# How readers can print their own reading logs
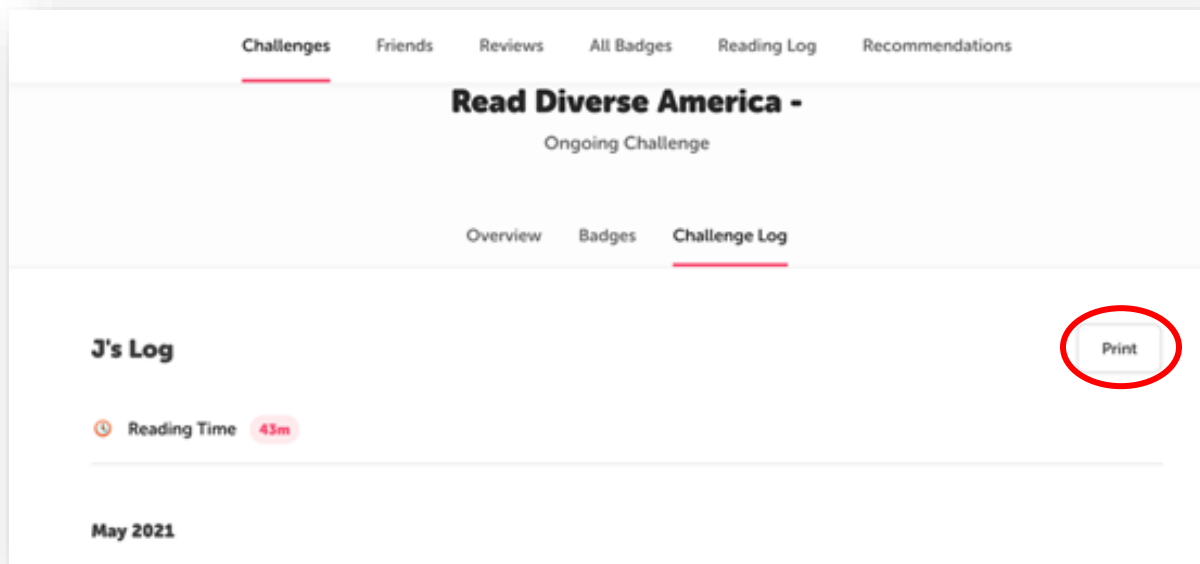

Beanstack Helpdesk Updated 1 year ago

Readers are able to print or download their all-time reading log or their challenge log by following the steps below.

1. To print their all-time reading log, instruct the reader to log in and click the Reading Log tab and then All Titles Logged.

2. To print their challenge log, from the reader homepage, click the desired challenge and then click Challenge Log.
3. From there, they should click the Print button in the upper righthand corner of their log screen.

When clicked, the list opens in a **printer-friendly view** and includes a list of book titles, *not book cover images*. To download, choose the "*Save to PDF*" option in the print window.
