

Annual Evaluation of the Content and Effectiveness of the LEA Parent and Family Engagement Policy

(Required for LEAs with Title I Schools)

School System: _____

Date Completed: _____

What the law requires:

The LEA must (1) conduct **with parents** an annual evaluation of the content and effectiveness of the parent and family engagement policy in improving the academic quality of Title I schools, including identifying barriers to greater participation by parents in authorized activities; and (2) use the findings to design more effective strategies and revise the policy.

Evaluating your plan should be done with LEA and school staff as well as parents. All Title I parents should be aware that the policy is being evaluated and understand the procedure that is in place allowing them the opportunity for input. Input may be from serving as a member of the committee conducting the evaluation; completing a parent and family engagement survey; participating in parent focus groups; etc. The input, including the results of the parent involvement survey, should be used to assist in addressing the following evaluation components. **The completed evaluation should be posted to the LEA's e-GAP Document Library each year when the Consolidated Application is submitted to the SDE.**

What were our student achievement goals this year?

How did we work as partners with parents in meeting those goals?

How can we improve with actively involving parents in the activities of our schools?

Do we have any barriers to parent and family engagement that need to be addressed?

How are we ensuring the distribution of our LEA and school parent and family engagement policy to all Title I parents?

How can we improve on training that is offered to parents: To help them work with their child at home?

How can we improve on training that we offer school staff/teachers to help them to work more effectively with parents?

Based on these evaluation findings, what changes do we want to make to our parent and family engagement policy for next year?
