

Parent Questionnaire of Academic Progress

When a student enrolls into a Texas Public School, all student records are requested and received from the student's previous school(s). These records are used to assess the needs specific to the student. The following questions serve as an initial screening to help in student placement prior to receiving the student's official records. If there is concern regarding one of the following scenarios please request to speak with a school official so that we can ensure your student's needs are accurately met.
