WARNING: Keep your head up. Do not butt, ram, spear, or strike an opponent with any part of this helmet or faceguard. This is a violation of football rules and may cause you to suffer severe brain or neck injury, including paralysis or death and possible injury to your opponent. Contact in football may result in Concussion/Brain injury which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea, or confusion. If you have symptoms, immediately stop and report them to your coach, trainer, and parents. Do not return to a game or contact until all symptoms are gone and you receive medical clearance. Ignoring this warning may lead to another and more serious or fatal brain injury. NO HELMET SYSTEM CAN PROTECT YOU FROM SERIOUS BRAIN AND/OR NECK INJURIES INCLUDING PARALYSIS OR DEATH. TO AVOID THESE RISKS, DO NOT ENGAGE IN THE SPORT OF FOOTBALL. TO ACHIEVE THE MOST EFFECTIVE PERFORMANCE OF A Schutt HELMET, USE ONLY SCHUTT SPORTS REPLACEMENT COMPONENTS. WARNING: Do not attach any accessories that are not supplied by and/or approved to be worn with Schutt helmets. Attachment of accessories not supplied by or recommended for Schutt helmets will void the warranty and could adversely affect the protective capabilities of the helmet. If you are unsure if an accessory is approved, please visit schuttsports.com. Due to differences in head shapes and sizes, adjustments may be needed to achieve proper fit and/or comfort. Please refer to the fitting instructions booklet included with each new Schutt helmet. Also available at schuttsports.com. Using jaw pads from suppliers other than Schutt Sports will void the warranty.

## THE NEXT LEVEL IN DESIGN, PROTECTION, AND PERFORMANCE

With athlete safety at its core, the VICIS ZERO2 sets the new standard in impact mitigation. The VICIS ZERO2 helmets outperformed all other helmets tested in the NFL and NFLPA's Annual Laboratory Testing.

## UNPRECEDENTED PERFORMANCE TOP-RANKED HELMETS

Certor Sports helmets earned four of the top five spots in the 2025 NFL and NFLPA's Annual Laboratory Testing.

### ¥vicis ZEROZ

## A TRULY MULTI-LAYERED HELMET SYSTEM

Developed by VICIS' innovative team of engineers and designers, the ZERO2 takes a revolutionary approach to offer out-of-the-box thinking for a completely reimagined helmet. The ZERO2 is more than 15% lighter than its predecessor ZERO1, and allows the athlete to dial in fit, comfort, and performance to elevate their game.

#### 01 DEFORMABLE OUTER SHELL

Flexible outer shell technology, exclusive to VICIS helmets, allows the ZERO2 to respond like no other helmet on the market. By deforming like a car bumper, impact forces are absorbed at the point of contact, before they reach the head. The result is not only groundbreaking protection, but a helmet that feels like no other.

#### **02** VICIS RFLX 2.0

Optimized for the ZERO2, VICIS RFLX 2.0 continues to leverage buckling structures, but has evolved the design with an array of columns interconnected by thin, flexible walls. The result is greater impact performance at a lower weight, allowing VICIS to further tune impact performance in key locations.

#### 03 REINFORCED INNER SHELL

The inner shell has been engineered through data collected from hundreds of head shapes to optimize fit accuracy, maximize player comfort, and accommodate a wider range of players.

#### **04** DLTA FIT SYSTEM

Raising the bar for personalized comfort and secure fit, the VICIS DLTA pod system is comprised of two layers: impact on the RFLX side, and comfort against the player's head. Fully interchangeable pads across 6 locations in multiple thicknesses translates to virtually unlimited customization without the need for air bladders. Updated pod materials provide upgraded comfort and improved durability.

### GROUNDBREAKING NEW APPROACH

The ZERO2 features a new and innovative approach to VICIS' RFLX structure to reduce weight without compromising on performance, a streamlined new design, and an array of customization options available to each athlete.

#### **ENHANCED FIELD OF VIEW**

Optimized vertical and horizontal sightlines provide the athlete maxmium situational awareness so they can perform at an elite level.

#### SIGNIFICANT WEIGHT REDUCTION

The ZERO2 is more than **15% lighter** than its predecessor ZERO1, and allows the athlete to dial in fit, comfort, and performance to elevate their game. Designed like no helmet before it, the ZERO2 is a combination of science, safety and sports equipment that is built for serious players.

**INTRODUCING** THE ALL-NEW

## THE LATEST EVOLUTION IN POSITION-SPECIFIC PROTECTION

The VICIS ZERO2 QB is the first-ever helmet engineered to provide position-specific protection for quarterbacks. Meticulously tested and optimized to provide unparalleled performance for the impacts quarterbacks experience.

### **TOP-RANKED**

#### NOTHING LESS THAN TOP RANKED PROTECTION

With its advanced technology and exceptional performance, the ZERO2 QB helmet provides unparalleled protection, allowing quarterbacks to perform at their best and take control on the field.

Engineered with the player's safety as the utmost priority, the ZERO2 QB has been recognized as highest ranked helmet in the 2025 NFL/NFLPA QB helmet performance rankings.

#### DESIGNED FOR THE QUARTERBACK

The ZERO2 QB leverages an all-new RFLX layer that has been developed and optimized based on data provided by the NFL & NFLPA which illustrates common impact locations and impact velocities experienced by quarterbacks.

By harnessing these data points, VICIS RDI has introduced a new RFLX layer for the ZERO2 QB designed to effectively mitigate and absorb forces associated with these impact types. This new design offers enhanced protection to the quarterback's head in areas that are frequently impacted during gameplay.

#### **ENHANCED FIELD OF VIEW**

Like all VICIS helmets, the ZERO2 QB offers an industry-leading field of view, providing athletes with an enhanced level of awareness on the field. Improved vertical and horizontal sight lights means quarterbacks can see and react quicker than the traditional helmet.

#### **NICIS**

## ZEROZ QBELITE

#### **UNPARALLELED PERFORMANCE**

The VICIS ZERO2 QB is the first helmet designed to offer position-specific protection for quarterbacks, meticulously tested and optimized to excel during the common impacts experienced by quarterbacks.

#### **FEATURE SET INCLUDES:**

- RFLX 2.0
- VICIS DLTA FIT SYSTEM
- VICIS FORM LINER
- RAPID MOUNT FACEGUARD ATTACHMENT

#### **ELITE UPGRADE INCLUDES:**

- TITANIUM FACEGUARD
- FUSION ELITE CHINCUP
- EDGE EYE SHIELD BY OAKLEY | CLEAR
- QUARTER TURN SYSTEM
- ANKR LOCK SYSTEM

**PRICING // MSRP \$929.99** 

#### **ENGINEERED FOR QUARTERBACKS**

The only helmet designed specifically for quarterbacks, the ZERO2 QB leverages an all-new RFLX impact layer that has been developed and optimized for hits commonly experience by quarterbacks, most notably head-to-ground.

#### **UNMATCHED FIELD OF VIEW**

Utilizes an industry-leading field-of-view, providing athletes with an enhanced level of awareness on the field, meaning quarterbacks can see more and react quicker than the traditional helmet.

#### **QUARTER TURN** ATTACHMENT SYSTEM

1/4 Turn lower faceguard connection allows for a very quick removal or attachment of the ZERO2 faceguard, especially when paired with the RAPID Mount upper connection.

#### **FUSION ELITE CHIN STRAP**

Custom built for the VICIS ZERO2, the Fusion Elite Chincup features a deformable upper panel for improved comfort, streamlined strap routing, and shell integration without sacrificing protection.

## SYICIS ØZTRENCH

## THE FIRST EVER POSITION-SPECIFIC HELMET

Engineered with the player's safety as the utmost priority. the ZERO2 Trench has been recognized as **highest ranked helmet in the 2025 NFL/NFLPA Offensive/Defensive Linemen helmet performance rankings.** 

Flexible outer shell technology, exclusive to VICIS helmets, allows the ZERO2 TRENCH to respond like no other helmet on the market. By deforming like a car bumper, impact forces are absorbed at the point of contact, before they reach the head. Combined with the additional offset and proprietary structure of the TRENCH, the result is improved impact mitigation for every type of hit.

WATCH THE ZERO2 TRENCH FEATURES VIDEO // CLICK OR SCAN QR CODE

#### **02 TRENCH**

#### **HOW WAS IT DESIGNED?**

Linemen experience more than twice as many impacts as other players, with the largest percentage of hits to the front of the helmet. The majority of those impacts are low velocity between 2.1 and 4.5 m/s. Based on this data, the TRENCH helmet was designed with additional offset in the frontal region, specifically tuned for low velocity impacts. To complete this optimization VICIS leveraged the combination of a deformable outer shell and engineered impact structure.

#### WHAT ABOUT HIGH VELOCITY IMPACTS?

At the core of this helmet sits the ZERO2, designed from the ground up in 2021. Guided by the latest NFL/NFLPA helmet protocol, the ZERO2 was optimized for 5.5, 7.4, 9.3m/s.

#### **₹**VICIS

## **OZTRENCH**

#### **POSITION SPECIFIC DESIGN**

The TRENCH builds upon the game-changing ZERO2 helmet platform, utilizing a soft deformable shell specifically designed to better protect on impacts that occur play after play.

#### **FEATURE SET INCLUDES:**

- RFLX 2.0
- VICIS DLTA FIT SYSTEM
- VICIS FORM LINER
- RAPID MOUNT FACEGUARD ATTACHMENT
- STEEL FACEGUARD
- FUSION CHIN STRAP

#### WHITE OUT KIT OPTION

PG. 45

Available for all helmets. Includes:

White Rapid Mount White Front Bumper White Rear Bumper White Chin Strap & Cup

TOP-RANKED

BY NFL & NFLPA
LAB TESTING

**PRICING // MSRP \$764.99** 

#### POSITION SPECIFIC HELMET

The game's first position-specific helmet. Designed for Linemen, the additional offset of the TRENCH helmet in the front and upper side is designed to mitigate repetitive low velocity impacts (2-4 m/s).

#### **EXCLUSIVE NEW FACEGUARD OPTION**

Introducing the **S0-215**, a new face-guard design available excusively for the ZERO2 TRENCH. The S0-215 offers the same optimized vertical and horizontal sightlines to provide the athlete maxmium situational awareness.

#### **HOW WAS TRENCH OPTIMIZED?**

Using the same linear impact ram found in the NFL/NFLPA lab, VICIS completed testing at the front and oblique front locations, focusing on reducing acceleration at low velocity impacts. The ZERO2 TRENCH **outperformed every other helmet** tested in the Virginia Tech Helmet Rating system.

#### **SHELL SIZES**

### VICIS ZEROZ

#### **HELMET FITTING GUIDE**

- **1** Familiarize yourself with the different fit zones in the helmet- Top/Sides/Back/Occipital/Stabilizer Pads/ Form Liner (Varsity Only).
- **2** The front pad is not a fit adjustable item in the helmet.
- **3** Test Fit the helmet on the Athletes Head. Note the starting point "out of the box" fit is: Occipital-0.625", Top/Side/Rear-0.5", Occipital Form Liner installed (Varsity Only).
- 4 Rear If the helmet is too loose front to back, adjust the rear two DLTA pods by exchanging to thicker pod options to snug up the fit.
- **5 Toρ** If the helmet sits too high, move Athlete to the next size up in the helmet.
- **Top** If the helmet sits too low, adjust the Top DLTA pod for optimal brow height (front edge of helmet should be 1" above the brow)
- **7 Sides** If the helmet is too loose side to side, adjust the side two DLTA pods by exchanging to thicker pods to snug up the fit.
- 8 Occipital If the helmet is too loose or gapped at the occipital, adjust the occipital DLTA pods by exchanging to a smaller or larger size.
- 9 Occipital If the Helmet is too tight at the occipital, remove the form liner behind the occipital DLTA fit pod (Varsity Only)
- **Stabilizer Pad** Adjust the stabilizer pads to desired comfort level by exchanging to thicker or thinner pads, creating just enough pressure to compress the cheeks.
- **11 Fit** The helmet should be snug but not uncomfortable. New parts will conform to Athlete's head shape during the first few uses.
- **12 Chin Strap** Adjust the chin strap upper then lower lengths. When upper length set, cut strap 1" from top of buckle and tuck remaining length into shell slot.

#### **DLTA POD INSTALLATION & REMOVAL TIPS:**

#### INSTALL

- Fold pod in half along base axis.
- Align the point of the snap post into the matching triangular hole in inner shell.
- Push down with thumb or knuckle in center of pod while helmet is on a solid surface.
- Listen for audible snap.

#### REMOVAL

- Slide finger under pod base as far as possible (longest side).
- Pry base up and away from inner shell.

## Ø2 MATRIX ID

## PARADIGM SHIFTING PROTECTION

The MATRIX system is a microfilament structure which is a replacement to the DLTA fit system for the MATRIX helmet.

MATRIX provides ultimate flexibility in the fitting process without having to wait for a custom manufactured helmet. By providing multiple unique fit contours per location and adjustable comfort top layers, the MATRIX pods are ready for gameplay out of the box. This allows for immediate fit feedback from players that can be adjusted at any time.

Similar to DLTA pods, MATRIX pods deliver customized comfort and a secure fit without air bladders. This is accomplished by unique biofidelic contoured pads which elevates the locked-in fit of the ZERO2 MATRIX.

## ADDITIONAL FEATURES TO ELEVATE YOUR GAME

#### **FUSION ELITE CHIN STRAP**

Custom built for the VICIS ZERO2, the Fusion Elite Chin Strap features a deformable upper panel for improved comfort, streamlined strap routing, and shell integration without sacrificing protection.

#### EDGE SHIELD by Oakley

Designed exclusively for the ZERO2 and engineered for optimal vision, the EDGE Shield offers players enhanced safety and performance by providing the sharpest vision with minimum distortion.

#### TITANIUM FACEGUARD

All-new faceguards built exclusively for the ZERO2, available in both titanium and steel. Titanium faceguards are 30% lighter than the steel on the standard ZERO2.

#### **QUARTER TURN**

1/4 Turn lower faceguard connection allows for a very quick removal or attachment of the ZERO2 faceguard especially when paired with the RAPID Mount upper connection (faceguard removed in as fast as 10 seconds).

#### ¥VICIS

### EDGE SHIELD BY OAKLEY

#### **ELEVATED ON-FIELD VISIBILITY**

**Optimized vertical and horizontal sightlines** provide the athlete maxmium situational awareness so they can perform at an elite level. With a shape designed exclusively for the ZERO2, the EDGE Shield offers players enhanced performance by providing the sharpest vision with minimum distortion.

Leveraging new manufacturing tools and software, including Freeform High Definition Optics® (HDO) and PRIZM™ Lens Technology, the EDGE Shield lens was exclusively engineered for the ZERO2, allowing Oakley to create an optically correct shield to match the unique shape of ZERO2 faceguards, and the ZERO2's wide field of view.

	LIGHT TRANSMISSION	LIGHT CONDITIONS	CONTRAST	BASE LENS COLOR

## SCHUTT VARSITY HELMETS

#### F72.0

The Schutt F7 2.0 utilizes the same iconic styling of the original F7, but with improved impact performance for maximum athlete protection and increased athlete comfort. The Schutt F7 2.0 recorded a **top rating in the Virginia Tech Performance Helmet ratings**.

#### F7UR1 2.0

As footballs most customizeable helmet, the UR1 2.0 maximizes an athlete's fit for maximum performance. With computer pressure mapped pods, UR1 2.0 empowers athletes and equipment managers to skillfully adjust helmet pressure and fit to compensate for changes the athlete experiences, to environmental conditions.

#### Vengeance PRO LTD II

Low-profile helmet shell and an inflatable SUREFIT air liner along the back and sides. Equipped with TPU Cushioning, which won't take a compression set, even after thousands of impacts. The liner on the helmet wraps itself around the player's head, evenly distributing the pressure and weight providing a comfortable fit.

#### The Next Evolution of the Game's Most Dynamic Helmet

The Schutt F7 2.0 incorporates a completely redesigned impact layer, an expanded Tektonic plate system for load distribution, and a completely re-engineered fit platform, all housed within the game's most dynamic outer shell. The result is the same iconic styling of the original F7, but with improved impact performance for maximum protection and increased athlete comfort.

#### 01

#### RFLX-S

The Schutt F7 2.0 features the RFLX-S impact layer, which absorbs and deflects impact forces before they reach the athlete's head. It is further optimized to respond to impacts in unison with a rigid outer shell and Schutt's Tektonic Plate System.

#### 02

#### TEKTONIC PLATE LOAD-MANAGEMENT SYSTEM

The Schutt F7 2.0 now incorporates interior Tektonic plates which improve impact distribution across the entirety of the helmet. Building upon the exterior plates synonymous with the original F7 design, the expanded Tektonic plate load management system is a key component that contributes to the 2.0's improved impact performance.

#### AIR ASSISTANCE

The F7 2.0 features a single inflation point to help athletes personalize their fit through the addition of air within the contoured air pocket. Now relocated to the rear bumper of the helmet, the fast-access inflation point is designed for ease of use by athletes, parents, and equipment managers alike.

#### 04

#### INCREASED ATHLETE COMFORT AND IMPROVED FIT FLEXIBILITY

The F7 2.0 introduces an all-new adaptive fit system that provides unrivaled flexibility and superior comfort. Newly designed impact-sensitive pods combine a comfort layer with a D30 rate-sensitive dampening layer. To improve the range of fit dynamics unique to each athlete, the helmet liner integrates an industry-first stacking pod system in five locations. This Tear-Away pod system makes for a quick-and-easy fit system using geometry interlock and Velcro<sup>®</sup>.

FOR VIRGINIA TECH RATING

The F7 2.0 recieved a 5-Star Rating in the Virginia Tech helmet protocols. Scan QR Code for link to ratings.

#### **CLICK OR SCAN OR CODE** FOR F7 2.0 INTRO VIDEO

Learn more about the newly redesigned F7 2.0 and what makes it the game's most dynamic helmet.

#### VIRGINIA TECH TOP-RATED HELMET

The Schutt F7 2.0 recorded a top rating in the Virginia Tech Performance Helmet Ratings, with a five-star rating and an extremely high performing score of 1.35.

#### NOT YOUR AVERAGE 5-STAR HELMET

Not all five-star helmets are created equally. The F7 2.0 tested signifigantly better in impact performance than the average five-star-rated helmet in the 2024 Virginia Tech Helmet Ratings.

#### **HELMET SIZE CHART**

HELMET SIZE	HEAD SIZE	HEAD CIRCUMFERENCE	HSS PADS INCLUDED
Medium	6½ – 7	20½ – 22"	3/4" - 1"
Large	7 – 7½	22 – 23½"	1/2" - 3/4"
X-Large	7½ – 8	23½ – 25"	1/2" - 3/4"

The graph compares this helmet's performance to the average 5 star-rated helmet at the 3 impact severities. Lower values for the score contribution indicate better performance. [Source: Virginia Tech]

#### **VARSITY HELMET FEATURES & FITTING GUIDE**

Measure the player's head as shown, 1" above the eyebrows around the widest part of the head, using the chart on helmet pages for size guideline.

Lubricate the pump needle generously and insert needle as shown. Do not force the needle into the port; doing so may puncture the liner's opposite wall.

Begin with bottom inflation port on back of helmet. Perform 1-3 pumps. Helmet should be snug against player's head but not overly tight. Excess air is released

When finished, repeat for top inflation port. Proper inflation will usually require 0-2 pumps, but that may vary.

Helmet's front edge and nose bumper should be approximately 1" above the player's eyebrows.

Attach chin strap to the helmet underneath the faceguard, never above it. Tighten chin strap to be snug and centered on the chin.

Jaw pads should be snug against the player's face, flush with his jaw, without pushing too forcefully into his cheeks.

The helmet should fit snugly, without being too tight. There should be no independent movement of the helmet.

Measure the player's head as shown, 1" above the eyebrows around the widest part of the head, using the chart on helmet pages for size guideline.

Attach chin strap to the helmet underneath the faceguard, never above it. Tighten chin strap to be snug and centered on the chin.

Jaw pads should be snug against the player's face, flush with his jaw, without pushing too forcefully into his cheeks.

Measure the player's head as shown, 1" above the eyebrows around the widest part of the head, using the chart on helmet pages for size guideline.

Lubricate the pump needle generously and insert needle as shown. Do not force the needle into the port; doing so may puncture the liner's opposite wall.

Begin with bottom inflation port on back of helmet. Perform 1-3 pumps. Helmet should be snug against player's head but not overly tight. Excess air is released with valve.

When finished, repeat for top inflation port. Proper inflation will usually require 0-2 pumps, but that may vary.

Helmet's front edge and nose bumper should be approximately 1" above the player's eyebrows.

Attach chin strap to the helmet underneath the faceguard, never above it. Tighten chin strap to be snug and centered on the chin.

Jaw pads should be snug against the player's face, flush with his jaw, without pushing too forcefully should be no independent moveinto his cheeks.

The helmet should fit snugly, without being too tight. There ment of the helmet.

Measure the player's head as shown, 1" above the eyebrows around the widest part of the head, using the chart on helmet pages for size guideline.

Attach chin strap to the helmet underneath the faceguard, never above it. Tighten chin strap to be snug and centered on the chin.

Jaw pads should be snug against the player's face, flush with his jaw, without pushing too forcefully into his cheeks.

The helmet should fit snugly, without being too tight. There should be no independent movement of the helmet.

# VICIS | schutt RECONDITIONING

# GET STARTED WITH SCHUTT RECONDITIONING & RECERTIFICATION

As a NAERA member licensed by NOCSAE we meet and exceed industry standards. All helmets are tagged with RFID tracking labels to record important information and allow easy identification throughout the process. All interior parts and faceguards are removed allowing better inspection, cleaning and sanitizing. Internal parts are reinstalled in the same helmet and rejected parts are replaced with new OEM parts. Shells are inspected, cleaned, sanitized and prepped for finish. Paint or polish. New recertification, NOCSAE, warning, size and initial season labels installed.

- Simple and Transparent
- Credit for rejected helmets towards new purchases
- New vapor blasting process
- Faceguard recoating and certification
- Online Order Management
- Online Tracking
- All work performed 100% domestically in Salem, IL Online Reporting
- Simple Order Entry for Recon and New Equipment

- Automated Order Acknowledgements
- Access to Order History
- Inbound Tracking
- Outbound Tracking
- Real Time Status Updates throughout Process
- Inventory Reports
- Reconditioning History
- Parts Replacement Reports
- Standard & Premium Options Available

### **SHOULDER PAD FITTING GUIDE**

IDENTIFY

Identify the player's position and choose the appropriate Schutt shoulder pad model.

**MEASURE SHOULDERS** 

Measure the width of the shoulder span, from the right to left tips of the humerus, using a cloth measuring tape.

**MEASURE CHEST** 

Using the cloth measuring tape, wrap around the player's torso to measure the player's chest circumference.

**PUT ON PADS** 

Determine the proper size of shoulder pad (from the measurements) and place them onto the player's shoulders.

**SECURE STRAPS** 

Buckle the belts then connect any straps that the shoulder pad uses. Ensure a good, tight fit in the chest and back areas.

### **CHECK FIT**

Ensure the shoulder pads are providing proper front coverage by confirming the pads cover the sternum, as well as the front upper shoulders.

### **ENSURE FIT | FRONT**

Check the collar and neck area to ensure there is no pinching and the fit is not too tight.

**ENSURE FIT | BACK** 

For proper coverage in the back, confirm the pads are covering the scapula and rhomboid areas. The player should have maximum range of arm motion.
