FCCLA Chapter Website

Level 3

Dare To Dream With FCCLA

IDENTIFY CONCERNS

We need a website that advises FCCLA members in our school and people in the community how much of an impact FCCLA can make on students' leadership skills, social skills and more. We want to promote FCCLA and everything it has to offer. Through a chapter FCCLA website we can accurately express the importance of Family and Consumer Sciences and highlight our East Carter FCCLA Chapter. The website needs to be easily accessible with lots of information and easy navigation.

SET A GOAL

My goal is to create a FCCLA website that promotes our chapter. I want to develop a website by using a website creating software, allowing us to inform students about FCCLA. We will create an FCCLA website for our chapter by putting links of important information and dates, awards of the chapter, pictures of chapter officers, and pictures of all current and past events. I want to create a website to organize and set up our FCCLA website in an effective way. I want to create a website for our local FCCLA chapter with usable links, event dates, and pictures for members, students, and community leaders by December 31, 2024.

FORM A PLAN

Who: Zak Walls
What: Create a FCCLA Chapter Website that is easy to navigate and that promotes FCCLA
When: September-December 2024
Where: East Carter High School, Ellsinore MO
How: Use the school computer and my own personal computer, use data from our chapter and events that we are hosting through FCCLA
Cost:
Resources: Members of the East Carter FCCLA Chapter and Program of Work for the year, FCCLA binder, flyers, school computer
Evaluation: We will do a survey to all FCCLA members and have them go in on the site and navigate through it to evaluate what they think about it and give us feedback on what things they would like to see added on there. They said that they are pleased with the website and said that it really helps them know more about FCCLA and what is going on currently.

ACT

I began brainstorming ideas for our chapter website such as which creator to use and what needed to be included on the website. I started the project by filling out the planning process, identification page, and all the other paperwork that was needed. I gathered all the information and dates of events we would have for this school year. I made a list of what pages I would work on and when I would work on them. I often took pictures and uploaded them to get the website ready. I used photos of all events that were happening and used past photos of ones that we hadn't had yet. As we have these events throughout the year I will update the photos. I then asked the adviser for a list of awards we had received over the past 4 years and updated that on the website. I finalized the website by making sure all the links were active on the web server. I also went through the entire website checking to make sure everything was included and looked good. I had some of the other FCCLA officers look over it and evaluate their thoughts on if I needed to add anything else. Completing this project took several months because I had to gather information and pictures from members and our advisor. Another thing that took a little time was that I had to publish the site many times to make sure every link worked correctly just as I wanted it to. Overall, this is a huge asset to our FCCLA Chapter.

FOLLOW UP

I am very proud of the work that I put into this project. The final product looks fantastic! I am very happy that our FCCLA Chapter has gained a place online that further projects who we are. Members can now keep up to date on events and information. Members can also check to see what we talked about at our meetings if they cannot attend a meeting. Anyone who views our webpage can contact us through a form or calling or emailing our chapter advisor or a chapter officer. I believe that this website is not only a great addition for our chapter members to keep up to date on events and meetings but also a great addition for community members to see who we are and follow up on events that we have or how well our chapter members are doing in things like STAR Events. Overall, the process of gathering information and creating our website was successful. It was a lot of responsibility for one person, so if I had it to do over, I might consider having a partner. But the finished project turned out successful.
