

ADDENDUM 3

Questions regarding IT23.07.27.1 Computers

1. Do you have a guesstimate on how many interactive displays the school district may procure over the school year?
 - A. We do not have a guesstimate on quantity. At this point purchases would be replacement panels for panels out of warranty and/or a school may wish to add an additional panel to a room such as a conference room.

2. Would each interactive display installation be done on an individual basis? For example, would a school purchase one and the installer would then come in to install and set up or would there be multiple scheduled at a time?
 - A. Currently, this would be on an individual basis.

3. Can you provide me a copy of your Microsoft LOE (letter of eligibility)? This allows us to provide a more competitive price for the school district.
 - A. This letter would be provided to the awarded vendor.

4. Do you have an approximate size of the image (if requested) that would be placed on the desktop/laptop?
 - A. The largest image we have at this time is around 25G.
