Florida Department of Education Curriculum Framework

Program Title: Emergency Medical Technician Program Type: ATD (Applied Technology Diploma)

Career Cluster: Health Science

	College Credit	Clock Hour Program
Program Number	N/A	W170212
CIP Number	0351090408	0351090413
Grade Level	Applied Technology Diploma (ATD)	30, 31
Standard Length	12 credit hours	300 clock hours
CTSO	HOSA: Future Health Professionals	HOSA: Future Health Professionals
SOC Codes (all applicable)	29-2041 Emergency Medical Technicians and Paramedics 31-9099 Healthcare Support Workers, All Other	29-2041 Emergency Medical Technicians and Paramedics 31-9099 Healthcare Support Workers, All Other
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/care	eer-tech-edu/program-resources.stml
Basic Skills Level:	N/A	

<u>Purpose</u>

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

This is an instructional program that prepares students for employment as emergency medical technicians SOC Code 29-2041 (Emergency Medical Technicians and Paramedics) to function at the basic pre-hospital emergency medical technician level and treat various medical/trauma conditions using appropriate equipment and materials. The program prepares students for certification as EMT's in accordance with Chapter 64J of the Florida Administrative Code. The program must be approved by the Department of Health, Office of Emergency Medical Services, and the curriculum must adhere to the US Department of Transportation (DOT) National EMS Education Standards for EMT. This is the initial level for a career in emergency medical services and the primary prerequisite for paramedic training and certification.

The content includes but is not limited to patient assessment, airway management, cardiac arrest, external and internal bleeding and shock, traumatic injuries, fractures, dislocations, sprains, poisoning, heart attack, stroke, diabetes, acute abdomen, communicable diseases, patients with

abnormal behavior, alcohol and drug abuse, the unconscious state, emergency childbirth, burns, environmental hazards, communications, reporting, extrication and transportation of patient. The student must be proficient in patient assessment and evaluation, the use of suctioning devices, oral and nasal airways, resuscitation devices, oxygen equipment, sphygmomanometer and stethoscope, splints of all types, pneumatic anti-shock garments, extrication tools, dressings and bandages, stretchers and patient carrying devices.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is an Applied Technology Diploma (ATD) program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An ATD program may consist of either technical credit or college credit. A public school district may offer an ATD program only as clock hour credit, with college credit awarded to a student upon articulation to a state college.

When offered at the district level, this program is a planned sequence of instruction consisting of 1 occupational completion point and the courses as shown below.

OCP	Course Number	Course Title	Length	SOC Code
Α	EMS0110	Emergency Medical Technician (EMT)	300 hours	29-2041

College Credit

When offered at the college credit level, this ATD program is part of the Emergency Medical Services (1351090402) program and has a length of 12 credits.

Regulated Programs

This program meets the Department of Health trauma score card methodologies and Sudden Unexpected Infant Death Syndrome (SUIDS) training education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met. This program also meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore the instructor <u>may</u> provide a certificate for renewal purposes to the student verifying these requirements have been met.

Please refer to chapter 401 F.S. for more information on disqualification for the EMT license through the Office of Emergency Medical Services (EMS), Department of Health.

An EMT program must be taught by an instructor meeting the qualifications as set forth in 64J-1.0201 FAC.

Students must complete this program, or demonstrate the mastery of skills standards contained in this program, before advancing in either of the other programs in this cluster. Completion of this program should prepare the student for the certification examination approved for the state of Florida.

An American Heart Association or Red Cross certification or equivalent in "professional" BLS is required of all candidates for entrance into an EMT program.

The Student Performance Standards for Emergency Medical Technology-EMT were adapted from the US Department of Transportation (DOT) National EMS Educational Standards for EMT.

Once students have successfully completed the EMT Program, they may be given a certificate stating they have met all Emergency Medical Responder competency requirements.

Florida Statute 401.2701 requires that the instructor-student ratio should not exceed 1:6. Hospital activity shall include a minimum of 20 hours of supervised clinical supervision, including 10 hours in a hospital emergency department. Clinical activity shall include appropriate patient assessment skills, intervention and documentation relevant to each clinical rotation.

Field internship shall include a competency based program to assure appropriate pre-hospital assessment and management of medical and trauma patients, as well as associated manual skills. The field internship activity shall include a minimum of 5 emergency runs resulting in patient care and transport appropriate for the EMT. In addition, the patient care component should include minimum competencies in patient assessment, airway management and ventilation, trauma and medical emergencies.

It is strongly recommended this program be accredited by Commission on Accreditation of Allied Health Education Programs (CAAHEP).

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate a simple depth, foundational breadth of knowledge of EMS systems.
- 02.0 Demonstrate a simple depth, simple breadth of knowledge of research and evidence-based decision making.
- 03.0 Demonstrate a fundamental depth, foundational breadth of knowledge of workforce safety and wellness.
- 04.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the principles of medical documentation and report writing.
- 05.0 Demonstrate a simple depth, simple breadth of knowledge of the EMS communication system, communication with other health care professionals, and team communication.
- 06.0 Demonstrate a simple depth, simple breadth of knowledge of the principles of therapeutic communication.
- 07.0 Demonstrate a fundamental depth, foundational breadth of knowledge of medical legality and ethics.
- 08.0 Demonstrate a fundamental knowledge of the anatomy and function of all human systems to the practice of EMS.
- 09.0 Demonstrate a fundamental knowledge in the use of medical terminology.
- 10.0 Demonstrate a fundamental knowledge of the causes and pathophysiology of shock and the components of resuscitation.
- 11.0 Demonstrate a fundamental knowledge of life span development to patient assessment and management.
- 12.0 Demonstrate a simple knowledge of the principles of illness and injury prevention in emergency care.
- 13.0 Demonstrate a simple depth, simple breadth of knowledge of pharmacology, medication safety, and medication types used during an emergency.
- 14.0 Demonstrate a fundamental depth, simple breadth of knowledge of emergency medications within the scope of practice of the EMT.
- 15.0 Demonstrate a foundational depth, fundamental breadth of knowledge of airway management across the life span within the scope of practice of the EMT.
- 16.0 Demonstrate a fundamental depth, foundational breadth of knowledge of respiration.
- 17.0 Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span.
- 18.0 Demonstrate a fundamental depth, foundational breadth of knowledge of scene management and multiple patient situations.
- 19.0 Demonstrate a fundamental depth, simple breadth of knowledge of the primary assessment for all patient situations.
- 20.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the components of history taking.
- 21.0 Demonstrate a fundamental depth, foundational breadth of knowledge of techniques used for a secondary assessment.
- 22.0 Demonstrate a simple depth, simple breath of knowledge of monitoring devices within the scope of practice of the EMT.
- 23.0 Demonstrate a fundamental depth, foundational breadth of knowledge of how and when to perform a reassessment for all patient situations.
- 24.0 Demonstrate a simple depth, foundation breadth of knowledge of pathophysiology, assessment and management of medical complaints.
- 25.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of neurologic disorders/emergencies across the life span.
- 26.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of abdominal and gastrointestinal disorders/emergencies across the life span.
- 27.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of immunology disorders/emergencies across the life span.

- 28.0 Demonstrate a simple depth, simple breadth of knowledge of the assessment and management of a patient who may have an infectious disease across the life span.
- 29.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of endocrine disorders/emergencies across the life span.
- 30.0 Demonstrate a fundamental depth, foundational breadth of knowledge regarding the assessment and management of psychiatric emergencies across the life span.
- 31.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of cardiovascular emergencies across the life span.
- 32.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of toxicological (poisoning and overdose) emergencies across the life span.
- 33.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of respiratory disorders/emergencies across the life span.
- 34.0 Demonstrate a simple depth, simple breadth of knowledge of the assessment, and management of hematology disorders across the life span.
- 35.0 Demonstrate a simple depth, simple breath of knowledge of the assessment and management of genitourinary/ renal emergencies across the life span.
- 36.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of gynecologic emergencies across the life span.
- 37.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of non-traumatic fractures across the life span.
- Demonstrate a simple depth, simple breadth of knowledge of assessment and management of diseases of the Eyes, Ears, Nose, and Throat across the life span.
- 39.0 Demonstrate a fundamental knowledge of the causes, pathophysiology, and management of shock and respiratory failure across the life span.
- 40.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of the trauma patient across the life span.
- 41.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of bleeding across the life span.
- 42.0 Demonstrate a fundamental depth, simple breadth of knowledge of pathophysiology, assessment, and management of chest trauma across the life span.
- 43.0 Demonstrate a fundamental depth, simple breadth of knowledge of pathophysiology, assessment, and management of abdominal and genitourinary trauma across the life span.
- 44.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of orthopedic trauma across the life span.
- 45.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of soft tissue trauma across the life span.
- 46.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of head, facial, neck, and spine trauma across the life span.

- 47.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of nervous system trauma across the life span.
- 48.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of trauma patients with special considerations across the life span.
- 49.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of environmental emergencies across the life span.
- 50.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the pathophysiology, assessment, and management of multi-system trauma and blast injuries across the life span.
- 51.0 Demonstrate a fundamental depth, foundational breadth of knowledge of management of the obstetric patient within the scope of practice of the EMT.
- 52.0 Demonstrate a fundamental depth, foundational breadth of knowledge of management of the newborn and neonatal patient within the scope of practice of the EMT.
- 53.0 Demonstrate a fundamental depth, fundamental breath of knowledge of the management of the pediatric patient within the scope of practice of the EMT.
- 54.0 Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT.
- 55.0 Demonstrate a simple depth, simple breadth of knowledge of management of the patient with special challenges across the life span.
- 56.0 Demonstrate a simple depth, foundational breadth of knowledge of risks and responsibilities of transport.
- 57.0 Demonstrate a fundamental depth, fundamental breadth of knowledge of establishing and working within the incident management system.
- 58.0 Demonstrate a simple depth, foundational breadth of knowledge of responding to an emergency during a multiple casualty incident.
- 59.0 Demonstrate a simple depth, simple breadth of knowledge of safe air medical operations and criteria for utilizing air medical response.
- 60.0 Demonstrate a simple depth, simple breadth of knowledge for safe vehicle extrication and use of simple hand tools.
- 61.0 Demonstrate a simple depth, simple breadth of knowledge of risks and responsibilities of operating in a cold zone at a hazardous material or other special incident.
- 62.0 Demonstrate a simple depth, simple breadth of knowledge of risks and responsibilities of operating on the scene of a natural or man-made disaster.

Florida Department of Education **Student Performance Standards**

Program Title: Emergency Medical Technician –ATD Clock Hour Program Number: W170212

When this program is offered at the Clock Hour level, the following organization of courses, standards, and benchmarks apply.

Occu	se Number: EMS0110 pational Completion Point: A gency Medical Technician – 300 Hours – SOC Code 29-2041
01.0	EMS Systems: Demonstrate a simple depth, foundational breadth of knowledge of EMS systems. – The student will be able to:
	01.01 Define Emergency Medical Services (EMS) systems.
	01.02 Discuss the historical background of the development of the EMS system.
	01.03 Identify the four levels of national EMS providers (EMR, EMT, AEMT and PM) as well as the three levels (EMR, EMT, and PM) in the State of Florida.
	01.04 Discuss the specific statutes and regulations regarding the EMS system in Florida.
	01.05 Discuss vehicle and equipment readiness.
	01.06 Characterize the EMS system's role in prevention and public education.
	01.07 Discuss the roles and responsibilities of the EMT related to personal safety of the crew, patient and by standers.
	01.08 Discuss the roles and responsibilities of the EMT to operate emergency vehicles, provide scene leadership and perform patient assessment and administer emergency care.
	01.09 Discuss the maintenance of and differences between certification and licensure for the EMS professional in the State of Florida and NREMT.
	01.10 Define quality improvement and discuss the EMT's role in the process.
	01.11 Identify the basics of common methods of payment for healthcare services.
	01.12 Analyze attributes and attitudes of an effective leader.
	01.13 Demonstrate effective techniques for managing team conflict.
	01.14 Describe factors that influence the current delivery system of healthcare.

	01.15	Discuss the importance of continuing medical education and skills retention.
	01.16	Assess personal attitudes and demeanor that may distract from professionalism.
	01.17	Serve as a role model and exhibit professional behaviors in the following areas: 01.17.01 integrity 01.17.02 empathy 01.17.03 self-motivation 01.17.04 appearance and personal hygiene 01.17.05 self-confidence 01.17.06 communications (including phone, email and social media etiquette) 01.17.07 time management 01.17.08 teamwork and diplomacy 01.17.09 respect 01.17.10 patient advocacy (inclusive of those with special needs, alternate life styles and cultural diversity) 01.17.11 careful delivery of service
02.0	Resea be able	rch: Demonstrate a simple depth, simple breadth of knowledge of research and evidence-based decision making. – The student will
	02.01	Discuss EMS research and evidence based decision making 02.01.01 Conduct scientific literature searches 02.01.02 Read, interpret, and extract information from journal articles relevant to a project
	02.02	Explain the importance of assessing and treating patients based on evidence based decision-making.
	02.03	Interpret graphs, charts, and tables.
	02.04	Measure time, temperature, distance, capacity, and mass/weight.
	02.05	Convert and use traditional and metric units.
	02.06	Make estimations, approximations and judge the reasonableness of the result.
	02.07	Convert time from a 12 hour format to a 24 hour format
	02.08	Demonstrate ability to evaluate and draw conclusions.
	02.09	Calculate ratios.
	02.10	Explain the rationale for the ems system gathering data.
03.0		orce Safety and Wellness: Demonstrate a fundamental depth, foundational breadth of knowledge of workforce safety and wellness. student will be able to:
	03.01	Explain the need to determine scene safety.

03.02	Discuss the importance of body substance isolation (BSI).
03.03	Describe the steps and equipment the EMT should take for personal protection from airborne and blood borne pathogens and communicable disease.
03.04	List possible emotional reactions that an individual (EMT and EMT family, Patient and Patient family) may experience when faced with trauma, illness, death and dying.
03.05	Discuss the steps the EMT should take when approaching a family confronted with death and dying.
03.06	Recognize the warning signs of personal stress and discuss the strategies and resources available for EMTs to utilize.
03.07	Demonstrate good body mechanics while using a stretcher and other patient moving devices.
03.08	Discuss the guidelines and safety precautions to be followed when lifting and moving patients and equipment.
03.09	Discuss patient positioning in common emergency situations.
03.10	Discuss situation that may require the use of medical restraints on the patient and explain guidelines and safety consideration for their use.
03.11	Define "infectious disease" and "communicable disease."
03.12	Describe the routes of transmission and associated risks for infectious disease.
03.13	Explain the mode of transmission and the steps to prevent/deal with an exposure of hepatitis, meningitis, tuberculosis and HIV.
03.14	Explain how immunity to infectious diseases is acquired.
03.15	Explain post exposure management of exposure to patient blood or body fluids, including proper notification documentation.
03.16	Describe the components of physical fitness and mental wellbeing.
03.17	Identify personal health practices and environmental factors, which affect physical, mental, and emotional wellbeing.
03.18	Discuss complementary and alternative health practices.
03.19	Explain the basic concepts of positive self-image, wellness and stress.
03.20	Discuss the need for a wellness and stress control plan that can be used in personal and professional life.
03.21	Explore the importance of adequate nutrition (i.e. U.S. Department of Agriculture's MyPlate food guide (<u>www.choosemyplate.gov</u>)).
03.22	Demonstrate safe behaviors in the proper use of medical equipment.
03.23	Explain the theory of root- cause analysis.
03.24	Identify and describe methods in medical error reduction and prevention in the various healthcare settings.

	03.25 Identify and practice security procedures for medical supplies and equipment in the various healthcare settings.
	03.26 Describe fire, safety, disaster and evacuation procedures in the various healthcare settings.
	03.27 Discuss applicable accrediting and regulatory agency patient safety guidelines.
04.0	Documentation: Demonstrate a fundamental depth, foundational breadth of knowledge of the principles of medical documentation and report writing. – The student will be able to:
	04.01 Discuss applications of technology in healthcare.
	04.02 Demonstrate basic computer skills.
	04.03 Interpret and utilize information from electronic health records.
	04.04 Identify methods of electronic communication to access and distribute data.
	04.05 Describe the use and importance of properly written communication and patient care documentation.
	04.06 Explain the legal implication of the patient care report.
	04.07 Identify the minimum dataset reference patient information and administrative information on the patient care report.
	04.08 Understand how to document refusal of care, including legal implications.
	04.09 Discuss the implications of the Health Insurance Portability and Accountability Act of 1996 on confidential documentation.
	04.10 Describe the special considerations concerning mass casualty incident documentation.
	04.11 Demonstrate completion of a patient care report for a medical and trauma patient.
05.0	EMS System Communication: Demonstrate a simple depth, simple breadth of knowledge of the EMS communication system, communication with other health care professionals, and team communication. – The student will be able to:
	05.01 Understand the basic principles of the various types of communications equipment used in EMS.
	05.02 Describe the use of radio communication and correct radio procedures, including the proper methods of initiating and terminating the radio call/transmission.
	05.03 Explain the rationale for providing efficient and effective radio communications and patient reports.
	05.04 Identify the essential components of the verbal report and legal aspects that need to be considered.
	05.05 Perform an organized and concise radio transmission.
	05.06 Perform an organized, concise verbal patient report that would be given to the staff at a receiving facility.
	05.07 Perform a brief, organized verbal report that would be given during transfer of care at an incident scene.

06.0	Therapeutic Communication: Demonstrate a simple depth, simple breadth of knowledge of the principles of therapeutic communication. – The student will be able to:
	06.01 Describe principles of therapeutic and effective communication with patients.
	06.02 Discuss basic speaking and active listening skills.
	06.03 Recognize the importance of patient/client educations regarding healthcare.
	Discuss the adjustment of communication strategies to effectively communicate with patients with: 06.04.01 differing age groups 06.04.02 differing developmental stages 06.04.03 special needs 06.04.04 differing cultures, including language barriers
	06.05 Discuss the communication techniques that should be used to interact with the patient, patient family, bystanders, and individuals from other agencies including verbal diffusion and interview techniques.
	06.06 Discuss the strategies for interviewing persons in special situations.
	06.07 Distinguish between and respond to verbal and non-verbal cues.
	06.08 Analyze elements of communication using a sender-receiver/close loop model.
	06.09 Exhibit positive non-verbal behaviors.
	06.10 Establish proper patient rapport.
07.0	Medical/Legal and Ethics: Demonstrate a fundamental depth, foundational breadth of knowledge of medical legality and ethics. – The student will be able to:
	07.01 Discuss the rational, importance, and limitations of patient autonomy.
	07.02 Differentiate between expressed, implied and involuntary consent.
	07.03 Discuss the methods of obtaining consent and procedures for minors.
	07.04 Discuss the issues of abandonment, negligence, false imprisonment and battery and their implications to the EMT.
	07.05 Discuss the implications for the EMT in patient refusal of care and/or transport.
	07.06 Explain the importance, necessity and legality of patient confidentiality.
	07.07 Discuss the importance of Do Not Resuscitate [DNR] (advance directives) and local or Florida provisions regarding EMS application.
	07.08 Discuss State of Florida and Federal special reporting situations including: 07.08.01 abuse 07.08.02 sexual assault 07.08.03 gunshot and knife wounds

		07.08.04 communicable disease 07.08.05 animal Bites
	07.09	Differentiate between civil tort and criminal actions.
	07.10	Discuss the elements of negligence and defenses/protections from liability.
	07.11	Discuss the role of the EMT at crime scenes and preservation of evidence.
	07.12	Define ethics and morality and discuss their implication for the EMT.
	07.13	Discuss Florida legislation such as: 07.13.01 Baker Act (FS 394.451) 07.13.02 Marchman Act (FS 397.601 and FS 397.675) 07.13.03 Emergency Examination and Treatment of Incapacitated Persons Act (FS 401.445)
	07.14	Differentiate between the scope of practice and the standard of care as applied to the EMT.
	07.15	Discuss the legal concepts and limitations of immunity, including Good Samaritan statutes and governmental immunity.
	07.16	Describe the appropriate patient management and care techniques in a refusal of care situation.
	07.17	Analyze the relationship between the law, morals and ethics in EMS and the premise that should under lie the EMTs ethical decisions.
	07.18	Describe the criteria necessary to honor an advance directive.
	07.19	Explain the rationale for the needs, benefits and varying degrees of advance directives.
08.0		my and Physiology: Demonstrate a fundamental knowledge of the anatomy and function of all human systems to the practice of EMS. student will be able to:
	08.01	Identify the following topographic terms: 08.01.01 medial 08.01.02 lateral 08.01.03 proximal 08.01.04 distal 08.01.05 superior 08.01.06 inferior 08.01.07 anterior 08.01.08 posterior 08.01.09 midline 08.01.10 right and left 08.01.11 mid-clavicular 08.01.12 bilateral 08.01.13 mid-axillary
	08.02	Describe the life support chain, aerobic metabolism, and anaerobic metabolism.

08.03	Define anatomy, physiology, pathophysiology, and homeostasis.
08.04	Identify and describe the anatomical structures and functions of the following: 08.04.01 skeletal system 08.04.02 muscular system 08.04.03 respiratory System 08.04.04 circulatory/ Cardiovascular system 08.04.05 nervous System 08.04.06 integumentary system 08.04.07 digestive system 08.04.08 endocrine system 08.04.09 renal system 08.04.10 reproductive system 08.04.11 lymphatic System
08.05	Explain cellular anatomy and physiology.
08.06	Explain cellular respiration.
08.07	Discuss cell division.
08.08	Describe the different types of muscle tissues including skeletal, smooth and cardiac.
08.09	Name and identify the location of the bones of the axial and appendicular skeleton.
08.10	Describe the classification and types of joints.
08.11	Discuss the mechanisms of breathing including: 08.11.01 mechanical ventilation 08.11.02 pulmonary volumes 08.11.03 dead space 08.11.04 lung compliance
08.12	Explain the diffusion of gases in external and internal respiration.
08.13	Describe oxygen and carbon dioxide transport in the blood.
08.14	Describe nervous and chemical mechanisms that regulate respirations.
08.15	Discuss respiration and acid-base balance.
08.16	Discuss the hemodynamics of blood pressure.
08.17	Discuss the role of nutrition, metabolism and body temperature on body function.
08.18	Describe the causes, advantages, and disadvantages of a fever.

	08.19 Discuss the hypothalamus functions as the thermostat in the body.	
09.0	Medical Terminology: Demonstrate a fundamental knowledge in the use of medical terminology. – The student will be able to:	
	09.01 Identify medical terminology word parts such as: 09.01.01 root words 09.01.02 prefixes 09.01.03 suffixes 09.01.04 combining forms	
	09.02 Correctly utilize medical terminology describing each of the following: 09.02.01 body structures 09.02.02 functions 09.02.03 conditions and disorders 09.02.04 body regions 09.02.05 cavities 09.02.06 areas 09.02.07 landmarks	
	09.03 Correctly use medical abbreviations and symbols.	
	09.04 Read and understand basic medical documentation in medical records and medical reports.	
	09.05 Communicate with healthcare professionals utilizing basic medical terminology.	
	09.06 Explain the rationale for using accepted medical terminology correctly.	
10.0	Pathophysiology: Demonstrate a fundamental knowledge of the causes and pathophysiology of shock and the components of resuscitation. – The student will be able to:	
	10.01 Discuss signs of irreversible death.	
	10.02 Review the anatomy and physiology of the respiratory and cardiovascular systems.	
	10.03 Discuss and identify the pathophysiology of respiratory failure and respiratory and cardiac arrest.	
	10.04 Understand shock, including the pathophysiology, causes, and the signs and symptoms associated with the various types of shock.	
	10.05 Discuss the variations in the pathophysiology of shock across the life span.	
11.0	Life Span Development: Demonstrate a fundamental knowledge of life span development to patient assessment and management. – The student will be able to:	
	11.01 Describe the major physiologic and psychosocial characteristics across the life span.	
12.0	Public Health: Demonstrate a simple knowledge of the principles of illness and injury prevention in emergency care. – The student will be able to:	

	12.01	Define public health and explain the goal of the public health field.
	12.02	dentify the EMS role within the public health field.
	12.03	Discuss basic concepts of epidemiology.
	12.04	Discuss ways of EMS involvement in injury prevention.
	12.05	dentify areas of need for prevention programs in the community.
13.0		les of Pharmacology: Demonstrate a simple depth, simple breadth of knowledge of pharmacology, medication safety, and ion types used during an emergency. –The student will be able to:
	13.01	Explain the "rights" of medication administration and describe how each one related to EMS.
	13.02	Discuss and differentiate the various medication forms and the appropriate routes of administration
	13.03	Describe the difference between a generic medication name and trade name, and provide an example of each.
	13.04	Discuss the components and elements of a drug profile including: 13.04.01 class 13.04.02 actions 13.04.03 contraindications 13.04.04 side effects 13.04.05 dose 13.04.06 route
	13.05	Describe the role of medical direction in medication administration and explain the difference between direct orders (online) and
110	Гизака	standing orders (off-line).
14.0	_	ency Medications: Demonstrate a fundamental depth, simple breadth of knowledge of emergency medications within the scope of of the EMT. – The student will be able to:
	14.01	State the following for each medication that can be administered by an EMT as dictated by the State of Florida and local medical
	14.01	direction :
		14.01.01 class
		14.01.02 generic and trade names
		14.01.03 actions
		14.01.04 indication
		14.01.05 contraindications
		14.01.06 complications
		14.01.07 routes of administration
		14.01.08 side effects
		14.01.09 interactions
		14.01.10 Doses of medications
	14.02	Discuss the forms in which the medications may be found.

	14.03 Demonstrate the steps in properly inspecting each type of medication.
	14.04 Discuss the difference between administration versus assistance of patient medications.
15.0	Airway Management: Demonstrate a fundamental depth, foundational breadth of knowledge of airway management across the life span within the scope of practice of the EMT. – The student will be able to:
	15.01 Review the structures and functions of the respiratory system.
	15.02 Describe appropriate airway management for a patient with or without adequate breathing.
	15.03 Describe indications for and demonstrate the steps in performing the head-tilt chin-lift and jaw thrust in all age groups.
	15.04 Define, identify and describe the following: 15.04.01 tracheostomy 15.04.02 laryngectomy 15.04.03 stoma 15.04.04 tracheostomy tube
	15.05 Describe the special considerations in airway management for the pediatric patient.
	15.06 Demonstrate the techniques of suctioning.
	15.07 Demonstrate relief of FBAO.
	15.08 Demonstrate how to insert an oral and nasal -airway adjunct.
	15.09 Demonstrate how to insert both esophageal and supra-glottic airways.
16.0	Respirations: Demonstrate a fundamental depth, foundational breadth of knowledge of respiration. – The student will be able to:
	16.01 Review the pulmonary ventilation process to include mechanics of ventilation and alveolar ventilation (tidal volumes, dead space, etc.).
	16.02 Describe the oxygenation process.
	16.03 Explain both external and internal respiration process.
	16.04 Discuss the various pathophysiologies of the respiratory system.
	16.05 Describe assessment and management for adequate and inadequate respiration, including the use of pulse oximetry and capnography.
	16.06 Describe the following regarding supplemental oxygen delivery devices: 16.06.01 indications 16.06.02 contraindications 16.06.03 advantages 16.06.04 disadvantages 16.06.05 complications

16.06.07 concentration of delivered oxygen 16.06.08 procedures 16.06.09 purpose 16.06.10 components 16.07 Review the anatomy and physiology of the respiratory system including: 16.07.01 control of respirations 16.07.02 mechanics of respirations 16.07.03 pulmonary ventilation 16.07.05 mechanics of respiration 16.07.05 mechanics of respiration 16.07.05 mechanics of respiration 16.07.05 mechanics of respiration 16.07.06 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the past, may have received low concentrations. 16.09 Demonstrate the correct operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. — The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 disadvantages 17.07.05 complications 17.07.06 Lendon of the process of the performance of the process			
16.06.08 procedures 16.06.10 components 16.07 Review the anatomy and physiology of the respiratory system including: 16.07.02 mechanics of respirations 16.07.02 mechanics of respirations 16.07.04 oxygenation 16.07.05 mechanical ventilation 16.07.05 mechanical ventilation 16.07.06 mechanical ventilation 16.07 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. — The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with a automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 technique for ventilating			16.06.06 liter flow range
16.06.09 purpose 16.07 Review the anatomy and physiology of the respiratory system including: 16.07.01 control of respirations 16.07.03 mechanics of respiration 16.07.03 pulmonary ventilation 16.07.05 mechanics of respiration 16.08 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the past, may have received low concentrations. 16.09 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. — The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation or a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 disadvantages 17.07.04 disadvantages 17.07.06 technique for ventilating			
16.07 Review the anatomy and physiology of the respiratory system including: 16.07.01 control of respirations 16.07.02 mechanics of respiration 16.07.03 pulmonary entillation 16.07.04 oxygenation 16.07.04 oxygenation 16.07.05 mechanical ventilation 16.08 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the past, may have received low concentrations. 16.09 Demonstrate the oxerect operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. — The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation or a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07.02 contraindications 17.07.03 disadvantages 17.07.04 disadvantages 17.07.06 technique for ventilating			· ·
16.07 Review the anatomy and physiology of the respiratory system including: 16.07.01 control of respirations 16.07.02 mechanics of respiration 16.07.03 pulmonary ventilation 16.07.05 mechanical ventilation 16.07.05 mechanical ventilation 16.07.05 mechanical ventilation 16.08 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the past, may have received low concentrations. 16.09 Demonstrate the correct operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.04 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. — The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating			· ·
16.07.01 control of respirations 16.07.02 mechanics of respiration 16.07.03 pulmonary ventilation 16.07.04 oxygenation 16.07.05 mechanical ventilation 16.07.05 mechanical ventilation 16.07.05 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the past, may have received low concentrations. 16.09 Demonstrate the correct operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student with a bocket mask. 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		40.07	
16.07.02 mechanics of respiration 16.07.03 pulmonary ventilation 16.07.05 mechanical ventilation 16.07.05 mechanical ventilation 16.08 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the past, may have received low concentrations. 16.09 Demonstrate the correct operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		16.07	
16.07.03 pulmonary ventilation 16.07.04 oxygenation 16.07.05 oxygenation 16.07.05 mechanical ventilation 16.08 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the past, may have received low concentrations. 16.09 Demonstrate the correct operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating			
16.07.04 oxygenation mechanical ventilation 16.08 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the past, may have received low concentrations. 16.09 Demonstrate the correct operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.05 complications 17.07.06 technique for ventilating			·
16.07.05 mechanical ventilation 16.08 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the past, may have received low concentrations. 16.09 Demonstrate the correct operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating			
16.08 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the past, may have received low concentrations. 16.09 Demonstrate the correct operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.01 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating			70
may have received low concentrations. 16.09 Demonstrate the correct operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate how to ventilate a patient with a pocket mask. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.02 disadvantages 17.07.03 advantages 17.07.05 complications 17.07.06 technique for ventilating		16.00	
16.09 Demonstrate the correct operation of oxygen tanks and regulators. 16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.05 complications 17.07.06 technique for ventilating		10.00	
16.10 Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups. 16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.05 complications 17.07.06 technique for ventilating			
16.11 Discuss the use of an oxygen humidifier and the requirements needed for its use. 16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		16.09	Demonstrate the correct operation of oxygen tanks and regulators.
16.12 Discuss the differences between negative pressure and positive pressure ventilation. 17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		16.10	Demonstrate the use of high, medium, low, and variable concentration oxygen delivery devices for all age groups.
17.0 Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation across the life span. — The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.05 complications 17.07.06 technique for ventilating		16.11	Discuss the use of an oxygen humidifier and the requirements needed for its use.
ventilation across the life span. – The student will be able to: 17.01 Demonstrate how to ventilate a patient with a pocket mask. 17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		16.12	Discuss the differences between negative pressure and positive pressure ventilation.
17.02 Demonstrate the safe and effective ventilation for a patient with a BVM for one or two rescuers using oral-nasal adjuncts with appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating	17.0		
appropriate airway positioning. 17.03 Discuss the signs of adequate and inadequate ventilation using the BVM. 17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		17.01	Demonstrate how to ventilate a patient with a pocket mask.
17.04 Describe the steps involved in performing a comprehensive assessment of ventilations. 17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		17.02	·
17.05 Demonstrate how to ventilate a patient with a stoma. 17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		17.03	Discuss the signs of adequate and inadequate ventilation using the BVM.
17.06 Demonstrate the use of various devices used in the assessment of supra-glottic airway placement. 17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		17.04	Describe the steps involved in performing a comprehensive assessment of ventilations.
17.07 Describe the following for a patient with an automatic transport ventilator (ATV): 17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		17.05	Demonstrate how to ventilate a patient with a stoma.
17.07.01 indications 17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		17.06	Demonstrate the use of various devices used in the assessment of supra-glottic airway placement.
17.07.02 contraindications 17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating		17.07	Describe the following for a patient with an automatic transport ventilator (ATV):
17.07.03 advantages 17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating			
17.07.04 disadvantages 17.07.05 complications 17.07.06 technique for ventilating			
17.07.05 complications 17.07.06 technique for ventilating			
17.07.06 technique for ventilating			
·			
17.08 Describe the following for a patient with a CPAP:			17.07.06 technique for ventilating
		17.08	Describe the following for a patient with a CPAP:

	17.08.01 indications
	17.08.02 contraindications
	17.08.03 advantages
	17.08.04 disadvantages
	17.08.05 complications
	17.08.06 technique for ventilating
18.0	Scene Size-Up: Demonstrate a fundamental depth, foundational breadth of knowledge of scene management and multiple patient situations. – The student will be able to:
	18.01 Recognize and describe hazards/potential hazards at the scene.
	18.02 Discuss common mechanisms of injury/nature of illness.
	18.03 Discuss the priority considerations for multiple-patient situations.
	18.04 Explain why it is important for the EMT to anticipate and determine the need for additional or specialized resources.
	18.05 Discuss the importance of continuous scene assessment to ensure safety of the EMS team and the patient.
	18.06 Discuss the minimum standard precautions that should be followed and PPE that should be worn as appropriate.
	18.07 Discuss special considerations for dealing with a violent scene.
	18.08 Explain the rationale for crew members to evaluate scene safety prior to entering.
	18.09 Explain how patient situations affect your evaluation of mechanism of injury or illness.
19.0	Primary Assessment: Demonstrate a fundamental depth, simple breadth of knowledge of the primary assessment for all patient situations. – The student will be able to:
	19.01 Summarize the elements of a general impression of the patient.
	19.02 Explain the reason for performing a primary assessment.
	19.03 Discuss and demonstrate methods of assessing level of responsiveness using AVPU.
	19.04 Discuss and demonstrate methods of assessing the airway and providing airway care across the life span.
	19.05 Describe and demonstrate methods used for assessing if a patient is breathing across the life span.
	19.06 Differentiate between a patient with adequate and inadequate breathing.
	19.07 Describe and demonstrate the methods used to obtain a pulse across the life span.
	19.08 Discuss and demonstrate assessing the patient for external bleeding.
	19.09 Describe and demonstrate the assessment and interpretation of skin color, temperature, moisture and capillary refill across the life

		span.
	19.10	Explain the reasons prioritizing a patient for care and transport.
	19.11	Describe when it is appropriate to expose the patient completely.
	19.12	Differentiate between critical life-threatening, potentially life- threatening, and non-life-threatening patient presentations.
20.0		ry-Taking: Demonstrate a fundamental depth, foundational breadth of knowledge of the components of history taking. – The student able to:
	20.01	Determine and investigate the chief complaint.
	20.02	Describe components of the patient history.
	20.03	Explain the importance of obtaining a SAMPLE and OPQRST history.
	20.04	Acknowledge the feelings patients experience during assessment.
	20.05	Discuss the value of obtaining a family and social history.
	20.06	Describe examples of different techniques the EMT may use to obtain information from patients, family or bystanders during the history taking process.
21.0		ndary Assessment: Demonstrate a fundamental depth, foundational breadth of knowledge of techniques used for a secondary sment. – The student will be able to:
	21.01	Discuss the components and techniques of the physical exam and skills involved.
	21.02	Discuss the indications for performing: 21.02.01 rapid assessment 21.02.02 focused exam 21.02.03 head to toe exam
	21.03	Demonstrate: 21.03.01 rapid exam 21.03.02 focused exam 21.03.03 head to toe exam
	21.04	Describe and demonstrate the techniques of inspection, palpation, percussion, and auscultation.
	21.05	Describe and demonstrate the importance of obtaining a baseline set of vital signs.
		Discuss blood pressure ranges across the life span.
22.0		oring Devices: Demonstrate a simple depth, simple breath of knowledge of monitoring devices within the scope of practice of the – The student will be able to:
	22.01	Describe and demonstrate the purpose, indications, procedure, normal findings, and limitations of the following patient monitoring technologies.

	22.01.01 pulse oximetry 22.01.02 glucometry 22.01.03 capnography 22.01.04 noninvasive BP monitoring 22.01.05 thermometry 22.01.06 telemetry
	22.02 Demonstrate proper placement of a cardiac monitor and diagnostic ECG leads.
23.0	Reassessment: Demonstrate a fundamental depth, foundational breadth of knowledge of how and when to perform a reassessment for all patient situations. – The student will be able to:
	23.01 Describe the components of reassessment and demonstrate the skills involved.
	23.02 Discuss the reasons for repeating the primary assessment as part of the reassessment.
	23.03 Explain trending assessment components and its value to other health professionals who assume care of the patient.
	23.04 Demonstrate the reassessment of patients across the life span.
24.0	Medical Overview: Demonstrate a simple depth, foundation breadth of knowledge of pathophysiology, assessment and management of medical complaints. – The student will be able to: 24.01 Identify factors that complicate patient assessment: 24.01.01 scene safety 24.01.02 environmental factors 24.01.03 chief complaint 24.01.04 EMT preconceptions 24.01.05 distracting injuries 24.01.06 tunnel vision 24.01.07 patient cooperation 24.01.08 EMT attitude
	24.02 Discuss forming a field impression and utilizing available information to determine a differential diagnosis.
25.0	Neurology: Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of neurologic disorders/emergencies across the life span. – The student will be able to:
	25.01 Review the anatomy and physiology of the nervous system.
	Describe the pathophysiology of the following neurologic disorders: 25.02.01 altered mental status 25.02.02 stroke 25.02.03 transient ischemic attack 25.02.04 headache 25.02.05 seizures 25.02.06 syncope

	25.03	Discuss and identify the causes, signs and symptoms of ischemic strokes, hemorrhagic strokes, and transient ischemic attacks and their similarities and differences.
	25.04	Discuss and demonstrate how to use a stroke scoring system in the assessment of patients with suspected stroke.
	25.05	Define and differentiate generalize seizure, partial seizure and status epilepticus and list their possible causes.
	25.06	Define and differentiate migraine headache, sinus headache, tension headache and discuss how to distinguish harmless headaches from something more serious.
	25.07	Define "altered mental status" and identify the possible causes.
	25.08	Describe and demonstrate the assessment and management of the patient with various neurological emergencies in all age groups to include: 25.08.01 strokes 25.08.02 headaches 25.08.03 seizures 25.08.04 altered mental status
	25.09	Discuss the transport of the stroke patient to the appropriate treatment center.
26.0		minal and Gastrointestinal Disorder: Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and gement of abdominal and gastrointestinal disorders/emergencies across the life span. – The student will be able to:
	26.01	Review the basic anatomy and physiology the gastrointestinal, genital and urinary systems.
	26.02	Define and describe the pathophysiology of the following abdominal and gastrointestinal disorders: 26.02.01 abdominal pain 26.02.02 acute abdomen 26.02.03 peritonitis 26.02.04 appendicitis 26.02.05 pancreatitis 26.02.06 cholecystitis 26.02.07 gastrointestinal bleeding 26.02.08 esophageal varices 26.02.09 gastroenteritis 26.02.10 ulcers 26.02.11 intestinal obstruction 26.02.12 hernia 26.02.13 abdominal aortic aneurysm
	26.03	Identify the signs and symptoms of common GI disorders.
	26.04	Describe and demonstrate the assessment and management of the patient with various gastrointestinal emergencies.
	26.05	Differentiate between hemorrhagic and non-hemorrhagic abdominal pain.

27.0	Immunology: Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of immunology disorders/emergencies across the life span. – The student will be able to:		
	27.01	Define and differentiate allergic reaction and anaphylaxis.	
	27.02	Describe the pathophysiology of the following immunology disorders: 27.02.01 allergic reaction 27.02.02 anaphylaxis 27.02.03 anaphylactic shock	
	27.03	Describe and demonstrate the assessment and management of the patient in all age groups experiencing an allergic or anaphylactic reaction.	
	27.04	Review the following for the epinephrine auto-injector: 27.04.01 generic and trade names 27.04.02 medication forms 27.04.03 dose 27.04.04 administration 27.04.05 action 27.04.06 contraindications	
	27.05	Demonstrate the use of epinephrine auto-injector.	
	27.06	Review the anatomy and physiology of the organs and structures related to anaphylaxis.	
	27.07	Describe the incidence, morbidity and mortality of anaphylaxis.	
	27.08	Recognize the signs and symptoms related to anaphylaxis.	
	27.09	Describe the risk factors for and prevention of anaphylaxis and appropriate patient education.	
	27.10	Discuss common antigens most frequently associated with anaphylaxis.	
	27.11	Explain the importance of separating the patient from the allergen when possible.	
28.0		ious Disease: Demonstrate a simple depth, simple breadth of knowledge of the assessment and management of a patient who may an infectious disease across the life span. – The student will be able to:	
	28.01	Discuss the causes of infectious diseases	
	28.02	Describe the pathophysiology of infectious diseases of significant public health concern.	
	28.03	Describe and demonstrate the assessment and management of the patient in all age groups experiencing an infectious disease.	
	28.04	Discuss mandatory notification to state or federal agencies of various diseases.	
	28.05	Identify patients with risk factors for infectious disease.	
	28.06	Explain the principles and practices of infection control in prehospital care.	

	28.07	Describe and discuss the rationale for the various types of PPE.
	28.08	Discuss the proper disposal of contaminated supplies (sharps, gauze sponges, tourniquets, etc.).
	28.09	Discuss decontamination of the ambulance and disinfection of patient care equipment, and areas in which care of the patient occurred.
	28.10	Describe the actions to take if the EMS provider is exposed to an infectious disease.
	28.11	Demonstrate the ability to comply with body substance isolation guidelines.
	28.12	Discuss the pathophysiology, risk factors, assessment, and prehospital management of sepsis/systemic inflammatory response syndrome (SIRS)
29.0		crine Disorders: Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of rine disorders/emergencies across the life span. – The student will be able to:
	29.01	Review the anatomy and physiology of the endocrine system and its main function in the body.
	29.02	Describe the pathophysiology and signs and symptoms of the following endocrine disorders: 29.02.01 insulin dependent Diabetes Mellitus 29.02.02 non-insulin dependent Diabetes Mellitus 29.02.03 hypoglycemia 29.02.04 hyperglycemia 29.02.05 Diabetic Ketoacidosis(DKA) 29.02.06 Hyperglycemic Hyperosmolar Non-ketotic Syndrome (HHNS)
	29.03	Define and differentiate between Type I and Type II Diabetes.
	29.04	Identify and demonstrate the steps in the management of the patient taking diabetic medicine with an altered mental status and a history of diabetes.
	29.05	Review the following for oral glucose: 29.05.01 generic and trade names 29.05.02 medication forms 29.05.03 dose 29.05.04 administration 29.05.05 action 29.05.06 contraindications
	29.06	Demonstrate the steps of using a glucometer device and administering oral glucose.
	29.07	Describe and demonstrate the assessment and the management of the patient experiencing an endocrinologic emergency to include hypo- and hyper-glycemia.
	29.08	Discuss the general assessment findings associated with endocrinologic emergencies.
30.0		iatric: Demonstrate a fundamental depth, foundational breadth of knowledge regarding the assessment and management of atric emergencies across the life span. – The student will be able to:

	30.01	Differentiate among behavior, psychiatric disorders and behavioral emergencies
	30.02	Discuss common psychiatric disorders and behavioral emergencies.
	30.03	Discuss the general factors that may cause an alteration in a patient's behavior.
	30.04	Discuss the risk factors/signs or symptoms of various psychiatric emergencies to include suicide.
	30.05	Manage a behavioral emergency scenario applying knowledge of medical/legal Florida Statutes.
	30.06	Describe and demonstrate the assessment and management of the patient experiencing a behavioral or psychiatric emergency.
	30.07	Describe the biological, psychosocial, and sociocultural influences on psychiatric disorders.
	30.08	Describe the special considerations for the safety of the EMS provider and EMS crew, the patient and bystanders when dealing with behavioral and psychiatric emergencies.
	30.09	Describe and demonstrate methods of restraint that may be used in the management of a patient with a behavioral emergency.
	30.10	Explain the importance of provider behavior and communication in the care of a patient with a behavioral emergency.
31.0		ovascular : Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of vascular emergencies across the life span. – The student will be able to:
	31.01	Review the basic anatomy and physiology of the cardiovascular system.
	31.02	Describe the pathophysiology and signs and symptoms of the following cardiovascular disorders: 31.02.01 acute coronary syndrome 31.02.02 angina pectoris 31.02.03 thromboembolism 31.02.04 myocardial infarction 31.02.05 hypertensive emergencies 31.02.06 aortic aneurysm/dissection 31.02.07 left and right sided heart failure 31.02.08 cardiogenic shock 31.02.09 cardiac arrest
	31.03	Describe and demonstrate the assessment and management of the patient experiencing a cardiac emergency.
	31.04	Discuss the indications and contraindications for automated external defibrillation (AED).
	31.05	Explain the impact of age and weight on defibrillation.
	31.06	Discuss the position of comfort for patients with various cardiac emergencies.
	31.07	Explain the rationale for early defibrillation.

	31.08	Discuss and differentiate among various types of external defibrillators.
	31.09	Discuss and differentiate among the various types of implanted cardiac devices.
	31.10	Understand the importance of maintenance and operators check list for AED's.
	31.11	Demonstrate the ability to use an AED according to the latest American Heart Association (AHA) guidelines.
	31.12	Explain the role medical direction plays in the use of automated external defibrillation.
	31.13	Explain the rationale for administering nitroglycerin and ASA to a patient with chest pain or discomfort.
	31.14	Demonstrate the assessment and documentation of patient response to the automated external defibrillator.
	31.15	Demonstrate the assessment and documentation of patient response to nitroglycerin.
	31.16	Discuss the purpose and use of CPR assist devices.
32.0		Plogy: Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of toxicological ning and overdose) emergencies across the life span. – The student will be able to:
	32.01	Define and differentiate among toxicology, poisoning, and overdose.
	32.02	Describe the pathophysiology and signs and symptoms of the following toxicological emergencies, including but not limited to: 32.02.01 food poisoning 32.02.02 carbon monoxide poisoning 32.02.03 cyanide poisoning 32.02.04 exposure to acid or alkaline substances 32.02.05 exposure to hydrocarbons 32.02.06 methanol ingestion 32.02.07 isopropanol ingestion 32.02.08 ethylene glycol ingestion 32.02.09 exposure to poisonous plants 32.02.10 drug withdrawal 32.02.11 alcoholic syndrome 32.02.12 withdrawal syndrome (including delirium tremens) 32.02.13 illicit drug use 32.02.14 medication overdose 32.02.15 opioid overdose 32.02.16 organa phosphate overdose
	32.03	Discuss various ways that toxins enter the body.
		Discuss and demonstrate the assessment and management for the patient with a toxicological emergency.
		Discuss the role of the Poison Control Center with the nationwide contact number 800-222-1222 in the United States.

32.06	Explain the ra	ationale for contacting medical direction early in the prehospital management of a patient with a toxicological emergency.
32.07	Review the fo	ollowing for Narcan (naloxone):
	32.07.01	generic and trade names
	32.07.02	medication forms
	32.07.03	dose
	32.07.04	administration
	32.07.05	action
	32.07.06	contraindications
		nstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of respiratory es across the life span – The student will be able to:
33.01	Review the b	asic anatomy and physiology of the respiratory system.
33.02	Describe the	pathophysiology and signs and symptoms of the following respiratory disorders:
	33.02.01	Chronic Obstructive Pulmonary Disease
	33.02.02	Asthma
	33.02.03	Pulmonary Edema
	33.02.04	Spontaneous Pneumothorax
	33.02.05	Hyperventilation Syndrome
	33.02.06	Cystic Fibrosis
	33.02.07	Pulmonary Embolism
	33.02.08	Pneumonia
	33.02.09	Viral Respiratory Infections
	33.02.10	Poisonous Exposures
	33.02.11	Bacterial respiratory infections
33.03	Discuss signs	s of adequate air exchange.
33.04	Discuss the s	signs and symptoms of a patient across the continuum from respiratory distress to failure.
33.05	Describe and	demonstrate the assessment and management of the patient with a respiratory emergency.
33.06	Review the fo	ollowing for the metered-dose inhalers and small volume nebulizers for medications within the scope of practice of the
	EMT:	
	33.06.01	generic name
	33.06.02	medication forms
	33.06.03	dose
	33.06.04	administration
	33.06.05	action
	33.06.06	indications
	33.06.07	contraindications
33.07	Describe and	demonstrate the steps in facilitating the use of an inhaler and a small volume nebulizer.

	33.08 Differentiate between upper and lower airway obstruction.		
	33.09 Demonstrate assessment and interpretation of normal and abnormal lung and breath sounds.		
34.0	Hematology: Demonstrate a simple depth, simple breadth of knowledge of the assessment, and management of hematology disorders across the life span. –The student will be able to:		
	34.01 Review the compositions and functions of blood and plasma.		
	34.02 Describe the pathophysiology of the following hematology disorders: 34.02.01 Anemia 34.02.02 Sickle Cell Anemia / Sickle Cell Crisis 34.02.03 Hemophilia		
	34.03 Describe and demonstrate the assessment and the management of the patient with a hematological disorder.		
35.0	Genitourinary /Renal: Demonstrate a simple depth, simple breath of knowledge of the assessment and management of genitourinary/ rena emergency across the life span. – The student will be able to:		
	35.01.01 Review the basic anatomy and physiology of the genitourinary and renal systems.		
	35.02 Describe the pathophysiology and signs and symptoms of the following genitourinary/ renal disorders: 35.02.01 urinary tract infection 35.02.02 kidney stones 35.02.03 kidney failure		
	35.03 Discuss the basic principles of kidney dialysis.		
	35.04 Discuss the recognition and complications of urinary catheters.		
	35.05 Describe and demonstrate the assessment and management of the patient with a dialysis emergency.		
36.0	Gynecology: Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of gynecologic emergencies across the life span. – The student will be able to:		
	36.01 Review the basic anatomy and physiology of the female reproductive system.		
	Describe the pathophysiology and signs and symptoms of the following gynecologic disorders and emergencies, including but not limited to: 36.02.01 sexual assault 36.02.02 non-traumatic vaginal bleeding 36.02.03 menstrual pain 36.02.04 ovarian cyst 36.02.05 endometritis 36.02.06 endometriosis 36.02.07 pelvic inflammatory disease 36.02.08 Sexually Transmitted Disease		

	36.04 Describe the assessment and management of a patient who has experienced a sexual assault including the psychosocial impact and assessment findings/presentations.
	36.05 Discuss the professional and psychological importance of maintaining a patient's modesty and privacy while still being able to obtain necessary information.
	36.06 Discuss the need to provide care for a patient of sexual assault, while still preventing destruction of crime scene information.
37.0	Non-Traumatic Musculoskeletal Disorders: Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of non-traumatic fractures across the life span. – The student will be able to:
	37.01 Review the basic anatomy and physiology of the musculoskeletal system.
	37.02 Describe and demonstrate the assessment and management of the patient in all age groups with a non-traumatic musculoskeletal emergency.
38.0	Diseases of the Eyes, Ears, Nose, and Throat: Demonstrate a simple depth, simple breadth of knowledge of assessment and management of diseases of the Eyes, Ears, Nose, and Throat across the life span –The student will be able to:
	38.01 Describe and demonstrate the assessment and management of the patient in all age groups with abnormal conditions affecting the eyes, ears, nose and throat, including epistaxis.
39.0	Shock and Resuscitation: Demonstrate a fundamental knowledge of the causes, pathophysiology, and management of shock and respiratory failure across the life span. – The student will be able to:
	39.01 Discuss and identify causes and pathophysiology of the categories of hemorrhage and shock.
	39.02 Review causes and pathophysiology of respiratory failure and arrest.
	39.03 Review causes and pathophysiology of cardiac failure or arrest.
	39.04 Discuss the various types and degrees of shock.
	39.05 Discuss post resuscitation management.
	39.06 Explain the system components of CPR, the links in the AHA chain of survival and how each relates to patient survival.
	39.07 Define and differentiate between compensated and decompensated shock.
	39.08 Discuss the importance of teamwork in the successful management of the critical patient.
	39.09 Demonstrate how to perform one and two rescuer CPR, adult, child, and infant.
	39.10 Demonstrate how to perform rescuer level appropriate defibrillation in an adult, child, and infant patient.
	39.11 Demonstrate rapid decision making based on differential field diagnosis of the critical patient with a peri-arrest condition.
	39.12 Describe and demonstrate the assessment and management of the patient with hemorrhage and shock.
40.0	Trauma Overview: Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment and management of the trauma patient across the life span. – The student will be able to:

	40.01 Discuss pathophysiology of the trauma patient.
	40.02 Discuss the components of a comprehensive trauma systems and levels of trauma centers.
	40.03 Describe the considerations for different transportation modes to a trauma center.
	40.04 Discuss the kinematics of blunt and penetrating trauma.
	40.05 Discuss and describe significant and non-significant Mechanism of Injury (MOI) and provide examples of each.
	40.06 Demonstrate the application of the State of Florida's trauma scorecard methodologies as required in Florida Statute and Florida Administrative Code (F.A.C.).
	40.07 Discuss the National Trauma Triage Protocol of injured Patients.
	40.08 Discuss forming a field impression and utilizing available information to determine a differential diagnosis.
	40.09 Identify the need for rapid intervention transport of the trauma patient.
41.0	Bleeding: Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of bleeding across the life span. – The student will be able to:
	41.01 Review the anatomy and physiology of the circulatory system.
	41.02 Discuss the different types of bleeding and classes of hemorrhage.
	41.03 Review signs and symptoms of shock (hypo-perfusion).
	41.04 Demonstrate effective hemorrhage control to include application of a tourniquet.
	41.05 Review the pathophysiology of hemorrhagic shock.
	41.06 Recognize the need for rapid transport for patients that are bleeding and showing signs of shock (hypo-perfusion).
	41.07 Describe and demonstrate the assessment and management of a patient with hemorrhagic shock.
	41.08 Discuss the possible complications of an improperly applied dressing, bandage, tourniquet, and hemostatic agents.
42.0	Chest Trauma: Demonstrate a fundamental depth, simple breadth of knowledge of pathophysiology, assessment and management of chest trauma across the life span. –.The student will be able to:
	42.01 Review the anatomy and physiology of the thoracic/chest cavity and respiratory system.
	42.02 Differentiate between a pneumothorax (open, simple and tension) and hemothorax.
	42.03 Discuss the pathophysiology, signs and symptoms, and MOI of myocardial injuries, including the following: 42.03.01 pericardial tamponade 42.03.02 myocardial contusion 42.03.03 myocardial rupture

	40.00.04 commetic condic
	42.03.04 commotio cordis 42.03.05 aortic sheerer
	42.04 Discuss the pathophysiology, signs and symptoms, and MOI of specific chest wall injuries, including the following:
	42.04.01 rib fracture
	42.04.02 flail segment
	42.04.03 sternal fracture
	42.05 Describe and demonstrate the assessment and management of chest trauma.
43.0	Abdominal and Genitourinary Trauma: Demonstrate a fundamental depth, simple breadth of knowledge of pathophysiology, assessment and management of abdominal and genitourinary trauma across the life span. – The student will be able to:
	43.01 Review the anatomy and physiology of the abdominal cavity and genitourinary system.
	43.02 Discuss the pathophysiology, signs and symptoms, and MOI for abdominal trauma including hallow and solid injuries.
	43.03 Describe and demonstrate the assessment and management of a patient with a suspected abdominal or genitourinary injury/trauma.
44.0	Orthopedic Trauma: Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of orthopedic trauma across the life span. – The student will be able to:
	44.01 Review the anatomy and physiology of the musculo-skeletal system.
	44.02 Discuss pathophysiology, signs and symptoms, and MOI for orthopedic trauma.
	44.03 Discuss the different types of orthopedic trauma including fracture classifications.
	44.04 Explain the rationale for stabilization of an injured extremity.
	44.05 Describe and demonstrate the assessment and management of a patient with a suspected orthopedic trauma.
	44.06 Discuss the following management techniques:
	44.06.01 heat therapy
	44.06.02 cold therapy
	44.06.03 splinting
	44.07 List the six "P's" of orthopedic injury assessment.
	44.08 Discuss the need for assessment of distal pulses, motor, and sensation before and after splinting.
	44.09 Review age-associated changes in the bones.
	44.10 Discuss the proper procedures to package an amputated body part for replantation.
	44.11 Explain the rationale for splinting at the scene versus load and go.
	44.12 Demonstrate the proper use of various splinting materials and devices to include improvised and traction splints.

45.0	Soft Tissue Trauma: Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of soft tissue trauma across the life span. – The student will be able to:
	45.01 Review anatomy and physiology of the integumentary system to include the layers of the skin.
	45.02 Describe the pathophysiology, signs and symptoms, and MOI of soft tissue trauma.
	45.03 Describe and demonstrate the assessment and management of various soft tissue injuries.
	45.04 Identify types of burn injuries, including: 45.04.01 thermal burn 45.04.02 chemical burn 45.04.03 electrical burn 45.04.04 radiation exposure
	45.05 Describe the depth classifications of burn injuries, including: 45.05.01 superficial burn 45.05.02 partial-thickness burn 45.05.03 full-thickness burn 45.05.04 other depth classifications
	45.06 Describe and demonstrate methods for determining body surface area percentage of a burn injury including the "rule of nines," the "rule of palms," and other methods.
	45.07 Explain how the seriousness of a burn is related to its depth and percent of body surface area (BSA) involved.
	45.08 Review the various management techniques for hemorrhage control.
	45.09 Differentiate among the types of injuries requiring the use of an occlusive versus non- occlusive dressing.
	45.10 Demonstrate the assessment and management of specific burn injuries including: 45.10.01 thermal 45.10.02 inhalation 45.10.03 chemical 45.10.04 electrical 45.10.05 radiation
46.0	Head, Facial, Neck, and Spine Trauma: Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of head, facial, neck and spine trauma across the life span. – The student will be able to:
	46.01 Review the anatomy and physiology of the head, face, neck and spine.
	46.02 Describe the pathophysiology, signs and symptoms, and MOI for head, face, neck, and spine trauma.

	6.03 Describe and demonstrate the assessment and management of a patient with the following traumas to the head, face, neck, and	l
	spine:	
	46.03.01 penetrating neck trauma	
	46.03.02 laryngotracheal injury	
	46.03.03 skull fracture	
	46.03.04 facial fracture	
	46.03.05 eye injury (foreign body)	
	46.03.06 dental trauma	
	6.04 Recognize and manage life threats due to face, head, neck, and spine trauma.	
	6.05 Discuss and demonstrate the utilization of the Glasgow Coma Scale.	
47.0	lervous System Trauma: Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and nanagement of nervous system trauma across the life span. – The student will be able to:	
	7.01 Review the anatomy and physiology of the nervous system.	
	7.02 Discuss the pathophysiology, signs and symptoms, and MOI for brain and spinal cord trauma.	
	7.03 Describe and demonstrate the assessment and management of a patient with a brain and/or spinal cord trauma.	
	7.04 Discuss the rationale and potential complications of spinal motion restriction of the entire spine when a cervical spine injury is suspected.	
	7.05 Given a scenario, discuss whether or not to remove a helmet prior to transport of a patient.	
	7.06 Demonstrate various methods for stabilization and removal of a helmet.	
	7.07 Discuss documentation of assessment before, during, and after spinal motion restriction.	
48.0	Special Considerations in Trauma: Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assess and management of trauma patients with special considerations across the life span. – The student will be able to:	ment
	8.01 Review the anatomy and physiology for the following trauma patients:	
	48.01.01 pregnant	
	48.01.02 pediatric	
	48.01.03 geriatric	
	8.02 Discuss the pathophysiology, signs and symptoms, and MOI of trauma in the following patients:	
	48.02.01 pregnant	
	48.02.02 pediatric	
	48.02.03 geriatric	
	8.03 Discuss and demonstrate unique assessment and management considerations for the following trauma patients:	
	48.03.01 pregnant 48.03.02 pediatric	
	40.00.02 pediatric	

		48.03.03	geriatric
		48.03.04	cognitively impaired
49.0	Fnviro		ergencies: Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment and
10.0			ironmental emergencies across the life span. – The student will be able to:
			ning and discuss its incidence, rick factors and prevention.
	49.02		pathophysiology, signs and symptoms, and MOI of the following:
		49.02.01	drowning and water related incidents
		49.02.02	temperature-related illness
		49.02.03 49.02.04	bites and envenomation
		49.02.04	dysbarism such as high-altitude injuries diving injuries
		49.02.06	lightning (electrical) injury
		49.02.07	high altitude illness
		49.02.08	radiation exposure
	49.03		nd demonstrate the assessment and management for a patient with the following:
		49.03.01	drowning and water related incidents
		49.03.02	temperature-related illness
		49.03.03	bites and envenomation
		49.03.04	dysbarism such as high-altitude injuries
		49.03.05	diving injuries
		49.03.06	lightning (electrical) injury
		49.03.07	high altitude illness
		49.03.08	radiation exposure
	49.04	Discuss the f	fundamental principles of the gas laws including: Boyle's, Dalton, Henry and Charles.
	49.05	Discuss scer	ne management and provider safety considerations for a variety of environmental emergencies.
	49.06	Explain the fi	ive ways a body can lose heat.
	49.07	Discuss pote	entially life threatening venomous species of insects, spiders and snakes in the U.S.
50.0			Ima: Demonstrate a fundamental depth, foundational breadth of knowledge of the pathophysiology, assessment, and ti-system trauma and blast injuries across the life span. – The student will be able to:
	50.01	Discuss the p	pathophysiology, signs and symptoms, and MOI of multi-system trauma and blast injuries.
	50.02	Describe and	d demonstrate assessment and management considerations for a patient of multi system trauma and blast injuries.
51.0			strate a fundamental depth, foundational breadth of knowledge of management of the obstetric patient within the scope IT. – The student will be able to:
	51.01	Identify and o	describe the anatomical and the physiological changes during pregnancy.
			. , , , , , , , , , , , , , , , , , , ,

	51.02 Define the stages of labor and discuss how to assess them.
	51.03 Differentiate between cephalic and abnormal delivery.
	51.04 Describe the management of a patient with pre-delivery emergencies.
	51.05 Discuss and demonstrate the patient care measures for all stages of labor in a cephalic delivery for the mother and the newborn.
	51.06 Describe the management of the mother post-delivery.
	51.07 Discuss and demonstrate the patient care measures for all stages of labor in abnormal deliveries for the mother and the newborn.
	51.08 Describe the procedures for handling complications of delivery.
	51.09 Describe special considerations when meconium is present in amniotic fluid or during delivery.
	51.10 Identify the factors that lead to premature birth and low birth weight newborns.
	51.11 Demonstrate the procedures for handling complications of pregnancy including pre-eclampsia, eclampsia, and high risk.
52.0	Neonatal Care: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the newborn and neonatal patient within the scope of practice of the EMT. – The student will be able to:
	52.01 Discuss and demonstrate assessment and management considerations of a neonate.
	52.02 Define the term neonate.
	52.03 Describe special patient care considerations of a premature baby.
	52.04 Calculate the Apgar score given various newborn situations.
	52.05 Discuss the common signs when ventilarory assistance is appropriate for a neonate.
	52.06 Discuss and demonstrate the steps in resuscitation of a neonate.
	52.07 Review the signs of hypovolemia in a newborn.
	52.08 Discuss the effects maternal narcotic usage has on the newborn.
	52.09 Discuss the management/treatment plan for vomiting in the neonate.
	52.10 Discuss the assessment findings associated with common birth injuries in the neonate.
53.0	Pediatrics: Demonstrate a fundamental depth, fundamental breath of knowledge of management of the pediatric patient within the scope of practice of the EMT. – The student will be able to:
	53.01 Review the anatomy, physiology and pathophysiology differences of patients.

53.02 Discuss the differences in approaching and assessing patients. 53.03 Discuss and demonstrate assessment and management considerations for Sudden Unexplained Infant Death Syndrome (SUIDS). 53.04 Describe the selection of appropriate airway adjuncts and ventilation devices. 53.05 Discuss complications of improper utilization of airway adjuncts and ventilation devices. 53.06 Describe the common causes, assessment and management of respiratory distress, failure, or arrest. 53.07 Discuss the common causes, assessment and management of prepiratory distress, failure, or arrest. 53.08 Discuss the common causes, assessment and management of prepiratory distress, failure, or arrest. 53.09 Describe the common causes, assessment and management of altered level of consciousness. 53.10 Describe the common causes, assessment and management of latered level of consciousness. 53.11 Describe the common causes, assessment and management of reural. 53.12 Demonstrate proper technique for administering blow-by oxygen. 53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.06 Gerlatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. — The student will be able to: 54.01 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Discuss the importance of fall prevention with the geriatric patient. 55.07 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span.—The student will be able to		
53.04 Describe the selection of appropriate airway adjuncts and ventilation devices. 53.05 Discuss complications of improper utilization of airway adjuncts and ventilation devices. 53.06 Describe the common causes, assessment and management of respiratory distress, failure, or arrest. 53.07 Discuss the common causes, assessment and management of pypo-perfusion. 53.08 Discuss the common causes, assessment and management of ardiopulmonary arrest. 53.09 Describe the common causes, assessment and management of latered level of consciousness. 53.10 Describe the common causes, assessment and management of trauma. 53.11 Describe the common causes, assessment and management of reurological emergencies. 53.12 Demonstrate proper technique for administering blow-by oxygen. 53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.00 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. — The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Describe the common causes, assessment, and management of the geriatric patient. 55.00 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.01 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.10 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma or psychosocial complaint. 55.10 Describe solution of the patient will be able to: 55.11 Discuss the special considerations required when prov		53.02 Discuss the differences in approaching and assessing patients.
53.05 Discuss complications of improper utilization of airway adjuncts and ventilation devices. 53.06 Describe the common causes, assessment and management of respiratory distress, failure, or arrest. 53.07 Discuss the common causes, assessment and management of hypo-perfusion. 53.08 Discuss the common causes, assessment and management of cardiopulmonary arrest. 53.09 Describe the common causes, assessment and management of altered level of consciousness. 53.10 Describe the common causes, assessment and management of trauma. 53.11 Describe the common causes, assessment and management of reurological emergencies. 53.12 Demonstrate proper technique for administering blow-by oxygen. 53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.0 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.06 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the lite span. —The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		53.03 Discuss and demonstrate assessment and management considerations for Sudden Unexplained Infant Death Syndrome (SUIDS).
53.06 Describe the common causes, assessment and management of respiratory distress, failure, or arrest. 53.07 Discuss the common causes, assessment and management of hypo-perfusion. 53.08 Discuss the common causes, assessment and management of cardiopulmonary arrest. 53.09 Describe the common causes, assessment and management of altered level of consciousness. 53.10 Describe the common causes, assessment and management of trauma. 53.11 Describe the common causes, assessment and management of reurological emergencies. 53.12 Demonstrate proper technique for administering blow-by oxygen. 53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.0 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.07 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the lite span. —The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		53.04 Describe the selection of appropriate airway adjuncts and ventilation devices.
53.07 Discuss the common causes, assessment and management of hypo-perfusion. 53.08 Discuss the common causes, assessment and management of cardiopulmonary arrest. 53.09 Describe the common causes, assessment and management of altered level of consciousness. 53.10 Describe the common causes, assessment and management of trauma. 53.11 Describe the common causes, assessment and management of neurological emergencies. 53.12 Demonstrate proper technique for administering blow-by oxygen. 53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.0 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. — The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 55.06 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with a medical, trauma, or psychosocial complaint. 55.01 Discuss the special considerations required when providing emergency care to patients with:		53.05 Discuss complications of improper utilization of airway adjuncts and ventilation devices.
53.08 Discuss the common causes, assessment and management of cardiopulmonary arrest. 53.09 Describe the common causes, assessment and management of altered level of consciousness. 53.10 Describe the common causes, assessment and management of trauma. 53.11 Describe the common causes, assessment and management of neurological emergencies. 53.12 Demonstrate proper technique for administering blow-by oxygen. 53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.00 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. — The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 55.06 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. —The student will be able to:		53.06 Describe the common causes, assessment and management of respiratory distress, failure, or arrest.
53.09 Describe the common causes, assessment and management of altered level of consciousness. 53.10 Describe the common causes, assessment and management of trauma. 53.11 Describe the common causes, assessment and management of neurological emergencies. 53.12 Demonstrate proper technique for administering blow-by oxygen. 53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.0 Gerlatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.01 Discuss the special challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		53.07 Discuss the common causes, assessment and management of hypo-perfusion.
53.10 Describe the common causes, assessment and management of trauma. 53.11 Describe the common causes, assessment and management of neurological emergencies. 53.12 Demonstrate proper technique for administering blow-by oxygen. 53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.0 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.01 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to:		53.08 Discuss the common causes, assessment and management of cardiopulmonary arrest.
53.11 Describe the common causes, assessment and management of neurological emergencies. 53.12 Demonstrate proper technique for administering blow-by oxygen. 53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.0 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.01 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		53.09 Describe the common causes, assessment and management of altered level of consciousness.
53.12 Demonstrate proper technique for administering blow-by oxygen. 53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.0 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.0 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		53.10 Describe the common causes, assessment and management of trauma.
53.13 Review proper technique for suctioning. 53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.0 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.01 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		53.11 Describe the common causes, assessment and management of neurological emergencies.
53.14 Review appropriate use of airway adjuncts and ventilation devices. 53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.0 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.0 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		53.12 Demonstrate proper technique for administering blow-by oxygen.
53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway. 54.0 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 55.0 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		53.13 Review proper technique for suctioning.
 54.0 Geriatrics: Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.0 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with: 		53.14 Review appropriate use of airway adjuncts and ventilation devices.
practice of the EMT. – The student will be able to: 54.01 Define and discuss the term geriatrics. 54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.01 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		53.15 Review age appropriate basic airway clearing maneuvers for a completely obstructed airway.
54.02 Review the anatomy, physiology and pathophysiology of the geriatric patient. 54.03 Discuss common emotional and psychological concerns and conditions of the geriatric patient. 54.04 Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.0 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. —The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:	54.0	
Discuss common emotional and psychological concerns and conditions of the geriatric patient. Discuss the importance of fall prevention with the geriatric patient. Describe principles that should be employed when assessing and communicating with the geriatric patient. Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. —The student will be able to: Discuss the special considerations required when providing emergency care to patients with:		54.01 Define and discuss the term geriatrics.
Discuss the importance of fall prevention with the geriatric patient. 54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.0 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. —The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		Review the anatomy, physiology and pathophysiology of the geriatric patient.
54.05 Describe principles that should be employed when assessing and communicating with the geriatric patient. 54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.0 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		Discuss common emotional and psychological concerns and conditions of the geriatric patient.
54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint. 55.0 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		Discuss the importance of fall prevention with the geriatric patient.
 Patients with Special Challenges: Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with: 		Describe principles that should be employed when assessing and communicating with the geriatric patient.
special challenges across the life span. –The student will be able to: 55.01 Discuss the special considerations required when providing emergency care to patients with:		54.06 Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint.
55.01 Discuss the special considerations required when providing emergency care to patients with:	55.0	
		55.01 Discuss the special considerations required when providing emergency care to patients with:

55.01.02 homelessness 55.01.03 poverty 55.01.04 bariatrics 55.01.05 tech dependent 55.01.06 hospice/terminally ill 55.01.07 tracheostomy 55.01.09 sensory deficit/loss 55.01.09 sensory deficit/loss 55.01.09 sensory deficit/loss 55.01.09 sensory deficit/loss 55.01.01 developmental disability 55.02.01 respiratory devices 55.02.01 respiratory devices 55.02.01 respiratory devices 55.02.03 gastro-urinary devices 55.02.03 gastro-urinary devices 55.02.04 central & pertipheral IV catheters 55.05 Discuss the role of the EMT as a patient advocate for vulnerable populations. 55.02 Discuss the role of the EMT as a patient advocate for vulnerable populations. 56.01 Discuss the role of the EMT as a patient advocate for vulnerable populations. 56.01 Discuss the importance of performing regular vehicle and equipment inspection. 56.02 Demonstrate how to perform a daily inspection of an ambulance. 56.03 Review the general provisions of Florida laws relating to the operation of the ambulance. 56.04 Discuss the guidelines for operating an ambulance safety during emergency and non-emergency situation/incident. 56.05 Review considerations that are required for ensuring scene safety, including personal safety, patient safety, and traffic control. 56.06 Review how to clean and disinfect the ambulance and equipment. 57.01 Discuss the importance of NIMS (National Incidence Management System) and its functional components. 57.02 Discuss unified command and when it is applicable. 57.03 Describe the role of command and the procedures for transfer of command. 	57.04 List and describe the functions of the following groups and leaders in ICS as it pertains to EMS incidents: 57.04.01 safety
	57.04.02 logistics
	57.04.03 rehabilitation
	57.04.04 staging,
	57.04.05 treatment
	57.04.06 triage
	57.04.07 transportation
	57.04.08 extrication/rescue 57.04.09 morgue
	57.04.09 morgue 57.04.10 communications
	57.05 Discuss the physical and psychological signs of critical incident stress.
58.0	Multiple Casualty Incidents: Demonstrate a simple depth, foundational breadth of knowledge of responding to an emergency during a multiple casualty incident. – The student will be able to:
	58.01 Review essential elements of scene size-up when arriving at a potential MCI.
	58.02 Describe the role of the rescuers and EMS systems in planning for MCIs and disasters.
	58.03 Describe the role of the physician at multiple casualty incidents.
	58.04 Define triage and describe the principles of triage.
	58.05 Describe the START (simple triage and rapid treatment) and JUMP START method of initial triage.
	58.06 Describe techniques used to allocate patients to hospitals and track them.
	58.07 Discuss and describe the essential equipment to provide logistical support to MCI operations.
	58.08 Describe the role of critical incident stress management during and after MCIs.
	58.09 Demonstrate the use of local/regional triage tagging system.
59.0	Air Medical: Demonstrate a simple depth, simple breadth of knowledge of safe air medical operations and criteria for utilizing air medical response. –The student will be able to:
	59.01 Describe key scene safety considerations when preparing for a helicopter medivac, including establishing a landing zone and approaching the aircraft.
	59.02 Describe the capabilities, protocols, and methods for accessing air medical transport.
	59.03 Review the advantages and disadvantages of air medical transport.
	59.04 Review the conditions/situations in which air medical transport should be considered.
60.0	Vehicle Extrication: Demonstrate a simple depth, simple breadth of knowledge for safe vehicle extrication and use of simple hand tools. –

	The st	udent will be able to:
	60.01	Describe the role of the EMT in patient rescue and vehicle extrication
	60.02	Describe personal and patient safety during vehicle extrication.
	60.03	Explain the difference between simple access and complex access in vehicle extrication.
	60.04 Discuss patient care consideration related to assisting with rapid extrication, providing emergency care to the trapped patie removing and transferring a patient.	
	60.05 Discuss the use of simple hand tools used for vehicle extrication.	
	60.06	Discuss and describe the hazards and safe practices associated with the following vehicle components: 60.06.01 energy absorbing bumpers 60.06.02 air bag/supplemental restraint systems 60.06.03 catalytic converters and conventional fuel systems 60.06.04 stored energy 60.06.05 hybrid-electric vehicles
	60.07	Describe methods for emergency stabilization using rope, cribbing, jacks, spare tire, and come-a-longs for vehicles.
	60.08	Describe the electrical hazards commonly found at highway incidents (above and below ground).
	60.09	Explain the difference between tempered and safety glass, identify its locations on a vehicle and how to break it safely.
	60.10	Explain typical door anatomy and methods to gain access to the patient.
61.0	cold zo	dous Materials Awareness: Demonstrate a simple depth, simple breadth of knowledge of risks and responsibilities of operating in a one at a hazardous material or other special incident. – The student will be able to:
	61.01	the following:
		61.01.01 poison control center
		61.01.02 medical control 61.01.03 material safety data sheets (MSDS),
		61.01.04 reference textbooks
		61.01.05 computer databases
		61.01.06 Computer-Aided Management of Emergency Operations (CAMEO)
		61.01.07 CHEMTREC
		61.01.08 technical specialists
		61.01.09 Agency for toxic substances and disease registry
	61.02	Explain primary and secondary contamination risk.
	61.03	Review routes of exposure.

	61.04 Discuss how the substance and route of contamination alters triage and decontamination methods.	
	61.05	Explain the common signs, symptoms, and treatment for the following substances: 61.05.01 corrosives 61.05.02 pesticides 61.05.03 chemical asphyxiants 61.05.04 hydrocarbon solvents
	61.06	Identify local facilities and resources capable of treating patients exposed to hazardous materials.
	61.07	Determine the appropriate level of PPE by considering the following: 61.07.01 types 61.07.02 application 61.07.03 use and limitations 61.07.04 use of chemical compatibility chart
	61.08	Explain specific decontamination procedures.
	61.09	Discuss the designated HAZMAT control zones (HOT, WARM, and COLD).
	61.10	Discuss an emergency two-step decontamination process.
	61.11	Identify DOT Labels, placards and markings that are used to designate HAZMAT materials.
	61.12	Demonstrate the ability to use a variety of reference materials to identify a HAZMAT material.
62.0		Casualty Incidents Due to Terrorism and Disaster: Demonstrate a simple depth, simple breadth of knowledge of risks and asibilities of operating on the scene of a natural or man-made disaster. – The student will be able to:
	62.01	Describe the role of the EMT on the scene of a natural or man-made disaster.
	62.02	Define the different types of terrorism and provide examples of incidents of each.
	62.03	Describe the factors related to ensuring situational safety at the site of a disaster and the procedures required.
	62.04	Discuss the National Terrorism Advisory System.
	62.05	Discuss factors to consider when responding to a terrorist situation.
	62.06	Review important actions to take at the scene of a terrorist event such as: 62.06.01 scene safety 62.06.02 personal protection 62.06.03 notification procedures 62.06.04 available resources 62.06.05 working with in the command system
	62.07	

62.08	Discuss the different types of chemical agents and their signs and symptoms.
62.09	Review the treatment and management of patients exposed to various types of chemical agents and radiation.
62.10	Review the different types of radiations and their effect on the human body.
62.11	Discuss the use of a nerve agent antidote kit.

Florida Department of Education Student Performance Standards

Emergency Medical Technician –ATD

Program Title: ATD CIP Number: 0351090408 SOC Code(s): 29-2041

When this program is offered at the college level, the following standards and benchmarks apply:

	ertificate program is part of the Emergency Medical Services AS degree program (1351090402). At the completion of this program, udent will be able to:
01.0	EMS Systems: Demonstration of a simple depth and foundational breadth of EMS systems. – The student will be able to:
	01.01 Define Emergency Medical Services (EMS) systems.
	01.02 Discuss the historical background of the development of the EMS system.
	01.03 Identify the four levels of national EMS providers (EMR, EMT, AEMT and PM) as well as the three levels in the State of Florida.
	01.04 Discuss the specific statutes and regulations regarding the EMS system in Florida.
	01.05 Discuss vehicle and equipment readiness
	01.06 Characterize the EMS system's role in prevention and public education.
	01.07 Discuss the roles and responsibilities of the EMT related to personal safety of the crew, patient and by standers.
	01.08 Discuss the roles and responsibilities of the EMT to operate emergency vehicles, provide scene leadership and perform patient assessment and administer emergency care.
	01.09 Discuss the maintenance of certification and licensure for the EMT in the State of Florida and NREMT.
	01.10 Define quality improvement and discuss the EMT's role in the process.
	01.11 Identify the basics of common methods of payment for healthcare services.
	01.12 Analyze attributes and attitudes of an effective leader.
	01.13 Demonstrate effective techniques for managing team conflict.
	01.14 Describe factors that influence the current delivery system of healthcare.
	01.15 Discuss the importance of continuing medical education and skills retention.

	01.16	Assess personal attitudes and demeanor that may distract from professionalism.
	01.17	Serve as a role model and exhibit professional behaviors in the following areas: 01.17.01 integrity 01.17.02 empathy 01.17.03 self-motivation 01.17.04 appearance and personal hygiene 01.17.05 self-confidence 01.17.06 communications (including phone, email and social media etiquette) 01.17.07 time management 01.17.08 teamwork and diplomacy 01.17.09 respect 01.17.10 patient advocacy (inclusive of those with special needs, alternate life styles and cultural diversity) 01.17.11 careful delivery of service
02.0	Resea to:	rch: Demonstration of a simple depth, simple breadth of research and evidence-based decision making. – The student will be able
	02.01	Discuss EMS research and evidence based decision making 02.01.01 Conduct scientific literature searches 02.01.02 Read, interpret and extract information from journal articles relevant to a project
	02.02	Explain the importance to assess and treat patients based on evidence based decision making.
	02.03	Interpret graphs, charts and tables.
	02.04	Measure time, temperature, distance, capacity, and mass/weight.
	02.05	Convert and use traditional and metric units.
	02.06	Make estimations, approximations and judge the reasonableness of the result.
	02.07	Convert time from a 12 hour format to a 24 hour format
	02.08	Demonstrate ability to evaluate and draw conclusions.
	02.09	Calculate ratios.
		Explain the rationale for the ems system gathering data.
03.0		orce Safety and Wellness: Demonstration of a fundamental depth, foundational breadth of workforce safety and wellness. – The at will be able to:
	03.01	Explain the need to determine scene safety.
	03.02	Discuss the importance of body substance isolation (BSI).

03.03	Describe the steps the EMT should take for personal protection from airborne and blood borne pathogens as well as
	communicable disease.
	List the personal protective equipment necessary to protect oneself in common emergency situations.
03.05	List possible emotional reactions that an individual (EMT and EMT family, Patient and Patient family) may experience when faced with trauma, illness, death and dying.
03.06	State the steps the EMT should take when approaching a family confronted with death and dying.
03.07	Recognize the warning signs of personal stress and discuss the strategies EMTs can apply to manage it.
03.08	Demonstrate good body mechanics while using a stretcher and other patient moving devices.
03.09	Discuss the guidelines and safety precautions that need to be followed when lifting a patient.
03.10	Describe the guidelines and safety precautions for carrying patients and/or equipment.
03.11	State the guidelines for reaching and their application.
03.12	State the guidelines for pushing and pulling.
03.13	Discuss patient positioning in common emergency situations.
03.14	Discuss situation that may require the use of medical restraints on the patient and explain guidelines and safety consideration for their use.
03.15	Define "infectious disease" and "communicable disease."
03.16	Describe the routes of transmission for infectious disease.
03.17	Explain the mode of transmission and the steps to prevent/deal with an exposure of hepatitis, meningitis, tuberculosis and HIV.
03.18	Explain how immunity to infectious diseases is acquired.
03.19	Explain post exposure management of exposure to patient blood or body fluids, including completing a post exposure report.
03.20	Describe the components of physical fitness and mental wellbeing.
03.21	Identify personal health practices and environmental factors which affect function of each of the major body systems.
03.22	Develop an awareness of complementary and alternative health practices.
03.23	Explain the basic concepts of positive self-image, wellness and stress.
03.24	Develop a wellness and stress control plan that can be used in personal and professional life.
03.25	Explore the importance of adequate nutrition (i.e. U.S. Department of Agriculture's MyPlate food guide (<u>www.choosemyplate.gov</u>).)
·	

	03.26 Identify personal health practices and environmental factors which affect function of each of the major body systems.
	03.27 Demonstrate the safe use of medical equipment.
	03.28 Explain the theory of root- cause analysis.
	03.29 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
	03.30 Identify and practice security procedures for medical supplies and equipment in the various healthcare settings.
	03.31 Describe fire, safety, disaster and evacuation procedures in the various healthcare settings.
	03.32 Discuss applicable accrediting and regulatory agency patient safety guidelines.
04.0	Documentation: Demonstration of a fundamental depth, foundational breadth of the principles of medical documentation and report writing. – The student will be able to:
	04.01 Recognize applications of technology in healthcare.
	04.02 Demonstrate basic computer skills.
	04.03 Interpret and utilize information from electronic health records.
	04.04 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
	04.05 Describe the use and importance of written communication and patient care documentation.
	04.06 Explain the legal implication of the patient care report.
	04.07 Identify the minimum dataset reference patient information and administrative information on the patient care report.
	04.08 Understand how to document refusal of care, including legal implications.
	04.09 Discuss the implications of the Health Insurance Portability and Accountability Act of 1996 on confidential documentation.
	04.10 Describe the special considerations concerning mass casualty incident documentation.
	04.11 Explain the relevance and importance of properly completed documentation.
	04.12 Demonstrate completion of a patient care report for a medical and trauma patient.
	04.13 Explain the rationale for patient care documentation.
05.0	EMS System Communication: Demonstration of a simple depth, simple breadth of the EMS communication system, communication with other health care professionals, and team communication. – The student will be able to:
	05.01 Understand the basic principles of the various types of communications equipment used in EMS

	05.02 Describe the use of radio communication and correct radio procedures, including the proper methods of initiating and terminating the radio call/transmission.
	05.03 Explain the rationale for providing efficient and effective radio communications and patient reports.
	05.04 Identify the essential components of the verbal report and legal aspects that need to be considered.
	05.05 Perform an organized and concise radio transmission.
	05.06 Perform an organized, concise patient report that would be given to the staff at a receiving facility.
	05.07 Perform a brief, organized report that would be given to an ALS provider arriving at an incident scene at which the EMT was already providing care.
06.0	Therapeutic Communication: Demonstration of a simple depth and simple breadth of the principles of therapeutic communication. – The student will be able to:
	06.01 Describe principles of therapeutic and effective communication with patients in a manner that achieves a positive relationship.
	06.02 Develop basic speaking and active listening skills.
	06.03 Recognize the importance of patient/client educations regarding healthcare.
	06.04 Demonstrate the adjustment of communication strategies to effectively communicate with patients with: 06.04.01 differing age groups 06.04.02 differing developmental stages 06.04.03 special needs 06.04.04 Differing cultures, including language barriers. 06.05 Demonstrate the communication techniques that should be used to interact with the patient, patient family, bystanders, and
	individuals from other agencies including verbal diffusion and interview techniques.
	06.06 Demonstrate the strategies for interviewing persons in special situations.
	06.07 Distinguish between and respond to verbal and non-verbal cues.
	06.08 Analyze elements of communication using a sender-receiver/close loop model.
	06.09 Exhibit positive non-verbal behaviors.
	06.10 Establish proper patient rapport.
07.0	Medical/Legal and Ethics: Demonstration of a fundamental depth, foundational breadth of medical legality and ethics. – The student will be able to:
	07.01 Differentiate between expressed, implied and involuntary consent
	07.02 Discuss the methods of obtaining consent and procedures for minors.
	07.03 Discuss the issues of abandonment, negligence, false imprisonment and battery and their implications to the EMT.

07.04	Discuss the implications for the EMT in patient refusal of care and/or transport.
07.0	Explain the importance, necessity and legality of patient confidentiality.
07.00	Discuss the importance of Do Not Resuscitate [DNR] (advance directives) and local or Florida provisions regarding EMS application.
07.0	Discuss State of Florida and Federal special reporting situations including: 07.07.01 Abuse 07.07.02 sexual assault 07.07.03 gunshot and knife wounds 07.07.04 communicable disease
07.08	Differentiate between civil tort and criminal actions
07.09	List the elements of negligence and defenses/protections from liability.
07.10	Discuss the role of the EMT at crime scenes and preservation of evidence.
07.1	Define ethics and morality and discuss their implication for the EMT.
07.12	Differentiate between licensure and certification as they apply to EMS.
07.13	Discuss Florida legislation such as the Baker Act, Marchman Act, and the Emergency Examination and Treatment of Incapacitated Persons Act.
07.14	Differentiate between the scope of practice and the standard of care as applied to the EMT.
07.1	Discuss the legal concept of immunity, including Good Samaritan statutes and governmental immunity.
07.10	Describe the appropriate patient management and care techniques in a refusal of care situation.
07.1	Analyze the relationship between the law, morals and ethics in EMS and the premise that should under lie the EMTs ethical decisions.
07.18	Describe the criteria necessary to honor an advance directive.
07.19	Explain the rationale for the needs, benefits and varying degrees of advance directives.
	omy and Physiology: Demonstrate the application of fundamental knowledge of the anatomy and function of all human systems to the ice of EMS. – The student will be able to:
08.0	Label the following topographic terms: 08.01.01 Medial 08.01.02 lateral 08.01.03 proximal 08.01.04 distal 08.01.05 superior 08.01.06 inferior

	08.01.07 anterior
	08.01.08 posterior
	08.01.09 midline
	08.01.10 right and left
	08.01.11 mid-clavicular
	08.01.12 bilateral
	08.01.13 mid-axillary
08.02	Chart the life support chain, aerobic metabolism and anaerobic metabolism.
08.03	Define anatomy, physiology, pathophysiology and homeostasis.
08.04	Identify and describe the anatomical structures and functions of the following:
	08.04.01 Skeletal system
	08.04.02 Muscular system
	08.04.03 Respiratory System
	08.04.04 Circulatory/ Cardiovascular system
	08.04.05 Nervous System
	08.04.06 Integumentary system
	08.04.07 Digestive system
	08.04.08 Endocrine system including glands and hormones 08.04.09 Renal system
	08.04.10 Reproductive system
	08.04.11 Lymphatic System
08.05	
08.06	Explain cellular respiration.
08.07	Discuss cell division.
08.08	Describe the different types of muscle tissues including skeletal, smooth and cardiac.
08.09	Describe the functions and divisions of the skeletal system including the classifications of bones.
08.10	Name and identify the location of the bones of the axial and appendicular skeleton.
08.11	Describe the classification and types of joints.
08.12	Describe the function of muscles.
08.13	Identify major muscles of the body
08.14	Describe the general function of the respiratory system and its structures.
08.15	Discuss the mechanisms of breathing including:
-	

		08.15.01 Mechanical Ventilation 08.15.02 Pulmonary volumes 08.15.03 Dead space 08.15.04 Lung compliance	
	08.16	Explain the diffusion of gases in external and internal respiration.	
	08.17	Describe oxygen and carbon dioxide transport in the blood.	
	08.18	Describe nervous and chemical mechanisms that regulate Respirations.	
	08.19	Discuss respiration and acid-base balance.	
	08.20	Describe the composition and function of blood and plasma.	
	08.21	Identify and describe the anatomical structures and functions of the cardiovascular system.	
	08.22	Discuss the hemodynamics of blood pressure.	
	08.23	Discuss the role of nutrition, metabolism and body temperature on body function.	
	08.24	Describe the causes, advantages and disadvantages of a fever	
	08.25	Discuss the hypothalamus functions as the thermostat in the body	
09.0		al Terminology: Demonstrate the application of fundamental knowledge in the use of medical termin t will be able to:	ology and medical terms. – The
	09.01	Identify medical terminology word parts such as: 09.01.01 root words 09.01.02 prefixes	
	09.02	09.01.03 suffixes 09.01.04 combining forms Correctly utilize medical terminology describing each of the following: 09.02.01 body structures 09.02.02 functions, 09.02.03 conditions and disorders 09.02.04 body regions 09.02.05 cavities 09.02.06 areas	
		09.01.04 combining forms Correctly utilize medical terminology describing each of the following: 09.02.01 body structures 09.02.02 functions, 09.02.03 conditions and disorders 09.02.04 body regions 09.02.05 cavities	

09. 10.0 Pa	2.05 Communicate with healthcare professionals utilizing basic medical terminology. 2.06 Explain the rationale for using accepted medical terminology correctly. 2.16 Interpretation of a fundamental knowledge of the causes, pathophysiology and management of shock and a components of resuscitation. — The student will be able to:
10.0 Pa	athophysiology: Demonstrate the application of a fundamental knowledge of the causes, pathophysiology and management of shock and
the	
	o componente di rocaccitationi. Tito ciadoni viii be able ter
10.	.01 Discuss signs of irreversible death.
10.	.02 Review the anatomy and physiology of the respiratory and cardiovascular systems.
10.	.03 Discuss and identify the pathophysiology and medical care for respiratory failure as well as respiratory and cardiac arrest.
10.	.04 Explain the system components of CPR, the four links in the AHA chain of survival and how each one relates to maximizing the survival of the patient.
10.	.05 Show Provider (AHA guidelines) certification required prior to EMT program admission as per FS 401.27.
10.	.06 Understand shock, including the pathophysiology, causes, and its signs and symptoms associated with the various types of shock.
10.	.07 Discuss patient assessment and steps to the emergency care of the patient with signs and symptoms of shock.
10.	.08 Based on age variations, discuss and distinguish the variations and causes between the management of patient experiencing shock.
	fe Span Development: Demonstrate the application of fundamental knowledge of life span development to patient assessment and anagement. – The student will be able to:
	.01 Describe the major physiologic and psychosocial characteristics of: 11.01.01 An infant's life 11.01.02 A toddler and preschooler's life 11.01.03 A school age child's life 11.01.04 An adolescent's life 11.01.05 An early adults life 11.01.06 A middle adult's life 11.01.07 A late adult's life
	iblic Health: Demonstrate the use of simple knowledge of the principles of illness and injury prevention in emergency care. – The student ll be able to:
12.	.01 Define public health and explain the goal of the public health field.
12.	.02 Identify the EMS role within the public health field.
12.	.03 Recognize the three categories of public health laws.
12.	.04 Discuss basic concepts of epidemiology
12.	2.05 Discuss ways of EMS involvement in injury prevention.

	12.06 Identify areas	of need for prevention programs in the community.
13.0	Principles of Pharma emergency. – The student	icology: Demonstrate a simple depth, simple breadth for medication safety and kinds of medications used during an dent will be able to:
	13.01 Explain the "six	x rights" of medication administration and describe how each one related to EMS.
		ms in which the medications may be found and provide examples of each and discuss how the form of a medication te of administration.
	13.03 Describe the d	ifference between a generic medication name and trade name, and provide an example of each.
	13.04.01 13.04.02 13.04.03 13.04.04	mponents and elements of a drug profile including: Actions Contraindications Side effects Dose Route
	13.05 Describe the ro	ole of medical direction in medication administration and explain the difference between direct orders (online) and s (off-line).
14.0	Medication Administ	ration: Demonstrate a fundamental depth and foundational breadth of medication administration within the scope of The student will be able to:
	14.01 Discuss the di	fference between administration versus assistance of patient medications.
	14.02 Explain the rati	ionale for the administration of medications.
	14.02.02 14.02.03 14.02.04	Assist in the administration of medications by the following routes: oral sublingual inhalation auto- injector
15.0	Emergency Medication	ons: Demonstrate a fundamental depth and simple breadth of emergency medications within the scope of practice of
	direction : 15.01.01 15.01.02	of will be able to: ving for each medication that can be administered by an EMT as dictated by the State of Florida and local medical Generic and trade names Actions Indication
	15.01.05 15.01.06 15.01.07 15.01.08	Contraindications Complications Routes of administration Side effects Interactions Doses of medications

	15.02	Discuss the forms in which the medications may be found.
	15.03	Demonstrate the steps in properly inspecting each type of medication.
16.0		y Management: Demonstrate a foundational depth, foundational breadth of airway management within the scope of practice of the - The student will be able to:
	16.01	Review the structures and functions of the respiratory system.
	16.02	State what care should be provided for a patient with or without adequate breathing.
	16.03	Describe and demonstrate the steps in performing the head-tilt chin-lift and jaw thrust in all age groups.
	16.04	Relate mechanism of injury to opening the airway.
	16.05	Explain the differences between airway anatomies in all age groups.
	16.06	Describe the following for a patient with an automatic transport ventilator (ATV): 16.06.01 Indications 16.06.02 Contraindications 16.06.03 Advantages 16.06.04 Disadvantages 16.06.05 Complications 16.06.06 Technique for ventilating Describe the following regarding supplemental oxygen delivery devices: 16.07.01 Indications 16.07.02 Contraindications 16.07.03 Advantages 16.07.04 Disadvantages
		16.07.05 Complications 16.07.06 Liter Flow Range 16.07.07 Concentration of Delivered Oxygen
	16.08	Define, identify and describe the following: 16.08.01 tracheostomy 16.08.02 laryngectomy 16.08.03 stoma 16.08.04 tracheostomy tube
	16.09	Describe the special considerations in airway management and ventilation for the pediatric patient.
	16.10	Demonstrate the techniques of suctioning in all age groups.
	16.11	Demonstrate relief of FBAO in all age groups.
	16.12	Demonstrate how to insert an oral and nasal -airway adjunct in all age groups.

	6.13 Demonstrate how to insert both esophageal and supra-glottic airways in all age groups.		
17.0	Respirations: Demonstrate a fundamental depth, foundational breadth of respiration. – The student will be able to:		
	7.01 Review the pulmonary ventilation process to include mechanics of ventilation and alveolar ventilation (tidal volumes, dead space etc.)	Э,	
	7.02 Describe the oxygenation process		
	7.03 Explain both external and internal respiration process		
	7.04 Discuss the various pathophysiologies of the respiratory system.		
	7.05 Describe assessment and management for adequate and inadequate respiration, including the use of pulse oximetry and capnography.		
	7.06 State the following for oxygen delivery devices: 17.06.01 components 17.06.02 purpose 17.06.03 indications 17.06.04 contraindications 17.06.05 complications 17.06.06 procedures		
	7.07 Describe and demonstrate the steps in performing the skill of assisting ventilations in the conscious and unconscious patient in respiratory distress using a bag-valve-mask (BVM), and continuous positive airway pressure (CPAP).		
	7.08 Review the anatomy and physiology of the respiratory system including: 17.08.01 control of respirations 17.08.02 mechanics of respiration 17.08.03 pulmonary ventilation 17.08.04 oxygenation 17.08.05 mechanical ventilation		
	7.09 Explain the rationale for providing adequate oxygenation through high inspired oxygen concentrations to patients who, in the parmay have received low concentrations.	st,	
	7.10 Demonstrate the correct operation of oxygen tanks and regulators.		
	7.11 Demonstrate the use of high, medium, low and variable concentration oxygen delivery devices for all age groups.		
	7.12 Demonstrate the use of an oxygen humidifier and the requirements needed for its use.		
	7.13 Discuss the differences between negative pressure and positive pressure ventilation.		
18.0	Artificial Ventilations: Demonstrate a fundamental depth, foundational breadth of assessment and management utilizing artificial rentilation. – The student will be able to:		
	8.01 Demonstrate how to artificially ventilate a patient with a pocket mask.		

	18.02 Demonstrate the steps in performing the skill of artificially ventilating a patient with a BVM for one and two rescuers using oral-nasal airway adjusts, head tilt chin lift and jaw thrust.
	18.03 Demonstrate the signs of adequate and inadequate artificial ventilation using the BVM.
	18.04 Describe and demonstrate the steps in artificially ventilating a patient with a manually triggered ventilation device.
	18.05 Demonstrate how to artificially ventilate the pediatric, adult and geriatric patient.
	18.06 Describe the steps involved in performing a comprehensive assessment of ventilations in all age groups.
	18.07 Demonstrate how to artificially ventilate a patient with a stoma.
	18.08 Demonstrate how to artificially ventilate a patient for all age groups.
	18.09 Demonstrate the use of various devices used in the assessment of supra-glottic and esophageal airway placement.
19.0	Scene Size-Up: Demonstrate a fundamental depth, foundational breadth of scene management and multiple patient situations. –The student will be able to:
	19.01 Recognize and describe hazards/potential hazards at the scene.
	19.02 Discuss common mechanisms of injury/nature of illness.
	19.03 Discuss the procedures for multiple-patient situations.
	19.04 Explain why it is important for the EMT to determine the need for additional or specialized resources.
	19.05 Discuss the importance of continuous scene assessment to ensure safety of the EMS team and the patient.
	19.06 List the minimum standard precautions that should be followed and PPE that should be worn at the emergency scene.
	19.07 Determine special considerations for dealing with a violent scene.
	19.08 Explain the rationale for crew members to evaluate scene safety prior to entering.
	19.09 Explain how patient situations affect your evaluation of mechanism of injury or illness.
20.0	Primary Assessment: Demonstrate a fundamental depth, simple breadth of the primary assessment for all patient situations. – The student will be able to:
	20.01 Summarize the elements of a general impression of the patient.
	20.02 Explain the reason for performing a primary assessment.
	20.03 Discuss and demonstrate methods of assessing altered mental status using assess for level of consciousness (AVPU).
	20.04 Discuss and demonstrate methods of assessing the airway and providing airway care.

	20.05 Describe and demonstrate methods used for assessing if a patient is breathing
	20.06 Differentiate between a patient with adequate and inadequate breathing.
	20.07 Distinguish between methods of assessing breathing for all age groups.
	20.08 Describe and demonstrate the methods used to obtain a pulse in all age groups
	20.09 Compare the methods of providing airway care in all age groups.
	20.10 Discuss and demonstrate the need for assessing the patient for external bleeding.
	20.11 Describe and demonstrate normal and abnormal findings when assessing skin color, temperature, moisture and capillary refill for all age groups.
	20.12 Explain the reason for and demonstrate prioritizing a patient for care and transport.
	20.13 Describe when it is appropriate to expose the patient completely
	20.14 Differentiate between critical life-threatening, potentially life- threatening, and non-life-threatening patient presentations.
21.0	History-Taking: Demonstrate a fundamental depth, foundational breadth of the components of history taking. – The student will be able to:
	21.01 Determine the chief complaint.
	21.02 Investigate the chief complaint.
	21.03 Describe components of the patient history
	21.04 Explain the importance of obtaining a SAMPLE and OPQRST history.
	21.05 Recognize and respond to the feelings patients experience during assessment.
	21.06 Discuss the value of obtaining a family and social history.
	21.07 Describe examples of different techniques the EMT may use to obtain information from patients, family or bystanders during the history taking process.
22.0	Secondary Assessment: Demonstrate a fundamental depth, foundational breadth of techniques used for a secondary assessment. – The student will be able to:
	22.01 Describe the unique needs and demonstrate assessing an individual with a specific chief complaint with no known prior history.
	22.02 Discuss the components and techniques of the physical exam and skills involved.
	22.03 Differentiate between the history and physical exam that are performed for responsive patients with no known prior history, responsive patients with a known prior history and unresponsive patients.
	22.04 State the circumstances for performing a rapid assessment.

	22.05 Discuss the reason for performing a focused history and physical exam.
	22.06 Describe and demonstrate the techniques of inspection, palpation, percussion, and auscultation.
	22.07 Describe and demonstrate the importance of obtaining a baseline set of vital signs.
	22.08 List normal blood pressure ranges for all age groups.
	22.09 Describe and demonstrate the head to toe examination.
	22.10 Demonstrate special examination techniques of the cardiovascular examination.
	22.11 Demonstrate the examination of the nervous system
	22.12 Demonstrate a physical exam performed for a responsive patient with and without a known prior history.
	22.13 Demonstrate a physical exam performed for an unresponsive patient.
	22.14 Recognize and respond to the feelings patients experience during assessment.
23.0	Monitoring Devices: Demonstrate a simple depth, simple breath of monitoring devices within the scope of practice of the EMT. – The student will be able to:
	23.01 Explain and demonstrate the use and interpretation of pulse oximetry and capnography device readings.
	23.02 Demonstrate and understand the findings of a blood pressure measured by palpation, auscultation and electronic device.
	23.03 Describe and demonstrate the purpose, indications, procedure, normal findings, and limitations of the following patient monitoring technologies. 23.03.01 Pulse Oximetry 23.03.02 Glucometry 23.03.03 Capnography
	23.04 Demonstrate the application of a cardiac monitor.
24.0	Reassessment: Demonstrate a fundamental depth, foundational breadth of how and when to perform a reassessment for all patient situations. – The student will be able to:
	24.01 Describe the components of the reassessment and demonstrate the skills involved.
	24.02 Discuss the reasons for repeating the initial assessment as part of the reassessment.
	24.03 Explain trending assessment components and its value to other health professionals who assume care of the patient.
	24.04 Demonstrate the steps for performing the reassessment of patients in all age groups.
	24.05 Explain the rationale of recording additional sets of vital signs.

25.0			Demonstrate a simple depth, foundation breadth of pathophysiology, assessment and management of medical udent will be able to:
	25.01	Identify the a	ssessment factors for a patient with a medical complaint including:
		25.01.01	scene safety
		25.01.02	environmental factors
		25.01.03	chief complaint
		25.01.04	non-life threatening conditions
		25.01.05	distracting injuries
		25.01.06	tunnel vision
		25.01.07	patient cooperation
		25.01.08	rescuer attitude
	25.02	Discuss form	ing a field impression and utilizing available information to determine a differential diagnosis.
26.0			nstrate a fundamental depth, foundational breadth of the assessment and management of neurologic es for all age groups. – The student will be able to:
	26.01	Review the a	natomy and physiology of the nervous system.
		26.02.01 26.02.02 26.02.03 26.02.04 26.02.05 26.02.06	pathophysiology of the following neurologic disorders: Altered Mental Status Stroke Transient Ischemic Attack Headache Seizures Syncope
	26.03		identify the causes, signs and symptoms of ischemic strokes, hemorrhagic strokes and transient ischemic attacks and es and differences.
	26.04	Discuss and	demonstrate how to use a stroke scoring system in the assessment of patients with suspected stroke.
	26.05	Define and di	ifferentiate generalize seizure, partial seizure and status epilepticus and list their possible causes.
	26.06		ifferentiate migraine headache, sinus headache, tension headache and discuss how to distinguish a harmless om something more serious.
	26.07	Define "altere	ed mental status" and identify the possible causes
	26.08	Describe and groups to inc	demonstrate the assessment and management of the patient with various neurological emergencies in all age lude:

		26.08.01 strokes
		26.08.02 headaches
		26.08.03 seizures 26.08.04 altered mental status
		Discuss the transport of the stroke patient to the appropriate treatment center.
27.0		inal and Gastrointestinal Disorder: Demonstrate a fundamental depth, foundational breadth of the assessment and management minal and gastrointestinal disorders/emergencies for all age groups. – The student will be able to:
	27.01	Review the basic anatomy and physiology the gastrointestinal, genital and urinary systems.
		Describe the pathophysiology of the following abdominal and gastrointestinal disorders: 27.02.01 Abdominal Pain 27.02.02 Acute Abdomen 27.02.03 Peritonitis 27.02.04 Appendicitis 27.02.05 Pancreatitis 27.02.06 Cholecystitis 27.02.07 Gastrointestinal bleeding 27.02.08 Esophageal Varices 27.02.09 Gastroenteritis 27.02.10 Ulcers 27.02.11 Intestinal Obstruction 27.02.12 Hernia 27.02.13 Abdominal Aortic Aneurysm
	27.03	Define the term," acute abdomen."
	27.04	Identify the signs and symptoms, and common causes of an acute abdomen.
	27.05	Define upper and lower gastrointestinal bleeding.
		Describe and demonstrate the assessment and management of the patient in all age groups with various gastrointestinal emergencies to include upper and lower gastrointestinal bleeding.
	27.07	Recognize the signs and symptoms related to upper and lower gastrointestinal bleeding.
	27.08	Define acute gastroenteritis.
	27.09	Differentiate between hemorrhagic and non-hemorrhagic abdominal pain.
	27.10	Discuss the signs and symptoms of peritoneal inflammation relative to acute abdominal pain.
28.0		ology: Demonstrate a fundamental depth, foundational breadth of the assessment and management of immunology rs/emergencies for all age groups. – The student will be able to:
	28.01	Define and differentiate allergic reaction and anaphylaxis

28.02 Describe the pathophysiology of the following immunology disorders: 28.02.01 Allergic Reaction 28.02.02 Anaphylaxis 28.02.03 Anaphylaxic Shock 28.03 Describe and demonstrate the assessment and management of the patient in all age groups experiencing an allergic or anaphylactic reaction. 28.04 State the following for the epinephrine auto-injector: 28.04.01 generic and trade names medication forms 28.04.03 dose 28.04.03 dose 28.04.04 administration 28.04.05 action 28.04.05 ocntraindications 28.05 Demonstrate the use of epinephrine auto-injector 28.06 Review the anatomy and physiology of the organs and structures related to anaphylaxis 28.07 Describe the incidence, morbidity and mortality of anaphylaxis. 28.09 Recognize the signs and symptoms related to anaphylaxis. 28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 29.11 Infectivus Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. — The student will be able to: 29.01 List the causes of infectious diseases 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Lypical and demonstrate the assessment and management of the patient in all age groups experiencing an infectious disease.		00.00	
28.02 02 Anaphylaxis 28.02.03 Anaphylactic Shock 28.03 Describe and demonstrate the assessment and management of the patient in all age groups experiencing an allergic or anaphylactic reaction. 28.04 State the following for the epinephrine auto-injector: 28.04 0.01 generic and trade names 28.04.02 medication forms 28.04.04 administration 28.04.04 administration 28.04.05 contraindications 28.05 Demonstrate the use of epinephrine auto-injector 28.06 Review the anatomy and physiology of the organs and structures related to anaphylaxis 28.07 Describe the incidence, morbidity and mortality of anaphylaxis. 28.08 Identify the risk factors most predisposing to anaphylaxis. 28.09 Recognize the signs and symptoms related to anaphylaxis 28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 19.01 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious diseases for all age groups. — The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the Hepathits C 29.02.03 Tuberculosis 29.02.05 Severe Acute Respiratory Syndrome 29.02.05 Multidrug-Resistant Organisms		28.02	
28.02.03 Anaphylactic Shock 28.03 Describe and demonstrate the assessment and management of the patient in all age groups experiencing an allergic or anaphylactic reaction. 28.04 State the following for the epinephrine auto-injector: 28.04.02 generic and trade names 28.04.02 medication forms 28.04.04 administration 28.04.05 action 28.04.05 action 28.04.05 action 28.04.05 pemonstrate the use of epinephrine auto-injector 28.06 Review the anatomy and physiology of the organs and structures related to anaphylaxis 28.07 Describe the incidence, morbidity and mortality of anaphylaxis. 28.08 Identify the risk factors most predisposing to anaphylaxis. 28.09 Recognize the signs and symptoms related to anaphylaxis. 28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.01 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. — The student will be able to: 29.01 List the causes of infectious diseases 29.02.01 Hepatitis B 29.02.01 Hepatitis C 29.02.03 Tuberculosis 29.02.05 Severe Acute Respiratory Syndrome 29.02.05 West Nile Virus 29.02.07 Multidrug-Resistant Organisms			
28.03 Describe and demonstrate the assessment and management of the patient in all age groups experiencing an allergic or anaphylactic reaction. 28.04 State the following for the epinephrine auto-injector: 28.04.01 generic and trade names 28.04.03 dose 28.04.03 dose 28.04.04 administration 28.04.05 action 28.04.05 contraindications 28.05 Demonstrate the use of epinephrine auto-injector 28.07 Describe the incidence, morbidity and mortality of anaphylaxis. 28.08 Identify the risk factors most predisposing to anaphylaxis. 28.09 Recognize the signs and symptoms related to anaphylaxis. 28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious diseases for all age groups. — The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infec			
anaphylactic reaction. 28.04 State the following for the epinephrine auto-injector: 28.04.01 generic and trade names 28.04.02 medication forms 28.04.03 dose 28.04.04 administration 28.04.05 contraindications 28.05 Demonstrate the use of epinephrine auto-injector 28.06 Review the anatomy and physiology of the organs and structures related to anaphylaxis 28.07 Describe the incidence, morbidity and mortality of anaphylaxis. 28.09 Recognize the signs and symptoms related to anaphylaxis. 28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. — The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms		28 U3	1 /
28.04 State the following for the epinephrine auto-injector: 28.04.01 generic and trade names 28.04.02 medication forms 28.04.03 dose 28.04.05 action 28.04.05 contraindications 28.05 Demonstrate the use of epinephrine auto-injector 28.06 Review the anatomy and physiology of the organs and structures related to anaphylaxis 28.07 Describe the incidence, morbidity and mortality of anaphylaxis. 28.08 Identify the risk factors most predisposing to anaphylaxis. 28.09 Recognize the signs and symptoms related to anaphylaxis 28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious diseases for all age groups. – The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the ollowing infectious diseases: 29.02 Describe the pathophysiology of the ollowing infectious diseases: 29.02 Describe the pathophysiology of the ollowing infectious diseases: 29.02 Describe the pathophysiology of the ollowing infectious diseases: 29.02 Describe the pathophysiology of the ollowing in		20.03

28.06 Review the anatomy and physiology of the organs and structures related to anaphylaxis 28.07 Describe the incidence, morbidity and mortality of anaphylaxis. 28.08 Identify the risk factors most predisposing to anaphylaxis. 28.09 Recognize the signs and symptoms related to anaphylaxis 28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. — The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious diseases: 29.02 Describe the pathophysiology of the following infectious			
28.07 Describe the incidence, morbidity and mortality of anaphylaxis. 28.08 Identify the risk factors most predisposing to anaphylaxis. 28.09 Recognize the signs and symptoms related to anaphylaxis 28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. – The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms		28.05	Demonstrate the use of epinephrine auto-injector
28.08 Identify the risk factors most predisposing to anaphylaxis. 28.09 Recognize the signs and symptoms related to anaphylaxis 28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. — The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms		28.06	Review the anatomy and physiology of the organs and structures related to anaphylaxis
28.09 Recognize the signs and symptoms related to anaphylaxis 28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. – The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms		28.07	Describe the incidence, morbidity and mortality of anaphylaxis.
28.10 Describe the prevention of anaphylaxis and appropriate patient education. 28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. – The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms		28.08	Identify the risk factors most predisposing to anaphylaxis.
28.11 List common antigens most frequently associated with anaphylaxis. 28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. – The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms		28.09	Recognize the signs and symptoms related to anaphylaxis
28.12 Demonstrate how to remove a stinger from a bee sting and proper management following its removal. 29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. – The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms		28.10	Describe the prevention of anaphylaxis and appropriate patient education.
29.0 Infectious Disease: Demonstrate a simple depth, simple breadth of the assessment and management of a patient who may have an infectious disease for all age groups. – The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms		28.11	List common antigens most frequently associated with anaphylaxis.
infectious disease for all age groups. – The student will be able to: 29.01 List the causes of infectious diseases 29.02 Describe the pathophysiology of the following infectious diseases: 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms			
29.02 Describe the pathophysiology of the following infectious diseases: 29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms	29.0		
29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms		29.01	List the causes of infectious diseases
29.02.01 Hepatitis B 29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms		29.02	Describe the pathophysiology of the following infectious diseases:
29.02.02 Hepatitis C 29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms			
29.02.03 Tuberculosis 29.02.04 Human Immunodeficiency Virus (AIDS) 29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms			·
29.02.05 Severe Acute Respiratory Syndrome 29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms			
29.02.06 West Nile Virus 29.02.07 Multidrug-Resistant Organisms			29.02.04 Human Immunodeficiency Virus (AIDS)
29.02.07 Multidrug-Resistant Organisms			
29.03 Describe and demonstrate the assessment and management of the patient in all age groups experiencing an infectious disease.			29.02.07 Multidrug-Resistant Organisms
		29.03	Describe and demonstrate the assessment and management of the patient in all age groups experiencing an infectious disease.

	29.04	Discuss mandatory notification to State or Federal agencies of various diseases.
	29.05	Identify patients with risk factors for infectious disease.
	29.06	Explain the principles and practices of infection control in prehospital care.
	29.07	Describe and discuss the rationale for the various types of PPE.
	29.08	Discuss the proper disposal of contaminated supplies (sharps, gauze sponges, tourniquets, etc.).
	29.09	Discuss decontamination of the ambulance and disinfection of patient care equipment, and areas in which care of the patient occurred.
	29.10	Describe the actions to take if the EMS provider is exposed to an infectious disease.
	29.11	Demonstrate the ability to comply with body substance isolation guidelines.
30.0		crine Disorders: Demonstrate a fundamental depth, foundational breadth of the assessment and management of endocrine ers/emergencies for all age groups. –The student will be able to:
	30.01	Review the anatomy and physiology of the endocrine system and its main function in the body.
	30.02	Describe the pathophysiology of the following endocrine disorders: 30.02.01 Insulin Dependent Diabetes Mellitus 30.02.02 Non-Insulin Dependent Diabetes Mellitus 30.02.03 Hypoglycemia 30.02.04 Hyperglycemia 30.02.05 Diabetic Ketoacidosis(DKA) 30.02.06 Hyperglycemic Hyperosmolar Nonketotic Syndrome (HHNS)
	30.03	Define and differentiate diabetes (type I and II), Hypoglycemia, Hyperglycemia, insulin shock and diabetic ketoacidosis.
	30.04	Identify and demonstrate the steps in the management of the patient taking diabetic medicine with an altered mental status and a history of diabetes.
	30.05	State the following for oral glucose: 30.05.01 Generic and trade names 30.05.02 Medication forms 30.05.03 Dose 30.05.04 Administration 30.05.05 Action 30.05.06 Contraindications
	30.06	Demonstrate the steps of using a glucometer device and administering oral glucose.
	30.07	Describe and demonstrate the assessment and the management of the patient in all age groups experiencing an endocrinologic emergency to include hypo- and hyper-glycemia.
	30.08	Discuss the general assessment findings associated with endocrinologic emergencies.

	30.09	Differentiate between the pathophysiology of normal glucose metabolism and diabetic glucose metabolism.
	30.10	Recognize the signs and symptoms of the patient with hypoglycemia.
	30.11	Recognize the signs and symptoms of the patient with hyperglycemia.
	30.12	Discuss the pathophysiology of diabetic ketoacidosis.
	30.13	Recognize the signs and symptoms of the patient with diabetic ketoacidosis.
31.0	_	atric: Demonstrate a fundamental depth, foundational breadth regarding the assessment and management of psychiatric encies for all age groups. – The student will be able to:
	31.01	Define behavior, psychiatric disorders and behavioral emergencies.
		Describe the pathophysiology of the following psychiatric disorders: 31.02.01 Anxiety 31.02.02 Phobias 31.02.03 Depression 31.02.04 Paranoia 31.02.05 Psychosis 31.02.06 Schizophrenia 31.02.07 Suicidal Ideations 31.02.08 Agitated Delirium 31.02.09 Violence toward Others
	31.03	Discuss the general factors that may cause an alteration in a patient's behavior.
	31.04	Discuss the risk factors/signs or symptoms of various psychiatric emergencies to include suicide.
		Given an scenario, apply knowledge of the special medical/legal considerations for managing behavioral emergencies to include Florida statues: 31.05.01 Baker Act (FS 394.451) 31.05.02 Marchman Act (FS 397.601 and FS 397.675) 31.05.03 Emergency examination and treatment of incapacitated (FS401.445)
		Describe and demonstrate the assessment and management of the patient in all age groups experiencing a behavioral or psychiatric emergency.
	31.07	Describe the biological, psychosocial, and sociocultural influences on psychiatric disorders.
		Describe the special considerations for the safety of the EMS provider and EMS crew, the patient and bystanders when dealing with behavioral and psychiatric disorders.
	31.09	Describe methods of restraint that may be necessary in managing the emotionally disturbed patient and the possible legal implications.
	31.10	Explain the rationale for learning how to modify your behavior toward the patient with a behavioral emergency.

32.0	Cardiovascular: Demonstrate a fundamental depth, foundational breadth of the assessment and management of cardiovascular emergencies for all age groups. – The student will be able to:	
	32.01	Review the basic anatomy and physiology of the cardiovascular system.
		Describe the pathophysiology of the following cardiovascular disorders: 32.02.01 Acute Coronary Syndrome 32.02.02 Angina pectoris 32.02.03 Thromboembolism 32.02.04 Myocardial infarction 32.02.05 Hypertensive emergencies 32.02.06 Aortic aneurysm/dissection 32.02.07 Left and right sided Heart Failure 32.02.08 Cardiogenic Shock 32.02.09 Hypertensive Emergencies 32.02.10 Cardiac Arrest
	32.03	Describe and demonstrate the assessment and management of the patient in all age groups experiencing a cardiac emergency.
	32.04	List the indications and contraindications for automated external defibrillation (AED).
	32.05	Explain the impact of age and weight on defibrillation.
	32.06	Discuss the position of comfort for patients with various cardiac emergencies.
	32.07	Explain the rationale for early defibrillation.
	32.08	Discuss the various types of automated external defibrillators.
	32.09	Differentiate between the fully automated and the semi-automated defibrillator.
	32.10	Understand the importance of maintenance and operators check list for AED's.
	32.11	Demonstrate the ability to use an AED according to the latest American Heart Association (AHA) guidelines.
	32.12	Explain the role medical direction plays in the use of automated external defibrillation.
	32.13	Explain the rationale for administering nitroglycerin and ASA to a patient with chest pain or discomfort.
	32.14	Demonstrate the assessment and documentation of patient response to the automated external defibrillator.
	32.15	Demonstrate the assessment and documentation of patient response to nitroglycerin.
33.0		logy: Demonstrate a fundamental depth, foundational breadth of the assessment and management of toxicological (poisoning and se) emergencies for all age groups. – The student will be able to:
	33.01	Define and differentiate toxicology, poisoning and overdose.

	22.02	Dagarila a Alaa	math and provided my of the following Assignation I are appropried.
	33.02		pathophysiology of the following toxicological emergencies:
		33.02.01 33.02.02	Food Poisoning Carbon Monoxide Poisoning
		33.02.03	Cyanide Poisoning
		33.02.04	Exposure to Acid or Alkaline Substances
		33.02.05	Exposure to Hydrocarbons
		33.02.06	Methanol Ingestion
		33.02.07	Isopropanol Ingestion
		33.02.08	Ethylene Glycol Ingestion
		33.02.09	Exposure to Poisonous Plants
		33.02.10	Drug Withdrawal
		33.02.11	Alcoholic Syndrome
		33.02.12	Withdrawal syndrome (including delirium tremens)
		33.02.13	Illicit Drug Use
		33.02.14	Medication Overdose
	33.03	List various w	yays that poisons enter the body.
	33.04	List signs/syn	nptoms associated with poisoning.
	33.05	Discuss and	demonstrate the assessment and management for the patient in all age groups with poisoning or overdose.
	33.06	Discuss the re	ole of the Poison Control Center with the nationwide contact number 800-222-1222 in the United States.
	33.07	Explain the ra	ationale for contacting medical direction early in the prehospital management of the poisoning or overdose patient.
34.0	_	•	nstrate a fundamental depth, foundational breadth of the assessment and management of respiratory es for all age groups. – The student will be able to:
	34.01	Review the ba	asic anatomy and physiology of the respiratory system.
	34.02	Describe the	pathophysiology of the following respiratory disorders:
	34.02.01 Chronic Obstructive Pulmonary Disease: Emphysema, Chronic Bronchitis, and Asthma		
		34.02.02	Pulmonary Edema
		34.02.03	Spontaneous Pneumothorax
		34.02.04	Hyperventilation Syndrome
		34.02.05	Epiglottitis
		34.02.06	Pertussis Custin Fibracia
		34.02.07 34.02.08	Cystic Fibrosis Pulmonary Embolism
		34.02.06	Pneumonia
		34.02.09	Viral Respiratory Infections
		34.02.10	Poisonous Exposures
	24.02		·
	34.03	LIST SIGNS OF A	adequate air exchange.

	34.04	State the signs and symptoms of a patient with respiratory distress.	
	34.05	Describe and demonstrate the assessment and management of the patient in all age groups with a respiratory emergency.	
	34.06	State the following for the metered-dose inhaler: 34.06.01 generic name 34.06.02 medication forms 34.06.03 dose 34.06.04 administration 34.06.05 action 34.06.06 indications 34.06.07 contraindications	
	34.07	Describe and demonstrate the steps in facilitating the use of an inhaler.	
	34.08	Differentiate between upper airway obstruction and lower airway disease in the patient for all age groups.	
	34.09	Discuss the measures needed to ensure personal safety while attending to the patient with a respiratory emergency or infection.	
	34.10	Demonstrate proper use of airway and ventilation devices.	
	34.11	Explain the rationale and demonstrate the application of a CPAP/ BiPAP unit.	
35.0	Hematology: Demonstrate a simple depth, simple breadth of the assessment, and management of hematology disorders for all age groups. – The student will be able to:		
35.01 Review the anatomy and physiology of blood.		Review the anatomy and physiology of blood.	
	35.02	Describe the pathophysiology of the following hematology disorders: 35.02.01 Anemia 35.02.02 Sickle Cell Anemia / Sickle Cell Crisis 35.02.03 Hemophilia	
35.03 State the signs and symptoms of a patient with a Sickle Cell crisis or a clotting disord		State the signs and symptoms of a patient with a Sickle Cell crisis or a clotting disorder.	
	35.04	Describe and demonstrate the assessment and the management of the patient with Sickle cell crisis or a clotting disorder.	
		Describe the anatomy and physiology of the hematologic system to the pathophysiology and assessment of patients with hematologic disorders such as Sickle cell.	
36.0		Durinary /Renal: Demonstrate a simple depth, simple breath of the assessment and management of genitourinary/ renal emergency age groups. – The student will be able to:	
		Review the basic anatomy and physiology of the genitourinary and renal systems	
	36.02	Describe the pathophysiology of the following genitourinary/ renal disorders: 36.02.01 Urinary Tract Infection 36.02.02 Kidney Stones 36.02.03 Kidney Failure	

	36.03 Understand the basic principles of kidney dialysis.
	36.04 Discuss the signs and symptoms of a patient with a dialysis emergency.
	36.05 Describe and demonstrate the assessment and management of the patient with a dialysis emergency.
37.0	Gynecology: Demonstrate a fundamental depth, foundational breadth of the assessment and management of gynecologic emergencies for all age groups. – The student will be able to:
	37.01 Review the basic anatomy and physiology of the female reproductive system.
	37.02 Describe the pathophysiology of the following gynecologic disorders and emergencies: 37.02.01 sexual Assault 37.02.02 non-traumatic vaginal bleeding 37.02.03 menstrual pain 37.02.04 ovarian cyst 37.02.05 endometritis 37.02.06 endometriosis 37.02.07 pelvic inflammatory disease 37.02.08 sexually transmitted diseases 37.02.09 Describe and demonstrate the assessment and management of the patient in all age groups experiencing a gynecologic emergency to include: 37.02.10 excessive bleeding 37.02.11 abdominal pain 37.02.12 sexual assault.
	37.03 Discuss the special consideration and precautions an EMT must observe when arriving at the scene of a suspected case of sexual assault or rape.
	37.04 Describe the assessment and management of a patient who has experienced a sexual assault including the psychosocial impact and assessment findings/presentations.
	37.05 Value the importance of maintaining a patient's modesty and privacy while still being able to obtain necessary information.
	37.06 Defend the need to provide care for a patient of sexual assault, while still preventing destruction of crime scene information.
38.0	Non-Traumatic Musculoskeletal Disorders: Demonstrate a fundamental depth, foundational breadth of the assessment and management of non-traumatic fractures for all age groups. – The student will be able to:
	38.01 Review the basic anatomy and physiology of the musculoskeletal system.
	38.02 Describe and demonstrate the assessment and management of the patient in all age groups with a non-traumatic musculoskeletal emergency.
39.0	Diseases of the Eyes, Ears, Nose, and Throat: Demonstrate a simple depth, simple breadth in recognition and management of nose bleed for all age groups. – The student will be able to:
	39.01 Discuss the recognition and management of an epistaxis.

	39.02 Describe and demonstrate the assessment and management of the patient in all age groups with abnormal conditions affecting the eyes, ears, nose and throat.
40.0	Shock and Resuscitation: Demonstrate the application of fundamental knowledge of the causes, pathophysiology, and management of shock and respiratory failure. – The student will be able to:
	40.01 Discuss and identify causes and pathophysiology of the categories of hemorrhage and shock.
	40.02 Discuss and identify causes and pathophysiology of respiratory failure and arrest.
	40.03 Discuss and identify causes and pathophysiology of cardiac failure or arrest.
	40.04 Discuss the various types and degrees of shock.
	40.05 Discuss and identify post resuscitation and management.
	40.06 Explain the system components of CPR, the links in the AHA chain of survival and how each one relates to maximizing the survival of the patient.
	40.07 Show Provider (AHA guidelines) certification required prior to rescuer program completion.
	40.08 Discuss and distinguish the variations and causes between the management of the infant, child, adult and geriatric patient experiencing shock.
	40.09 Define and differentiate compensated and decompensated hemorrhagic shock.
	40.10 Defend the importance of teamwork, experience, and practice in preparation to manage the critical patient
	40.11 Demonstrate how to perform one and two rescuer CPR, adult, child, infant
	40.12 Demonstrate how to perform rescuer level appropriate defibrillation in an adult, child and infant patient
	40.13 Demonstrate the steps of rescuer level appropriate post resuscitative care
	40.14 Management and resuscitation of the critical patient
	40.15 Demonstrate rapid decision making based on differential field diagnosis of the critical patient with a peri-arrest condition
	40.16 Describe and demonstrate the assessment and management of the patient with hemorrhage and shock.
41.0	Trauma Overview: Demonstrate a fundamental depth, foundational breadth of pathophysiology, assessment and management of the trauma patient for all age groups. – The student will be able to:
	41.01 Discuss and define pathophysiology of the trauma patient
	41.02 List and describe the components of a comprehensive trauma systems and levels of trauma centers.
	41.03 Describe the criteria for different transportation modes to a trauma center.
	41.04 Explain the relationship between mechanism of injury and potential energy, kinetic energy and work in relation to trauma.

		41.04.01 Define energy, force, laws of motion
		41.04.02 Explain the physics of trauma
	41.05	Define the term blunt and penetrating trauma and provide examples of the mechanism of injury (MOI) that would cause each to
		occur and include:
		41.05.01 Effects of high, medium and low velocity penetrating trauma
		41.05.02 Primary, secondary, tertiary and miscellaneous blast injuries
		41.05.03 Factors to consider of a patient injured in a fall. 41.05.04 Consider all age groups
	41.06	Describe the kinematics of penetrating injuries.
	41.07	Discuss the role of documentation in trauma.
	41.08	Demonstrate the use of the Florida Trauma Alert Criteria, classify various types of trauma patients.
	41.09	Discuss and describe significant and non-significant Mechanism of Injury (MOI) and provide examples of each.
	41.10	Discuss and describe State of Florida's trauma scorecard methodologies as required in Florida Statute and Florida Administrative Code (F.A.C.)
	41.11	Discuss the National Trauma Triage Protocol of injured Patients (http://cdc.gov/fieldtriage/)
42.0	Bleed age gr	ing: Demonstrate a fundamental depth, foundational breadth of pathophysiology, assessment, and management of bleeding for all oups. – The student will be able to:
	42.01	Review the anatomy and physiology of the circulatory system
	42.02	Review the different types of bleeding and classes of hemorrhage.
	42.03	List signs and symptoms of shock (hypo-perfusion).
	42.04	Describe the body's physiologic response to bleeding.
	42.05	Review the pathophysiology of hemorrhagic shock.
	42.06	Explain the sense of urgency to transport patients that are bleeding and show signs of shock (hypoperfusion).
	42.07	Describe and demonstrate the assessment and management of a patient in all age groups with hemorrhagic shock.
	42.08	Demonstrate how to apply a commercial tourniquet.
		Formulate a field impression based upon the assessment findings for a patient with hemorrhagic shock.
43.0		Trauma: Demonstrate a fundamental depth, simple breadth of pathophysiology, assessment and management of chest trauma for groups. – The student will be able to:
	43.01	Review the anatomy and physiology of the thoracic/chest cavity and respiratory system.

	3.02 Differentiate between a pneumothorax (open, simple and tension) and hemothorax.	
	 3.03 Discuss the pathophysiology and MOI of myocardial injuries, including the following: 43.03.01 pericardial tamponade 43.03.02 myocardial contusion, 43.03.03 myocardial rupture 43.03.04 commotio cordis 	
	3.04 Identify the need for rapid intervention and transport of the patient with thoracic injuries.	
	3.05 Discuss the pathophysiology and MOI of specific chest wall injuries, including the following: 43.05.01 rib fracture 43.05.02 flail segment 43.05.03 sternal fracture	
	3.06 Describe and demonstrate the assessment and management of injuries to the chest wall, lung and myocardial tissue.	
	3.07 Identify the need for rapid intervention and transport of the patient with chest wall, lung and myocardial tissue injuries.	
	3.08 Formulate a field impression based upon the assessment findings for a patient with chest trauma.	
44.0	bdominal and Genitourinary Trauma: Demonstrate a fundamental depth, simple breadth of pathophysiology, assessment and nanagement of abdominal and genitourinary trauma for all age groups. – The student will be able to:	
	4.01 Review the anatomy and physiology and of the abdominal cavity and genitourinary (both male and female) system.	
	4.02 Describe the abdominal quadrants and the organs found within each quadrant.	
	4.03 Describe the differences between hollow and solid organs.	
	4.04 Discuss the pathophysiology and MOI for abdominal trauma including hallow and solid injuries.	
	 Describe and demonstrate the assessment and management of a patient with a suspected abdominal or genitourinary injury including: 44.05.01 Penetrating 44.05.02 Blunt 44.05.03 Open 44.05.04 Closed 	
	4.06 Formulate a field impression based upon the assessment findings for a patient with abdominal trauma.	
45.0	Orthopedic Trauma: Demonstrate a fundamental depth, foundational breadth of pathophysiology, assessment, and management of orthopedic trauma for all age groups. – The student will be able to:	
	5.01 Review the anatomy and physiology of the musculo-skeletal system.]
	5.02 and Discuss pathophysiology and MOI for orthopedic injury including: 45.02.01 Fractures 45.02.02 Sprains	

	45.02.03 Strains
	45.02.04 Pelvic Injury
	45.02.05 Amputation
45.03	Describe the different types of orthopedic injuries including:
	45.03.01 Fractures
	45.03.02 Sprains
	45.03.03 Strains
	45.03.04 Pelvic Injury
	45.03.05 Amputation
45.04	List the primary signs and symptoms of extremity trauma.
45.05	Explain the rationale for stabilization of an open and a closed painful, swollen, deformed extremity.
45.06	Describe and demonstrate the assessment and management of a patient with a suspected orthopedic injury including:
	45.06.01 fractures
	45.06.02 sprains
	45.06.03 strains
	45.06.04 pelvic Injury
	45.06.05 amputation
45.07	Explain the benefits and general guidelines for the following management techniques:
	45.07.01 heat Therapy
	45.07.02 cold Therapy
	45.07.03 splinting
45.08	List the six "Ps" of orthopedic injury assessment.
45.09	Discuss the need for assessment of pulses, motor, and sensation before and after splinting.
45.10	Describe age-associated changes in the bones.
45.11	Discuss the usefulness of the pneumatic anti-shock garment (PASG) in the management of fractures.
45.12	Discuss the out-of-hospital management of dislocation/fractures, including splinting and realignment and sprains and strains.
45.13	Discuss the pathophysiology of replantation.
45.14	Explain the rationale for splinting at the scene versus load and go.
45.15	Demonstrate the proper use of following techniques for a patient with a suspected fracture:, ,
	45.15.01 hard
	45.15.02 improvised
	45.15.03 soft
	45.15.04 traction splints
15 16	Formulate a field impression based upon the assessment findings for a patient with orthopedic trauma.
45.10	i ornidiate a neid impression pased upon the assessment inidings for a patient with orthopedic traditia.

46.0	Soft Tissue Trauma: Demonstrate a fundamental depth, foundational breadth of pathophysiology, assessment, and management of soft tissue trauma for all age groups. – The student will be able to:		
	46.01 Review anatomy and physiology of the integumentary system to include the layers of the skin.		
	46.02 Describe the pathophysiology and MOI of wounds, burns, crush injuries and high pressure injection injuries.		
	46.03 Describe and demonstrate the assessment and management of the following types of closed soft tissue injuries:		
			wounds
			burns
			high pressure injection
			crush syndrome injuries
			compartment syndrome injuries contusion
			hematoma
	46.04		demonstrate the assessment and management of the following types of open soft tissue injuries:
	40.04		abrasions
			lacerations
			major arterial lacerations
			avulsions,
		46.04.05	bites
			impaled objects
			amputations
		46.04.08	incisions
		46.04.09	crush injuries
			blast injuries
		46.04.11	Penetrations/punctures.
	46.05		of burn injuries, including:
			thermal burn
			inhalation burn
			chemical burn
			electrical burn
	40.00		radiation exposure
	46.06		lepth classifications of burn injuries, including:
			superficial burn
		46.06.02	partial-thickness burn
			full-thickness burn Other death place:ficetions
	46.07		Other depth classifications ods for determining body surface area percentage of a burn injury including the "rules of nines," the "rules of palms,"
	46.07	and other meth	
	46 0g		ne seriousness of a burn is related to its depth and extent (percent of body surface area (BSA) involved or rule of
	40.00		ents in all age groups.
		mica, ioi pauc	one in all age greaps.

	6.09 Differentiate and demonstrate the various management techniques for hemorrhage control of open soft tissue injuries, including			
	but not limited to:			
	46.09.01 direct pressure			
	46.09.02 pressure dressing			
	46.09.03 tourniquet application			
	46.09.04 Hemostatic agents			
	6.10 Differentiate between the types of injuries requiring the use of an occlusive versus non- occlusive dressing.			
	1 Discuss the possible complications of an improperly applied dressing, bandage, tourniquet and hemostatic agents.			
	Describe and demonstrate the assessment and management of specific burn injuries including: 46.12.01 thermal 46.12.02 inhalation 46.12.03 chemical 46.12.04 electrical 46.12.05 radiation			
	6.13 Formulate a field impression based upon the assessment findings for a patient with soft tissue trauma.			
47.0	ead, Facial, Neck, and Spine Trauma: Demonstrate a fundamental depth, foundational breadth of pathophysiology, assessment, and anagement of head, facial, neck, and spine trauma for all age groups. – The student will be able to:			
	7.01 Review the anatomy and physiology and of the head, face, and neck (non-spinal).			
	7.02 Describe the pathophysiology and MOI for head, face, and neck (non-spinal) hemorrhage.			
	7.03 Describe and demonstrate the assessment and management of a patient with the following injuries to the head, face and neck (non-spinal): 47.03.01 penetrating neck trauma 47.03.02 laryngotracheal injury 47.03.03 skull fracture 47.03.04 facial fracture 47.03.05 eye injury (foreign body) 47.03.06 dental trauma			
	7.04 Recognize and manage life threats due to head, neck and spine trauma.			
	7.05 Discuss and demonstrate the rationale and use of the Glasgow Coma Score.			
	7.06 Formulate a field impression based upon the assessment findings for a patient with head, facial, and/ or neck (non-spinal) trauma			
48.0	ervous System Trauma: Demonstrate a fundamental depth, foundational breadth of pathophysiology, assessment, and management c ervous system trauma for all age groups. – The student will be able to:			
	8.01 Review the anatomy and physiology and of the nervous system.			
	3.02 Discuss the pathophysiology and MOI for brain and spinal injury including:			

48.02.01 Increased intracranial pressure (ICP) 48.02.02 Concussion 48.02.03 Contusion 48.03 Describe and demonstrate the assessment and management of a patient with a brain and spin 48.03.01 Brain Trauma	nal injury including:
48.02.03 Contusion 48.03 Describe and demonstrate the assessment and management of a patient with a brain and spin	nal injury including:
48.03 Describe and demonstrate the assessment and management of a patient with a brain and spin	nal injury including:
	nal injury including:
48.03.01 Brain Trauma	
48.03.02 Spinal Cord Trauma	
48.03.03 Cervical Spine Trauma	
48.04 Explain the rationale for motion restriction of the entire spine when a cervical spine injury is sus	spected
40.04 Explain the rationale for motion restriction of the entire spine when a cervical spine injury is sus	specieu.
48.05 Explain the rationale for utilizing spinal motion restriction methods apart from the straps on the	
48.06 Explain the rationale for utilizing a short spine motion restriction device when moving a patient position.	from the sitting to the supine
48.07 Given a scenario, defend whether or not to remove a helmet prior to transport of a patient.	
48.08 Demonstrate specific management techniques for a patient with a suspected spinal cord injury	<i>'</i> .
48.09 Demonstrate various methods for stabilization and removal of a helmet.	
48.10 Demonstrate documentation of assessment before, during and after spinal motion restriction.	
48.11 Formulate a field impression based upon the assessment findings for a patient with brain and/o	or spinal trauma.
49.0 Special Considerations in Trauma: Demonstrate a fundamental depth, foundational breadth of patho management of trauma patients with special considerations for all age groups. – The student will be a	
49.01 Review the anatomy and physiology for the following trauma patients:	
49.01.01 pregnant	
49.01.02 pediatric	
49.01.03 geriatric	
49.01.04 cognitively impaired	
49.02 Discuss the pathophysiology and MOI of trauma in the following patients:	
49.02.02 pediatric	
49.02.03 geriatric	
49.02.04 cognitively impaired	
49.03 Discuss and demonstrate unique assessment and management considerations for the following	ing trauma patients:
49.03.01 pregnant	
49.03.02 pediatric	
49.03.03 geriatric	
49.03.04 cognitively impaired	
49.04 Formulate a field impression based upon the assessment findings for a patient requiring specia	al considerations.

50.0	Environmental Emergencies: Demonstrate a fundamental depth, foundational breadth of pathophysiology, assessment and management of environmental emergencies for all age groups. – The student will be able to:
	50.01 Define drowning and discuss its incidence, rick factors and prevention.
	50.02 Discuss the pathophysiology and MOI of the following: 50.02.01 Drowning and water related incidents 50.02.02 temperature-related illness 50.02.03 bites and envenomation 50.02.04 dysbarism such as high-altitude edema 50.02.05 diving injuries 50.02.06 lightning (electrical) injury 50.02.07 high altitude illness 50.03 Describes and demonstrate the assessment and management for a patient with the following:
	50.03.01 Drowning and water related incidents 50.03.02 temperature-related illness 50.03.03 bites and envenomation 50.03.04 dysbarism such as high-altitude edema 50.03.05 diving injuries 50.03.06 lightning (electrical) injury 50.03.07 high altitude illness
	50.04 Discuss the physics of the gas laws including: Boyle's, Dalton, Henry and Charles.
	50.05 Discuss scene management and provider safety considerations for a submersion, diving, or lightning incident.
	50.06 Explain the five ways a body can lose heat
	50.07 Identify the species of insects, spiders and snakes in the US that may cause life threatening injuries.
	50.08 Formulate a field impression based upon the assessment findings for a patient with an environmental emergency.
51.0	Multi-Systems Trauma: Demonstrate a fundamental depth, foundational breadth of the pathophysiology, assessment, and management of multi-system trauma and blast injuries. – The student will be able to:
	51.01 Discuss the pathophysiology and MOI of multi-system trauma and blast injuries.
	51.02 Discuss the golden principle of out-of-hospital trauma care
	51.03 Describe and demonstrate assessment and management considerations for a patient of multi system trauma and blast injuries.
	51.04 Formulate a field impression based upon the assessment findings for a patient with multi systems trauma and/ or blast injuries.
52.0	Obstetrics: Demonstrate a fundamental depth, foundational breadth of management of the obstetric patient within the scope of practice of the EMT. – The student will be able to:
	52.01 Identify and describe the anatomical structures and functions of the female reproductive system and how these structures and functions change during pregnancy

	52.02 Define the stages of labor and discuss how to assess them	
	52.03 Differentiate between normal delivery, abnormal delivery and complications associated with delivery.	
	52.04 Differentiate the management of a patient with predelivery emergencies from a normal delivery.	
	52.05 State the patient care measures for all stages of labor in a normal (cephalic) delivery for the mother and the newborn	
	52.06 Describe how to care for the newborn post-delivery.	
	52.07 Describe the management of the mother post-delivery.	
	52.08 State the patient care measures for all stages of labor in abnormal (non-cephalic) deliveries for the mother and the newborn	
	52.09 Describe the procedures for handling complications of pregnancy	
	52.10 Describe special considerations when meconium is present in amniotic fluid or during delivery.	
	52.11 Describe special patient care considerations of a premature baby.	
52.12 Demonstrate how to listen to fetal heart tones.		
52.13 Demonstrate the patient care measures for all stages of labor in a normal (cephalic) delivery for the mother and		
	52.14 Demonstrate the patient care measures for all stages of labor in abnormal (non-cephalic) deliveries for the mother and the newborn	
52.15 Demonstrate the procedures for handling complications of pregnancy including pre-eclampsia and eclampsia		
53.0	Neonatal Care: Demonstrate a fundamental depth, foundational breadth of management of the newborn and neonatal patient v scope of practice of the EMT. – The student will be able to:	
	53.01 Discuss and demonstrate assessment and management considerations of a neonate.	
	53.02 Define the term neonate.	
53.03 Identify the factors that lead to premature birth and low birth weight newborns.		
	53.04 Calculate the Apgar score given various newborn situations.	
	53.05 Discuss the common signs when ventilator assistance is appropriate for a neonate.	
	53.06 Identify and discuss the use of oxygen/airway adjuncts in the neonate	
	53.07 Discuss the steps in resuscitation of a neonate	
	53.08 Discuss the signs of hypovolemia in a newborn.	

	53.09 Discuss the effects maternal narcotic usage has on the newborn
	53.10 Discuss the management/treatment plan for vomiting in the neonate.
	53.11 Discuss the assessment findings associated with common birth injuries in the neonate.
	53.12 Demonstrate assessment of APGAR scoring during a scenario
	53.13 Demonstrate appropriate assessment technique for examining a neonate.
	53.14 Demonstrate appropriate assisted ventilations for a neonate.
	53.15 Demonstrate appropriate chest compression and ventilation technique for a neonate.
	53.16 Demonstrate the initial steps in resuscitation of a neonate.
	53.17 Demonstrate blow-by oxygen delivery for a neonate.
54.0	Pediatrics: Demonstrate a fundamental depth, fundamental breath of management of the pediatric patient within the scope of practice of the EMT. – The student will be able to:
	54.01 Review the anatomy, physiology and pathophysiology and differences of patients in the pediatric age ranges.
	54.02 Discuss the differences in approaching and assessing patients in the pediatric age ranges.
	54.03 Discuss and demonstrate assessment and management considerations for Sudden Unexplained Infant Death Syndrome (SUIDS).
	54.04 Describe the selection of appropriate airway adjuncts and ventilation devices for infants and children.
	54.05 Discuss complications of improper utilization of airway adjuncts and ventilation devices with infants and children.
	54.06 Describe the common causes, assessment and management of respiratory distress, failure, or arrest in infants and children.
	54.07 Discuss the common causes, assessment and management of hypo-perfusion in infants and children.
	54.08 Discuss the common causes, assessment and management of cardiopulmonary arrest in infants and children.
	54.09 Describe the common causes, assessment and management of altered level of consciousness in infants and children.
	54.10 Describe the common causes, assessment and management of trauma in infants and children.
	54.11 Discuss the pathophysiology of hypo-perfusion in infants and children.
	54.12 Describe the common causes, assessment and management of hypo-perfusion in infants and children.
	54.13 Describe the common causes, assessment and management of neurological emergencies in infants and children.

	54.14	Demonstrat	e proper technique for administering blow-by oxygen to infants and children.
	54.15	Demonstrat	e proper technique for suctioning of infants and children.
	54.16	Demonstrat	e appropriate use of airway adjuncts and ventilation devices with infants and children.
	54.17	Demonstrat	e age appropriate basic airway clearing maneuvers for infants and children with a completely obstructed airway.
	54.18	Demonstrat	e appropriate airway and breathing control maneuvers for infant and child trauma patients.
55.0			nstrate a fundamental depth, foundational breadth of management of the geriatric patient within the scope of practice of dent will be able to:
	55.01	Define and	discuss the term "geriatrics."
	55.02	Review the	anatomy, physiology and pathophysiology of the Geriatric patient.
	55.03	Discuss con	nmon emotional and psychological reactions to aging to include causes and manifestations.
	55.04	Discuss the	problems with mobility in the elderly and develop strategies to prevent falls.
	55.05	Discuss factories overcome the	tors that may complicate the assessment of the elderly patient including communication issues and methods to nem.
	55.06	Describe pri	inciples that should be employed when assessing and communicating with the elderly.
	55.07	Describe the	e common causes, assessment and management of the elderly patient with the following complaints:
		55.07.01	Pulmonary, including pneumonia, chronic obstructive pulmonary diseases, and pulmonary embolism.
		55.07.02	Cardiovascular, including myocardial infarction, heart failure, dysrhythmias, aneurism, and hypertension.
		55.07.03	Nervous system, including cerebral vascular disease, delirium, dementia, Alzheimer's disease and Parkinson's disease.
		55.07.04	Endocrine system, including diabetes and thyroid diseases.
		55.07.05	Gastrointestinal problems.
		55.07.06	Toxicological problems including alcohol/drug abuse, and polypharmacy errors.
		55.07.07	Environmental considerations.
		55.07.08	Traumatic injuries, including orthopedic injuries, burns and head injuries.
56.0		its with Spec udent will be	cial Challenges: Demonstrate a simple depth, simple breadth of management of the patient with special challenges. – able to:
	56.01	Define child	abuse / neglect

56.02	Define children with special health care needs.
56.03	Discuss the pathophysiology of abuse and neglect in infants and children.
56.04	Discuss the assessment and management/treatment plan for abuse and neglect in infants and children, including documentation and reporting.
56.05	Discuss the pathophysiology of children with special health care needs including technology
56.06	Discuss the assessment management/treatment plan for children with special health care needs including technology assisted children.
56.07	Discuss the incidence and categories of abuse and assault.
56.08	Describe the characteristics associated with the profile of the typical abuser of a spouse, elder and child.
56.09	Identify the profile of the "at-risk" spouse, elder and child.
56.10	Discuss special considerations for the assessment and management of the abused patient.
56.11	Discuss the legal aspects of documentation and mandatory reporting associated with abused and assaulted patient.
56.12	Discuss considerations for approach, assessment and treatment of patients with the following impairments/disabilities: (LIST) Hearing, Vision, and Speech.
56.13	Describe paraplegia/quadriplegia.
56.14	Recognize the patient with a developmental disability.
56.15	Recognize the patient with Down's syndrome.
56.16	Describe the following diseases/illnesses: 56.16.01 Cerebral palsy 56.16.02 Cystic fibrosis 56.16.03 Spina bifida 56.16.04 Patients with a previous head injury
56.17	Identify a patient that is terminally ill.
56.18	Differentiate between the role of EMS provider and the role of the home care provider.
56.19	Discuss the aspects of home care that impact quality of the care for a given patient.
56.20	List complications commonly seen in the home care patients, which result in their hospitalization.
56.21	Define hospice care and comfort care.
56.22	List the stages of the grief process and relate them to an individual in hospice care.

	56.23 Describe airway maintenance devices typically found in the home care environment.
	56.24 Describe indwelling catheters, implanted central IV ports and central line monitoring.
	56.25 Identify failure of GI/GU devices found in the home care setting.
	56.26 Identify failure of ventilating devices found in the home care setting.
	56.27 Identify failure of vascular access devices found in the home care setting.
	56.28 Demonstrate the ability to assess a spouse, elder or child abused patient.
	56.29 Demonstrate the ability to assess a sexually assaulted patient.
	56.30 Demonstrate the assessment of a patient with a sensory deficit or developmental disability.
	56.31 Develop a treatment and management plan of the elderly psychiatric patient, including depression and suicide.
57.0	Principles of Safely Operating a Ground Ambulance: Demonstrate a simple depth, foundational breadth of risks and responsibilities of transport. – The student will be able to:
	57.01 Discuss the importance of performing regular vehicle and equipment inspection.
	57.02 Demonstrate how to perform a daily inspection of an ambulance.
	57.03 Describe the general provisions of Florida laws relating to the operation of the ambulance and privileges.,
	57.04 Identify current local and state standards which influence ambulance design.
	57.05 Demonstrate how to place a patient in, and remove a patient from an ambulance.
	57.06 Discuss the guidelines for operating an ambulance safety during emergency and non-emergency situation/incident.
	57.07 Discuss considerations that are required for ensuring scene safety, including personal safety, patient safety, and traffic control.
	57.08 Demonstrate how to clean and disinfect the ambulance and equipment.
58.0	Incident Management: Demonstrate a fundamental depth, fundamental breadth of establishing and working within the incident management system. – The student will be able to:
	58.01 Explain the need for the incident management system (IMS)/incident command system (ICS) in managing emergency medical services incidents.
	58.02 Define the term disaster management.
	58.03 Discuss the importance of NIMS (National Incidence Management System).
	58.04 Describe the functional components of the incident management system in terms of the following: 58.04.01 Command

		58.04.02 Finance 58.04.03 Logistics 58.04.04 Operations 58.04.05 Planning
	58.05	Differentiate between singular and unified command and when each is most applicable.
	58.06	Describe the role of command
	58.07	Describe the need for transfer of command and procedures for transferring it.
	58.08	List and describe the functions of the following groups and leaders in ICS as it pertains to EMS incidents: 58.08.01 safety 58.08.02 logistics 58.08.03 rehabilitation 58.08.04 staging, 58.08.05 treatment 58.08.06 triage 58.08.07 transportation 58.08.08 extrication/rescue 58.08.09 morgue 58.08.10 communications
	58.09	Describe techniques used to allocate patients to hospitals and track them.
	58.10	List the physical and psychological signs of critical incident stress.
	58.11	Explain the organizational benefits for having standard operating procedures (SOPs) for using the incident management system or incident command system.
59.0		le Casualty Incidents: Demonstrate a simple depth, foundational breadth of responding to an emergency during a multiple casualty it. – The student will be able to:
	59.01	Describe essential elements of scene size-up when arriving at a potential MCI.
	59.02	Describe the role of the rescuers and EMS systems in planning for MCIs and disasters.
	59.03	Describe the role of the physician at multiple casualty incidents.
	59.04	Define triage and describe the principles of triage.
	59.05	Describe the START (simple triage and rapid treatment) method of initial triage.
	59.06	Describe techniques used to allocate patients to hospitals and track them.
	59.07	List and describe the essential equipment to provide logistical support to MCI operations, including but not limited to:, 59.07.01 Airway 59.07.02 respiratory and hemorrhage control

_		
		59.07.03 Burn management 59.07.04 Patient packaging/immobilization
	59.08	List the physical and psychological signs of critical incident stress.
	59.09	Describe the role of critical incident stress management sessions in MCIs.
	59.10	Explain the organizational benefits for having standard operating procedures (SOPs) for using the incident management system or incident command system.
	59.11	Demonstrate the use of local/regional triage tagging system used for primary and secondary triage.
	59.12	Given a classroom simulation of a MCI with 5-10 patients, fulfill the role of triage group leader.
60.0	0.0 Air Medical: Demonstrate a simple depth, simple breadth of safe air medical operations and criteria for utilizing air medical respon The student will be able to:	
	60.01	Discuss safe air medical operations.
	60.02	Describe key scene safety considerations when preparing for a helicopter medivac, including establishing a landing zone and approaching the aircraft.
	60.03	Describe the capabilities, protocols, and methods for accessing air medical transport.
	60.04	Describe the advantages and disadvantages of air medical transport.
	60.05	Identify the conditions/situations in which air medical transport should be considered.
	60.06	Assess personal practices relative to air medical operations which may affect the safety of the crew, the patient and bystanders.
	60.07	Perform setting up an air medical helicopter landing zone.
61.0		le Extrication: Demonstrate a simple depth, simple breadth for safe vehicle extrication and use of simple hand tools. – The student able to:
	61.01	Describe the role of the EMT in patient rescue and vehicle extrication
	61.02	Describe personal and patient safety during vehicle extrication.
	61.03	Explain the difference between simple access and complex access in vehicle extrication
	61.04	Discuss patient care consideration related to assisting with rapid extrication, providing emergency care to the trapped patient and removing and transferring a patient.
	61.05	Discuss the use of simple hand tools used for vehicle extrication
	61.06	Describe the effects of traffic flow on the highway rescue incident including limited access superhighways and regular access highways.
	61.07	

	61.07.03 61.07.04 61.07.05	catalytic converters and conventional fuel systems stored energy alternate fuel systems
61.0	8 Describe me	thods for emergency stabilization using rope, cribbing, jacks, spare tire, and come-a-longs for vehicles.
61.0	9 Describe the	electrical hazards commonly found at highway incidents (above and below ground).
61.1	0 Explain the o	difference between tempered and safety glass, identify its locations on a vehicle and how to break it safely.
61.1	1 Explain typic	al door anatomy and methods to access through stuck doors.
61.1	2 Explain SRS	or "air bag" systems and methods to neutralize them.
61.1	3 Demonstrate	e the use of wood cribbing to stabilize a vehicle.
61.1	4 Demonstrate	e how to gain access to a patient by using a spring- loaded center punch.
a ha 62.0	zardous materia 1 Identify resor 62.01.01 62.01.02 62.01.03 62.01.04 62.01.05 62.01.06 62.01.07 62.01.08 62.01.09	Als Awareness: Demonstrate a simple depth, simple breadth of risks and responsibilities of operating in a cold zone at all or other special incident. – The student will be able to: urces for substance identification, decontamination and treatment information, including but not limited to the following: poison control center medical control material safety data sheets (MSDS), reference textbooks computer databases Computer-Aided Management of Emergency Operations (CAMEO) CHEMTREC technical specialists Agency for toxic substances and disease registry ary and secondary contamination risk.
62.0	3 List and desc	cribe the following routes of exposure:
	62.03.01	topical
	62.03.02	respiratory
	62.03.03	gastrointestinal
	62.03.04	parenteral
62.0	4 Explain how	the substance and route of contamination alters triage and decontamination methods.
62.0	5 List and expl 62.05.01	ain the common signs, symptoms and treatment for the following substances: corrosives (acids/alkalis)

		62.05.02 pesticides (carbamates / organophosphates),
		62.05.03 chemical asphyxiants (cyanide/carbon monoxide) 62.05.04 hydrocarbon solvents (xylene, methylene chloride)
	62.06	Identify local facilities and resources capable of treating patients
	62.07	Determine the appropriate level of PPE by considering the following: 62.07.01 Types
		62.07.02 Application
		62.07.03 Use and Limitations
		62.07.04 Use of chemical compatibility chart
	62.08	Explain specific decontamination procedures.
	62.09	Demonstrate the donning and doffing of appropriate PPE.
	62.10	Set up and demonstrate an emergency two-step decontamination process.
	62.11	Identify DOT Labels, placards and markings that are used to designate HAZMAT materials
	62.12	Demonstrate the ability to use a variety of reference materials to identify a HAZMAT material
63.0		Casualty Incidents Due to Terrorism and Disaster: Demonstrate a simple depth, simple breadth of risks and responsibilities of ing on the scene of a natural or man-made disaster. – The student will be able to:
	63.01	Describe the role of the EMT on the scene of a natural or man-made disaster
	63.02	Define the different types of terrorism and provide examples of incidents of each.
	63.03	Describe personal and patient safety during a natural or man-made disaster.
	63.04	Describe the factors related to ensuring situational safety at the site of a disaster and the procedures required.
	63.05	Discuss the National Terrorism Advisory System
	63.06	Discuss factors to consider when responding to a terrorist situation
	63.07	Discuss important actions to take at the scene of a terrorist event such as:
		63.07.01 scene safety
		63.07.02 personal protection
		63.07.03 notification procedures 63.07.04 available resources
		63.07.05 working with in the command system
	63.08	List the main categories of weapons of mass destruction
	63.09	Discuss the different types of chemical agents and their signs and symptoms
L		

63.10	Discuss the treatment and management of patients exposed to various types of chemical agents and radiation.
63.11	Define the different types of radiations and their effect on the human body.
63.12	Demonstrate the use of a nerve agent antidote kit.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

MyCareerShines is an interactive resource to assist students in identifying their ideal career and to enhance preparation for employment. Teachers are encouraged to integrate this resource into the program curriculum to meet the employability goals for each student. Access MyCareerShines by visiting: www.mycareershines.org.

Career and Technical Student Organization (CTSO)

HOSA: Future Health Professionals is the intercurricular career and technical student organization providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Program Length

In accordance with Rule 6A-10.024, F.A.C. an ATD program consists of a course of study that is part of an AS or AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An ATD program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an ATD program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion

from the program, must receive remedial instruction. The minimum standards must be at least the equivalent of a score of ten (10) on all sections of basic skills test approved in Rule 6A-10.040, F.A.C. Students must successfully complete all remedial instruction before completing the ATD.

Community Colleges may offer either college or career credit toward the ATD. A Career Center in a public school district may offer an ATD program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 12 credits. When offered at a technical center the standard length of this program is 300 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.
