For Persons who performed inspections, and recommend(ed) design, or carry out response actions (except for operations and maintenance) the local education agency uses or will use persons who have been accredited by a state which has adopted a contractor accreditation plan under section 206(b) of Title II of the Act or is accredited by an EPA-approved course under section 206(c) of Title II of the Act. In addition the LEA has considered whether any conflict of interest may arise from the interrelationship among accredited personnel, such as abatement activities being performed by an inspector or management planner, and whether that should influence the selection of accredited personnel to perform activities under this AHERA program.

The signatories below certify that the general local education agency responsibilities, as stipulated by Part 763.84 have been met or will be met.

procedures involve representative sample site selection within sampling areas. After sampling, the bulk samples were forwarded to EMSL Analytical in Smyrna, Georgia. The NVLAP lab code for EMSL's Smyrna lab is 101048-1. The sampling work was performed by Mr. Trent Hill an accredited asbestos inspector (Alabama Accreditation No. AIN0222708327), Mr. Carter Byrd an accredited asbestos inspector (Alabama Accreditation Number AIN022269E11740), and Mrs. Jennifer Passineau an environmental project manager. The bulk samples were analyzed by polarized light microscopy (PLM) coupled with dispersion staining. This technique is used to identify asbestos fibers by their shape and unique optical properties. The analysis identified no (0) asbestos-containing materials (ACMs) based on the samples collected by EMC.

Building/Structure	EMC Building ID #	Total # of ACMs
Main Building	01	0
Classroom Annex	02	0
	Total	0

A summarization of the analytical results is provided in the tables included with this report. Specific data for each sample analysis is shown on the enclosed analytical data sheets and chain-of-custody.

Limitations

EMC's observations, sampling, and testing were limited to exposed materials within the interior of the buildings. EMC did not perform exploratory demolition activities to walls, flooring materials, ceilings, or insulations to observe and sample underlying materials. Determination of whether a suspect material contains asbestos was generally based on analyses of the minimum number of samples allowed by the EPA's AHERA regulations. Because of variations in the composition of some materials, and our inability to visually identify those variations, it is possible that not all asbestos-containing materials were identified. This report has been prepared for the use of Pike Road Schools and/or its representatives. No other warranties are expressed or implied.

We appreciate the opportunity to provide this service. Please do not hesitate to contact us if you have questions about EMC's work.

Sincerely,
Environmental-Materials Consultants, Inc.

Jennifer K. Passineau

ASBESTOS SURVEY SUMMARY

Pike Road School
Elementary School
Building 2 - Annex (2022)
EMC Project Number MA-4409
November 10, 2022

EMC HSA#	Material Description	General Location	Asbestos
4409-03-02-01	joint compound, white	throughout building	none detected
4409-03-02-01a	wallboard, gray		none detected
4409-03-02-02	12" floor tile, yellow	accent tile throughout	none detected
4409-03-02-03	12" floor tile, blue		none detected
4409-03-02-04	12" floor tile, white with blue gray mottling	throughout building (primary tile)	none detected
4409-03-02-05	duct sealant, white	throughout building, above suspended ceiling	none detected
4409-03-02-06	2'x2' ceiling tile, smooth (gypsum board type)	restrooms and janitor's closet	none detected
4409-03-02-07	2'x2' ceiling tile, pin holes and small gouges	throughout building	none detected
4409-03-02-08	12" floor tile, light gray with darker mottling	throughout building (primary tile)	none detected

Materials shown in bold are asbestos-containing materials.

General location information is provided to assist in identifying the material and may not list all locations where the material exists.

The samples were analyzed by polarized light microscopy (PLM) coupled with dispersion staining.

Reported asbestos percentages are visual estimations made by the microscopist.

Note: EMC was able to observe the construction adhesive used in the referenced 2022 building addition, for the rubber cover base installation along the walls. The remaining stock purchased by the contractor was turned over to the Pike Road Schools (stored on-site within the new building) to use in the future if repairs are necessary. The product's Safety Data Sheet was reviewed by EMC for the presence or absence of asbestos. This product contains no asbestos.

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method") but augmented with procedures outlined in the 1993 ("final") version of the method. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample. Estimation of uncertainty is available on request.
