommended Prerequisite: Ancient History (H)

This new course from AP Central starts with the earliest beginnings of human history and ends at 1200 AD. As with all AP course, there is an emphasis on writing and preparation for the AP World History Ancient exam. This course will be offered every other year, beginning in spring 2021.

World Language Courses

French I

Grades 10-12

Students will learn basic French grammar and vocabulary which will give them the skills needed to communicate with those who speak and read French and will develop an appreciation for the French culture and people. Students are expected to speak in French in class to showcase what they are learning.

French II

Grades 10-12; Prerequisite: Teacher recommendation

Students will improve and expand their ability to communicate in French by studying more specialized vocabulary. Students will also learn more advanced grammar in French II and will particularly hone their writing and conversational skills. Students are expected to speak in French in class to showcase what they are learning.

French III (H)

Grades 11-12; Prerequisite: Teacher recommendation

The purpose of the third course of French is to solidify the grammar and vocabulary students have already learned in French I and II and to expand their knowledge of further vocabulary and advanced grammatical concepts. Particular emphasis is placed on spontaneous conversational skills and developing reading and composition abilities. This course is designed to help students prepare for a university French placement exam. French will be spoken almost exclusively in French III Honors.

French IV (H) / V (H)

Grades 11-12; Prerequisite: Teacher recommendation

The purpose of the fourth and fifth courses of French is to expand students' knowledge of further vocabulary and advanced grammatical concepts. Continued emphasis is placed on spontaneous conversational skills and developing reading and composition abilities. French will be spoken almost exclusively in French IV and V Honors.

German I

Grades 10-12

This course stresses primarily speaking and writing in German as well as understanding spoken German. Students are exposed to geography of German speaking countries and other cultural information.

German II

Grades 10-12

This continues the study of the language in a more detailed survey including reading the language. Students participate in cultural projects and research activities.

Latin I and II

Grades 10-12

Latin is a student-friendly and relaxed learning environment. The approach of this class is to make Latin useful and applicable in the modern day. This class is useful for those wishing to work in the medical field. Examples of what will be studied in this class are Latin language, mythology, ancient history, Latin/Greek roots and vocabulary, medical terminology, and, advanced English vocabulary from Latin roots. The class also improves ACT scores.

Spanish I

Grades 10-12

The purpose of Spanish I is to encourage interest in the language, culture, and history of Spanish-speaking countries and develop language skills knowledge needed to proceed to Spanish II. The class provides basic language skills needed to communicate on both written and oral formats in the Spanish language. The design of the course requires a high level of participation from the students as they will be required to speak, read, write, and/or listen to Spanish on a daily basis. Students will develop an appreciation for Hispanic culture.

Spanish II

Grades 10-12

Spanish II offers all skills of communication and culture in a more advanced manner. In Spanish II, students will build upon the material skills learned in Spanish I and continue to develop language skills needed to proceed to college-level Spanish courses. Emphasis is placed on verb conjugations in various tenses, including past, future, and conditional. Students will spend more time practicing their use of the language in real-life situations. Although the prerequisite for Spanish II is a passing score in Spanish I, it is also recommended that the student receive at least a C average in Spanish I and maintain at least a B average in English courses.

Heritage Spanish I

Heritage Spanish I is a course designed for heritage learners of Spanish who already have some oral language proficiency. This course accommodates Spanish-speakers from a wide range of linguistic backgrounds. Students will build upon their current language skills to develop language and cultural literacy, as well as their own creative expression. This course will guide students to develop a deeper appreciation for their own cultural heritage in addition to the cultures of other Hispanic countries.

During this course, students will gain confidence using Spanish to express their own thoughts on social and academic themes, interact with other speakers of the language, understand oral and written messages, make oral and written presentations, reflect on language variation, and critically view and evaluate resources and websites. Students will understand material presented on a variety of topics related to contemporary events and issues in Hispanic communities. Teacher recommendation and/or a placement test may be required.

Heritage Spanish II

This course is designed to further develop and challenge students' abilities in speaking, reading, writing, listening, and cultural understanding in Spanish. Reading is a major component of the course, including newspaper articles, short stories, and novels. Students practice translating texts and interpreting spoken information. Students work to further develop their Spanish literacy and

academic language skills, to learn more about their language and cultural heritage, and to enhance college and career opportunities as they become both bilingual and biliterate.

Fine Arts Courses

Art I

Grades 9-12

This course is designed for the student who wishes to fulfill the arts requirement and to experience a general knowledge of the elements of art. Emphasis is placed on helping students to understand a general knowledge of art to build upon in advanced art classes, if so desired. Exploration is in a variety of media, such as drawing, painting, clay, ink, etc.

Art II (Studio)

Grades 10-12; Requirement: Must have 85 average previous Art class

Studio concentration on painting, sculpture and fine art media. Students in this class should have an interest in art production as well as art critique. This class could be used as a fulfillment of the Elective Focus Option with the addition of AP Studio 2-D, 3-D or Drawing.

Advanced Placement Studio Art 2-D

Grades 11-12; Prerequisite: Art II taken in the fall semester prior to AP Art in the spring

AP 2-D Studio class is designed for students who are seriously interested in the practical experience of art. The emphasis of this class is to develop a portfolio of graphic arts based designs that comply with the Breadth, Concentration and Quality sections of the AP portfolio requirements. Students submit the portfolios for evaluation at the end of the school year.

Advanced Placement Studio Art 3-D

Grades 11-12; Prerequisite: Art II taken in the fall semester prior to AP Art in the spring

AP 3-D Studio class is designed for students who are seriously interested in the practical experience of art. The emphasis of this class is to develop a portfolio of 3D based sculptural designs that comply with the Breadth, Concentration and Quality sections of the AP portfolio requirements. Students submit the portfolios for evaluation at the end of the school year.

Advanced Placement Drawing

Grades 11-12; Prerequisite: Art II taken in the fall semester prior to AP Art in the spring

AP 2-D Studio class is designed for students who are seriously interested in the practical experience of art. The emphasis of this class is to develop a portfolio of graphic arts based designs that comply with the Breadth, Concentration and Quality sections of the AP portfolio requirements. Students submit the portfolios for evaluation at the end of the school year.

Theatre Arts I

Grades 9-12

Emphasis on basic acting techniques, expression of ideas, and basic scenery design and construction.

Theatre Arts III / Forensics

Grades 9-12

This class is designed for the college bound student to enhance one's public speaking skills. The focus of the class will be Debate, Extemporaneous Speaking, Original Oratory, Impromptu and After

Dinner Speaking. Other topics will also be covered. Participation in Saturday tournaments is a requirement of this class.

Flag Corps

Grades 9-12

After a student desiring to take Flag Corps has passed a tryout given by the band director, she may enroll with the director's permission. Flag Corps participates in parades, competitions, athletic half-time performances, etc. Many of the events are out of town.

Instrumental Music HS I, II, III, IV (Fall)/Marching Band

Grades 9-12

For students with advanced musical and marching ability who have been selected by auditions given each summer. This band participates in parades, competitions, athletic half time performances, etc. Several of the events are out of town.

Instrumental Music HS I, II, III, IV (Spring)/Concert Band

Grades 9-12

For students with advanced musical ability who have been selected through an audition process. This class covers a variety of styles of music as it prepares for concerts and competitions.

Chorus I (Beginning Chorus)

Grades 9-12; Prerequisite: none

In Chorus I, students will develop performance-based skills and techniques; work on reading, notating, and evaluating music; and gain practice with analysis and description of music. Cultural and historical context will be studied. Chorus classes at Morristown-Hamblen High School West School are performance-based ensembles designed to give the student the opportunity to develop and improve individual musical and vocal skills. Since these ensembles are performance based, the student is required to attend all extra-curricular activities including after school rehearsals and performances.

Chorus II (Women's Chorus)

Grade 9-12; Prerequisite: audition by choral instructor & recommendation from two other teachers.

This ensemble is for students of voice. Emphasis is placed on development of proper vocal tone, basic music theory, sight singing, music history, creative self-expression and vocal performance. Attendance for all rehearsals and performances is mandatory. Uniforms are required and may be either purchased or rented each year.

Chorus III (Advanced)

Grades 10-12 (2 terms); Prerequisite: audition by choral instructor & recommendation from two other teachers.

This ensemble is an advanced level course requiring a yearly commitment to excellence in vocal music performance for boys and girls. A wide range of choral literature will be explored from various periods and cultures, with the goal of performing at the highest level possible. Attendance for all rehearsals and performances is mandatory. Uniforms are required and may be either purchased or rented each year.

Physical Education Courses

Lifetime Wellness

Grade 9

In this course, through a combination of health and physical fitness students will: (A) apply knowledge of the human body to make decisions related to nutrition, mental and physical health promotion, injury prevention, and disease prevention and control; (B) learn to make correct decisions related to nicotine, alcohol, and substance abuse prevention; (C) develop a plan for maintaining personal fitness and health; and (D) demonstrate individual development in fitness and psychomotor skills to promote lifelong physical activity.

Physical Education I

Grades 10-12

A program to improve the quality of life by making available different options in relation to developing, maintaining, and enhancing fitness levels. PE I incorporates different types of fitness, including walking, running, weightlifting, CrossFit, Zumba, yoga, and team building activities. This class is specifically tailored to students who might find interest in different types of fitness other than weightlifting.

Physical Education II - Weight Training

Grades 10-12

A major fitness goal at the high school level is to build a positive attitude toward good physical health. This program offers a variety of activities, including flexibility, calisthenics, weightlifting, strength and conditioning, agility drills, rope jumping and running.

Air Force JROTC Courses

JROTC I—Aerospace Science I (offered at Morristown East)

Grades 9-12

A Leadership Development Program embedded within the High School Experience. Focus on Leadership Education, Aerospace Science and fitness training. Cadets wear AFJROTC uniform all school day once a week and maintain grooming standards. Males cut their hair off the ears/eyebrows and be tapered, within Air Force standards. Cadets perform physical training (PT) once a week and wear AFJROTC issued PT uniforms. Cost: \$10 class fee, professionally dry-cleaned uniforms at cadets cost. Cadets responsible for maintaining uniforms.

Overview of aerospace science and furthers the building of basic knowledge and skills to function in today's technical world. Studies include the history of flight, modern aerospace developments, attitude and discipline, study habit and time management, health and wellness, and drill ceremonies. We offer field trips and have afterschool teams including Color Guard, Drill, Drone, Saber and other programs.

JROTC II—Aerospace Science II (offered at Morristown East)

Grades 9-12

A Leadership Development Program embedded within the High School Experience. Focus on Leadership Education, Aerospace Science and fitness training. Cadets wear AFJROTC uniform all school day once a week and maintain grooming standards. Males cut their hair off the ears/eyebrows

and be tapered, within Air Force standards. Cadets perform physical training (PT) once a week and wear AFJROTC issued PT uniforms. Cost: \$10 class fee, professionally dry-cleaned uniforms at cadets cost. Cadets responsible for maintaining uniforms.

This course helps students develop knowledge of the cause of weather, the effects of flight on the human body, aircraft flight, and air navigation. Leadership training is further developed to permit that student to function as part of the cadet staff and lead in co-curricular activities, such as parades and color guards. We offer field trips and have afterschool teams including Color Guard, Drill, Drone, Saber and other programs

JROTC III—Aerospace Science III (offered at Morristown East)

Grades 9-12

A Leadership Development Program embedded within the High School Experience. Focus on Leadership Education, Aerospace Science and fitness training. Cadets wear AFJROTC uniform all school day once a week and maintain grooming standards. Males cut their hair off the ears/eyebrows and be tapered, within Air Force standards. Cadets perform physical training (PT) once a week and wear AFJROTC issued PT uniforms. Cost: \$10 class fee, professionally dry-cleaned uniforms at cadets cost. Cadets responsible for maintaining uniforms.

This course provides an exploration of space and an introductory to astronomy. Students learn the history of astronomy, including introductory Newtonian astrophysics; the Earth's physical properties; the Moon's characteristics and effect on the Earth; and the make-up of the Solar System. Human relations, communications skills, logic and problem solving are further developed in the leadership phase. We offer field trips and have afterschool teams including Color Guard, Drill, Drone, Saber and other programs

JROTC IV—Aerospace Science IV (offered at Morristown East)

Grades 9-12

A Leadership Development Program embedded within the High School Experience. Focus on Leadership Education, Aerospace Science and fitness training. Cadets wear AFJROTC uniform all school day once a week and maintain grooming standards. Males cut their hair off the ears/eyebrows and be tapered, within Air Force standards. Cadets perform physical training (PT) once a week and wear AFJROTC issued PT uniforms. Cost: \$10 class fee, professionally dry-cleaned uniforms at cadets cost. Cadets responsible for maintaining uniforms.

This course of aerospace studies provides an emphasis upon developing the individual's knowledge of leadership and communicative skills. Academic include life success skills, including the unlocking Your Potential series, the National Endowment for Financial education Program, High School Financial Planning, and other management skills needed to lead a Corps of Cadets. Emphasis is placed on participating in the overall operation of the cadet organization and competitive drill as hands-on training. Field trips and a variety of co-curricular activities, planned and carried out by the students, are important parts of the course. We offer field trips and have afterschool teams including Color Guard, Drill, Drone, Saber and other programs.

Career & Technical Education

Tennessee's career and technical education (CTE) programs of study are meant to provide a relevant framework of industry-aligned, rigorous courses that progress a student in knowledge and skills year after year. They provide invaluable opportunities for students to experience a subject that they are passionate about and explore interests that lead to postsecondary learning and future career paths. These sequenced courses also reflect and support the three-credit elective focus requirement for graduation. Each program of study includes a work-based learning (WBL) course option at level IV of the elective focus. Please see Elective Focus Options (p. 5) for WBL courses in each elective focus pathway.

Advanced Manufacturing Courses

Principles of Manufacturing

Grades 9-10

Principles of Manufacturing is designed to provide students with exposure to various occupations and pathways in the Advanced Manufacturing career cluster, such as Machining Technology, Electromechanical Technology, Mechatronics, and Welding. In order to gain a holistic view of the advanced manufacturing industry, students will complete all core standards, as well as standards in two focus areas. Throughout the course, they will develop an understanding of the general steps involved in the manufacturing process and master the essential skills to be an effective team member in a manufacturing production setting. Course content covers basic quality principles and processes, blueprints and schematics, and systems. Upon completion of this course, proficient students will advance from this course with a nuanced understanding of how manufacturing combines design and engineering, materials science, process technology, and quality. Upon completion of the Principles of Manufacturing course, students will be prepared to make an informed decision regarding which Advanced Manufacturing program of study to pursue.

Industry certification(s) offered: OSHA-10, PMI

Industrial Maintenance Pathway - This program is designed to provide students general skills in a variety of areas common to industry. Students receive training in basic welding techniques and cutting processes; machine tool technology training that includes shop theory, blueprint reading and sketching, use of hand tools and technical manuals, and the use of precision measuring instruments. Also included is Industrial Electricity that provides training in electrical maintenance, installation, repair, and operation of electrical equipment. Students also receive Mechanical Maintenance that consists of training from lubrication through pumps, bearings, gearing, etc.

Introduction to Industrial Maintenance

Grades 10-11; Prerequisite: Principles of Manufacturing

Introduction to Electromechanical is a foundational course that introduces students to basic electro-mechanical skills necessary in a manufacturing facility. Topics covered include safety, construction drawings, site layout, hand and power tools, linear and angular measurements, and application of algebraic and geometric principles to construction problems. Upon completion of this course, proficient students will be able to understand, describe and troubleshoot electromechanical systems.

Industry certification(s) offered: OSHA-10, PMI, Festo Fundamentals of AC/DC, SnapOn 504 & 525 Multimeter

Dual Enrollment Industrial Maintenance Technology

Grades 11-12; Prerequisites: Principles of Manufacturing, Introduction to Industrial Maintenance

This course is offered at West High School and is a dual enrollment program offered through the TCAT Morristown.

Industry certification(s) offered: OHSA-10, Festo Fundamentals of AC/DC

Machining Pathway - The work of machine tool operators, machinists, tool and die makers, industrial maintenance personnel and those in related occupations requires skill in machining metal by such machine tools as milling machines, lathes, grinders, drill presses, CNC milling machines, EDM machines and the ability to use precision measuring tools. Machine Tool Technology also includes set-up and operation of computer controlled milling machines and lathes. The course in the machine shop is designed to give students experience on a variety of machine tools similar to those on which they will work after graduation. Instruction is given in related blueprint reading and mathematics, precision measuring, and such basic metallurgy as properties of metals, their workable characteristics, best treatment of metals, and relative hardness.

Principles of Machining I

Grades 10-11; Prerequisite: Principles of Manufacturing

Principles of Machining I is designed to provide students with the skills and knowledge to be effective in production environments as a machinist, CNC operator, or supervisor. Upon completion of this course, proficient students will demonstrate safety practices concerning machining technology, proper measurement and layout techniques, reading and interpreting drawings and blueprints, production design processes, and quality control procedures. Upon completion of this course, students will be knowledgeable about potential postsecondary education and career opportunities related to machining technology and will be prepared to enroll in more advanced machining courses in high school.

Industry certification(s) offered: OSHA-10

Principles of Machining II

Grades 11-12; Prerequisites: Principles of Manufacturing, Principles of Machining I

Principles of Machining II is an advanced level contextual course that builds on the introductory skills learned in the entry-level manufacturing and machining courses, stressing the concepts and practices in a production environment supported by advanced machining and engineering facilities. Working with the course instructor and team members in a cooperative learning environment, students will design, produce, and maintain products that are defined by detailed technical specifications.

Emphasis is placed on quality control, safety and engineering codes and standards, and production-grade machining systems, building on the learner's past knowledge, current experiences, and future conduct as a career machinist. Upon completion of this course, proficient students will be able to examine blueprints and specification drawings to plan and implement the manufacture of products, machine parts to specifications using both manual and computer controlled machine tools, and measure, examine, and test completed products to check for defects and conformance to specifications.

Industry certification(s) offered: OSHA-10

Dual Enrollment Machine Tool Technology

Grades 11-12; Prerequisites: Principles of Manufacturing, Principles of Machining I

This course is offered at West High School and is a dual enrollment program offered through the TCAT Morristown.

Industry certification(s) offered: OSHA-10

Welding Pathway - The Welding program is designed to teach individuals how to weld various metals using different types of welding processes. The student begins with basic welding processes and techniques and then advances into processes such as pipe and tig welding. Students may elect to take the full course or may learn only one or two areas, such as mig welding for a production job or to upgrade current skills.

Welding I

Grades 10-11

Prerequisite: Principles of Manufacturing

Welding I is designed to provide students with the skills and knowledge to effectively perform cutting and welding applications used in the advanced manufacturing industry. Proficient students will develop proficiency in fundamental safety practices in welding, interpreting drawings, creating computer aided drawings, identifying and using joint designs, efficiently laying out parts for fabrication, basic shielded metal arc welding (SMAW), mechanical and thermal properties of metals, and quality control. Upon completion of this course, proficient students will understand the requirements to pursue the American Welding Society (AWS) Entry Welder qualification and examination and will be prepared to undertake more advanced welding coursework.

Industry certification(s) offered: OSHA-10, PMI

Welding II

Grades 11-12; Prerequisites: Principles of Manufacturing, Welding I

Welding II is designed to provide students with opportunities to effectively perform cutting and welding applications of increasingly complexity used in the advanced manufacturing industry. Proficient students will build on the knowledge and skills of the Welding I course and apply them in novel environments, while learning additional welding techniques not covered in previous courses. Specifically, students will be proficient in (1) fundamental safety practices in welding, (2) gas metal arc welding (GMAW), (3) flux cored arc welding (FCAW), (4) gas tungsten arc welding (GTAW), and (5) quality control methods. Upon completion of the Welding II course, proficient students will be eligible to complete the American Welding Society (AWS) Entry Welder qualification and certification.

Industry certification(s) offered: OSHA-10

Dual Enrollment Welding

Grades 11-12; Prerequisites: Principles of Manufacturing, Welding I, Welding II

This course is offered at West High School and is a dual enrollment program offered through the TCAT Morristown.

Industry certification(s) offered: OSHA-10

Education Works WBL Manufacturing Practicum

Grades 11-12; Prerequisite: min. of 2 credits in an Advanced Manufacturing program of study

Manufacturing Practicum is a capstone course intended to provide students with the opportunity to apply the skills and knowledge learned in previous Advanced Manufacturing courses within a professional, working environment. While continuing to add to their technical skillsets, students in this course assume increasing responsibility for overseeing manufacturing processes and managing complex projects. Specifically, proficient students will be able to work in teams to plan the production

of a sophisticated product; develop troubleshooting and problem-solving mechanisms to ensure that projects run smoothly; analyze output and compile professional reports; and connect practicum activities to career and postsecondary opportunities. For all projects undertaken in this course, students are expected to follow the focus area in their chosen program of study (Machining Technology, Electromechanical Technology, Mechatronics, or Welding), while also refining skills previously acquired to achieve deeper levels of mastery. Upon completion of the practicum, proficient students will be prepared for postsecondary study and career advancement in their chosen focus area.

Architecture & Construction Courses

Fundamentals of Construction

Grades 9-10

Fundamentals of Construction is a foundational course in the Architecture & Construction cluster covering essential knowledge, skills, and concepts required for careers in construction. Upon completion of this course, proficient students will be able to describe various construction fields and outline the steps necessary to advance in specific construction careers. Students will be able to employ tools safely and interpret construction drawings to complete projects demonstrating proper measurement and application of mathematical concepts. Standards in this course also include an overview of the construction industry and an introduction to building systems and materials. Students will begin compiling artifacts for inclusion in their portfolios, which they will carry with them throughout the full sequence of courses in their selected program of study.

Residential & Commercial Construction I

Grades 10-11; Prerequisite: Fundamentals of Construction

Residential & Commercial Construction I is the second course in the Residential & Commercial Construction program of study intended to prepare students for careers in construction by developing an understanding of the different phases of a construction project from start to finish. Upon completion of this course, proficient students will be able to demonstrate knowledge and skill in the earlier phases of building construction, including site layout, foundation systems, concrete, framing systems, and electrical systems. Students will be able to perform concrete work; frame walls, ceilings, and floors of a structure; and install proper wiring while safely employing tools and interpreting construction drawings to complete projects. Emphasis is placed on demonstrating proper measurement and application of mathematical concepts. Standards in this course also include principles of the construction industry and business and project management. Students will continue compiling artifacts for inclusion in their portfolios, which they will carry with them throughout the full sequence of courses in this program of study.

Residential & Commercial Construction II (available 2023-2024)

Grades 11-12; Prerequisites: Fundamentals of Construction, Residential & Commercial Construction I

Residential & Commercial Construction II is the third course in the Residential & Commercial Construction program of study intended to prepare students for careers in construction by developing an understanding of the different phases of a construction project from start to finish. Upon completion of this course, proficient students will be able to demonstrate knowledge and skill in the later phases of building construction including roofing systems, exterior finishing, stair framing systems, masonry systems, and plumbing systems. Students will be able to perform masonry work; frame roofs; install shingles on roofs; apply exterior finishes; and install proper

pipng for plumbing systems while safely employing tools and interpreting construction drawings to complete projects. Emphasis is placed on demonstrating proper measurement and application of mathematical concepts. Standards in this course also include an introduction to heating, ventilation, and air conditioning systems, principles of the construction industry, and business and project management. Students will continue compiling artifacts for inclusion in their portfolios, which they will carry with them throughout the full sequence of courses in this program of study.

Education Works WBL Construction Practicum (available 2023-2024)

Grades 11-12; Prerequisites: Fundamentals of Construction, Residential & Commercial Construction I, Residential & Commercial Construction II

Construction Practicum is a capstone course intended to provide students with the opportunity to apply the skills and knowledge learned in previous Architecture & Construction courses within a professional, working environment. In addition to developing an understanding of the professional and ethical issues encountered by tradesmen and contractors in the workplace, students learn to refine their skills in problem solving, communication, teamwork, and project management in the completion of a course-long project. Due to the importance of on-the-job training in the construction industry, a principle aim of the practicum is to assist students with placements where on-the-job training occurs, if available, so they can begin to log hours on a worksite and gain experience prior to entering the job market, such as in pre-apprenticeships. Additionally, students are exposed to the great range of postsecondary opportunities in today's construction fields as well, in order to prepare them to make an informed decision regarding their post-high school plans.

Agriculture Courses

Agriscience

Grades 9-10

This is an introductory laboratory science course that prepares students for biology, subsequent science and agriculture courses, and postsecondary study. This course helps students understand the important role that agricultural science and technology serves in the 21st century. In addition, it serves as the first course for all programs of study in the Agriculture, Food and Natural Resources Cluster. This course counts as a lab science credit toward graduation and college entrance requirements. This course is the foundational course for all Agriculture, Food and Natural Resources programs of study.

Principles of Plant Science and Hydroculture

Grades 10-11; Prerequisite: Agriscience

Principles of Plant Science and Hydroculture focuses on essential knowledge and skills related to the science of plant growth. This course covers principles of plant health, growth, reproduction, and biotechnology, as well as fundamental principles of hydroponics and aquaponics.

Greenhouse Management

Grades 11-12; Prerequisites: Agriscience, Principles of Plant Science and Hydroculture

Greenhouse Management is an applied-knowledge course designed to prepare students to manage greenhouse operations. This course covers principles of greenhouse structures, plant health and growth, growing media, greenhouse crop selection and propagation, and management techniques. It provides students with the technical knowledge and skills needed to prepare for further education and careers in horticulture production.

Landscaping and Turf Science

Grades 11-12; Prerequisites: Agriscience, Principles of Plant Science

Landscaping and Turf Science is an applied-knowledge course designed to provide challenging academic standards and relevant technical knowledge and skills needed for further education and careers in landscape design, maintenance, and turf management. Content includes site analysis and planning, principles of design, and plant selection and care techniques.

Principles of Agricultural Mechanics & Construction

Grades 10-11; Prerequisite: Agriscience

Principles of Agricultural Mechanics is a course introducing students to basic skills and knowledge in construction and land management for both rural and urban environments. This course covers topics including project management, basic engine and motor mechanics, land surveying, irrigation and drainage, agricultural structures, and basic metalworking techniques.

Industry certification(s) offered: PMI

Agriculture Power and Equipment

Grades 11-12; Prerequisites: Agriscience, Principles of Agricultural Mechanics

Agricultural Power and Equipment is an applied course in agricultural engineering with special emphasis on laboratory activities involving small engines, tractors, and agricultural equipment. The standards in this course address navigation, maintenance, repair, and overhaul of electrical motors, hydraulic systems, and fuel-powered engines as well as exploration of a wide range of careers in agricultural mechanics. Upon completion of this course, proficient students will be able to pursue advanced training in agricultural engineering and related fields at a postsecondary institution.

Industry certification(s) offered: Briggs and Stratton Basic Engine Maintenance

Agricultural Fabrication & Biosystems Engineering

Grades 11-12; Prerequisites: Agriscience, Principles of Ag Mechanics, Ag Power and Equipment

Agricultural and Biosystems Engineering is an applied course that prepares students for further study or careers in engineering, environmental science, agricultural design and research, and agricultural mechanics. Special emphasis is given to the many modern applications of geographic information systems (GIS) and global positioning systems (GPS) to achieve various agricultural goals. Upon completion of this course, proficient students will be able to pursue advanced training in agricultural engineering and related fields at a postsecondary institution.

Small Animal Science Technologies

Grades 10-11; Prerequisite: Agriscience

Small Animal Science is an intermediate course in animal science and care for students interested in learning more about becoming a veterinarian, vet tech, vet assistant, or pursuing a variety of scientific, health, or agriculture professions. This course covers anatomy and physiological systems of different groups of small animals, as well as careers, leadership, and history of the industry. Upon completion of this course, proficient students will be prepared for more advanced coursework in veterinary and animal science.

Large Animal Science Technologies

Grades 11-12; Prerequisites: Agriscience, Small Animal Science

Large Animal Science is an applied course in veterinary and animal science for students interested in learning more about becoming a veterinarian, vet tech, vet assistant, or pursuing a variety of

scientific, health, or agriculture professions. This course covers anatomy and physiological systems of different groups of large animals, as well as careers, leadership, and history of the industry. Upon completion of this course, proficient students will be prepared for success in the level-four Veterinary Science course and further postsecondary training.

Audio/Visual Technology and Digital Arts Courses

A/V Production I

Grades 9-10

This offered for students interested in either the Audio and Video Technologies sub-cluster or the Journalism and Broadcasting sub-cluster of the arts and communication cluster. The overlap in these industries is extensive as can be witnessed in television, film, music, radio, newspaper, Web-cast, and entertainment just to name a few. This course is the entry-level course to prepare students for the media industry. Course content provides a broad-based exposure to audio, video, and journalism and broadcasting within the media industry. Upon completion of this course, students will be prepared to pursue advanced coursework in either audio and video technology or journalism and broadcasting.

A/V Production II

Grades 10-11; Prerequisite: A/V Production I

This offered in the audio and video technology sub-cluster to students who have completed Broadcasting I or obtained instructor's approval. Course content focuses on broadcast production technologies utilizing simulated and/or real-life projects. This course centers on production of various broadcasting products including, commercials, music, news, and interactive programming. The student will gain valuable insight into the many facets of broadcast production, including but not limited to concept creation, scripting, sound design, visual design, engineering, editing, budgeting, and producing, as well as exploring some of the latest advances in industry technology. Upon completion of this course, students will be prepared to pursue advanced coursework.

A/V Production III

Grades 11-12; Prerequisites: A/V Production I, II

This offered in the Journalism and Broadcasting sub-cluster to students who have completed Broadcasting I and Broadcasting II or obtained the instructor's approval. This course focuses on simulated real-life broadcast production and management. Projects center on in-house production of newscasts, special events, and original programming. The student will gain valuable insight into both audio and video sides of the broadcasting industry. Course content is composed of scripting, reporting, directing, editing, budgeting, and producing, as well as cameras, lights, sound, and set design. This course will explore the latest digital technology and applications, research, and future trends in the broadcast industry. Upon completion of this course students will be prepared to pursue postsecondary education or enter the broadcasting industry in an entry level position. The educational laboratories will assimilate broadcast facilities in the broadcast industry.

Digital Arts and Design II (offered at East High)

Grades 10-11; Prerequisite: Digital Arts and Design I

Digital Arts and Design II is a course that builds on the basic principles and design process learned in the introductory Digital Arts and Design I course. Upon completion of this course, proficient students will be able to perform advanced software operations to create photographs and illustrations of increasing complexity. Students will employ design principles and use industry software to create

layouts for a variety of applications. Standards in this course also include an overview of art and design industries, career exploration, and business management. In addition, students will continue compiling artifacts for inclusion in a digital portfolio, which they will carry with them throughout the full sequence of courses in this program of study.

Digital Arts and Design III (offered at East High)

Grades 11-12; Prerequisite: Digital Arts and Design I, II

Digital Arts and Design III is the third course in the Digital Arts and Design program of study. Applying design skills developed in prior courses, students will expand their creative and critical thinking skills to create comprehensive multimedia projects and three-dimensional designs. Upon completion of this course, proficient students will be able to use industry-standard software to create multimedia projects, web pages, three-dimensional models, and animations. Students will utilize research techniques to plan and enhance project outcomes. Standards in this course also include professionalism and ethics, career exploration, and business and project management. In addition, students will continue compiling artifacts for inclusion in a digital portfolio, which they will carry with them throughout the full sequence of courses in this program of study.

Education Works WBL: Applied Arts Practicum

Grades 11-12; Prerequisite: Minimum of 2 credits in an Arts, A/V Technology, & Communications program of study

The Applied Arts Practicum is a capstone course intended to provide students with the opportunity to apply the skills and knowledge learned in previous Arts, A/V Technology, & Communications courses within a professional, working environment. In addition to developing an understanding of the professional and ethical issues encountered by professionals in these careers, students learn to refine their skills in problem solving, research, communication, teamwork, and project management through the completion of a course-long project. The course is highly customizable to meet local system needs. Instruction may be delivered through school laboratory training or through work-based learning arrangements such as internships, service learning, and job shadowing. Upon completion of the practicum, proficient students will be prepared to pursue postsecondary study in arts, A/V technology, or communications programs; or seek additional training or employment with the aid of the portfolio, which documents the student's work completed throughout the program of study.

Business/Finance/Marketing Courses

Introduction to Business and Marketing

Grades 9-10

This is an introductory course designed to give students an overview of the Business Management and Administration, Marketing, and Finance career clusters. The course helps students prepare for the growing complexities of the business world by examining basic principles of business, marketing, and finance in addition to exploring key aspects of leadership, ethical and social responsibilities, and careers. Students' academic skills in communications, mathematics, and economics are reinforced with activities modeled in the context of business topics. Upon completion of this course, proficient students will be equipped with the foundational skills to succeed in any of the Business, Marketing, or Finance programs of study and will be prepared to make an informed decision regarding which pathways they would like to pursue in high school. Standards in this course are aligned with

Tennessee State Standards for English Language Arts & Literacy in Technical Subjects, Tennessee State Standards in Mathematics, and Tennessee Economics standards.

Accounting I

Grades 10-11; Prerequisite: Intro to Business and Marketing

Accounting I introduces concepts and principles based on a double-entry system of maintaining the electronic and manual financial records for a sole proprietorship, partnership and corporation. It includes analyzing business transactions, journalizing, posting, and preparing worksheets and financial statements.

Accounting II

Grades 11-12; Prerequisites: Intro to Business and Marketing; Accounting I

Accounting II is an advanced study of concepts, principles and techniques that build on the competencies acquired in Accounting I used in keeping the electronic and manual financial records of a sole proprietorship, partnership and corporation. Departmental, management, cost and not-for-profit accounting systems are explored.

Marketing and Management I - Principles

Grades 11-12

This course's principle focus is on the study of marketing concepts and their practical application. Students will examine risks and challenges marketers face to establish a competitive edge. Subject matter includes economics, marketing foundations / functions and human resource leadership development. Skills in communication, mathematics, economics and psychology are reinforced in this course. *This can substitute for Economics but students would have to take the Personal Finance Class. Membership in DECA recommended.*

Marketing and Management II Advanced Strategies

Grades 11-12; Prerequisite: Marketing and Management I

Marketing and Management II: Advanced Strategies is a study of marketing concepts and principles used in management. Students will examine the challenges, responsibilities, and risks managers face in today's workplace. Subject matter includes finance, business ownership, risk management, marketing information systems, purchasing, promotion, and human resource skills.

Computer Applications

Grades 9-10

This course is designed to develop computer technology skills. Students will improve keying net words per minute. Students will utilize Microsoft Office Word, Excel, PowerPoint, and Access. The students will develop skills that will assist them with efficient production; accurate production analysis; management of information and design and presentation of a multimedia project. Most all higher education programs and the workforce require basic computer skills. This course will prepare students to succeed in technology for entering the workforce or higher education.

Advanced Computer Applications

Grades 11-12; Prerequisite: Computer Applications

This course offers many Early Postsecondary opportunities. Students have the chance to earn 3 industry certifications as a Microsoft Office Specialist. If a student passes one certification, he or she may graduate with distinction if a 3.0 GPA is upheld. Also, students may take a Dual Enrollment

test at Walters State Community College at the end of the course. If the WSCC test is passed, students receive 3 hours college credit at WSCC for a \$25 fee. Students with Microsoft Office Specialist certifications will also be considered for summer internships with industry. This course is for students who want to advance their basic computer applications skills to be ready for job placement and upper level technology courses in college utilizing Microsoft Office Word, Excel, and PowerPoint. Students increase their employability by working toward the attainment of high level skills in the areas of integrated software applications, communication skills, ethical issues, human relations, leadership, self-management, and workplace management.
Industry certification(s) offered: Microsoft Office Specialist

Business Communications (Online Newspaper)

Grades: 10- 12; The teacher must accept a student from an application and recommendation.

This course strongly combines journalism writing, graphic design, and web design. Students must be strong writers and proficient in technology. They will learn to use Wix platform for designing websites and Photoshop for altering photos and advertisements. Students will craft social media announcements and produce graduation and honors bulletins, flyers, etc. Students are expected to be able to work independently and in teams to meet weekly deadlines. Students are responsible for selling ads in the community and attending events for news coverage outside of school hours. The students must learn to produce work without error so that it can be published and distributed outside the classroom. The online newspaper may be viewed at <http://westsidestory.net>.

Industry certification(s) offered: Adobe Photoshop

Business Communications (Yearbook)

Grades: 10-12 (two terms required meeting 2 credits); Prerequisite: Intro to Business & Marketing. The yearbook advisor must accept a student from an application and teacher recommendation.

This course covers all of the necessary skills that are essential for the production of the school annual. Students must be strong writers and proficient in technology. Students are expected to be able to work independently and in teams to meet deadlines. Students are responsible for selling ads in the community and attending events for event coverage outside of school hours. Students must produce work without error. Classroom activities involve the following: photography, selling ads, writing captions, art work, organization of layout, collection of deposits, and picture and yearbook distribution.

Education Works WBL Business & Entrepreneurship Practicum

Grades 11-12; Prerequisites: Intro to Business & Marketing, Business Communications (NP or YB)

Business & Entrepreneurship Practicum is a capstone course intended to provide students with the opportunity to apply the skills and knowledge learned in previous Business and Marketing courses within a simulated startup environment or authentic business setting. The course is structured to allow students the creativity to develop, launch, and market original business ideas. It is ideal for students who wish to pursue careers as future business owners or entrepreneurs. Practicum activities can take place around student-led startups under the supervision of the instructor, or in collaboration with a local business incubator. The standards in this course can also be used to promote student participation in a work-based learning (WBL) experience through an internship or other off-campus arrangement. Upon completion of the practicum, proficient students will be prepared to further develop their business ideas into viable ventures or continue their study at the postsecondary level.

Industry certification(s) offered: Adobe Photoshop (Newspaper)

Business Economics/Personal Finance

Grade 12

This course provides an in-depth study of fundamental concepts, free enterprise trading practices, and the various players in the economic system. Topics include the production, marketing, and distribution of goods and services, as well as the roles of financial institutions, the government, and the individual within the free enterprise system. Students will explore various careers related to the economy. International trade and economics have become an integral part of Business Economics.

This course fulfills the graduation requirements for Economics and Personal Finance.

Introduction to Business (Statewide Dual Credit)

Grades 11, 12; Prerequisite: Introduction to Business and Marketing

Students in Introduction to Business will develop a foundation in the many activities, problems, and decisions that are intrinsic to the management of a successful business, as well as an appreciation for the importance of these responsibilities. Areas to be examined include business organization, ethical and legal responsibilities, communication, decision-making, personnel, safety, professional development and related careers. By gaining an understanding of these areas, students will be better prepared to enhance the business decisions of tomorrow. At the end of the course, students will take the Introduction to Business Statewide Dual Credit exam. Successful completion of the exam will allow students to earn both high school and college credit for Introduction to Business. There is no cost to the student to take the exam.

Work-Based Learning Career Practicum (WBL-CTE)

Grades 11-12

Each student will be required to stay in school for all four periods except for 11th and 12th graders who are enrolled in work-based learning programs. They may be dismissed early (1:20) in order to report to work prior to 3:00 pm. Students may only leave early if their job requires it, if they have met all other graduation requirements, and have parental permission. Students must be employed to be eligible for work release and must bring documentation of employment at the beginning of the year. The documentation must be on company letterhead, must state at what time the student is expected to report to work, and have a supervisor's signature. Students must have written parental permission to register for work release. One work credit is earned each semester. In order to earn one work credit, a student must average 18 hours of work per week. A total of 320 hours is required to earn one work credit.

Education & Training Courses

Early Childhood Education Careers I (Pre-K – 4)

Grades 9-12

Early Childhood Education Careers I (ECEC I) is a foundational course in the Education and Training career cluster intended to prepare students for careers as preschool teachers, elementary teachers, childcare providers, nannies, and more. Course content covers the foundation of childhood development services, careers, provider responsibilities and aptitudes, and fundamentals of child development. Upon completion of this course, students will have created artifacts for inclusion in a course portfolio, which will continue with them throughout the program of study.

Industry certification(s) offered: CPR/BLS

Early Childhood Education Careers II

Grades 10-12; Prerequisite: ECEC I

Early Childhood Education Careers II (ECEC II) is an intermediate course for students interested in learning more about becoming an early childhood teacher, elementary teacher, nanny, or childcare provider. This course covers the components of curriculum planning, learning, screening and assessing, special populations, and educational technology. Students will observe educators in action, practice specific skills, and add personal work products to a course portfolio. During this course, students working toward earning a Child Development Associate (CDA) credential should begin recording hours toward the required 480—clock hours needed in working with children. Upon completion of this course, proficient students will be able to pursue more advanced coursework in the ECEC program of study.

Early Childhood Education Careers III

Grades 10-12; Prerequisites: ECEC I, ECEC II

Early Childhood Education Careers III (ECEC III) is an applied-knowledge course for students interested in becoming an early childhood teacher, elementary teacher, nanny, or childcare provider. This course covers the components of the learning environment, planning age appropriate activities, using activities for learning, and developing communication skills. If available, students may participate in a work-based learning component of instruction and add work products to a course portfolio. Students continuing to work toward earning a Child Development Associate (CDA) credential should record hours toward the required 480—clock hours needed in working with children. Upon completion of this course, proficient students will be prepared to participate in the capstone ECEC IV course and/or continue their studies at the postsecondary level.

Early Childhood Education Careers IV

Grades 11-12; Prerequisites: ECEC I, ECEC II, ECEC III

Early Childhood Education Careers IV (ECEC IV) is capstone course for students who intend to pursue advanced training as an early childhood teacher, elementary teacher, nanny, or childcare provider. The course standards cover understanding of the components of professionalism, policies, regulations, and teaching and learning. Students will participate in a work-based learning component of instruction and add work products to a course portfolio. Students continuing to work toward earning a Child Development Associate (CDA) credential should record hours toward the required 480—clock hours needed in working with children. Upon completion of this course, proficient students will be prepared to continue their studies at the postsecondary level.

Industry certification(s) offered: CDA – Child Development Associate

Introduction to Teaching as a Profession (K – 12)

Grades 9-10

Fundamentals of Education is a foundational course in the Education and Training career cluster for students interested in learning more about becoming a school counselor, teacher, librarian, or speech-language pathologist. This course covers the history of education in the United States, careers in education, and the influence of human development on learning.

Teaching as a Profession I (TAP I)

Grades 10-11; Prerequisite: Introduction to Teaching as a Profession (K-12)

TAP I is an applied-knowledge course for students interested in learning more about becoming a school counselor, teacher, librarian, or speech-language pathologist. This course covers the components of instruction, teaching strategies, types of assessments, student learning, special

populations, and educational technology. Students in this course will conduct observations of educators at work and create artifacts for a course portfolio.

Teaching as a Profession II (TAP II)

Grade 11-12; Prerequisites: Introduction to Teaching as a Profession (K-12), TAP I

TAP II is an applied knowledge course for students interested in learning more about becoming a teacher, school counselor, librarian, or speech-language pathologist. This course covers classroom management, concepts of higher order thinking, differentiating instruction, and strategies of effective classroom planning. Students in this course will demonstrate their skills in laboratory settings while building a course portfolio of work.

Education Works Teaching as a Profession Practicum

Grade 11-12; Prerequisites: Introduction to Teaching as a Profession (K-12), TAP I, TAP I

Teaching as a Profession (TAP) Practicum is a capstone course in the Education and Training career cluster for students interested in applying the knowledge and skills learned in previous courses toward becoming a teacher, school counselor, trainer, librarian, or speech-language pathologist. The course covers classroom professionalism, ethics, policies, communications, and career requirements in education and training fields. In addition, students will complete an internship and continue to create artifacts for their student portfolios. Upon completion of this course, proficient students will be prepared to pursue advanced training at a postsecondary institution.

Health Science Courses

Health Science Education

Grades 9-10

This is an introductory course designed to prepare students to pursue careers in the fields of public health, therapeutics, health informatics, diagnostics, and support services. Upon completion of this course, a proficient student will be able to identify careers in these fields, compare and contrast the features of healthcare systems, explain the legal and ethical ramifications of the healthcare setting, and begin to perform foundational healthcare skills. This course will serve as a strong foundation for all of the Health Science programs of study.

Medical Therapeutics

Grades 10-11; Prerequisite: Health Science Education with a minimum C average

This is an applied course designed to prepare students to pursue careers in therapeutic and nursing services. Upon completion of this course, a proficient student will be able to identify careers in therapeutics services; assess, monitor, evaluate, and report patient/client health status; and identify the purpose and components of treatments.

Rehabilitation Careers

Grades 11-12; Prerequisite: Health Science Education with a minimum C average, Human Anatomy & Physiology with minimum of C average

Rehabilitation Careers is an applied course designed to prepare students to pursue careers in rehabilitation services. Upon completion of this course, a proficient student will be able to identify careers in rehabilitation services, recognize diseases, disorders or injuries related to rehabilitation services and correlate the related anatomy and physiology then develop a plan of treatment with appropriate modalities. (Needs to be taken in conjunction with Clinical Internship C14H11)

Industry certification(s) offered: OSHA-10 and Physical Therapy Aide (The Physical Therapy Aide credential is recognized throughout Tennessee and the country. Physical Therapist Aides can be employed in hospitals, clinics, doctors' offices, and other sport or rehabilitation facilities.)

Anatomy and Physiology

Grades 11-12; Health Science Education with a minimum C average

Anatomy and Physiology is designed to develop an understanding of the structures and functions of the human body, while relating those to knowledge and skills associated with pathophysiology. Upon completion of this course, proficient students will be able to (1) apply the gross anatomy from earlier courses to a deeper understanding of all body systems, (2) identify the organs and structures of the support and movement systems, (3) relate the structure and function of the communication, control, and integration system, and (4) demonstrate a professional, working understanding of the transportation, respiration, excretory, and reproduction systems.

Medical Assisting

Grade 12; Prerequisites: Health Science Education, Medical Therapeutics, Anatomy & Physiology - all with a minimum C average. This course should be taken in conjunction with Clinical Internship.

Medical Assisting is a course designed to prepare students to pursue careers in medical assisting. Upon completion of this course, a proficient student will be able to implement communication and interpersonal skills, provide care safely, prevent emergency situations, prevent infection through infection control, and perform the skills required of a medical assistant. At the conclusion of this course and an appropriate clinical internship, students may sit for the Certified Clinical Medical Assistant (CCMA) exam. The cost of the exam is \$155 and students will be reimbursed if they obtain a passing score.

Industry certification(s) offered: Certified Clinical Medical Assistant

Nursing Education

Grades 11-12; Prerequisite: Health Science Education, Medical Therapeutics, and Human Anatomy & Physiology – all with a minimum C average; 16 years old; good attendance is required.

This is a capstone course designed to prepare students to pursue careers in the field of nursing. Upon completion of this course, a proficient student will be able to implement communication and interpersonal skills, maintain residents' rights and independence, provide care safely, prevent emergency situations, prevent infection through infection control, and perform the skills required of a nursing assistant. At the conclusion of this course, if students have logged 40 hours of classroom instruction and 20 hours of classroom clinical instruction, and if they have completed 40 hours of site-based clinical with at least 24 of those hours spent in a long-term care facility, then they are eligible to take the certification examination as a Certified Nursing Assistant (CNA). Prior to beginning work at a clinical site, students must be certified in Basic Life Support (BLS) Cardiopulmonary Resuscitation (CPR), and deemed competent in basic first aid, body mechanics, Standard Precaution guidelines, and confidentiality.

Industry certification(s) offered: Certified Nursing Assistant, OSHA-10, Certified Patient Care Tech

Clinical Internship

Grade 12; Prerequisites: Health Science Ed, Human Anatomy & Physiology, and Medical Therapeutics and/or Rehabilitation Careers and/or Pharmacological Science and/or Nutrition Science & Diet Therapy

Clinical Internship is a capstone course and work-based learning experience designed to provide students with real-world application of skills and knowledge obtained in a prerequisite Health Science course. Upon completion of this course, proficient students will be able to pursue certification in the prerequisite course of Cardiovascular Services, Exercise Physiology, Medical Therapeutics, Pharmacological Services or Certified Clinical Medical Assistant.

Industry certification(s) offered: OSHA-10

Exercise Science (Certified Personal Trainer Path – offered at East High)

Grades 11-12; Prerequisites: Health Science Education with a minimum C average, Rehabilitation Careers, Human Anatomy & Physiology with a C or better.

Exercise Science is an applied course designed to prepare students to pursue careers in kinesiology and exercise physiology services. Upon completion of this course, proficient students will be able to apply concepts of anatomy and physiology, physics, chemistry, bioenergetics, and kinesiology to specific exercise science contexts. Through these connections, students will understand the importance that exercise, nutrition, and rehabilitation play in athletes or patients with debilitating or acute metabolic, orthopedic, neurological, psychological, and cardiovascular disorders. In addition, students have the opportunity to incorporate communication, goal setting, and information collection skills in their coursework in preparation for future success in the workplace.

Industry certification(s) offered: Certified Personal Trainer

Emergency Medical Services (offered at Morristown East)

Grades 11-12; Prerequisites: Health Science Education, Medical Therapeutics, Anatomy & Physiology

Emergency Medical Services is a capstone course in the Emergency Medical Services program of study and is designed to prepare students to pursue careers in the fields of emergency medicine. Upon completion of this course, proficient students will be able to: identify careers and features of the EMS system; define the importance of workforce safety and wellness; maintain legal and ethical guidelines; correlate anatomy and physiology concepts to the patient with a medical or traumatic injury; and perform EMS skills with a high level of proficiency. If taught with an EMT instructor, students will be given the opportunity to sit for the National Emergency Medical Responder certification. In addition, students will continue to add artifacts to a portfolio, which they will continue to build throughout the program of study. Each standard presumes that the expected knowledge and behaviors are within the scope of practice for that EMS licensure level, as defined by the National EMS Scope of Practice Model. Each competency applies to patients of all ages, unless a specific age group is identified.

Industry certification(s) offered: IS-100.C Introduction to Incident Command System, IS-5.A

Introduction to Hazardous Materials, IS-200.C Basic Incident Command System for Initial Response

Pharmacological Science (offered at Morristown East- Spring Semester Only)

Grade 12; Prerequisites: Health Science, Anatomy & Physiology, or Medical Therapeutics.

Pharmacological Science is a third level applied course in the Therapeutic Services program of study intended to prepare students with an understanding of the roles and responsibilities of the healthcare worker in a pharmacy setting. This course equips students with the communication, goal-setting, and information-processing skills to be successful in the workforce, in addition to covering key topics in pharmacology, pharmacy law, and regulations, sterile and non-sterile compounding, medication safety, quality assurance, and more. Upon completion of this course, proficient students who have also completed a clinical internship (which is embedded in this course) and are within 60 days of graduation, may sit for the Pharmacy Technician Certification Board examination. This course is also beneficial for the student wishing to pursue a career in Nursing. The cost of this exam is \$117.

Requirements for the course: Students must be a senior, within 60 days of graduation, be able to drive themselves to the clinical site, provide documentation of a current physical, TB skin test, Immunizations, Medical Insurance, and Automobile Insurance.
Industry certification(s) offered: Certified Pharmacy Technician

Hospitality & Tourism Courses

Culinary Arts I

Grades 9-12

Culinary Arts I equips students with the foundational knowledge and skills to pursue careers in the culinary field as competent entry-level quick service and fast food employees. Upon completion of this course, proficient students will have knowledge in the components of commercial kitchen safety and sanitation, history of the foodservice industry, hospitality careers, nutritional concepts, recipe basics, proper kitchen tools and equipment, and kitchen staples. Throughout the course students will gain experience in commercial food production and service operations, while preparing for further training in the culinary arts program of study at the secondary and postsecondary levels. Artifacts will be created for inclusion in a portfolio, which will continue throughout the full sequence of courses.

Culinary Arts II

Grades 10-12; Prerequisite: Culinary Arts I

Culinary Arts II is an applied-knowledge course to prepare students for careers in the culinary field as a prep cook, line cook, catering assistant, and many other entry-level food and beverage industry career paths. Upon completion of this course, proficient students will have a working knowledge of commercial kitchen safety and sanitation, menu planning, food presentation, purchasing and inventory, cooking principles, and food preparation. Students will gain experience in commercial food production and service operations, while preparing for further training in the culinary arts program of study at the secondary and postsecondary levels. Artifacts will be created for inclusion in a portfolio, which will continue throughout the full sequence of courses.

Culinary Arts III

Grades 11-12; Prerequisite: Culinary Arts I, Culinary Arts II

Culinary Arts III is an advanced course intended to further equip students with the skills and knowledge needed to pursue a variety of careers in the culinary field. Upon completion of the course, students will be proficient in components of commercial kitchen safety and sanitation, dining room service, food preparation and presentation, bakeshop preparation skills and equipment, and advanced cooking principles. Students will gain experience in commercial food production and service operations, while preparing for further training at the postsecondary level. Artifacts will be created for inclusion in a portfolio, which will continue throughout the full sequence of courses.

Culinary Arts IV

Grades 11-12; Prerequisite: Culinary Arts I, Culinary Arts II, Culinary Arts III

Culinary Arts IV is the capstone course in the Culinary Arts program of study intended to prepare students for careers such as banquet cook, catering assistant, event planning assistant, and many other entry-level food and beverage industry career paths. Course content reinforces the components of commercial kitchen safety and sanitation, food presentation, bakeshop preparation skills, sustainability practices, professionalism, and business opportunities. Upon completion of this course,

proficient students will have applied the full range of knowledge and skills acquired in this program of study toward the planning and catering of an event approved by the instructor. Artifacts will be created for inclusion in a portfolio, which will continue throughout the full sequence of courses.

Human Services Courses

Introduction to Human Studies

Grades 9-10

Introduction to Human Studies is a foundational course for students interested in becoming a public advocate, social worker, dietician, nutritionist, counselor, or community volunteer. This course covers the history of counseling, career investigation, stress management, mental illness, communication, and the counseling process.

Lifespan Development

Grades 10-12; Prerequisites: None

Lifespan Development builds basic knowledge in human growth and development. The course standards include developmental theory, principles of growth, behavior of children from conception through adolescence, adult development and aging, and death and dying. (This course is taught every other year).

Family Studies

Grades 10-12; Prerequisites: None

Family Studies is an applied knowledge course that examines the diversity and evolving structure of the modern family. Course standards focus on the demographic, historical, and social changes of interpersonal relationships, as well as parenting, and the effect of stressors on the family. (This course is taught every other year).

Nutrition Across the Lifespan

Grades 10-11

Nutrition Across the Lifespan is for students interested in learning more about becoming a dietitian, nutritionist, counselor, or pursuing a variety of scientific, health, or culinary arts professions. This course covers human anatomy and physiological systems, nutrition requirements, as well as social, cultural, and other impacts on food preparation and integrity.

Industry certification(s) offered: Serv Safe – Food Handler

Nutrition Science and Diet Therapy

Grades 11-12; Prerequisite: Nutrition Across the Lifespan or Health Science Education

Nutrition Science and Diet Therapy is an applied knowledge course in nutrition for students interested in the role of nutrition in health and disease. The course covers the development of a nutrition care plan as part of the overall health care process. Methods for analyzing the nutritional health of a community are explored. Finally, the relationship of diet and nutrition to specific diseases will be researched, including the role of diet as a contributor to disease and its role in the prevention and treatment of disease.

Education Works WBL Human Services Practicum

Grade 12; Prerequisite Nutrition Science and Diet Therapy or Family Studies

Human Services Practicum is a capstone course in the Human Services career cluster that provides a practicum experience for students as they develop an understanding of professional and ethical issues. The capstone course will be based on the knowledge and skills from previous courses in the human services cluster. Upon completion of the course, students will be proficient in components of communication, critical thinking, problem solving, information technology, ethical and legal responsibilities, leadership, and teamwork. Instruction may be delivered through school-based laboratory training or through work-based learning arrangements such as cooperative education, mentoring, and job shadowing.

Cosmetology I (offered at Morristown East)

Grades 10-11

This course is designed to introduce you to an exciting career as a professional cosmetologist. You will be introduced to hair and scalp care, hair cutting, hairstyling techniques, nail care and cosmetic applications. These procedures will enhance the beauty and attractiveness of you and your future clients. As you progress through your training, you will gain hands on experience and the added confidence to excel in the beauty industry.

Cosmetology II – Design Principles of Cosmetology (Offered at Morristown East)

Grades 10-11; Prerequisite: Cosmetology I; 2 credits (back-to-back in same semester)

This course is designed to advance your knowledge and skills in haircutting, hair styling techniques, nail care and skin care in a salon setting. You will also be introduced to chemical procedures performed in the salon such as permanent waving, chemical relaxing and hair coloring.

Cosmetology III – Chemistry of Cosmetology (offered at Morristown East)

Grades 11-12; Prerequisite: Cosmetology I, II; 2 credits (back-to-back in same semester)

This is an advanced course designed for the aspiring cosmetologist. In this class, you will perform work related services using chemicals. You will apply your knowledge and skill in performing hair coloring, permanent waving and chemical relaxing. You will receive advanced training in nail care including the application of artificial nails. Each student will have the opportunity to compete in local, regional and state competitions. Upon completion of this course, you will be ready to advance into a technical or private school to prepare for licensure as a cosmetologist.

Information Technology Courses

Computer Science Foundations

Grades 9-10

Computer Science Foundations (CSF) is a course intended to provide students with exposure to various information technology occupations and pathways such as Networking Systems, Coding, Web Design, and Cybersecurity. As a result, students will complete all core standards, as well as standards in two of four focus areas. Upon completion of this course, proficient students will be able to describe various information technology (IT) occupations and professional organizations. Moreover, they will be able to demonstrate logical thought processes and discuss the social, legal, and ethical issues encountered in the IT profession. Depending on the focus area, proficient students will also demonstrate an understanding of electronics and basic digital theory; project management and teamwork; client relations; causes and prevention of Internet security breaches; and writing styles appropriate for web publication. Upon completion of the CSF course, students will be prepared to make an informed decision about which Information Technology program of study to pursue.

Web Design Foundations

Grades 10-11; Prerequisite: Computer Science Foundations

This course prepares students with work related skills for advancement into postsecondary education or industry. Students will learn about setting up their own website for a business, domain names and hosting fees. Course content includes exposure to basic Web Design of learning HTML5, Cascading Stylesheets CSS, Wix, and Photoshop. The course content provides students the opportunity to acquire fundamental skills in both theory and practical application of Web Design and of leadership and interpersonal skill development.

Website Development

Grades 11-12; Prerequisite: Computer Science Foundations; Web Design Foundations

Web Site Development builds on the skills and knowledge gained in Web Design Foundations to further prepare students for success in the web design and development fields. Emphasis is placed on applying the design process toward projects of increasing sophistication, culminating in the production of a functional, static website. As students work toward this goal, they acquire key skills in coding, project management, basic troubleshooting and validation, and content development and analysis. Artifacts of the work completed in this course will be logged in a student portfolio demonstrating mastery of skills and knowledge. Upon completion of this course, proficient students will be prepared to pursue a variety of postsecondary programs in the computer sciences.

Education Works WBL Web Design Practicum

Grades 11-12; Prerequisites: Computer Science Foundations, Web Design Foundations, Website Development

Web Design Practicum is a capstone course intended to provide students with the opportunity to apply the skills and knowledge learned in previous Web Design courses toward the completion of an in-depth project with fellow team members. Students who have progressed to this level in the Web Design program of study take on more responsibilities for producing independent work and managing processes involved in the planning, designing, refinement, and launch of a website. In addition to developing an understanding of the professional and ethical issues encountered by web design professionals in the workplace, students learn to refine their skills in problem solving, troubleshooting, teamwork, marketing and analytics, and project management. Upon completion of the practicum, proficient students will be prepared for postsecondary study and career advancement in web design.

Coding I (offered at East High)

Grades 10-11; Prerequisite: Computer Science Foundations

Coding I is a course intended to teach students the basics of computer programming. The course places emphasis on practicing standard programming techniques and learning the logic tools and methods typically used by programmers to create simple computer applications. Upon completion of this course, proficient students will be able to solve problems by planning multistep procedures; write, analyze, review, and revise programs, converting detailed information from workflow charts and diagrams into coded instructions in a computer language; and will be able to troubleshoot/debug programs and software applications to correct malfunctions and ensure their proper execution.

Coding II (offered at East High)

Grades 11-12; Prerequisites: Computer Science Foundations, Coding I

Coding II challenges students to develop advanced skills in problem analysis, construction of algorithms, and computer implementation of algorithms as they work on programming projects of increased complexity. In so doing, they develop key skills of discernment and judgment as they must choose from among many languages, development environments, and strategies for the program life cycle. Course content is reinforced through numerous short- and long-term programming projects, accomplished both individually and in small groups. These projects are meant to hone the discipline and logical thinking skills necessary to craft error-free syntax for the writing and testing of programs. Upon completion of this course, proficient students will demonstrate an understanding of object-oriented programming language using high-level languages such as FOCUS, Python, or SAS.

Education Works WBL Coding Practicum

Grades 11-12; Prerequisites: Computer Science Foundations, Coding I, Coding II

Coding Practicum is a capstone course intended to provide students with the opportunity to apply the skills and knowledge learned in previous Coding courses toward the completion of an in-depth project with fellow team members. Students who have progressed to this level in the program of study take on more responsibilities for producing independent work and managing processes involved in the planning, designing, refinement, and production of original software applications. The course is designed to allow students to choose their specific application of interest, be it the development of a mobile application (app), an animation package, a game or other educational tool, or any other approved program that requires coding and development skills. Upon completion of the practicum, proficient students will be prepared for postsecondary study and career advancement in programming and software development, and will be equipped to market their finished product should they choose.

Cybersecurity I (offered at East High)

Grades 10-11; Prerequisite: Computer Science Foundations.

Cybersecurity I is a course intended to teach students the basic concepts of cybersecurity. The course places an emphasis on security integration, application of cybersecurity practices and devices, ethics, and best practices management. The fundamental skills in this course cover both in-house and external threats to network security and design, how to enforce network level security policies, and how to safeguard an organization's information.

Industry certification(s) offered: CompTIA IT Fundamentals, CompTIA Network +

Cybersecurity II (offered at East High)

Grades 11-12; Prerequisites: Computer Science Foundations, Cybersecurity I.

Cybersecurity II challenges students to develop advanced skills in concepts and terminology of cybersecurity. This course builds on previous concepts introduced in Cybersecurity I while expanding the content to include malware threats, cryptography, wireless technologies and organizational security. Upon completion of this course, proficient students will be able to demonstrate an understanding of cybersecurity ethical decisions, malware threats, how to detect vulnerabilities, principles of cryptology, security techniques, contingency plan techniques, security analysis, risk management techniques, and advanced methods of cybersecurity.

Industry certification(s) offered: CompTIA Security +, Associate of ISC2 in Cloud Security

Education Works WBL Cybersecurity Practicum

Grades 11-12; Prerequisites: Computer Science Foundations, Cybersecurity I, Cybersecurity II

Cybersecurity Practicum is a capstone course intended to provide students with the opportunity to apply the skills and knowledge learned in previous Cybersecurity courses toward the completion of an in-depth project with fellow team members. Students who have progressed to this level in the

program of study take on more responsibilities for producing independent work and managing processes involved in the planning, designing, refinement, and production of cybersecurity applications. Upon completion of the practicum, proficient students will be prepared for postsecondary study and career advancement in cybersecurity, and will be equipped to market their finished product should they choose.

Advanced Placement Computer Science Principles

Grades 10-12; Prerequisite: Algebra I; recommended course: Computer Science Foundations

AP Computer Science Principles introduces students to the foundational concepts of the field and challenges them to explore how computing and technology can impact the world. Whether it's 3-D animation, engineering, music, app development, medicine, visual design, robotics, or political analysis, computer science is the engine that powers the technology, productivity, and innovation that drive the world. Computer science experience has become imperative for students' success in the workforce of tomorrow. This course may be used as a 4th math course for students who have met the ACT College Readiness Benchmark for mathematics.

Law, Public Safety, Corrections, & Security Courses

Criminal Justice I

Grades 9-10

Criminal Justice I is the first level of study of criminal justice careers. This course prepares students for work-related knowledge and skills for advancement into the second level of criminal justice careers. Course content focuses on areas comprised of planning, managing, and providing judicial, legal, and protective services. This course is an overview of the criminal justice system and builds a better understanding of the development of laws on state and federal levels. New technology and career opportunities in criminal justice are an integral part of the course content.

Criminal Justice II

Grades 10-11; Prerequisite: Criminal Justice I

Criminal Justice II will offer an in-depth study of criminal justice careers in which current issues will be discussed and debated. Local, state, and federal laws will be analyzed. Subject matter will include a comparison of the criminal justice careers in the United States with other countries. Students will have opportunities to participate in mock trials and field trips with criminal justice careers emphasis. Course content will introduce new technology, effects of forensic analysis, and career opportunities. The course is designed to assist students with success in passing the WSCC Dual Credit exam and preparing students for future success on the Introduction to Criminal Justice Statewide Dual Credit exam.

Criminal Justice III

Grades 11-12; Prerequisites: Criminal Justice I, II

Criminal Justice III is designed to equip students with the knowledge and skills to be successful in the sciences of criminal investigations. Students will learn terminology and investigation skills related to the crime scene, aspects of criminal behavior, and applications of the scientific inquiry to solve crimes. By utilizing the scientific inquiry method, students will obtain and analyze evidence through simulated crime scenes and evaluation of case studies. Upon completion of this course, proficient students will be able to identify careers forensic science and criminology, summarize the

laws that govern the application of forensic science, and draw key connections between the history of the forensic science system and the modern legal system.

Education Works WBL Criminal Justice Practicum

Grades 11-12; Prerequisites: Criminal Justice I, II, III

Criminal Justice Practicum is a capstone course in the Law Enforcement and Correction Services program of study that provides a practicum experience for students as they develop an understanding of professional and ethical issues. The capstone course will be based on the knowledge and skills from previous courses in the Law Enforcement and Correction Services program of study. Upon completion of the course, students will be proficient in components of communication, critical thinking, problem solving, information technology, ethical and legal responsibilities, leadership, and teamwork. Instruction may be delivered through school-based laboratory training or through work-based learning arrangements such as cooperative education, mentoring, and job shadowing.

STEM Courses

Principles of Engineering & Technology

Grades 9-10

This is a foundational course in the STEM cluster for students interested in learning more about careers in engineering and technology. This course covers basic skills required for engineering and technology fields of study. Upon completion of this course, proficient students are able to identify and explain the steps in the engineering design process. They can evaluate an existing engineering design, use fundamental sketching and engineering drawing techniques, complete simple design projects using the engineering design process, and effectively communicate design solutions to others.

Industry certification(s) offered: PMI

Digital Electronics

Grades 10-11; Prerequisite: Principles of Engineering & Technology

Digital Electronics is intended to provide students with an introduction to the basic components of digital electronic systems and equip them with the ability to use these components to design more complex digital systems. Proficient students will be able to (1) describe basic functions of digital components (including gates, flip flops, counters, and other devices upon which larger systems are designed), (2) use these devices as building blocks to design larger, more complex circuits, (3) implement these circuits using programmable devices, and (4) effectively communicate designs and systems. Students develop additional skill in technical documentation when operating and troubleshooting circuits. Upon completion of the Digital Electronics course, proficient students will be able to design a complex digital system and communicate their designs through a variety of media.

Robotics & Automated Systems

Grades 11-12; Prerequisites: Principles of Engineering & Technology, Digital Electronics

This is an applied course for students who wish to explore how robots and automated systems are used in industry. Upon completion of this course, proficient students will have an understanding of the historical and current uses of robots and automated systems; programmable circuits, interfacing both inputs and outputs; ethical standards for engineering and technology professions; and testing and maintenance of robots and automated systems. Note: Standards in this course are presented sequentially for students' learning progression; however, instructors may tailor the order of course

standards to their specifications. Students are expected to use engineering notebooks to document procedures, design ideas, and other notes for all projects throughout the course.

Engineering Design I

Grades 10-11; Prerequisite: Principles of Engineering & Technology

Engineering Design I is a fundamental course in the STEM cluster for students interested in developing their skills in preparation for careers in engineering and technology. The course covers essential knowledge, skills, and concepts required for postsecondary engineering and technology fields of study. Upon completion of this course, proficient students are able to describe various engineering disciplines, as well as admissions requirements for postsecondary engineering and engineering technology programs in Tennessee. They will also be able to identify simple and complex machines; calculate various ratios related to mechanisms; explain fundamental concepts related to energy; understand Ohm's Law; follow the steps in the engineering design process to complete a team project; and effectively communicate design solutions to others.

Industry certification(s) offered: AutoCAD Certified User

Engineering Design II

Grades 11-12; Prerequisite: Principles of Engineering & Technology; Engineering Design I

Engineering Design II is an applied course in the STEM career cluster for students interested in further developing their skills as future engineers. This course covers knowledge, skills, and concepts required for postsecondary engineering and technology fields of study. Upon completion of this course, proficient students are able to explain the differences between scientists and engineers, understand the importance of ethical practices in engineering and technology, identify components of control systems, describe differences between laws related to fluid power systems, explain why material and mechanical properties are important to design, create simple free body diagrams, use measurement devices employed in engineering, conduct basic engineering economic analysis, follow the steps in the engineering design process to complete a team project, and effectively communicate design solutions to others.

Education Works WBL Engineering Practicum

Grades 11-12; Prerequisites: Principles of Engineering & Technology, Digital Electronics

Engineering Practicum is a capstone course intended to provide students with the opportunity to apply the skills and knowledge learned in previous Engineering courses within a professional, working environment. In addition to developing an understanding of the professional and ethical issues encountered by engineers and technologists in the workplace, students learn to refine their skills in problem solving, research, communication, data analysis, teamwork, and project management. The course is highly customizable to meet local system needs: instruction may be delivered through school laboratory training or through work-based learning arrangements such as internships, cooperative education, service learning, mentoring, and job shadowing. Upon completion of the practicum, students will be prepared for postsecondary study in engineering and technology fields.

Advanced Placement Computer Science Principles

Grades 10-12; Prerequisite: Algebra I; recommended course: Computer Science Foundations

AP Computer Science Principles introduces students to the foundational concepts of the field and challenges them to explore how computing and technology can impact the world. Whether it's 3-D animation, engineering, music, app development, medicine, visual design, robotics, or political

analysis, computer science is the engine that powers the technology, productivity, and innovation that drive the world. Computer science experience has become imperative for students' success in the workforce of tomorrow. This course may be used as a 4th math course for students who have met the ACT College Readiness Benchmark for mathematics.

Advanced Placement Physics I – Algebra-Based

Grades 10-12; Prerequisite: Algebra I, Geometry; Pre- or Co-requisite: Algebra II

Learn about the foundational principles of physics as you explore Newtonian mechanics; work, energy, and power; mechanical waves and sound; and introductory, simple circuits. You'll do hands-on laboratory work to investigate phenomena. This course may be used as a 4th math course for students who have met the ACT College Readiness Benchmark for mathematics.

Transportation Courses

Maintenance and Light Repair I (MLR I)

Grades 9-10

This course prepares students for entry into Maintenance and Light Repair II. Students explore career opportunities and requirements of a professional service technician. Content emphasizes beginning transportation service skills and workplace success skills. Students study safety, tools, equipment, shop operations, basic engine fundamentals, and basic technician skills. Upon completing all of the MLR courses, students are eligible to earn a student ASE MLR Certification.

Industry certification(s) offered: OSHA-10, PMI

Maintenance and Light Repair II (MLR II)

Grades 10-11; Prerequisite: MLR I

This course prepares students for entry into Maintenance and Light Repair III. Students study automotive general electrical systems, starting and charging systems, batteries, lighting, and electrical accessories. Upon completing all of the MLR courses, students are eligible to earn a student ASE MLR Certification.

Industry certification(s) offered: OSHA-10, SnapOn 504 & 525 Multimeter

Maintenance and Light Repair III (MLR III)

Grades 11-12; Prerequisites: MLR II; 2 credits (year-long class; offered academic years beginning with odd numbers)

This course prepares students for entry into Maintenance and Light Repair IV. Students study and service suspension and steering systems and brake systems. Upon completing all of the MLR courses, students are eligible to earn a student ASE MLR Certification.

Industry certification(s) offered: OSHA-10

Maintenance and Light Repair IV (MLR IV)

Grades 11-12; Prerequisites: MLR II; 2 credits (year-long class; offered academic years beginning with even numbers)

The Maintenance and Light Repair IV class prepares students for entry into the automotive workforce or into postsecondary training. Students study and service automotive HVAC systems, engine performance systems, automatic and manual transmission/transaxle systems, and practice workplace

soft skills. Upon completing all of the MLR courses, students are eligible to earn a student ASE MLR Certification.

Industry certification(s) offered: OSHA-10

***Upcoming seniors who have successfully completed 3 of the 4 MLR classes are encouraged to apply for a summer internship to help expand their knowledge and understanding of automotive service technology.*

Education Works (Workforce Ready Partnership)

In response to a growing demand for a skilled workforce within our region, Hamblen County has established through the Innovative High School Grant, Education Works. This is a program that connects high school students ready to enter the workforce with employers. Students are equipped with in-demand state recognized industry certifications and OSHA 10 safety training certification. Education Works provides two different pathways to employment. Candidates for Education Works can be identified by school administrators, counselors, teachers, graduation coaches, or IEP case managers and should be submitted to Mr. Daniel Aldridge, Hamblen County WBL Coordinator and CTE Program Manager. Education Works is offered in every program of study as a fourth level course.

Option One is offered to students who are on track to graduate and have completed a specific program of study and are ready to enter the workforce. Based on availability in her/his schedule, students may work up to two periods of Work-Based Learning each semester. WBL may be offered multiple times during the students' junior and senior years, but students may only obtain 3 WBL credits per year. Students interested in Option 1 of the Education Works should have a transcript analysis completed to see if he/she would be a possible candidate for this program. For more information or questions, please contact the Hamblen County Career and Technical Education Department at 423-581-3084

Option Two is intended for a student who may not be on track for graduation and is eager to enter the workforce. Hamblen County Schools provides an online academy for this student to finish their remaining graduation requirements in a nontraditional setting. Students are offered a flexible schedule to accommodate employer and student needs. Placements are based on both employer needs and available school scheduling. This partnership serves as an evaluation period with the employer. When graduation requirements have been met, students may be offered full-time employment based on employer evaluations and company needs at that time. Part-time employment is a possible option if a student wishes to enroll at a local postsecondary institution.
