

ART IV 2022-2023

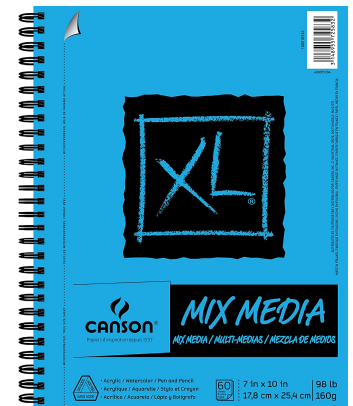

Google Classroom: 3rd period: p4ut2oc

Course Description: The Art IV class is intended for highly motivated students who are seriously interested in the study of art and design. 3 years of Studio Art, as well as a high level of technical art skills, creativity, and inquiry are required to take this course. During the year, the students will work in and out of class to produce a portfolio. Students will be expected to complete at least one piece of quality artwork every two to three weeks, complete practice exercises, keep a comprehensive sketchbook, document their ongoing inquiry and thinking processes, and participate in critique sessions. Each student must have a sketchbook with them and be able to develop these sketchbooks as ongoing journals throughout the year. This course emphasizes making art as an ongoing process that involves the student in informed and critical decision making at all times, according to their own individual inquiry.

Students will create a portfolio of work to demonstrate inquiry through art and design and development of materials, processes, and ideas over the course of a year. Portfolios include works of art and design, process documentation, and written information about the work presented. They will be evaluated based on specific criteria, which include skillful synthesis of materials, processes, and ideas and sustained investigation through practice, experimentation, and revision, guided by questions.
