

2025-2026 School Year  
Senate Bill 12 Consent Forms

New legislation, Senate Bill 12, requires parents and guardians to provide annual consent for certain school-based services and activities. New consent forms are for:

- **Health Services**—Parents must give consent for routine physical health services such as giving a child a band-aid or ice pack
- **Student Clubs/organizations**—Parents must give consent for a child to participate in school sponsored clubs. All extracurricular opportunities are reviewed and vetted to ensure compliance with state laws and district guidelines
- **School Counseling Services**—Parents must give consent for mental health services such as school-based counseling for emotional or behavioral support

Please review the consent forms and return them to school. **Without this consent, Savoy ISD will not be able to provide basic physical or mental health services.** Please direct any questions to your campus principal.
