

John Lawrence Elementary School

RCSS Elementary Media Specialists participated in Lego Education Academy Training on November 27th and received Duplo and Classic Lego Sets for each school library media center's maker space.

After listening to the book "How to Catch Santa Claus," John Lawrence Elementary School K-5th grade students were challenged to build a trap to catch Santa Claus using the sets. They had such a great time and were so engaged! "Hearing them explain their traps and all the engineering creativity that went into them was the best part," says Media Specialist, Madison Prevatte.
