About Us

At MasterLibrary, we are focused on providing the technology and support for K-12 school districts to manage their facilities at a world-class level within a school-sized budget.

Our mission is to help the educational sector better manage their facilities with the limited resources they have on hand. By generating new efficiencies in facility administration and maintenance, we help our customers achieve better managed, more transparent and safer environments for students, staff and the community. We believe that technology in education includes smart ways to manage the "Where" - that is the schools, classrooms and grounds our children and community use everyday.

At MasterLibrary, we are a technology company that puts the best interest of its customers at the heart of every decision we make.

COMPANY PRESIDENT

Our president, Tom Rauscher, has more than 30 years of experience related to the services and software required to strategically plan, build and manage K12 facilities.

ACCOUNT EXECUTIVE

I am Aaron Barley, and I will be your point of contact throughout the sales process. I can be reached via phone or email at: (585) 851-0696 or abarley@masterlibrary.com

Client Testimonials

Nothing is more important to us than the satisfaction of those we work with. Below are just a few of the many positive messages we've received from our clients.

"ML Schedules is very easy to set up and use for keeping track of all our 20 campuses' "Use of Facilities" requests and scheduling. We were able to streamline our whole process and make it easier for the community to use our facilities without double-booking with our school activities. We can coordinate with our Google calendars as well, which is really nice. I highly recommend this program. The customer service is great too! They always respond quickly, efficiently and professionally both over the phone and email."

- Dawn M. (Cartwright Elementary School District, AZ)

"ML Schedules is very user friendly, making it quick and easy to manage the booking of all of our facilities across our school environment without having to worry about double-booking. The calendars integrate with Google calendars and the auto-invoicing feature makes collecting payments a breeze. Customer service is excellent and the on-boarding process has been smooth. We are K-12, but this would be good for any company in charge of multiple facilities or rental spaces."

- Brandon E. (Mt. Vernon Community School Corporation, IN)

"To me the most valuable aspect is the ability to move swiftly through the approval path. What used to take us 1-2 weeks using inter-office mail now can be done in a matter of minutes. Huge time saver! I also love the ability to halt applications if insurance documents are not included or missing information. It is super helpful that the system communicates with our work order system as well as our athletic scheduling software."

- Shelby S. (Rome City School District, NY)

"ML Schedules made the quantum leap from paper forms to digital a breeze... the time and guidance given to us for the initial setup and their continued excellent support were and continue to be very much appreciated. The documentation and training provided made the transition considerably easier."

- Daryl J (Greenwich Central School District, NY)
