Description of classes taught this school year:

Pre Ag I & 2 – (Animal Science/Small Animal Care) -

Introduction to Agricultural Science and Technology, a comprehensive course, provides students the knowledge and skills necessary for career planning and advanced study in the broad field of agriculture/agribusiness. Topics of instruction include the agricultural industry and its global importance; agricultural leadership organizations; agricultural research; concepts of animal and plant science; basics of mechanized agriculture; and personal and communication skills and it is recommended for students in grades 8-12.
