FROM THE NURSE'S DESK

Did you know the best thing you can do to keep from getting sick is to wash your hands? Washing your hands frequently can help you prevent picking up germs from other sources and then infecting yourself. So remember: wet your hands, get soap, scrub for 20-30 seconds, rinse, & then dry.

COUNSELOR CONNECTION

Parents play an important role in helping children develop positive homework habits. You can support your child by providing a quiet, comfortable place to work & establishing a consistent homework routine. Encourage your child to try assignments independently before offering help, & guide them with questions rather than simply giving the answers. Praise their effort, persistence, & improvement, even when the work is challenging. If your child becomes frustrated, a short break can help them return to the task with a fresh start. Most importantly, keep homework positive and communicate with your child's teacher if assignments are consistently too difficult, confusing, or taking an unusually long time to complete.
