Paulsboro BOE

662 North Delaware St.

Paulsboro, NJ 08066

Mr. McGarry,

I am submitting this proposal to the Paulsboro School District BOE to continue Physician Services for the 2024-2025 school year. South Jersey School Doctors, LLC has been school physician for Paulsboro Schools for the past 2 years. Please ask your school nurses, athletic director, administrators, athletic trainers and anyone else who has utilized my services. They will all vouch for my availability to be reached immediately when needed for a consult.

I have taken a special interest in trying to reduce the Homebound Instruction volume in the schools. I work closely with the school's Child Study Team to ensure services are provided to those students in need, but not over-utilized by students who do not fit the established criteria for such services. I am also a proud sponsor and donor to the Senior Scholarship program at Paulsboro.

My proposed salary for the position of School Physician for the 2024-2025 school year is **\$30,900**. This is just a 1% increase from last year which is less than standard raises in the public school system. This fee includes sports physicals done in the school on the mutually agreed upon dates.

New employees and transfer students are expected to get their pre-enrollment physicals at their medical home. If they choose the school physician, the charge will be \$50, plus \$30 if a PPD test is needed. Any independent evaluation of an employee to determine their ability to work (Fit for Duty) would be a \$150 fee per evaluation.

Please consider this proposal as I would want to immediately contact your Athletic Director and school nurses to get dates coordinated for athletic physical reviews.

I will, of course, be readily available for consultations regarding any health issues as they arise during the school year incurring no additional fee to the school district.

Looking forward to continuing our professional relationship. Thank you for your consideration in this matter.

Sincerely,

David M. Koerner D.O.
