## Southwestern Randolph High School Air Quality

Mrs. Susan Helmer, a former teacher at Southwestern Randolph High School, met with the Board to express concerns regarding air quality at the school. Mrs. Helmer had conducted a survey of teachers during the 2001-2002 and 2002-2003 school years regarding symptoms of health issues. Staff reported symptoms such as, but not limited to, allergies/asthma, difficulty breathing, sore throats/hoarseness, sinus

infections, headaches/migraines, excessive fatigue, muscle/joint soreness, confusion/memory loss, and cancer. Most symptoms were experienced by staff who worked in the main building and/or annex. especially those near the welding shop. Mrs. Helmer stated that her research showed that these were symptoms of health issues related to poor air quality from toxic mold, asbestos, and high carbon dioxide rates. Mrs. Kay Copple, a former teacher at the school, also expressed concerns to the Board. Mrs. Copple is on disability and has a high sensitivity to smell which could have resulted from lengthy exposure to mold, formaldehyde, and poor air quality. Bob Scherer, Executive Director of Facilities and Construction, reported that some testing had been conducted at the school. He introduced Dennis Forbis, an industrial hygienist from S&ME. Mr. Forbis reported that testing had occurred in the main, annex, theater, and new wings of the school. He explained that there were no federal standards of how much mold, formaldehyde, CO2, etc. was too much; however, national guidelines established by ASHRAE gave some parameters for air quality. He reported that readings for mold were at a remarkably low level, mold was relatively small visibly, and was usually due to poorly insulated areas causing condensation on ceiling tiles. Mr. Scherer reported these areas had been insulated and damaged ceiling tiles replaced. Mr. Forbis also reported that CO2 levels were high, especially in rooms around the welding shop, due to poor fresh air intake and inadequate exhaust in the shop. Mr. Scherer reported the Department of Labor had also conducted tests at the school and had recommended that work be done to install ventilation in the shop and that the system have an engineer look at the HVAC system. Additionally, the Department of labor commended the school system for the manner in which Southwestern Randolph High School is being maintained. Mr. Scherer also reported that plans were being designed to revamp and replace the exhaust system in the shop area at an estimated cost of \$50,000. He also stated that redesign of the HVAC system to increase the intake of fresh air could cost as much as \$550,000. Mr. Forbis reported that the air quality issues were not life threatening, but could be a source of irritant to employees and students and result in complaints. The Board discussed manpower and equipment that would be needed to provide long-term sampling of the air quality in schools. They expressed appreciation to Mrs. Helmer and Mrs. Copple for bringing their concerns to the Board. Superintendent McRae stated the system would continue to be responsive to concerns and would continue to test, research, and improve air quality in the schools.

## Personnel Report

P. Guthrie made a motion seconded by T. McDonald that the Board approve the Personnel Report as presented. The motion carried: 6-0. The report as approved by the Board is as follows:
