From: Mark Bergthold, Bond Project Manager

Subject: Bond Activity Report as of September 7, 2023

This summer's bond projects are nearing completion. Classroom carpet has been installed, and teachers are busy preparing their room for incoming students. 1<sup>st</sup> floor lockers that were removed for flooring replacement will be installed today. First floor student bathrooms are expected to be completed tomorrow. The stairways are in process, one at a time will be closed while they're being redone.

Over the next four days, hallways will be waxed and the building will receive a final cleaning. While several projects will continue until completed, the building's facelift looks amazing. The new stair treads have a fresh look and the consistent wall color throughout ties it all together.

We're looking forward to seeing staff and students back in the building, enjoying the enhancements and new color scheme.

Respectfully submitted,

Mark Bergthold

Bond Project Manager
