

# Animal Science

The Animal Science / FFA program has started strong this year. Our program has 65 students enrolled and actively participating in different Agricultural activities. We have students exhibit-

ing sheep and goats at the local fair, caring for our small companion animals as well as our companion goats, creating gardening plots and designing landscape. We started our FFA year starting with 14 students attending the Greenhand Conference which is specifically for our freshman class. We also had our

officers' hosting meetings and planning their year of fun. The Animal Science Program has expanded this year with adding Pet Bathing and Pet Stylist to our curriculum. This program currently has 11 students in the Pet Bather Course and five in the Stylist Program. These students will end the year as a certified Bather or Stylist depending on their course. We are excited for the year and look forward to what comes next.
