i-Ready Classroom Tennessee Mathematics

Key Details

As you use your review account, please keep the following details in mind:

- Data resets nightly. You can save changes in your review account, but these changes will only be preserved for the remainder of the day. Your review account resets every night to its original state.
- Data is sample data. The data in your account is intended to help you explore *i-Ready Classroom Mathematics, Tennessee Edition* and *i-Ready* reports and understand its functionality. The data represents a broad set of grade levels, classes, and instructional paths, as well as a broad range of levels of student proficiency. However, because the data was generated for demonstration purposes, and is not the data of real students, you may occasionally see scenarios that seem unlikely or incomplete.
- Saving changes affect all users in your account. You may see the data in reports or on your dashboard change in real-time if other users who are logged into the same account save a change in *i-Ready Classroom Mathematics, Tennessee Edition,* such as adjusting settings, rosters, instructional paths, or testing windows.
- Review data shifts on a weekly basis. Our demonstration data is designed to change periodically to mirror the experience you would have during a school year. Therefore, you may see data change in the Diagnostic Status or Prerequisites Reports during the fall, winter, and spring when students would be completing the *Diagnostic Assessment* throughout the school year, when students would be progressing through their online lessons.

For a comprehensive overview of the **Teacher Digital Experience**, see the Teacher Digital Experience Walkthrough Guide in your samples, or for <u>Grades K-5 click here</u> and for <u>Grades 6-8 click here</u>. This document provides a step-by-step walkthrough of the Teacher Digital Experience that will help you navigate and locate various resources.

For a comprehensive overview of the **Student Digital Experience**, see the Student Digital Experience Walkthrough Guides in your samples, or <u>Grades K-5 click here</u> and for <u>Grades 6-8 click here</u>. This document provides information regarding the resources available within the Student Digital Experience.
