FOR IMMEDIATE RELEASE

WCSD CELEBRATED NEW SIEMENS ENGINEERING COURSES WITH RIBBON-CUTTING CEREMONY

August 25, 2026

Williamsburg County School District (WCSD) celebrated the launch of new Siemens engineering courses with a special ribbon-cutting ceremony held on Tuesday, August 25, 2026, at Hemingway High School.

The celebration marked an important milestone in WCSD's commitment to providing students with innovative, hands-on learning experiences designed to prepare them for future careers in science, technology, engineering, and mathematics (STEM).

The new Siemens engineering courses were offered at Kingstree High School, Hemingway High School, and M.B. Lee Middle School. Through these courses, students had opportunities to explore engineering concepts, participate in hands-on learning experiences, develop technical skills, and gain valuable experiences to prepare them for college and careers in high-demand STEM fields.

Siemens' commitment to innovation and workforce development provided WCSD students with opportunities to connect classroom learning to real-world applications. Through the engineering courses, students were exposed to engineering principles, technology, problem-solving, collaboration, and other skills essential to success in today's rapidly changing workforce.

The ribbon-cutting ceremony brought together district and school leaders, educators, students, community partners, and representatives connected to the Siemens initiative to celebrate this significant advancement in WCSD's Career and Technology Education (CTE) programming.

The district viewed the expansion of Siemens engineering opportunities as an important step toward strengthening its CTE offerings and creating additional pathways for students to explore their interests and talents while preparing for future educational and career opportunities.

Building Futures. Inspiring Innovation. Empowering Success.

The Siemens engineering initiative represented a meaningful investment in the future of Williamsburg County students by connecting classroom instruction with real-world STEM applications and career opportunities.

The mission of Williamsburg County School District is to prepare students for college, careers, and citizenship in a global society.
