

WHO DO YOU CONTACT WHEN YOU NEED ASSISTANCE?

Warren County Public Schools prides itself on providing all of our students a quality education. We are also mindful that we are here to serve our parents and community members. There are times throughout the school year when you may need to contact one of our staff members regarding an issue or concern that needs to be addressed. The following procedures are provided below to assist you in resolving or answering your questions/concerns:

1. First contact the person closest to the problem. An example: You have a question about something that happened in your child's classroom, the first person to contact is the teacher.
2. If the incident in question is not resolved at that level, then discuss the issue with the supervisor of that individual, in most cases the next person to discuss your concern with is the person who supervises that individual, for instance, the assistant principal or principal.
3. If at this point, you still feel your concerns have not been addressed appropriately, we ask that you contact the school principal if you have only spoken with the assistant principal. Most issues can be resolved at this level. Please give our school principals an opportunity to address your concerns. If your concerns cannot be addressed at the school level or you have a division-level issue, we encourage you to contact the appropriate department listed below that can best address your questions and/or concerns:
