

## MIDDLE & HIGH Science

	Science 6 (4th ed.)	Life Science (5th ed.)	Earth Science (5th ed.)
			
	<p>Increase your appreciation of God's wonderful creation through a study of various concepts about earth science, life science, physical science, and the human body in <i>Science 6</i>. Learn about new and current technology being developed that utilizes and benefits from science. Explore earthquakes and volcanoes, weathering and erosion, natural resources, and astronomy while learning about the Earth and space.</p>	<p><i>Life Science</i> surveys the structures and functions of living things such as plants, animals, and human beings. All these concepts are unfolded as a quest to understand the life that God has created. Case studies, webquests, lab activities, ethics boxes, and questions help students think like scientists and see life science from a biblical perspective.</p>	<p><i>Earth Science</i> is an expansive study that moves from the Earth's lithosphere to the rest of the universe. Students will study major theories in earth science, guided by biblical and scientific principles. Ultimately, this course leads to a better understanding of our Creator and a greater appreciation of His creation. The process of teaching encourages students to think like scientists who are eager to learn and discover. By equipping students to be conscious of earth science issues, they will be able to discover new ways to exercise dominion through science.</p>
<b>Biblical Worldview Shaping</b>	<ul style="list-style-type: none"> <li>• <b>Creator</b>—Explaining how order in Creation reflects the Creator</li> <li>• <b>Dominion</b>—Explaining ways that people have harnessed discoveries to improve life</li> <li>• <b>People</b>—Defending the value of human life</li> <li>• <b>Worldview</b>—Evaluating approaches to the study of science</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Design</b>—Synthesizing observations and biblical teachings about design</li> <li>• <b>Ethics</b>—Formulating positions on bioethics from Scripture</li> <li>• <b>Gender</b>—Describing a biblical view of human sexuality</li> <li>• <b>History</b>—Evaluating claims about the origin of life</li> <li>• <b>Modeling</b>—Explaining how modeling affects scientific theories</li> <li>• <b>Worldview</b>—Relating the significance of the Creation Mandate to life science</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Life</b>—Explaining why Earth is well-suited for life</li> <li>• <b>Glory</b>—Explaining how earth science declares God's glory</li> <li>• <b>Origins</b>—Evaluating old-earth positions</li> <li>• <b>Creation Mandate</b>—Explaining why Christians should be concerned about the environment</li> <li>• <b>Modeling</b>—Evaluating the usefulness of models in earth science</li> </ul>

## MIDDLE & HIGH Science

	Physical Science (6th ed.)	Biology (6th ed.)	Chemistry (5th ed.)
	 <p>This research-based science course introduces students to chemistry and physics, equipping them to be student scientists. A clean, uncluttered layout helps students focus on key details and information. Going beyond science facts, students will learn to think critically about real-world science problems. Case studies, worldview sleuthing activities, ethics boxes, and mini-labs all give students opportunities for hands-on experiences with real-world problems. Additionally, they will be given strategies for making ethical decisions based on a biblical worldview.</p>	 <p>Help your students explore the wonders of the living world. The biology course endeavors to equip students to ethically engage in biological inquiry and to recognize life's design, homeostasis, and conservation from a biblical worldview. Students will be able to discuss the process of homeostasis to biological structures at multiple levels, analyze living organisms, evaluate current and historical biological models, and apply a biblical framework to ethical issues in the realm of biology. Going beyond science facts, students will learn to think critically about real-world science problems. Case studies, worldview investigations (formerly worldview sleuthing) activities, ethics boxes, and mini-labs all give students opportunities for hands-on experiences with real-world problems.</p>	 <p>Show your students the wonder of how matter and energy interact in the food we eat, the cars we drive, and the medicine we take. This chemistry course explores macroscopic and microscopic changes of matter in chemical reactions, organic chemistry, biochemistry, and nuclear changes. Students will learn how chemistry impacts the world around us and how to be good stewards of the physical world with what we know about chemistry. Going beyond science facts, students will learn to think critically about real-world science problems. Case studies, worldview investigations (formerly worldview sleuthing) activities, ethics boxes, and mini-labs all give students opportunities for hands-on experiences with real-world problems.</p>
<b>Biblical Worldview Shaping</b>	<ul style="list-style-type: none"> <li>• <b>Dominion</b>—Evaluating the effectiveness of solutions to problems in physics and chemistry</li> <li>• <b>Ethics</b>—Formulating a biblical pattern for answering ethical questions raised in science</li> <li>• <b>Modeling</b>—Evaluating how well models of matter represent physical matter</li> <li>• <b>Pursuit of Science</b>—Defending a Christian pursuit of science as the normative approach to science</li> <li>• <b>Order</b>—Evaluating modern theories regarding order in nature</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Design</b>—Evaluating prevailing cultural views that contradict God's design</li> <li>• <b>Ethics</b>—Applying the biblical ethics triad to questions of bioethics</li> <li>• <b>Foundations</b>—Defending the influence of worldview on biological studies</li> <li>• <b>Modeling</b>—Evaluating models used in the study of biology</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Community</b>—Explaining how chemistry is valuable for a community</li> <li>• <b>Environment</b>—Proposing solutions to problems that impact the environment</li> <li>• <b>Ethics</b>—Proposing ethical solutions to problems raised by advancements in chemical technology</li> <li>• <b>Foundations</b>—Formulating a biblical approach to the study of chemistry</li> <li>• <b>Models</b>—Formulating a biblical view of modeling's influence upon scientific knowledge</li> </ul>

Physics (4th ed.)	Health (2nd ed.)	
 <p><i>Physics</i> equips students to ethically engage in the work of physics through a program of instruction, practice, inquiry, and engineering design based on real-world problems. Students will extend their knowledge and skills through strategic modeling and practice, case studies, evaluation of scientific models, and ethics activities. Going beyond science facts, students will learn to think critically about real-world science problems. Case studies, worldview investigations (formerly worldview sleuthing) activities, ethics boxes, and mini-labs all give students opportunities for hands-on experiences with real-world problems. Students will also be able to collect and analyze data as well as create their own models using discovery labs, inquiry labs, and collaborative STEM experiences.</p>	 <p>Personal health and community health are important topics that are debated on many different levels today and have a great impact on our lives. Current news headlines include health topics such as viruses and vaccines, health care fraud, abortion laws, and staying safe in natural disasters. Some health questions involve choosing between what is wise and what is foolish, while others involve choosing between what is righteous and what is sinful. Students need to be given the tools to make wise and righteous decisions. Our health course guides students to a biblical thinking process as they evaluate the many health issues prevalent today. Health knowledge and skills will be used throughout the students' lives. This book provides the knowledge, skills, and appropriate worldview to help students make healthy choices.</p>

## Scope & Sequence

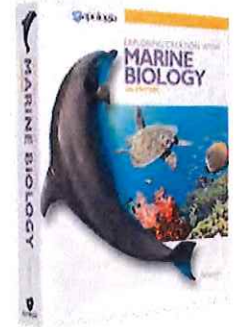

### *Exploring Creation with Marine Biology, 2nd Edition*

**GRADE LEVEL:** 10th–12th with prerequisite of Biology

**TEXT SUMMARY:** Water covers 72% of our planet and makes up close to 99% of the living space on Earth. However, we know more about the surface of Mars than we know about the ocean floor. Dive into *Exploring Creation with Marine Biology*, 2nd Edition and discover the living waters that God has placed all around us. Journey to the farthest depths of the ocean to explore life that exists in the most unlikely places. Learn how the ocean ecology is essential to our existence. Creation exists on every part of our planet. There is not one space that our Creator has not touched. Even the ocean floor is intelligently designed in order to support life.

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 1</b> <i>The Oceans of Our Planet</i>	<p>Module 1 provides an introduction to the earth's structure and to ocean geography. Module 1 also introduces the properties of water and the forces that act on the oceans.</p>	<ul style="list-style-type: none"> <li>• The Geography of the Oceans</li> <li>• The Earth's Structure</li> <li>• Continental Drift and Plate Tectonics</li> <li>• Plate Interactions</li> <li>• Features of the Ocean Bottom</li> <li>• Properties of Water</li> <li>• Seawater</li> <li>• Salinity, Temperature, and Density</li> <li>• Light in the Sea</li> <li>• Pressure</li> <li>• The Motion of the Ocean</li> <li>• Waves</li> <li>• Tides</li> <li>• Vertical Motion</li> </ul>	<ul style="list-style-type: none"> <li>• Mountain Formation from Plate Movement</li> <li>• Removing the Salt from Salt Water</li> <li>• The Effects of Salinity and Temperature on the Density of Water</li> <li>• The Coriolis Effect</li> <li>• The Motion of Waves</li> </ul>
<b>MODULE 2</b> <i>Life in the Sea</i>	<p>Module 2 introduces the student to life under the water. It provides an in-depth look at the essential elements necessary for life and the reproductive processes that enable life to continue.</p>	<ul style="list-style-type: none"> <li>• The Process of Life</li> <li>• Photosynthesis</li> <li>• Respiration</li> <li>• Cells</li> <li>• Levels of Organization</li> <li>• The Challenge of Life in the Sea</li> <li>• Diffusion and Osmosis</li> <li>• Temperature</li> <li>• Reproduction in the Sea</li> <li>• Asexual and Sexual Reproduction</li> <li>• Reproductive Strategies</li> <li>• Classifying Life in the Sea</li> </ul>	<ul style="list-style-type: none"> <li>• Photosynthesis</li> <li>• Respiration</li> <li>• Osmosis</li> </ul>

## Scope & Sequence

### *Exploring Creation with Marine Biology, 2nd Edition*

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 3</b> <i>The First Four Kingdoms</i>	Module 3 provides a detailed look at the Kingdoms Monera, Protista, Fungi, and Plantae.	<ul style="list-style-type: none"> <li>• Kingdom Monera</li> <li>• Kingdom Protista: The Unicellular Algae</li> <li>• Diatoms</li> <li>• Dinoflagellates</li> <li>• Kingdom Protista: The Marine Protozoans</li> <li>• Foraminiferans</li> <li>• Radiolarians</li> <li>• Ciliates</li> <li>• Kingdom Protista: The Multicellular Algae</li> <li>• Green, Brown and Red Algae</li> <li>• Reproduction of Multicellular Algae</li> <li>• Kingdom Fungi</li> <li>• Kingdom Plantae</li> <li>• The Seagrasses</li> <li>• Salt Water Marsh Plants</li> <li>• The Mangroves</li> </ul>	<ul style="list-style-type: none"> <li>• Unicellular Algae</li> <li>• Marine Protozoans</li> </ul>
<b>MODULE 4</b> <i>Marine Invertebrates I</i>	Module 4 discusses invertebrates and vertebrates and provides and in-depth look at many marine invertebrates.	<ul style="list-style-type: none"> <li>• Phylum Porifera</li> <li>• Phylum Cnidaria</li> <li>• Classes Hydrozoa, Scyphozoa, Anthozoa</li> <li>• Phylum Ctenophora</li> <li>• The Bilateral Worms</li> <li>• Phylums Platyhelminthes, Nemertea, Nematoda, Annelida</li> <li>• Class Polychaeta</li> <li>• Lophophorates</li> </ul>	<ul style="list-style-type: none"> <li>• Observation of a Sponge</li> <li>• One-Opening Gut vs. a True Digestive System</li> </ul>

Continued on next page.

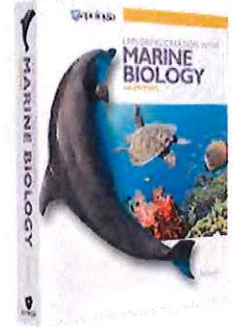

## Scope & Sequence

### *Exploring Creation with Marine Biology, 2nd Edition*

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 5</b> <i>Marine Invertebrates II</i>	Module 5 continues the study of marine invertebrates.	<ul style="list-style-type: none"> <li>• Phylum Mollusca</li> <li>• Classes Gastropoda, Bivalvia, Cephalopoda, Other Classes</li> <li>• Mollusk Biology</li> <li>• Phylum Arthropoda</li> <li>• Class Crustacea</li> <li>• Crustacean Biology</li> <li>• Other Arthropod Classes</li> <li>• Phylum Echinodermata</li> <li>• Classes Asteroidea, Ophiuroidea, Echinoidea, Holothuroidea, Crinoidea</li> <li>• Echinoderm Biology</li> <li>• Phylum Chordata</li> <li>• Subphylums Urochordata and Cephalochordata</li> </ul>	<ul style="list-style-type: none"> <li>• The Clam</li> <li>• Crustacean Larvae</li> <li>• The Sea Star</li> </ul>
<b>MODULE 6</b> <i>Marine Vertebrates I</i>	Module 6 provides a study of several marine vertebrates and an in-depth look at their biology and behaviors.	<ul style="list-style-type: none"> <li>• Classes Agnatha, Chondrichthyes</li> <li>• Rays and Skates</li> <li>• The Bony Fishes</li> <li>• The Biology of Fishes</li> <li>• Coloration</li> <li>• Locomotion</li> <li>• Feeding and Digestion</li> <li>• The Circulatory System</li> <li>• The Gills and Respiratory System</li> <li>• Osmoregulation and Osmosis</li> <li>• The Nervous System</li> <li>• Social Behavior</li> <li>• Migration</li> <li>• Reproduction</li> </ul>	<ul style="list-style-type: none"> <li>• Types of Fish Scales</li> <li>• The Shark</li> </ul>

Continued on next page.

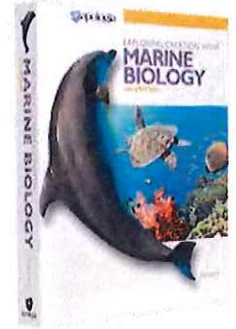

## Scope & Sequence

### *Exploring Creation with Marine Biology, 2nd Edition*

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 7</b> <i>Marine Vertebrates II</i>	Module 7 continues the study of marine vertebrates including reptiles, birds, and mammals.	<ul style="list-style-type: none"> <li>• Classes Reptilia, Aves</li> <li>• Gulls and Similar Birds</li> <li>• Penguins</li> <li>• Shearwaters and Similar Birds</li> <li>• Pelicans and Similar Birds</li> <li>• Birds at the Shore</li> <li>• Class Mammalia</li> <li>• Orders Cetacea, Sirenia, Pinnipedia, Carnivora</li> <li>• Echolocation</li> <li>• Movement in the Water</li> <li>• Behavior</li> <li>• Mating and Reproduction</li> </ul>	<ul style="list-style-type: none"> <li>• Dolphin Echolocation</li> <li>• What Causes the Bends?</li> </ul>
<b>MODULE 8</b> <i>Marine Ecology</i>	Module 8 delves into the marine ecosystem and different types of relationships that exist in marine life.	<ul style="list-style-type: none"> <li>• The Ecosystem</li> <li>• Population Growth</li> <li>• Predator and Prey Relationships</li> <li>• Symbiosis</li> <li>• Trophic Relationships</li> <li>• Primary Productivity</li> <li>• The Nitrogen and Carbon Cycles</li> <li>• Environmental Zones</li> </ul>	<ul style="list-style-type: none"> <li>• Exploring Carbon Fixation</li> </ul>
<b>MODULE 9</b> <i>The Intertidal Zone</i>	Module 9 introduces intertidal communities and breaks down these communities into different intertidal zones.	<ul style="list-style-type: none"> <li>• Intertidal Communities</li> <li>• The Rocky Intertidal</li> <li>• Rocky Intertidal Abiotic Conditions</li> <li>• Intertidal Feeding and Reproduction</li> <li>• Wave Action</li> <li>• Surviving the Waves</li> <li>• Zonation of the Rocky Intertidal</li> <li>• The Intertidal Zones: Upper, Middle, Lower</li> <li>• The Sandy and Muddy Intertidal</li> <li>• Survival in the Mud</li> </ul>	<ul style="list-style-type: none"> <li>• Exploring Intertidal Sediments</li> <li>• The Movement of Water Through Sediment</li> </ul>

Continued on next page.

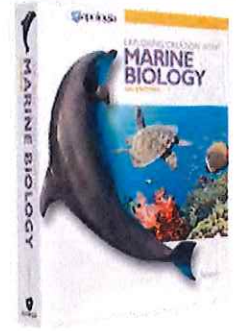

## Scope & Sequence

### *Exploring Creation with Marine Biology, 2nd Edition*

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 10</b> <i>Estuary Communities</i>	Module 10 provides an introduction to estuaries and an in-depth look at different aspects of estuaries.	<ul style="list-style-type: none"> <li>• The Ice Age</li> <li>• Types of Estuaries</li> <li>• Abiotic Factors in Estuaries</li> <li>• Estuarine Communities</li> <li>• Estuarine Habitats</li> <li>• Wetland</li> <li>• Mudflats</li> <li>• Channels</li> <li>• Estuary Production</li> </ul>	<ul style="list-style-type: none"> <li>• Distribution of Mangroves in an Estuary</li> </ul>
<b>MODULE 11</b> <i>Coral Reefs</i>	Module 11 provides an introduction to coral reefs and the intricate details of their formations, growth, and relationships.	<ul style="list-style-type: none"> <li>• Coral Reef Requirements and Locations</li> <li>• Reef Composition</li> <li>• Coral Reef Formation and Growth</li> <li>• Types of Reefs</li> <li>• Coral Reef Ecology</li> <li>• Reef Relationships</li> <li>• Symbiotic Relationships</li> </ul>	<ul style="list-style-type: none"> <li>• Examining Coral</li> </ul>
<b>MODULE 12</b> <i>Continental Shelf Communities</i>	Module 12 provides an overview of the continental shelf and the different communities that exist there.	<ul style="list-style-type: none"> <li>• Physical Features of the Continental Shelf</li> <li>• Soft-Bottom Shelf Communities</li> <li>• Unvegetated Soft Bottom Environments</li> <li>• Vegetated Soft-Bottom Environments</li> <li>• Hard-Bottom Shelf Communities</li> <li>• Kelp Beds and Forests</li> <li>• Sea Urchins</li> </ul>	<ul style="list-style-type: none"> <li>• Meiofaunal Organisms</li> </ul>

Continued on next page.

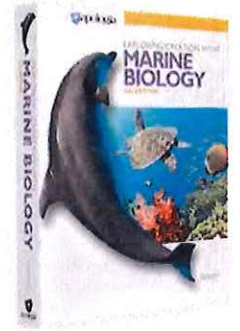

## Scope & Sequence

### *Exploring Creation with Marine Biology, 2nd Edition*

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 13</b> <i>The Epipelagic Zone</i>	Module 13 provides an introduction to the epipelagic zone and an in-depth look at life there.	<ul style="list-style-type: none"> <li>• The Epipelagic Zone</li> <li>• Life in the Epipelagic</li> <li>• Epipelagic Phytoplankton, Zooplankton, Nekton</li> <li>• Staying Afloat in the Epipelagic</li> <li>• Living in the Epipelagic Zone</li> <li>• Vertical Migration</li> <li>• The Epipelagic Food Web</li> <li>• Primary Productivity</li> <li>• Nutrients and Productivity</li> <li>• El Niño—Southern Oscillation</li> </ul>	<ul style="list-style-type: none"> <li>• Observing Live Microplankton</li> <li>• Water Drag</li> </ul>
<b>MODULE 14</b> <i>The Deep Ocean</i>	Module 14 provides a study of the two zones under the epipelagic zone: the mesopelagic zone and the deep sea.	<ul style="list-style-type: none"> <li>• The Mesopelagic</li> <li>• Food Webs</li> <li>• Body Design</li> <li>• The Deep Sea</li> <li>• The Deep Sea Floor</li> <li>• Hydrothermal Vents and Other Vent Communities</li> <li>• Deep Sea Photosynthesis</li> </ul>	<ul style="list-style-type: none"> <li>• Chemical "Bioluminescence"</li> <li>• The Bioluminescence of Plankton</li> </ul>
<b>MODULE 15</b> <i>Ocean Resources</i>	Module 15 provides a study of living and nonliving ocean resources.	<ul style="list-style-type: none"> <li>• Food From the Sea</li> <li>• Food Species and Their Locations</li> <li>• Managing Populations</li> <li>• Mariculture</li> <li>• Other Living Resources</li> <li>• Nonliving Ocean Resources</li> </ul>	<ul style="list-style-type: none"> <li>• Mapping Ocean Resources</li> </ul>

Continued on next page.

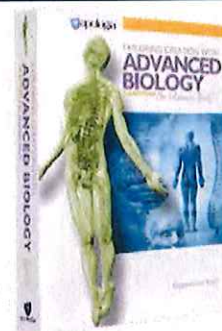

## Scope & Sequence

### *Exploring Creation with Marine Biology, 2nd Edition*

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 16</b> <i>Effects of Humans on the Sea</i>	Module 16 provides a closer look at how the human lifestyle effects all water sources.	<ul style="list-style-type: none"> <li>• Ocean Habitat Damage</li> <li>• Effects on Coral Reefs</li> <li>• Pollution</li> <li>• Sewage, Fertilizers, Oil, Synthetic Pollutants, DDT</li> <li>• Other Toxic Chemicals</li> <li>• Metals and Other Toxic Materials</li> <li>• Trash and Other Debris</li> <li>• Our Responsibility</li> </ul>	<ul style="list-style-type: none"> <li>• Biomagnification</li> </ul>

## Scope & Sequence

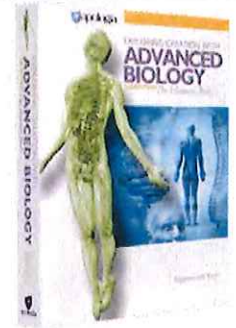

### *Exploring Creation with Advanced Biology The Human Body*

**GRADE LEVEL:** 11th or 12th with prerequisite of Biology and Chemistry

**TEXT SUMMARY:** In this course you will explore the fascinating creation we call the human body. As you make your way through the modules, you will begin to understand how every part of the body has a purpose, each part being necessary for the other parts to function. This study will introduce the organizational levels of the human body from the cell to the 11 major systems. You will learn the anatomy and physiology of the human body and the efficiency with which each system works. The seamless integration of one system with the others and the intricacy at the molecular level represents a feat of engineering and design that could only come from God. We are truly fearfully and wonderfully made!

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 1</b> <i>Introduction to Anatomy and Physiology</i>	Module 1 provides an introduction to the organizational levels of the human body from the major organ systems to cellular functions.	<ul style="list-style-type: none"> <li>• Anatomy Terms</li> <li>• Organization of the Human Body</li> <li>• Homeostasis</li> <li>• Cell Structure and Function</li> <li>• Protein Synthesis</li> <li>• Cellular Mitosis</li> <li>• Plasma Membrane</li> <li>• Membrane Transport Processes</li> </ul>	This module contains no experiments.
<b>MODULE 2</b> <i>Histology: The Study of Tissues</i>	Module 2 provides an in-depth look at different tissues in the body including their structures and functions.	<ul style="list-style-type: none"> <li>• Epithelial Tissues</li> <li>• Glandular Epithelium</li> <li>• Connective Tissues</li> <li>• Cartilage</li> <li>• Bone and Blood Tissues</li> <li>• Membranes</li> <li>• Tissue Repair</li> </ul>	<ul style="list-style-type: none"> <li>• Microscope: Epithelial Tissues</li> <li>• Microscope: Microscopic Anatomy of the Salivary Glands</li> </ul>
<b>MODULE 3</b> <i>The Integumentary and Skeletal Systems</i>	A study of the integumentary system more commonly known as the skin. A study of the gross anatomy of the skeletal system.	<ul style="list-style-type: none"> <li>• Basic Structure of Skin</li> <li>• Epidermis</li> <li>• Hair and Nails</li> <li>• Skin Glands</li> <li>• Skeletal System</li> <li>• Gross Anatomy of Bone</li> <li>• Details of the Appendicular Skeleton</li> <li>• Details of the Axial Skeleton</li> </ul>	<ul style="list-style-type: none"> <li>• Microscope: A Closer Look at the Skin</li> <li>• Microscope: A Closer Look at Follicles</li> </ul>

Continued on next page.

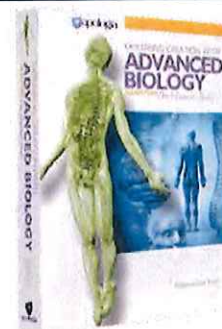

## Scope & Sequence

### *Exploring Creation with Advanced Biology The Human Body*

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 4</b> <i>Skeletal System Histology and Movement</i>	Module 4 provides a detailed look at the skeletal system: bone make-up and joint movement.	<ul style="list-style-type: none"> <li>• Bone Histology Overview</li> <li>• Cancellous and Compact Bone Histology</li> <li>• Bone Growth and Remodeling</li> <li>• Bone Homeostasis</li> <li>• Nutrition for Bone Health</li> <li>• Three Major Types of Joints</li> <li>• Motion and Terms of Movement</li> </ul>	<ul style="list-style-type: none"> <li>• Calcium Salts in Bone</li> <li>• Microscope: Cancellous and Compact Bone Histology</li> </ul>
<b>MODULE 5</b> <i>The Muscular System Histology and Physiology</i>	Module 5 provides an introduction to muscle structures, functions, and how muscles perform those functions.	<ul style="list-style-type: none"> <li>• Skeletal Muscle Structure</li> <li>• How a Muscle Fiber Contracts</li> <li>• Neuromuscular Junction</li> <li>• How a Muscle Fiber Relaxes</li> <li>• Motor Units</li> <li>• Muscle Tone</li> <li>• Energy in Skeletal Muscle Fibers</li> <li>• Warm-Up and Cool-Down</li> </ul>	<ul style="list-style-type: none"> <li>• Microscope: Skeletal Muscle Histology</li> </ul>
<b>MODULE 6</b> <i>The Skeletal Muscle System</i>	Module 6 provides an overview of how the individual muscles of the body come together to enable us to move and keep our shape.	<ul style="list-style-type: none"> <li>• General Terms and Principles</li> <li>• Overview of the Skeletal Muscle System</li> <li>• Major Muscles Groups Including the Head and Face; Anterior Chest and Abdominal Wall; Shoulder, Back and Arm; Forearm; Hand; Thigh; Leg; and Foot</li> </ul>	This module contains no experiments.

Continued on next page.

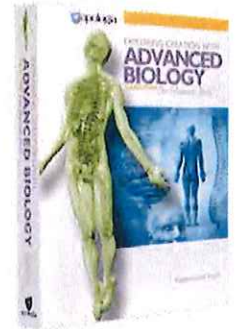

## Scope & Sequence

### Exploring Creation with Advanced Biology The Human Body

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 7</b> <i>The Nervous System</i>	Module 7 provides an overview of the central nervous system and the peripheral nervous system. Module 7 also provides an in-depth study of the nervous system at the cellular and molecular levels.	<ul style="list-style-type: none"> <li>• Overview of the Entire Nervous System</li> <li>• The Nervous System at the Cellular Level</li> <li>• Neuroglia</li> <li>• Nerve Structure</li> <li>• Action Potentials</li> <li>• Synaptic Transmission</li> <li>• Neuron Arrangements</li> </ul>	<ul style="list-style-type: none"> <li>• Microscope: Neurons and Neuroglia</li> </ul>
<b>MODULE 8</b> <i>The Central Nervous System</i>	Module 8 provides an introduction to the complexity of the human brain and spinal cord.	<ul style="list-style-type: none"> <li>• Brain Anatomy</li> <li>• Cerebrum in Detail</li> <li>• Important Brain Structures</li> <li>• Protection of the Brain</li> <li>• The Spinal Cord</li> <li>• The Reflex Arc</li> <li>• Ascending and Descending Pathways in the Spinal Cord</li> </ul>	This module contains no experiments.
<b>MODULE 9</b> <i>The Peripheral Nervous System</i>	Module 9 provides a detailed look at the peripheral nervous system and the general senses.	<ul style="list-style-type: none"> <li>• Divisions of the Autonomic Nervous System (ANS)</li> <li>• Control of the ANS</li> <li>• Afferent Division of the Peripheral Nervous System</li> <li>• General Senses</li> <li>• Sense of Taste</li> <li>• Sense of Balance</li> <li>• Sense of Hearing</li> <li>• Sense of Vision: Eye Anatomy and Physiology</li> </ul>	<ul style="list-style-type: none"> <li>• Two-Point discrimination</li> <li>• Cow Eye Dissection</li> </ul>

Continued on next page.

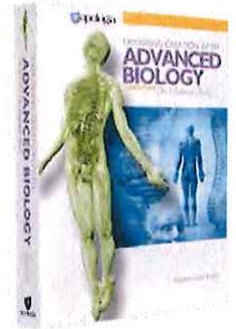

## Scope & Sequence

### *Exploring Creation with Advanced Biology The Human Body*

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 10</b> <i>The Endocrine System</i>	Module 10 provides an introduction to the endocrine system's make-up, chemical production, and function in the human body.	<ul style="list-style-type: none"> <li>• Endocrine System as a Whole</li> <li>• Endocrine Glands and Hormones</li> <li>• Hormone Chemistry</li> <li>• Hormone Secretion Control</li> <li>• Hormone Receptors in the Body</li> <li>• Prostaglandins</li> </ul>	This module contains no experiments.
<b>MODULE 11</b> <i>The Cardiovascular System</i>	Module 11 provides an introduction to the blood, heart, and blood vessels that make up the cardiovascular system.	<ul style="list-style-type: none"> <li>• Composition of Blood</li> <li>• Formed Elements in Blood</li> <li>• Blood as a Connective Tissue</li> <li>• Blood Types</li> <li>• Blood Circulation</li> <li>• Heart Anatomy</li> <li>• Cardiac Muscle and the Cardiac Cycle</li> <li>• Blood Vessels and the Entire Circulatory System</li> </ul>	<ul style="list-style-type: none"> <li>• Microscope: Examining a Blood Smear</li> <li>• Cow's Heart Dissection</li> </ul>
<b>MODULE 12</b> <i>The Lymphatic System</i>	Module 12 provides an introduction to the vast network of lymph vessels and lymph tissues in the human body and their functions.	<ul style="list-style-type: none"> <li>• Lymph and Lymph Vessels</li> <li>• Functions of the Lymphatic System</li> <li>• Lymph Nodes</li> <li>• Spleen and Thymus Gland</li> <li>• Immunity</li> <li>• Innate Immunity</li> <li>• Innate Defense</li> <li>• Acquired Immunity: Humoral and Cell-Mediated</li> <li>• Types of Acquired Immunity and Autoimmunity</li> </ul>	<ul style="list-style-type: none"> <li>• Microscope: Histology of a Tonsil</li> </ul>

Continued on next page.

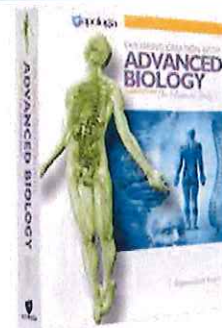

## Scope & Sequence

### Exploring Creation with Advanced Biology The Human Body

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 13</b> <i>The Digestive System</i>	<p>Module 13 provides an introduction to the digestive system as a whole and a detailed look at the anatomy and function of each of its parts. Module 13 also provides an in-depth look at nutrition and what the body needs to stay healthy.</p>	<ul style="list-style-type: none"> <li>• Overview of the Digestive System</li> <li>• Mouth, Pharynx, and Esophagus</li> <li>• Stomach</li> <li>• Small Intestine</li> <li>• Large Intestine</li> <li>• Accessory Organs: Liver, Pancreas, Gallbladder</li> <li>• Nutrition</li> <li>• Micronutrients</li> </ul>	<ul style="list-style-type: none"> <li>• Microscope: Histology of the Stomach</li> <li>• Microscope: Histology of the Liver</li> </ul>
<b>MODULE 14</b> <i>The Respiratory System</i>	<p>Module 14 provides an introduction to the anatomy of the respiratory system and the functions it performs at macro and micro levels.</p>	<ul style="list-style-type: none"> <li>• Anatomy and Functions of Respiratory System</li> <li>• Voice</li> <li>• Muscles and Mechanics of Ventilation</li> <li>• Factors that Aid Ventilation</li> <li>• External Respiration</li> <li>• Gas Exchange During External and Internal Respiration</li> <li>• Respiratory Control</li> <li>• Cellular Respiration: Glycolysis, Oxidation of Pyruvate, Citric Acid (Krebs) Cycle, Electron Transport Chain</li> <li>• Review of Cellular Respiration</li> </ul>	<ul style="list-style-type: none"> <li>• Microscope: Histology of the Lung</li> </ul>

Continued on next page.

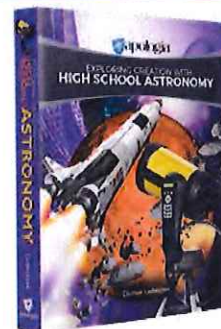

## Scope & Sequence

### Exploring Creation with Advanced Biology The Human Body

Module & Major Themes	Summary	Main Themes	Supporting Experiments
<b>MODULE 15</b> <i>The Urinary System</i>	<p>Module 15 provides an introduction to the anatomy of the urinary system and the processes that it performs to provide balance to the body while removing harmful toxins.</p>	<ul style="list-style-type: none"> <li>• Anatomy of Urinary System</li> <li>• Urine Formation: Overall Scheme, Glomerular Filtration, Secretion, Reabsorption of Water</li> <li>• Storage and Release of Urine</li> <li>• Blood Pressure Control by the Kidneys</li> <li>• Acid-Base Balance in the Body</li> </ul>	<ul style="list-style-type: none"> <li>• The Bicarbonate Buffer</li> </ul>
<b>MODULE 16</b> <i>The Reproductive System</i>	<p>Module 16 provides an introduction to the anatomy of both the male and female reproductive systems and the part they play in the miraculous conception of human life.</p>	<ul style="list-style-type: none"> <li>• Anatomy of the Male Reproductive System</li> <li>• Meiosis</li> <li>• Spermatogenesis</li> <li>• Hormonal Control of Male Reproduction</li> <li>• Anatomy of the Female Reproductive System</li> <li>• Oogenesis</li> <li>• The Menstrual Cycle</li> <li>• Fertilization, Development, and Parturition</li> </ul>	<ul style="list-style-type: none"> <li>• Microscope: Spermatogenesis and Sperm</li> <li>• The Fetal Pig Dissection</li> </ul>

## Scope & Sequence

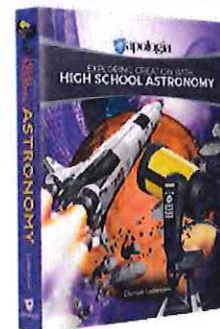

### *Exploring Creation with High School Astronomy*

**GRADE LEVEL:** 9th–12th There are no prerequisites for this course. All of the math is worked out in the text so that the student can follow along.

**TEXT SUMMARY:** This text covers in-depth concepts of astronomy and uses math to support the content. Students will be awestruck at the vastness of God's creation and gain a greater appreciation for this complex and magnificent universe.

Module & Major Themes	Summary	Main Themes	Mathematical Concepts
<b>MODULE 1</b> <i>Mysteries of the Universe</i>	Module 1 introduces the concept of the universe by defining space and explaining electromagnetic energy and high energy particles.	<ul style="list-style-type: none"> <li>• Interstellar Space</li> <li>• The Universe</li> <li>• Matter and Antimatter</li> <li>• Cosmic Rays</li> <li>• Dark Matter and Dark Energy</li> <li>• Black Holes and Worm Holes</li> <li>• Temperature of the Universe</li> </ul>	<ul style="list-style-type: none"> <li>• Mathematical concepts are not introduced in this module.</li> </ul>
<b>MODULE 2</b> <i>The History of Astronomy</i>	Module 2 discusses the beginnings of astronomy, cultural influences, and the significance of progress.	<ul style="list-style-type: none"> <li>• Ancient Stargazers</li> <li>• Renaissance Era of Stargazers</li> <li>• Telescope</li> <li>• Modern Astronomers</li> <li>• Spectroscopy</li> </ul>	<ul style="list-style-type: none"> <li>• Einstein's Theory of Special Relativity</li> </ul>
<b>MODULE 3</b> <i>Understanding the Basics</i>	Module 3 provides the mathematical framework for astronomy in order to understand terminology and define measurement.	<ul style="list-style-type: none"> <li>• Measurement and Units</li> <li>• Astronomical Unit, Light Year, Parsec</li> <li>• Time</li> <li>• Speed and Velocity</li> <li>• Mass and Weight</li> <li>• Doppler Effect</li> <li>• Rotations and Revolutions</li> <li>• Potential and Kinetic</li> </ul>	<ul style="list-style-type: none"> <li>• Newton's Universal Law of Gravitation</li> </ul>

## Scope & Sequence

### *Exploring Creation with High School Astronomy*

Module & Major Themes	Summary	Main Themes	Mathematical Concepts
<b>MODULE 11</b> <i>The Universe</i>	Module 11 explains techniques that scientists use to study the universe. This module also includes information on constellations and other visible objects in the universe.	<ul style="list-style-type: none"> <li>• Studying the Universe</li> <li>• Electromagnetic Energy</li> <li>• Cosmic Rays</li> <li>• The Visible Universe</li> <li>• Constellations</li> <li>• Discovering Planets of Distant Stars</li> <li>• Interstellar Medium</li> <li>• Black Holes</li> </ul>	<ul style="list-style-type: none"> <li>• No new mathematical concepts are introduced in this module.</li> </ul>
<b>MODULE 12</b> <i>The Stars</i>	Module 12 investigates the stars, provides a solid background for how they are studied, and explains their classifications.	<ul style="list-style-type: none"> <li>• Nuclear Fusion and Binding Energy</li> <li>• Star Temperatures</li> <li>• Spectroscopy</li> <li>• Brightness of a Star</li> <li>• Determining a Star's Radius and Distance</li> <li>• Classification of Stars</li> <li>• Star Explosions</li> </ul>	<ul style="list-style-type: none"> <li>• Temperature of a Distant Star</li> <li>• The Brightness of a Star</li> <li>• Luminosity of a Distant Star</li> <li>• Comparing Star Brightness</li> <li>• Radius of a Star</li> <li>• Converting Fahrenheit to Kelvin</li> <li>• Calculating the Distance to a Star</li> </ul>
<b>MODULE 13</b> <i>Galaxies</i>	Module 13 reveals the order of the universe. It describes different types of galaxies and how they are clustered together.	<ul style="list-style-type: none"> <li>• Different Galaxy Shapes</li> <li>• Quasars</li> <li>• The Milky Way Galaxy</li> <li>• Galaxies Close to the Milky Way</li> </ul>	<ul style="list-style-type: none"> <li>• No new supporting equations are introduced in this module.</li> </ul>
<b>MODULE 14</b> <i>Celestial Navigation</i>	Module 14 demonstrates different methods of navigation and ways to determine one's current position.	<ul style="list-style-type: none"> <li>• Navigation</li> <li>• Dead Reckoning</li> <li>• Celestial Navigation</li> <li>• Angle Measurements</li> <li>• Longitude and Latitude</li> <li>• The Sextant and the Nautical Almanac</li> </ul>	<ul style="list-style-type: none"> <li>• Estimating the Angle between Earth and Polaris</li> </ul>

**ADDITIONAL INFORMATION:** Additional resources and websites for further exploration of the topics in the text are provided at the Book Extras link for this title.

Goodheart-Willcox Publisher Correlation of <i>Introduction to Health Science</i> ©2016 to the Mississippi 2014 Health Sciences (Core) Frameworks for Health Sciences Core I – Course Code 995102		
<b>Course Description:</b> The Health Sciences Core A course introduces students to the theory and practical applications of tasks related to employment in the field of health science. Students will cover topics such as safety in the workplace, infection control, and health care systems. The course offers insight into careers in health care as well as the educational requirements, and the professional, legal, and ethical responsibilities involved.		
COMPETENCY / SUGGESTED OBJECTIVE		CORRELATING PAGES
Unit 1 – Course Orientation and Professional Organizations		
1	Describe the purpose of the course and related professional organizations. a. Identify student and course expectations. b. Explore health science professional organizations (HOSA). c. Explore leadership skills and parliamentary procedures with professional organizations.	4, 40, 62-63, 65 (#18), 67 (#28), 70, 116, 146, 212-213, 217 (#33), 220, 262, 332, 373, 377 (#33), 416, 420, 481, 518-519, 523 (#30), 558, 590, 628, 639-640, 656-658, 660-661, 665 (#31 and 38), 668, 696
Unit 2 – Safety and Infection Control		
1	Describe personal and environmental safety practices. a. Apply principles of body mechanics. b. Apply safety techniques (personal and patient) in the health care setting in order to prevent accidents and injuries.	193-199, 277-283, 287 (#31), 425-433, 490-498, 503, 574-582, 587 (#26 and 32), 642-644, 711-714, 718 (#29)
2	Identify common safety hazards. a. Comply with safety signs, symbols, and labels. b. Recognize Safety Data Sheets (SDS) and discuss safety implications of handling hazardous materials (checking labels, and checking solutions).	197, 203, 240, 246, 250, 277, 280, 333 (The Diagnostic Worker), 422, 506-507, 560, 636, 642, 665 (#29), 711, 712, 713, 714

3	<p>Utilize emergency procedures and protocols.</p> <ul style="list-style-type: none"> <li>a. Practice fire safety in a health care setting.</li> <li>b. Recognize principles of basic emergency response in natural disasters and other emergencies</li> </ul>	85, 360-367, 377 (#28), 575-578, 582-583, 714
4	<p>Describe the principles of infection control.</p> <ul style="list-style-type: none"> <li>a. Explain the classes of microorganisms and diseases caused by each one. Include the following: Aerobic Anaerobic Bacteria Fungi Helminths Nonpathogens Pathogens Protozoa Rickettsiae Viruses</li> <li>b. Identify the types of infections. Include the following:  <b>Bacterial:</b> boils botulism cholera diphtheria gonorrhea meningitis methicillin-resistant staphylococcus pertussis pneumonia rheumatic fever strep throat syphilis tetanus</li> </ul>	12, 102, 126, 193, 194-196, 296, 299, 300, 337, 421-422, 425-430, 430, 431, 432, 436 (#24), 453-454, 454, 455, 457, 461, 463, 490, 491, 494, 495, 497, 509, 598, 605, 708, 712, 715, 734

	<p>toxic shock tuberculosis typhoid urinary tract infections wound infections</p> <p><b>Protozoa:</b> African sleeping sickness amebic dysentery malaria trichomonas</p> <p><b>Fungal:</b> athlete's foot ring worm histoplasmosis thrush yeast vaginitis</p> <p><b>Rickettsiae:</b> Rocky Mountain spotted fever typhus fever</p> <p><b>Viruses:</b> chicken pox common cold ebola H5N1 (bird flu) hepatitis B hepatitis C human immunodeficiency virus (HIV) influenza Marburg measles monkey pox mumps polio severe acute respiratory herpes syndrome (SARS) warts West Nile Virus (WNV)</p> <p><b>Helminths:</b> hook worms or flukes ascariasis</p>	
--	--	--

	<p>enterobiasis taenia solium trichinella spiralis</p> <p>c. Describe the chain of infection and describe the types of infections (endogenous, exogenous, nosocomial (hospital acquired or health care associated), and opportunistic).</p> <p>d. Identify the levels of aseptic control.</p> <p>e. Demonstrate the proper procedure for aseptic hand washing.</p>	
5	<p>Explain standard precaution based on Occupational Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations.</p> <p>a. Describe OSHA's blood-borne pathogen standards.</p> <p>b. Explore employer requirements according to the Needle Stick Safety and Prevention Act.</p> <p>c. Identify the basic rules of standard precaution.</p>	<p>193-194, 421-422, 429 (Figure 12.13), 431, 437 (#28), 711</p>
6	<p>Describe the principles of sterile technique.</p> <p>a. Demonstrate skills related to sterile technique for example, donning sterile gloves, sterile dressing, and sterilizing instruments.</p>	<p>198, 361, 430, 490, 491, 642, 648-649</p>
7	<p>Explain the importance of maintaining transmission-based isolation precautions.</p> <p>a. Identify the precautions needed to prevent the spread of communicable diseases.</p> <p>b. Demonstrate the proper procedure for applying personal</p>	<p>197, 198, 431-433</p>

# Goodheart-Willcox Publisher

18604 West Creek Drive • Tinley Park, IL 60477 • 800.323.0440 • www.g-w.com

	protective equipment (PPE). c. Explain the need for protective or reverse isolation.	
<b>Unit 3 – Health Care Systems, Legal and Ethical Practices</b>		
1	Explain the role of the health care professional in a department, organization, and the overall health care environment. a. Explain the health care delivery system (public, private, government, and non-profit facilities/agencies). b. Explain the factors influencing health care delivery systems. c. Describe the responsibilities of consumers within the health care system.	34 (#17), 118-121, 192, 263, 264, 271, 388, 389, 418-419, 482, 483, 484, 555 (#36), 558, 560, 592, 628 (The Biotechnology Research and Development Worker), 631
2	Identify how health care systems affect the services that are performed and the quality of care. a. Explain the impact of emerging issues such as technology, epidemiology, bioethics, and socioeconomics on health care delivery systems. b. Discuss common methods of payment for health care.	17-20, 57-59, 89-95, 118-121, 122-127, 143 (#24 and 31), 230-238, 393-398, 455, 537-539, 637, 676-681, 704-710
3	Describe the legal implications associated with health care. a. Analyze legal responsibilities of health care systems. b. Apply procedures for accurate documentation and record keeping.	81-82, 112 (#18), 128-130, 230-234, 265, 266-268, 282, 419-421, 651-652
4	Describe and demonstrate legal practices associated with health care. a. Identify the standards of Health Insurance Portability and Accountability Act (HIPAA). b. Describe advance directives.	128, 130, 133-134, 143 (#30), 230, 268, 269, 270-273, 287 (#28), 370, 566-568, 570-571, 677

	<ul style="list-style-type: none"> <li>c. Summarize the Patient's Bill of Rights (for acute care) and the Resident's Bill of Rights (for long-term care).</li> <li>d. Recognize informed consent.</li> <li>e. Explain criminal laws governing harassment, labor, and scope of practice.</li> <li>f. Explain civil laws including torts.</li> </ul>	
5	<p>Recognize and discuss ethical boundaries within the health care environment.</p> <ul style="list-style-type: none"> <li>a. Differentiate between ethical and legal issues impacting health care.</li> <li>b. Recognize ethical issues and their implications related to health care.</li> </ul>	127-135, 143 (#29), 266-276, 419-425, 565-574, 704-710
6	<p>Discuss the accepted ethical practices within the health care environment.</p> <ul style="list-style-type: none"> <li>a. Define procedures for reporting activities and behaviors that affect the health, safety, and the welfare of others.</li> </ul>	130-135, 222-223, 265, 273-275, 286 (#24), 287 (#32), 370-371, 384-385, 424-425
7	<p>Identify cultural, social, and ethnic diversity within the health care environment.</p> <ul style="list-style-type: none"> <li>a. Compare religious, spiritual, and cultural values as they impact health care.</li> <li>b. Demonstrate respectful and empathetic treatment of all patients/clients.</li> </ul>	48, 127, 132, 178, 216 (#18), 224, 228-229, 271, 276, 371, 387, 388 (Figure 11.10), 389, 390 (Figure 11.12), 572, 573
<b>Unit 4 – Communication and Teamwork</b>		
1	<p>Describe the concepts of effective communication.</p> <ul style="list-style-type: none"> <li>a. Interpret verbal and nonverbal communication.</li> <li>b. Recognize barriers to communication.</li> <li>c. Differentiate subjective and objective information.</li> </ul>	71-73, 75-76, 111 (#16), 112 (#17), 113 (#31), 127, 221-222, 224, 225-229, 381

	<p>d. Recognize the elements of communication using a sender-receiver model.</p> <p>e. Demonstrate speaking and active listening skills.</p>	
2	<p>Compare the roles and responsibilities of individual members as part of the health care team.</p> <p>a. Describe roles and responsibilities of team members.</p> <p>b. Recognize characteristics of effective teams.</p>	48, 49, 216 (#22), 264, 346
3	<p>Explain the principles of interacting effectively and sensitively with all members of the health care team.</p> <p>a. Recognize methods for building positive team relationships.</p> <p>b. Analyze attributes and attitudes of an effective leader.</p> <p>c. Apply effective techniques for managing team conflict.</p>	48-49, 346, 488-489, 639-641
4	<p>Introduce appropriate medical terminology and abbreviations.</p> <p>a. Use roots, prefixes, and suffixes to communicate information.</p> <p>b. Use medical abbreviations to communicate information.</p> <p>c. Describe elements of written and electronic communication (spelling, grammar, and formatting).</p>	74, 82, 93, 148-153, 170 (#18), 249, 385, 532
<b>Unit 5 – Body Organization, Covering, Support, and Movement</b>		
1	<p>Describe the organization of the body.</p> <p>a. Apply and relate appropriate anatomical terms to the body in anatomical position.</p> <ul style="list-style-type: none"> <li>Relationship of body parts</li> <li>Major cavities and essential organs</li> </ul> <p>b. Explain how specific mechanisms</p>	154-157, 159-162, 164-165, 591, 605-606, 623 (#24), 724, 757, 764 (#18)

	<p>(e.g., feedback, transport, pH, or temperature regulation) maintain homeostasis.</p> <p>c. Categorize the relationship of the cell and its functions to the more complex levels of organization within the body.</p> <ul style="list-style-type: none"> <li>• Four major categories of tissues and their respective locations, structures, and functions.</li> </ul>	
2	<p>Discuss the structures and functions of the integumentary system.</p> <p>a. Identify the parts comprising the integumentary system and their respective functions.</p> <p>b. Discuss the concept of pigmentation.</p>	293, 294-300
3	<p>Explain diseases and disorders of the integumentary system and related signs and symptoms and treatment methods.</p> <p>a. Identify diseases and disorders that affect the integumentary system. Include the following:</p> <ul style="list-style-type: none"> <li>• acne vulgaris</li> <li>• athlete's foot</li> <li>• basal cell carcinoma</li> <li>• dermatitis</li> <li>• eczema</li> <li>• impetigo</li> <li>• melanoma</li> <li>• psoriasis</li> <li>• ringworm</li> <li>• squamous cell carcinoma</li> <li>• verrucae</li> </ul> <p>b. Identify signs, symptoms, and treatment methods associated with diseases and disorders of the integumentary system.</p> <p>c. Describe various skin eruptions. Include: macules, papules, vesicles, pustules, crusts, wheals,</p>	296, 299-303, 426, 455

	and ulcers.	
4	<p>Compare the structures and functions of the skeletal system with its relationship to movement.</p> <ol style="list-style-type: none"> <li>Identify the bones of the body, noting differences between males and females.</li> <li>Identify the structures that comprise bones.</li> <li>Explain the functions of the skeletal system.</li> <li>Identify the types of joints and their related movements.</li> </ol>	304-306, 308-309, 310-315
5	<p>Discuss diseases and disorders of the skeletal system and related signs, symptoms, and treatment methods.</p> <ol style="list-style-type: none"> <li>Identify diseases and disorders that affect the skeletal system. Include the following: <ul style="list-style-type: none"> <li>• bursitis</li> <li>• colles fracture</li> <li>• comminuted fracture</li> <li>• compound or open fracture</li> <li>• depressed fracture</li> <li>• dislocation</li> <li>• green stick fracture</li> <li>• impacted fracture</li> <li>• osteoarthritis</li> <li>• osteomyelitis</li> <li>• osteoporosis</li> <li>• ruptured disk</li> <li>• simple of close fracture</li> <li>• spinal curvatures</li> <li>• spiral fracture</li> <li>• sprain</li> </ul> </li> <li>Identify signs, symptoms, and treatment methods associated with skeletal diseases, disorders, and injury.</li> </ol>	279, 304, 306-307, 311-312, 313-315, 326 (#18), 703
6	<p>Compare the structures and functions of the muscular system with its relationship to movement.</p> <ol style="list-style-type: none"> <li>Identify the three types of</li> </ol>	315, 316-318, 319, 322

	<p>muscles.</p> <p>b. Identify the major components and functions of skeletal muscle fiber.</p> <p>c. Identify the major skeletal muscles.</p> <p>d. Explain the function of the muscles.</p> <p>e. Describe the process of muscle contraction.</p> <p>f. Introduce active/passive range of motion: adduction, abduction, flexion, extension, rotation, and circumduction.</p>	
7	<p>Discuss diseases, disorders, and injury of the muscular system and related signs, symptoms, and treatment methods.</p> <p>a. Identify diseases and disorders that affect the muscular system. Include the following:</p> <ul style="list-style-type: none"> <li>• fibromyalgia</li> <li>• muscle spasms</li> <li>• muscular dystrophy</li> <li>• strain</li> <li>• myasthenia gravis</li> </ul> <p>b. Identify signs, symptoms, and treatment methods associated with muscular diseases and disorders.</p> <p>c. Research and evaluate the impact of medical technology on muscle physiology and disease.</p>	234, 319-320, 316

### GW textbook *Introduction to Medical Terminology*

Student Expectations	Textbook Page(s)
<b>(1) The student demonstrates professional standards/employability skill as required by business and industry. The student is expected to:</b>	
(1)(A) express ideas in a clear, concise, and effective manner	2, 55 (#2)
(1)(B) exhibit the ability to cooperate, contribute, and collaborate as a member of a team	25, 79, 183, 269
<b>(2) The student recognizes the terminology related to the health science industry. The student is expected to:</b>	
(2)(A) identify abbreviations, acronyms, and symbols related to the health science industry	22–23, 29, 51, 55, 81, 85, 268, 302
(2)(B) identify the basic structures of medical words	2–3, 28, 54, 66
(2)(C) practice word-building skills	3, 28, 54, 57
(2)(D) research the origins of eponyms	272 (#1), 315
(2)(E) recall directional terms and anatomical planes related to body structure	7–14, 26, 27, 28–29, 58, 92
(2)(F) define and accurately spell occupationally specific terms such as those relating to the body systems, surgical and diagnostic procedures, diseases, and treatment	4, 19–22, 28, 47–48, 55, 76, 154–159, 161–163, 170
(2)(G) use prior knowledge and experiences to understand the meaning of terms as they relate to the health science industry	24, 70, 110, 249, 261, 288, 382, 388
<b>(3) The student demonstrates communication skills using the terminology applicable to the health science industry. The student is expected to:</b>	
(3)(A) demonstrate appropriate verbal and written strategies such as correct pronunciation of medical terms and spelling in a variety of health science scenarios	2, 3, 4, 28, 55, 56, 57, 85

Student Expectations	Textbook Page(s)
(3)(B) employ increasingly precise language to communicate	7, 27 (#6), 170 (#2), 415
(3)(C) translate technical material related to the health science industry	2, 29, 302
<b>(4) The student examines available resources. The student is expected to:</b>	
(4)(A) examine medical and dental dictionaries and multimedia resources	7, 170, 261, 303 (#2)
(4)(B) integrate resources to interpret technical materials	7, 55, 109, 201
(4)(C) investigate electronic media with appropriate supervision	7, 55, 170, 201
<b>(5) The student interprets medical abbreviations. The student is expected to:</b>	
(5)(A) distinguish medical abbreviations used throughout the health science industry	22–23, 51, 55, 56, 85
(5)(B) translate medical abbreviations in simulated technical material such as physician progress notes, radiological reports, and laboratory reports	2, 56, 86
<b>(6) The student appropriately translates health science industry terms. The student is expected to:</b>	
(6)(A) interpret, transcribe, and communicate vocabulary related to the health science industry	2, 3, 7–11, 19–22, 26, 28–29, 76, 108, 109, 111
(6)(B) translate medical terms to conversational language to facilitate communication	2, 56, 305
(6)(C) distinguish medical terminology associated with medical specialists such as geneticists, pathologists, and oncologists	19, 76, 161, 394
(6)(D) summarize observations using medical terminology	2, 76, 170 (#2), 384 (#2)
(6)(E) interpret contents of medical scenarios correctly	3, 28–29, 109, 202
