

year.

Lifespan Development

Primary Career Cluster:	Human Services
Course Contact:	CTE.Standards@tn.gov
Course Code(s):	C19H17
Prerequisite(s):	<i>Introduction to Human Studies</i> (C19H19)
Credit:	1
Grade Level:	10
Focus Elective - Graduation Requirements:	This course satisfies one of three credits required for an elective focus when taken in conjunction with other Human Services courses.
POS Concentrator:	This course satisfies one out of two required courses to meet the Perkins V concentrator definition, when taken in sequence in the approved program of study.
Programs of Study and Sequence:	This is the second course in the <i>Human and Social Sciences</i> program of study.
Aligned Student Organization(s):	Family, Career and Community Leaders of America (FCCLA): http://www.tennesseefccla.org/
Coordinating Work-Based Learning:	Teachers are encouraged to use embedded WBL activities such as informational interviewing, job shadowing, and career mentoring. For information, visit https://www.tn.gov/education/career-and-technical-education/work-based-learning.html .
Available Student Industry Certifications:	Students can take the following certifying exam in conjunction with level one and level three program of study courses: Tennessee Specific Industry Certification (TSIC) for Human and Social Sciences .
Teacher Endorsement(s):	050, 051, 154, 450
Required Teacher Certifications/Training:	None
Teacher Resources:	https://www.tn.gov/education/career-and-technical-education/career-clusters/cte-cluster-human-services.html

Course Description

Lifespan Development builds basic knowledge in human growth and development. Upon completion of the course, proficient students will have knowledge of developmental theory, principles of growth, behavior of children from conception through adolescence, adult development and aging, and death and dying. Artifacts will be created for inclusion in a portfolio, which will continue to build throughout the program of study.

Approved April 10, 2015; Amended January 26, 2018

Program of Study Application

This is the second course in the *Human and Social Sciences* program of study. For more information on the benefits and requirements of implementing this program in full, please visit the Human Services website at <https://www.tn.gov/education/career-and-technical-education/career-clusters/cte-cluster-human-services.html>.

Course Standards

Foundations of Human Development

- 1) Differentiate between the major methodologies used in research on human growth and development. Compare and contrast the benefits and consequences of each, including ethical issues involved with each method. Methods should include the following:
 - a. Case study method
 - b. Social survey method
 - c. Naturalistic observation method
 - d. Cross-cultural studies
- 2) Using supporting evidence from a variety of academic journals and news media, compare and contrast the following theories of human development. Identify the researcher(s) credited with developing each theory and analyze the significance of their contributions to the field of human development:
 - a. Psychoanalytic theories
 - b. Behavioral theories
 - c. Humanistic theories
 - d. Cognitive theories
 - e. Ecological theory
 - f. Sociocultural Theory
- 3) Conduct a research project on a topic related to human growth and development, citing specific textual evidence from academic resources. Topics might include, but are not limited to:
 - a. Emotional development/emotional intelligence
 - b. Cross-cultural conceptions of intelligence
 - c. Self-esteem
 - d. Relationships
 - e. Nature vs. nurture
 - f. Temperament and personality

Prenatal Development

- 4) Outline the biological processes that occur from conception to delivery of a full-term infant, sequenced by trimester. Prepare an informational artifact for parents that describe each stage of growth and development. Analyzing the role of heredity and environment in infant growth and development. Create a corresponding list of common risk factors during each stage.

- 5) Define the concepts of DNA, genes, genetics, heredity, and analyze the structure of relationships among the concepts. Describe the process of how traits are passed from parents to offspring. Identify the most common chromosomal and gene-linked anomalies and the health implications associated with each.
- 6) Research the various types of labor and delivery. Create a sequenced presentation, artifact, or graphic describing what happens at each stage and complications that may arise, citing evidence from case studies and medical literature. Investigate what medical testing that the newborn might undergo over the course of the first few days of life. Newborn testing examples include but not limited to:
 - a. Apgar score
 - b. Brazelton Neonatal Behavioral Assessment Scale
 - c. Neonatal Intensive Care Unit Network Neurobehavioral Scale (NNNS)

Infancy

- 7) Research and outline the physical, cognitive, and emotional-social development that occurs during infancy. Prepare an informational artifact for parents that describes this stage of growth and development with real life examples including but not limited to the following:
 - a. Physical: head and skull, interpreting height and weight growth charts, skin, umbilical cord healing, teeth, elimination, gross motor skills, fine motor skills, sleep patterns, feeding and nutritional needs, normal ranges for vital signs
 - b. Cognitive: reflexes, language acquisition, sensory development, play, Piaget
 - c. Emotional-social: bonding, Erikson's psychosocial task, temperament vs. personality
 - d. Appraise activities and techniques that optimize the development of the infant
- 8) Create an annotated model or graphic illustrating the parts of the human brain, detailing principle functions as they relate to physical and cognitive development. Draft a companion artifact on the stages of human development in the form of a timeline from toddlerhood through early adulthood. Draw conclusions from cases studies, news articles, and academic journals about the most important influences on and relationships among brain development, reasoning capacity, and learning. Define brain plasticity and describe how it changes over the lifespan.

Toddlerhood

- 9) Research and outline the physical, cognitive, and emotional-social development that occurs during toddlerhood. Prepare an informational artifact for parents that describes this stage of growth and development with real life examples including, but not limited to the following:
 - a. Physical: height and weight, body proportions, teeth, skeletal development, vital signs, gross and fine motor skills, sleep patterns
 - b. Cognitive: sensory development, language acquisition/vocabulary, object permanence, recognition of body parts, understanding relationships between people and things, curiosity, concept of time, moral development, symbolic play, imagination, Piaget's preoperational thought
 - c. Emotional-social: separation anxiety, independence, possessive phase, toilet training, Erikson's autonomy, self-concept, temper tantrums, regression, egocentric thinking
 - d. Appraise activities and techniques that optimize the development of a toddler

Preschool

- 10) Research and outline the physical, cognitive, and emotional-social development that occurs in preschool. Prepare an informational artifact for parents that describes this stage of growth and development with real life including but not limited to the following:
- a. Physical: height & weight, body proportions, teeth, musculoskeletal development, vital signs, gross and fine motor skills, sleep patterns,
 - b. Cognitive: sensory development, depth perception, maximum visual ability, language acquisition/vocabulary, sexual curiosity, locates body parts, understanding of relationships between people and things, curiosity, concept of time, moral development, symbolic play, imagination, Piaget's preoperational thought and centration, concept formation
 - c. Emotional-social: Erikson's initiative, jealousy, preschool socialization, friendships with other children, Freud's development of superego, cooperative play, fears
 - d. Appraise activities and techniques that optimize the development of preschool age children

School Age

- 11) Research and outline the physical, cognitive, and emotional-social development that occurs in school-age children. Prepare an informational artifact for parents that describes this stage of growth and development with real life examples including but not limited to the following:
- a. Physical: height and weight, musculoskeletal development, improvement of hand-eye coordination, permanent teeth, development of gastrointestinal and nervous systems, immune system maturation, vital signs, fine motor skills development, gender differences in motor skills, development of writing, strength acquisition and endurance, sleep and rest requirements
 - b. Cognitive: visual maturity, peripheral vision and depth perception improvement, Piaget's stage, numbering classifying of objects, increased attention span, developing problem-solving skills, improved memory, language development, academic learning
 - c. Emotional-social: types of play, personality development, peer and sibling relationships, Freud's latency period, transition from Kohlberg's preconventional level of moral thought to conventional level of moral reasoning and beginning of reciprocity
 - d. Appraise activities and techniques that optimize the development of school-age children

Puberty and Adolescence

- 12) Research and outline the physical, cognitive, and emotional-social development that occurs during puberty and adolescence. Prepare an informational artifact that describes this stage of growth and development with real life examples including, but not limited to the following:
- a. Physical: rapid growth to cessation of growth, development of secondary sex characteristics, maturing of reproductive system, changes in height and weight
 - b. Cognitive: experimentation and learning, Piaget's shift from concrete thinking to formal operational thought processes, abstract thinking, formal problem solving

- c. Emotional-social: peer and romantic relationships, Erikson's search for identity, conflict with authority figures
- d. Analyze components of a healthy and safe environment during adolescence.
- e. Appraise activities and techniques that optimize the development of adolescences

Early Adulthood

- 13) Research and outline the physical, cognitive, and emotional-social development that occurs during early adulthood. Prepare an informational artifact highlighting steps for achieving optimum wellness during late adulthood, addressing at minimum the following:
- a. Physical: cessation of growth, peaking of physical functions and characteristics
 - b. Cognitive: post conventional stage of moral development, continued development of intellectual and reasoning capacities
 - c. Emotional-social: sexual maturation, Erikson's intimacy, development of a professional and personal identity
 - d. Analyze components of a healthy and safe environment during early adulthood.

Middle Adulthood

- 14) Research and outline the physical, cognitive, and emotional-social development that occurs during middle adulthood. Prepare an informational artifact highlighting steps for achieving optimum wellness during late adulthood, addressing at minimum the following:
- a. Physical: decline of physical functions and characteristics, increase in health risks due to genetic conditions or contraction of diseases
 - b. Cognitive: plateau of mental capabilities, reevaluation of life purpose and meaning
 - c. Emotional-social: Erikson's task (generativity), evaluating and redesigning career options
 - d. Analyze components of a healthy and safe environment during middle adulthood.

Later Adulthood

- 15) Research and outline the physical, cognitive, and emotional-social development that occurs during later adulthood. Prepare an informative artifact that includes steps for achieving optimum wellness during late adulthood, addressing at minimum the following:
- a. Physical: continued decline of physical functions and characteristics
 - b. Cognitive: cognitive decline, long-term versus short-term memory loss
 - c. Emotional-social: Erikson's ego integrity, changes in work and leisure
 - d. Analyze components of a healthy and safe environment during later adulthood.

Death and Dying

- 16) Below are the most commonly listed stages of the grief model. Research and create graphic or artifact that explains each stage of the model. The graphic or artifact could include but not be limited to: definition of each stage, emotional and physical actions, and ways to cope.
- a. Shock and Denial
 - b. Pain and Guilt
 - c. Anger and Bargaining
 - d. Depression, Reflection, and Loneliness

- e. Upward Turn
- f. Reconstruction and Working Through
- g. Acceptance and Hope

Final Project

17) Differentiate the major periods of life outlined in the course and describe major developmental changes and key tasks associated with each period. Create a timeline of a human from conception to age 100 following typical growth and development patterns outlining what is occurring at each stage.

The following artifacts will reside in the student's portfolio:

- Methodologies artifact
- Human Growth & Development report
- Prenatal Development artifact
- Genetic artifact
- Human Development Stage artifacts
- Death and Dying artifacts
- Capstone Timeline graphic

Standards Alignment Notes

*References to other standards include:

- FACS: National Standards for Family and Consumer Sciences Education, Second Edition: National Association of State Administrators of Family and Consumer Sciences, [FACS](#).
- P21: Partnership for 21st Century Skills [Framework for 21st Century Learning](#)
 - Note: While not all standards are specifically aligned, teachers will find the framework helpful for setting expectations for student behavior in their classroom and practicing specific career readiness skills.
