

## Lead Testing Final Report

For test points at or above 5 ppb lead content, per §160.077, secure water and discontinue use until remediated unless testing proves that flushing will provide water below 5ppb.

144 Test points were identified:

The 24 points listed in the table below indicated greater than 5parts per billion during the initial draw sampling phase.

21 outlets have permanent “Hand Wash Only” signage placed near the faucet.

3 were successfully remediated.

If you desire further health information, you can contact your county health department:
