WARNING: NO HELMET CAN PREVENT SERIOUS HEAD OR NECK INJURIES A PLAYER MIGHT RECEIVE WHILE PARTICIPATING IN FOOTBALL. Do not use this helmet to butt, ram or spear an opposing player. This is in violation of the football rules and such use can result in severe head or neck injuries, paralysis or death to you and possible injury to your opponent. Contact in football may result in CONCUSSION-BRAIN INJURY which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea or confusion. If you have symptoms, immediately stop playing and report them to your coach, trainer and parents. Do not return to a game or practice until all symptoms are gone and you have received MEDICAL CLEARANCE. Ignoring this warning may lead to another and more serious or fatal brain injury.

TRU-FIT™

Riddell

TRU-FIT™

The fit and feel of Precision-Fit - without dedicating the helmet to an individual player. The liner system can be reconfigured to fit a different player as a program's roster evolves.

Personalized fit is achieved by analyzing a 3D image of an athlete's head collected with Riddell's Head Scanning app powered by Verifit™.

Each helmet is built with a custom combination of interior liner pads that work together to create a personalized fit and protection system.

No Fitting Foams. No Air Adjustments.

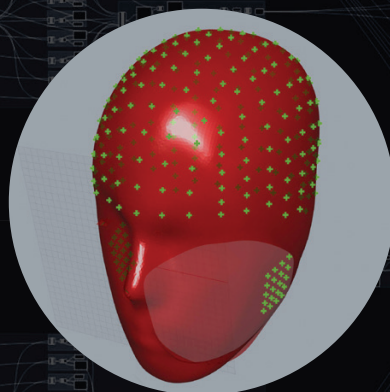

HOW IT'S DONE

ACQUIRE HEAD SCAN

The 3D scanning technology developed for Precision-Fit helmets captures surfaces accurate up to 0.5 mm. The Riddell Head Scanning app powered by Verifit™ is easy to download and use for iOS and Android devices from your app store.

FIT ANALYSIS

Riddell's proprietary fit algorithm analyzes thousands of data points from the head scan to select shell size and energy management components to generate a unique, individualized build configuration.

INDIVIDUALIZED BUILD

In Riddell's facility in North Ridgeville, Ohio, each helmet is built by combining the team's design specifications, individual player preferences, and unique build configuration. The helmet is labeled with the player's name to complete the personalization process.

INSITE ANALYTICS

HELP IMPROVE PLAYER PERFORMANCE WITH THIS ANALYTICS REPORTING SUITE

Riddell is using proprietary impact metrics to deliver customers a unique depiction of a football program's daily routines.

By leveraging data, teams will create a distinct competitive and performance advantage:

- Analyze impact data by dress type to make informed practice plan decisions.
- Analyze impact location to proactively influence player behavior, manage impact exposure, improve training technique and keep athletes on the field.
- Correlate game day performance to team and players' impact workload data.

"We made an investment several years ago when we partnered up with Riddell. We've altered how we practice to make it a safer game. We're seeing players that initially would lead with the head and we're seeing that technology has allowed us to coach guys differently to get those high impact occurrences way, way down."

RECONDITIONING

THE WORLD'S LARGEST RECONDITIONER OF FOOTBALL EQUIPMENT

LEARN MORE

Watch this video from our YouTube page to see more of the reconditioning process steps.

HOW IT'S DONE

Annual reconditioning ensures equipment continues to meet performance standards.

1. UNLOAD

Helmet bags are delivered to our facility. Each bag is taken out by hand.

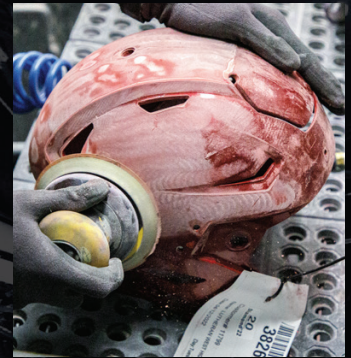

2. SORT

Each bag is sorted by school name and then placed in line to be evaluated.

3. TEARDOWN

Face masks, hardware and decals are removed.

4. BUFF & SAND

The shell of the helmet is sanded and buffed to smooth out any gouges and remove any remaining decals.

SANITIZE

Riddell will clean, sanitize, recondition and recertify your equipment. Take an extra step to sanitize with an O-Zone add-on.

NOT INTENDED FOR THE PREVENTION OF COVID-19

NOC SAE CERTIFIED

Football helmets are now required to be recertified minimally every other year in accordance with manufacturer's warranty validation requirements to remain NOCSAE certified.

5. WASH

Helmets are cleaned and sanitized by hot pressurized water and detergent and then rinsed.

6. INSPECT

Helmets are hand-inspected for hairline cracks and any other defects.

7. PAINT

For painted helmets, new paint is applied. Paint color changes can also be made at this time.

8. BUILD

Interior parts are replaced if necessary. Warnings, other labels and a recertification seal are applied before hardware is reattached.

Riddell reserves the right to reject any equipment obsolete, outdated, not meeting the required standards or not meeting the expense of repair.

TERMINOLOGY

INTEGRATED RIPKORD™ TECHNOLOGY

The RipKord shoulder pad removal system utilizes a release mechanism that is strategically integrated into the shoulder pad that allows for quick and easy removal and access to the player.

STAC SHOULDER SYSTEM

Patented designed cap and epaulet system provides protection to the AC joint while allowing for maximum mobility.

REMOVABLE/ ADJUSTABLE DELTOIDS

Contoured closed cell foam piece that protects the deltoid muscle during contact.

SWIM CUT ARCHES

Strategically designed arch pattern used to optimize an athlete's arm motion.

BIOTHANE® STAC STRAPS & BELTS

Strong, flexible Biothane® coated webbing.

FLAT PAD DESIGN

Shoulder pad design that sits low across the player's shoulder, minimizing interference with the rotational range of the helmet. Rigid belts route forces away from the point of impact by converting the entire arch into a large-scale, shock absorbing system.

STAINLESS STEEL HARDWARE

Rust-resistant hardware used to attach components of the shoulder to add structure and rigidity to the pad.

AIR MANAGEMENT LINER

Shoulder pad liner construction that attenuates impact energy on a cushion of air within semi-sealed chambers. Energy dispersion occurs through spreading the impact forces within a large volume of air slowly released from the liner at a controlled rate.

REMOVABLE / ADJUSTABLE BODIES

Ability to shift pads to meet player's preference.

CORRUGATED ARCHES & EPAULETS

Engineered design element which raises areas of the outer surface to create a stronger structure, allowing the component to be thinner for weight reduction.

INTEGRATED DELTOID PADS

Open cell foam piece that protects the deltoid muscle during contact.

PVC BELTS

Adjustable belts secure the shoulder pad to maintain protective placement for a proper fit.

Z-FIT BELTING SYSTEM

Attachment system using high-strength nylon clips to increase the ease of putting on and securing a shoulder pad.

ELITE PERFORMANCE TECHNICAL TRAINING EQUIPMENT

This innovative tackle system has changed the way players and coaches prepare and train. It emphasizes specific tackling techniques and skill development relating to all the tackles a player may be faced with during a game. The goal is to create the player who is a 'Multi-Purpose Tackler'.

The equipment is designed at different heights and weights which creates varying degrees of difficulty depending on the training aid being used. There are three tackle levels:

These training aids allow the player to work continually throughout the season on key technique and skills development, while taking away the 'player on player' contact. Learn more about the products and see them in action at www.gsi-performance.com.
