Title: Contract for Ethernet Network Cabling : Addendum

Closing Time to Receive Bids: Friday, February 14th, 2024 at 4:00pm EST

Any bids received after this date and/or time will not be considered.

After discussing with all interested parties during the mandatory walkthroughs, a conclusion was made that the district requested drops that would have been out of specification due to the distance from the original MDF to the drop being over 320ft.

To mitigate this issue, the general consensus was to create a new IDF that is more centralized in the High School/Middle School building as indicated in the attached floor plan. This new IDF will allow all future drops to be run within specification, and ensure that all new cables can be labeled/organized by the requested standards.

What this means for the bid of this project:

- The amount of requested drops, location of the drops, as well as the specifications requested have **NOT** changed. Cat 6 or better cabling, labeled and organized in patch panels as explained during the walkthroughs.
- The only factor that has changed, is now all drops need to be terminated at the new location indicated on the floor plan. The IDF infrastructure (rack, power, etc.) will be provided by the district. No additional connectivity (fiber) should be quoted on the ERate-bid.

Addendum dated: 02/06/2025
