Ms. Alisha DiCorpo

#### **Assistant Superintendent**

Mrs. Holly Hollander

#### Authors of Course Guide

Arnauckas/Kevorkian

BOE Approved March 2022

# **New Milford's Mission Statement**

The mission of the New Milford Public Schools, a collaborative partnership of students, educators, family and community, is to prepare each and every student to compete and excel in an ever-changing world, embrace challenges with vigor, respect and appreciate the worth of every human being, and contribute to society by providing effective instruction and dynamic curriculum, offering a wide range of valuable experiences, and inspiring students to pursue their dreams and aspirations.

## **Physical Education**

Physical Education in the 12th grade will provide students an opportunity to participate in a variety of lifetime activities, recreational activities and team sport activities that will be offered throughout the semester. Students will have an opportunity to choose an activity in each unit of instruction that will best fit their interest level. A wide range of units will be offered for the students to engage in activities that will enhance their learning experience in an educational setting that allows students to reach their level of success while collaborating with peers and setting personal goals and standards, as well as, reaching team goals.

Students will have an opportunity to develop a wide range of skills while participating in a variety of individual/partner and team activities. Students will be provided many opportunities to develop their skills of throwing, catching, striking, and hitting with an implement in addition to improving overall fitness levels through warm ups, lead up activities and application of skills through game play. In addition to skill development students will learn about strategies, etiquette, sportsmanship, and rules of the game while developing an appreciation of individual differences.

Units of Instruction that may be offered are broken down into three main categories: Lifetime Activities, Recreational Activities and Team Sport Activities. Units may include but are not limited to:

#### Lifetime Activities:

Aerobics, Archery, Circuit Training, Cycling, Fitness, Golf, Tennis, Walking, Yoga

## **Recreational Activities:**

Backyard Games, Badminton, Flag Frenzy, Outdoor Games, Pickleball, Table Tennis, Ulti-mania, Wiffle Ball, Nitro Ball

#### Team Sport Activities:

Basketball, Flag Football, Floor Hockey, Soccer, Softball, Speedball, Tchoukball, Team Handball, Volleyball, Ultimate Frisbee

At the high school level students are provided the opportunity to choose the activity that best fits their interest level during each unit of instruction. Doing this provides flexibility for the students and also improves the overall participation level. In addition, student choice may result in particulation in a particular unit for the first time even as an upperclassmen. The chart below indicates expected skill level based on the years of participation in the selected activity.

Year of Participation	Expected Skill Level
1st year	Students will be at an entry level and begin understanding the proper techniques, form and strategies involved in the particular unit of choice. Practice of these skills, both physical and cognitively, will be emphasized throughout the unit.
2nd year	Students will be able to use prior knowledge to build on skills acquired from the previous year. At this level students will begin to implement the skills in game-like situations or activities in the unit of choice.
3rd year	Students will be able to use prior knowledge to build on higher level implementation of skills acquired in the previous two years. This should be applied in game situations/activities and will result in a more efficient game situation.
4th year	Students will be able to use prior three years of skill development and strategies learned to help lead and manage game situations and activities. At this level students will help guide and model for entry level students by showing proper use of equipment, strategies applied and correct technique and form used to participate in their unit of choice.

# **Pacing Guide**

## **Twelfth Grade Pacing Guide**

Students will be offered one activity from each of the three categories per unit of instruction.

Lifetime Activities:	Days:	Days 1-2:	Days 3-5	Day 6:
1. Aerobics	6	Skills and techniques	Exercise routine, formative assessment	Summative Assessment

		PERFORMANCE TASK(S):	
T, M, A	Rubric showing student level: Emerging - Students participate in deliberate practice tasks that will lead to skill and knowledge acquisition. Maturing - Students can demonstrate the critical elements of the motor skills and knowledge components of the grade level outcomes, which will continue to refine with practice. Applying - Students can demonstrate the critical elements of the motor skills and knowledge components of the grade level outcomes in a variety of physical activity environments.	Students will apply specific game related strategies and rules while working collaboratively with teammates in a game situation. Students will demonstrate this through drills and game play where they will use specific skills and abilities to incorporate all teammates in the specific game being played. Students will also be able to show an understanding of the importance of involving all participants in a variety of ways. Students will describe ways to replay specific game situations to show effective team play through the perspective of a teammate. This will be demonstrated by the students describing specific plays used in chosen team activity that demonstrate the use of all teammates, such as correct spacing on a court or movement without the ball to get an open teammate.
